In Landsberger *vs.* Magnetic Telegraph Company (32 Barb. 530), the same rule was followed. There, the plaintiff sent a telegram to his partners in New York, informing them where they could get $10,000. This telegram was greatly delayed, through the fault of the company, and for want of it the plaintiff incurred a loss of over $500. But as the company had no notice that any peculiar circumstances existed in the case, it was held that the only damages recoverable were the amount paid for telegraphing, and interest on $10,000 during the delay.

The cases, however, do not cover the whole ground of our rule. We have laid it down that a party to a contract is liable for special damage of the probability of which he has notice *after making the contract*, but while yet able to perform it. For this proposition our authority is a *dictum* of Baron Bramwell, in Gee *vs.* The Lancashire and Yorkshire Railway Co. (6 Hurlst. & Norm. 211,218), which, although not entitled to as much weight as the formal decision of a court upon a question directly submitted, is nevertheless deserving of great consideration, as the opinion of a very able judge. It is moreover commended by sound reason. It may not infrequently happen that one who has hired another to render a service does not himself know, until after the contract is made, the full extent of the loss to which he will be subject, if the other party fails to perform it. It is but just, that having warned the other contracting party, he should hold him to full indemnity.

The second branch of our rule is universally admitted, and needs no support, other than such as it has incidentally received from the cases already cited. We proceed therefore, to consider the application of this rule to particular instances, of which the most familiar, so far as common carriers are concerned, are (1) refusal to receive freight, (2) failure to deliver freight at all, and (3) delay in delivering freight.

REFUSAL TO RECEIVE FREIGHT.

A common carrier is bound to receive all freight of a kind that he is accustomed to carry, if addressed to a place on his route, and offered at a reasonable time. But he cannot be made liable in damages for refusing to do so, unless it appears that the person to whom the refusal is addressed either had, or was about to procure, freight for transportation. If, however, the carrier has entered into a special contract with any one, for the transportation of certain goods at a specific rate, it is not necessary, in case of his subsequent refusal to comply with his contract that the party aggrieved should actually have the goods, in order to maintain an action for substantial damages. (Ogden *vs.* Marshall, 8 N. Y. 340.)

The measure of damages, in case of such refusal, is the difference between the amount which the carriers had the right to charge for carrying the freight, and the amount which the consignor would have been obliged to pay in open market to procure the same service to be rendered. (Ogden *vs.* Marshall, 8 N. Y. 340.)

In many cases, it is evident that the damages caused by the refusal of of a common carrier to receive goods, concerning which he had made no special contract, would be merely nominal; because the shipper could generally send them by a rival line, at the market rate, and a carrier has a right to charge the market rate. But where, as is often the case, a railroad has an absolute monopoly of the travel and transportation between two points, the consignor might, in case of an unjust refusal to carry, employ a wagon for the purpose, and recover the difference between the cost of such transportation, and a fair rate of charge upon the railroad. Or, if this was impracticable, he might sell the goods at home and recover the loss from the railroad company.

FAILURE TO DELIVER FREIGHT.

The measure of damages, where a carrier wholly fails to deliver freight, but has not been guilty of fraud or of a conversion to his own use, is generally the value of the goods at the place of their destination, deducting the expenses of transportation. (Van Winkle *vs.* U. S. Steamship Co., 37 Barb. 122; Watkinson *vs.* Laughton, 8 Johns. 213; Atkisson *vs.* Castle Garden, 28 Miss. 124.)

But if the carrier fails to reach his destination, or does not start upon his journey, the measure of damages is the cost price at the place of shipment, free on board. (Lakeman *vs.* Grinnell, 5 Bosw. 625.)

If the carrier fraudulently disposes of or wastes freight, or in any other way converts it to his own use, he must pay the highest market value thereof at any time before a verdict in the action against him, provided such action is brought and prosecuted with reasonable diligence. (Romaine *vs.* Van Allen, 26 N. Y. 390.)

DELAY IN FREIGHT.

The measure of damages, proper in case of unreasonable delay in the delivery of freight, is a matter by no means free from difficulty, though the trouble arises, as we believe, more from the decisions in one branch of the eight-headed Supreme Court of this state, than from the real nature of the subject.

It is not questioned that a carrier is in such case liable for a depreciation in the *intrinsic* value of the goods (Jones *vs.* N. Y. & Erie R. R. Co., 29 Barb. 633); but one of the general terms in this state holds firmly to the doctrine that a depreciation in the *market* value cannot be taken into account (Jones *vs.* N. Y. & Erie R. R. Co., 29 Barb. 633; Wibert *vs.* N. Y. & Erie R. R. Co., 19 id. 36). But in another district, the general term of the Supreme Court has held that a decline in the market value is to be reckoned in assessing damages in such case (Kent *vs.* Hudson River R. R. Co., 22 Barb. 278; Medbury *vs.* N. Y. & Erie R. R. Co., 26 id. 564); and this rule has been sanctioned in England, after very thorough examination (Collard *vs.* Southwestern Railway Co., 7 Hurlst. & N. 79; Wilson *vs.* Lancashire & Yorkshire Railway Co., 9 Com. Bench [N. S.] 632.

The weight of authority is very clearly in favor of the greater liability, and, to our judgment, the reason of the thing appears to be on the same side. The decline in market value is a loss which might easily be anticipated by the parties, as at least possible, if not probable. And in many cases, goods are not injured by any extent of delay. It is said that the decline is not the proximate result of the delay. True, but the inability of the owner to sell at the higher price is. The argument of Judge Selden, in Griffin *vs.* Colver (16 N. Y. 489), showing that profits may be recovered, if certain, really disposes of this question on principle. It is to be regretted that this question has never been carried to the Court of Appeals.

Railway to the Bay of Fundy.

We have before us a pamphlet containing a proposal to construct a railway from Whitehaven, which is the most eastern harbor of Nova Scotia, to the Head of the Bay of Fundy, the object being to shorten the voyage across the Atlantic, and reduce as much as possible the time consumed in reaching Boston and New York after the vessels have once touched the coast. Whitehaven harbor was surveyed by the late Admiral Owen in 1846, who reported to the British Government that it was "at the nearest available point of North America to Ireland," and that "its natural facilities greatly exceeded those of Halifax." Other engineers have corroborated the report of Admiral Owen, after having surveyed both routes to the head of the Bay of Fundy from Whitehaven and Halifax. By the route from Whitehaven, it is represented that the range of the Cobequid mountains can be avoided, while they have to be crossed by the Halifax and Eastern line. From Whitehaven to Galway—the two points between which it is proposed to establish a line of steamers—the distance is but little more than two thousand nautical miles, and it is declared that the passage can be made in a week, or one-third less than the present time; avoiding also the most difficult and dangerous point of Europe to the United States. The proposed railway would pass through rich gold mining and agricultural districts, and the coal fields of Pictou, besides laying under tribute a region where building materials can be most readily and cheaply obtained. A charter has already been granted by the Nova Scotia legislature to run a branch line from Whitehaven in the main Trunk line from Halifax on its way to the head of the Bay of Fundy; and it is proposed now to organize a company of capitalists of Boston, New York and Philadelphia, as of Great Britain and Ireland, to take up the work and push it to completion. In which case a continuous and unbroken railway communication will be had through Nova Scotia, New Brunswick and the United States, Canada included.—*Boston Post.*

Cleveland, Columbus and Cincinnati R. R.

The earnings of this road for the year ending December 31, 1864, were as follows:

From Passengers		$808,423 90
" Freight		1,394,683 22
" Express		87,983 97
" Mail		31,243 00
" Rents		84,808 14
" Berea Branch track		2,226 84
" Mileage of cars		7,210 70
" Interest and dividends		46,182 93
" Miscellaneous items		6,585 09
		$2,499,347 79
Expenses, viz:		
Transportation exp...	$402,373 93	
General expenses	34,396 64	
Repairs of Track	375,493 34	
" Locomotives	90,131 87	
" Cars	89,681 48	
" Buildings	33,428 10	
" Bridges	8,930 74	
" Fences	3,609 57	
Fuel	146,600 28	
Damages & gratuities	56.701 87	
Oil and Waste	17,931 44	
Telegraph expenses	4,905 94	
		1,264,185 20
Net over operating expenses		$1,235,162 59
Roads and depots	$167,875 10	
Duties, taxes, etc	166,043 26	333,918 36
Net over all expenditure		$901,244 23
Dividend Aug. 1, 1864, of 8 per cent	$479,512 00	
Dividend Feb. 1, 1865, 7 per cent	419,692 00	899,204 00
Surplus for the year		$2,040 23

Compared with the previous year, the gross earnings show an increase of $347,404 89; with an increase in working expenses of $415,482 17. The entire expenditures show an increase of $662,-417 78. The per centage of working expenses the past year has been 50.50 per cent.; in 1863 it was 43.50; in 1862, 36.93. The total expenditures are 63.90 per cent. of earnings.

The equipment of the road consists of 44 locomotives; 23 first-class and 4 second class passenger cars; 3 mail and express, 6 baggage, 483 house, 121 stock, 184 platform, and 9 caboose cars.

Miles run by locomotives with passenger trains, 310,731; with freight trains, 445,745; with fuel trains, 35,616; with gravel and repair trains, 76,-049; with switching trains, 164,227—total 1,032,-368, against 1,012,130 in 1863, an increase of 20,238.

Cost per mile run for repairs, 8.73 cents.

The amount and cost of material used in track repairs during the year is as follows:

3,924 tons rails re-rolled	$181,299 69
14,681 repaired rails	10,988 96
112,037 new cross-ties	49,322 07
8,966 joint chairs	8,006 11
279,044 lbs. iron joint splices	22,397 61
442 kegs joint-bolts and nuts	9,935 93
1,163 kegs spikes	17,266 71
Frogs and switches	10,720 00

The number of passengers carried was 532,142, of which 98,730 were through, 389,293 way; 6,890 excursions at half-fare, and 37,229 local military,

Number of passengers carried one mile, 33,661,-898. Average rate received per mile, 2,40 cents. Tons of freight transported, 562,758; do. carried one mile, 52,779,560.

The assets and liabilities of the Company are as follows:

ASSETS:

Roads and depots	$4,000,000 00
Equipment	750,000 00
Bellefontaine railway stock	1,131,750 00
Materials on hand	286,972 95
Cash	601,946 51
Bills receivable	74,573 75

Superintendent.—E. S. FLINT.

Secretary & Treasurer.—GEORGE H. RUSSELL.

British North American Railway to the Pacific.

The people of the British North American Province have of late been frequently appealed to on the subject of railway communication with their sister Colonies on the Pacific. One of the chief difficulties, beyond the want of money, is that it can not so well be carried exclusively through British territory. A recent work, by Mr. Thomas Rawlings, on the confederation of the Provinces, is partly devoted to the consideration of what he styles "the only true and practicable route from the Atlantic to the Pacific Ocean." The route preferred within the British territories is from Lake Superior to the Red River Settlement, 220 miles. Thence via the elbow of the south branch of the Saskatchewan, latitude 51 and 2 to the Rocky Mountains, 700 miles, thence by the Kootanie Pass in the Rocky Mountains between the Great Saskatchewan plains on the east, and the Tobacco plains on the west, 40 miles, (the pass being at the east entrance 40 miles from the boundary, and at the west 18 miles.) From the the west end of Kootanie Pass to the mouth of Fraser's river, Gulf of Georgia, 300 miles. Total distance, 1360 miles. The whole distance is claimed to be level prairie land, with the exception of the 40 miles in the Kootanie Pass.

The engineering difficulties occur in this pass, and, according to Capt. Blakiston, who with Captain Palisser was specially delegated by the British Government to survey the whole region are as follows:

Its length is 40 geographical or nearly 47 English miles, extending from longitude 114 deg. 34 min. west, to 115 24 west. It leaves the Saskatchewan Plains where they have an altitude of about 4,000 feet above the sea, rises 2,000 feet to the waterside of the mountains, descends to Flathead River, again rises to an altitude of 4,000, follows up this river to its head waters, then crosses a precipitous ridge, reaching an altitude of 6,000 feet; it then descends the great western slope, falling 2,000 feet in two miles of horizontal distance, after which, by a nearly uniform grade of 100 feet per geographical mile, it gains the Tobacco Plains at the point where the Wigwam branch enters Kootanie or Elk River.

There are three obstacles to the passage of a railroad—namely, two mountains and one steep slope. As to the mountains, they could, I consider without difficulty be pierced by tunnels. The great western slope is a more serious obstacle; however in the following details I hope to show that it also may be overcome.

"From the Forks of Belly River on the east side the line would traverse the gradually ascending prairie to the entrance of the pass where Railway River issues from the mountains. This river would be followed up with a grade of 1 in 180, or 34 feet per geographical mile for 7½ miles, the 'river levels' affording considerable advantnges; leaving this river it would follow the course of my track markedon the map. A cutting of about 3½ miles would lead to a tunnel of nearly 5 miles in length which would pierce the Watershed Mountain and come out in the valley of Flathead River, the whole having a grade of 1 in 130, or 47 feet per geographical mile. On emerging into the valley the line would skirt the base of the mountains to the north of the track, thereby avoiding a steep descent, then following up the river with a grade of 40 feet per geographical mile, it would reach the rise of the western ridge at a height of 5,100 feet above the sea. This would be the culminating point of the line from which in a distance of 10 geographical miles it has to fall 1,900 feet to the North and South Bluff, and after that, by a slope of 54 feet per geographical mile for 5 miles, to reach the Tobacco Plains, crossing the Kootanie Fork by a bridge. This I propose to accomplish in the following manner:—From the culminating point, to pierce the ridge by a tunnel of 3 geographical miles, and continue the line along the side of the hills to the north of the track reaching the North bluff, the whole with a grade of 190 feet per geographical mile. This portion of the line of 10 geographical miles would have to be worked by a wire rope, and one or more stationary engines. Regarding the remaining 5 miles to the west of the North and South Bluffs, a careful survey is required to determine whether a grade not too steep for a locomotive can be made. My measurements taken with so uncertain an instrument as an aneroid barometer, must not be depended on to a few feet; they give a fall of 54 feet per geographical mile, or 1 in 112.

"As regards the country to the west of the Kootanie Fork I can say nothing, but that no mountains were visible to the distance I could see, neither have I any personal knowledge of the Saskatchewan Plains to the eastward of the forks of Belley River; but it is probable that these great prairies stretch without break from this point to the Red River Settlement, and that in the construction of a railroad little more labour would be required than that of laying down the rails.

Any other practicable route southward would make it necessary to pass through the State of Minnesota; and we believe there is actually an American Company formed for the construction of such a line at some future day, and which is to have some connection with the Grand Trunk of Canada.

At present, British overland travellers pass from Pembina on the Red River which is fast attracting emigrants, over a wagon road, which crosses Saskatchewan Valley to the foot of the Rocky Mountains. The completion of our own Union Pacific Railroad, sustained by large Government aid, and now in progress under the management of several influential and energetic companies, will seem however to make the British work quite unnecessary; and it is doubtful whether, with such competition, the work will be attempted in our time.

Intercolonial Railway.

The Provincial papers state that two parties of engineerrs under the personal supervision of Mr. Fleming, have been for some time exploring the proposed route for the intercolonial railway from Truro to Amherst, by way of the Acadia iron mines and Spring Hill. We would judge from this fact that the engineers employed in the same service last year by Mr. Livesey were not so completely successful in their labors as was reported at the the time. We may look for some definite announcement about the construction of this line—whether it is to be done by government or by a company, or whether it is to be commenced at all for another year—when the New Brunswick and Nova Scotia delegates return from England. Private letters by last steamer to gentlemen in New Brunswick stated that the delegates from both Provinces had been negotiating with the Intercolonial Contract Company for the building of the line, and strong hopes were entertained of being able to effect an arrangement, and have a contract signed before leaving England.

☞ The Edgefield, S. C., *Advertiser* says that the branches of the South Carolina Railroad, between Branchville and Johnston's Turn-Out, and from Orangeburg to Columbia, are under contract, and are being rapidly pushed forward toward completion. The Greenville and Columbia Road is in running order from Greenville to Alston, and the remainder of it, which is not of much length, is being rapidly put in order. The Northeastern Railroad is now running its entire length from Charleston to Florence. The Wilmington and Manchester Road is running from Kingsville ninety-seven miles of its length, and will be in order its entire length, it is said, during this month. The Cheraw and Darlington Road also is now running its entire length. The Columbia and Hamburg Road has a large force of workmen on it, and is rapidly being pushed forward. The Charleston and Savannah Railroad is running its whole length.

Railroad from New Castle to Youngstown.

Work is being rapidly pushed forward on the new railroad from New Castle to Youngstown, and the track will soon be ready for the rails from the junction with the Beaver Valley Railroad to Lowell. From Lowell the road will continue up the west bank of the Mahoning as far as Powers' Coal Bank, where the river will be bridged. From that point to Youngstown (two miles) it is not yet determined whether a new road will be built, or the coal road belonging to the Atlantic and Great Western Railroad will be used. We understand that the Pittsburgh, Fort Wayne and Chicago Railroad Company own a controlling interest in this new route, and if this is the case, arrangements will no doubt be made to run through trains between Youngstown and Pittsburgh, which would prove a great advantage to Youngstown. It is rumored that there is a possibility of the road extending from Youngstown to Ravenna, running across the northern part of Mahoning county.—*Cleveland Herald.*

☞ At a special meeting of the Ottawa City Council a resolution was carried by a majority of 11 to 3 for the passage of a bill through Parliament to incorporate a company for the construction of a street railway.

Central Pacific Railroad of California.

At the annual meeting of the stockholders of this company, held at Sacramento, Cal., on the 13th ult., the President, Leland Stanford, Esq., presented the following report:

To the Stockholders of the Central Pacific Railroad Company:

At our last annual meeting held October 8, 1864, I found occasion to congratulate you upon the progress of our enterprise, its condition and prospects. Though in all respects the progress, for reasons that will appear, has not been as rapid as we had anticipated, yet it has progressed fairly, and in its present condition and prospects are not less bright than at our former meeting. Indeed, they are far brighter. Much of what we had hoped than has been realized; the financial problem which was then pressing upon us for solution has been solved and the result is abundant financial means to press forward the work to its utmost development. Now, the question which addresses itself with most force upon our consideration is one of labor; this is gradually being answered satisfactorily. For want of funds we were not able to employ a large force of laborers in construction until the first of last January. From that time to this, there has been employed in construction all the labor that could be obtained. For the months of January, February and March the force, with great efforts to increase it, did not probably average above five hundred men, and they, owing to the wet weather, could not labor above half the time. Since then we have had more favorable weather, and an average force of about two thousand. At present, there is a force of about twenty-five hundred men employed and the number is being daily increased, so much so that in connection with several favorable causes, we think it probable that the force this season can be increased to five thousand. An important element of labor is found in our Chinese population. Of this class of laborers there are now engaged in construction about two thousand. They are found to be good laborers and, at the price at which they are to be had, full as cheap as any other. Regular and prompt pay, with kind usage, secure their confidence, and it is probable, from the Chinese population of our State, we shall be able to obtain to the extent that white labor shall prove inadequate, the necessary force to prosecute the work vigorously. We are employing, and shall employ all the white, Chinese, or other labor that offers.

It is now nine months since our last annual meeting. For the first three months but little work was performed, and for the next three, for causes above alluded to, not a great deal. Yet we have been able to complete the work to Clipper Gap, a distance of twelve miles above Newcastle, and have the work on the next twelve in so forward a condition that it will probably be completed and the cars doing business over it full as early as the 15th of September next. We shall then be operating in all fifty-six miles of road and have reached an elevation of 2,448 feet, or over one-third of the entire elevation to be overcome in crossing the mountains. Of the present force engaged in construction, the most of it together with what it may be increased, can be placed as early as the middle of August on the work between Illinoistown and Dutch Flat, which place we expect to reach by the first of next April and have much work done beyond that point. Indeed, by the time of our next annual meeting, should we not be disappointed in obtaining labor, we shall have the cars running to Crystal Lake, twenty miles above Dutch Flat and within fifteen miles of the Summit. Complete surveys have been made for this distance and the work found of a more favorable character than had been anticipated. There are three corps of engineers now engaged in making surveys beyond this last-mentioned point, one of which will commence this week to survey from Donner Lake eastwardly. The principal object in making that survey at this time is that the work may be ready for construction as early as possible. I deem it important to commence the work of grading from Donner Lake eastwardly and laying the track without waiting until the road can be constructed from this side to that point. By pursuing the course indicated we may expect to have the entire road completed from this side to Salt Lake in three years from this season. The grading can proceed on the other side of the mountains without retarding the work on this, and by the time the season will permit the transportation of iron over the mountains at low freights next year, the railroad will have reached a distance on this side from whence iron can be transported by teams to where the track will commence on the other side for from ten to fifteen dollars per ton. There will be, of course, more cost besides this in construction, beyond what there would be if we waited until the road was constructed over the mountains; but this will be more than counterbalanced by the benefits to be derived from its use. Besides, while conscious of the immense benefits to be derived to the company by the use of a road on the other side, with the consequent increase of business by the settlement and development of the vast mineral region the road will penetrate, it should not be forgotten that our enterprise is one of a State and national character, and that we have a duty in this respect which will not permit us to do anything less than is in our power to hasten its completion. As a pecuniary matter to the company, I am confident its benefits cannot be exaggerated; and it should be a matter of pride, if possible, to overcome the Sierras and reach Salt Lake, to greet our brethren of the East upon their arrival there. It does not seem to me that there need necessarily to be more than three years from the present to witness this great and happy event.

That we are financially fully warranted in pushing the work to the extent proposed will be seen from our present assets, together with those to be derived from the National Government.

The Act of Congress granting aid to the Pacific Railroad was beneficially amended at the last session of Congress by allowing the company to make their first mortgage bonds payable in gold coin, both principal and interest. This will make our first mortgage bonds among the most desirable securities, as they will be of the best to be offered in the market.

We have now on hand Placer and Sacramento county bonds (gold)—eight per cents	$238,500
Bonds on which the State pays seven per cent, interest in gold	1,475,000
San Francisco county bonds (gold,) seven per cent	265,000
United States bonds, six per cents	1,258,000
Making a total of	$3,236,500

In addition to this there will be due to the company on completion of the work to the station at Illinoistown Government bonds amounting to $1,200,000; and which in view of the speedy completion of that work, may be considered, for practical purposes, as assets immediately available.

Issuing first mortgage bonds, as authorized by Act of Congress, though we should limit their issue to completed road, by the middle of September, and we shall have from this source, $2,458,000.

Besides, we are authorized to issue first mortgage bonds to the extent of one hundred miles in advance of a completed line.

Thus, it will be seen that the company have as assets, immediately available, without issuing first mortgage bonds beyond road constructed, bonds on hand—first mortgage bonds	$2,458,000
Government bonds on work nearly completed	1,200,000
Placer, Sacramento and San Francisco county bonds, and bonds on which the State pays interest	$6,894,500
Making a total of	$3,236,500

On which the company draws an annual interest of $216,360.

In consequence of the suppression of the rebellion, the Government bonds are appreciating in value; from the prosecution of the work our other bonds are also appreciating; consequently we have not thought it advisable to sell this class of bonds. To prosecute the work, aside from proceeds of bonds sold, we have made loans. With the means on hand and the Government bonds to be derived as the work progresses, and first mortgage bonds on one hundred miles in advance of construction, at will of the company, it is fully warranted in considering itself able to overcome the Sierras as rapidly as possible, and in undertaking the work beyond. It is not to be anticipated that there will be in the future any delay in obtaining the Government bonds when due.

The bonds on the first thirty-one miles were due last September, but we did not receive them until the 12th day of May, though the most strenuous efforts were made to procure them at an earlier day. In consequence of injurious reports raised by the antagonists of our road, the bonds upon which the State pays interest were not available for use until the first of January, when the Supreme Court decided their legality. The bonds due from the city and county of San Francisco, from the pertinacious and unscrupulous opposition of our enemies, after much litigation were obtained on the 12th day of April.

No disposition has as yet been made of the lands of the company. It has been thought advisable before doing so to wait for the receipt of a patent. Over 50,000 acres have been listed to the company by the United States Land Office. As the railroad progresses the lands will become more valuable; soon we shall find them yielding largely in the shape of freight. We are now close to a fine lumber region.

The general business of the road is constantly increasing; the gross earnings for the month of June amount to $31,456 66, though we were not fairly in condition to do a freighting business to Clipper Gap before the middle of that month. The road is daily increasing in its local business, as also the business over the mountains. With its further extension this will be increased until all is secured. The report of the Secretary will give a detailed statement of the business of the road since the last annual meeting.

The construction of the Pacific Railroad will prove what our lamented President predicted—that our country will be the Treasury of the world. The vast country west of the Rocky Mountains, by its teeming mineral wealth, will be settled up with an industrious population that will develop its wealth. The Pacific coast will feel its exilarating influence; the arts, commerce and agriculture will flourish; population will be increased, and there will be a numerous, powerful and prosperous people on this extreme west of our country, bound to the Union by interest and the strongest fraternal and patriotic ties. The whole nation, and in fact the entire civilized world, will feel the benign influence of the Pacific railroad. With this great incentive, let your energies be applied with the utmost force to overcome the gigantic obstacles you have to encounter, and complete the work to Salt Lake in 1868, and with new bonds help to bind together our country, now so gloriously restored to peace. We have a Government and a country beyond compare. A Government of the people and for the people alone; a country devoted to freedom, lovely and grand; a soil and climate conspiring to furnish untold blessings. Let us rejoice that we have an opportunity to do something towards strengthening, aiding and developing one or all of them—to do all in our power in this respect. If we need further incentive, we shall find it in the best interests of our company.

The election of directors for the ensuing year was then held.

The old Board was re-elected by a unanimous vote, and is composed of the following named members: Leland Stanford, A. P. Stanford, C. P. Huntington, Mark Hopkins, E. B. Crocker, E. H. Miller, Jr., Chas. Marsh.

Railroad Earnings.--Weekly.

The earnings of the Marietta and Cincinnati Railroad for the 2d week in August, 1865, were:

	1865.	1864.
Passengers	$11,696 65	$9,070 91
Freight	10,189 35	9,834 83
Mail, express & telegraph	1,200 00	1,125 58
Total	$23,086 00	$20,031 32
Total this month to date	48,112 70	38,561 48
Total for the fiscal year commencing Jan. 1	$701,220 88	$593,864 38

The traffic of the Great Western Railroad for the week ending August 18, 1865, was as follows:

Passengers	$35,793 07
Freight and live stock	26,354 89
Mails and sundries	1,780 11
Total	$63,928 07
Corresponding week of 1864	51,457 02
Increase	$12,471 04

The earnings of the Grand Trunk Railway for the week ending Aug. 12, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$50,061 00
Express, freight, mails and sundries	4,036 00
Freight and live stock	62,824 00
Total	$116,921 00
Corresponding week, 1864	101,503 00
Increase	$15,418 00

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending August 14, were:

	1865.	1864.
Passengers	$3,513 51	$2,518 83
Freight	9,579 08	6,369 91
Express	130 22	104 16
Mail	296 58	296 58
Total	$13,519 39	$9,289 48

Receipts from January 1 to August 14:

1865	$388,062 26
1864	337,272 51
Increase	$50,789 75

The earnings of the Chicago and Northwestern Railway for the second week in August, 1865, were $162,063 13
Corresponding week of previous year. 101,094 33
Increase $60,968 80

The earnings of the Michigan Central Railroad for the 2d week in August, 1865, were. $82,799 52
Corresponding week of previous year. 65,542 66
Increase $17,256 86

The earnings of the Chicago and Rock Island Railroad for the second week in August, 1865, were $48,395 00
Corresponding week of previous year. 54,657 00
Decrease $6,262 00

The Michigan Southern road earned the 2d week in August, 1865 $81,445 00
Corresponding week of 1864 68,506 00
Increase $12,939 00

☞ A vigorous effort is now being made to reorganize the Pittsburgh, Maysville and Cincinnati Railroad Company, and to recommence and prosecute the work of rebuilding the road as far as McConnellsville. The Atlantic and Great Western Company has taken hold of the matter and purpose commencing the work the coming Winter.

Central Pacific Railroad.

We give, from the Auburn *Stars and Stripes*, the following table of distances on the Central Pacific Railroad route from Sacramento to Virginia, Nevada:

	miles	
Sacramento City to Clipper Gap by R. R.	43	
Clipper Gap to Illinoistown	11	54
Illinoistown to Madden's	6	60
Madden's to Gold Run	5	65
Gold Run to Dutch Flat	3	68
Dutch Flat to Mallows'	4	72
Mallows' to Zerr's	3	75
Zerr's to Heath's	3	78
Heath's to Wilson's	2	80
Wilson's to Crystal Lake	4	81
Crystal Lake to Jones'	9	93
Jones' to Summit	5	98
Summit to Donner Lake	3	101
Donner Lake to King's	3	104
King's to Prosser Creek	5	109
Prosser Creek to Russell's Valley	4	113
Russell's Valley to Little Truckee	4	117
Little Truckee to Crystal Peak	8	125
Crystal Peak to Hunter's Bridge	7	132
Hunter's Bridge to Huffaker's	5	137
Huffaker's to Steamboat Springs	8	145
Steamboat Springs to Virginia	10	155

This makes the distance by wagon road from Clipper Gap to Virginia, 112 miles.

Weights and Measures.

At the Detroit Commercial Convention, a committee was appointed to consider and report upon a uniform system of weights and measures. The New York Chamber of Commerce has also appointed a committee with the same object, and the attention of scientific men is just now much attracted to the subject. In connection with it we therefore publish an extract from a letter from A. K. Shepard, Esq., of Albany, which explains itself, and is well worthy of consideration.

"It would appear that the plan which would be most acceptable to the public, and meet with the least opposition, would be one which would merely simplify and modify existing standards.

The matter in which I am most interested is to induce the boards of trade throughout the country to adopt the cental of 100 lbs. as the standard for measuring all kinds of grain. We have now to the bushel of wheat 60 lbs.; Corn, 56 lbs.; Rye, 56 lbs.; Oats, 32 lbs.; and Barley 48 lbs.; when really the grain is bought and sold by the pound. A man buying 7,000 bushels of wheat, buys it with the understanding that 60 lbs. go to the bushel. If it were expressed 4,200,000 centals, it would save much useless labor. All grain is weighed at elevators, and the weights reduced to measure—an unnecessary trouble. If wheat is worth 129 cts. per bushel at Chicago, it would be much more simple to figure a boat load of 7,025 29-60 bushels, as 4,215.29 centals at 215 cts. per cental. The figures would all be in decimals, and all grain would be measured by the same standard. The business community are slow to move, but I think that proper exertion would bring about this much needed reform."

☞ We learn from E. R. Burpee that matters are progressing very favorably in reference to the European and North American Railway. The negotiations for money, by the assistance of the railroad companies, between Boston and Bangor, are being carried on with a certainty of success; and there is scarcely a doubt that at the meeting in Bangor on the 23d August, the company will be in a position to commence work.—*St. John Globe.*

Leavenworth, Lawrence and Fort Gibson R. R.

The Lawrence (Kansas) correspondent of the Chicago *Tribune* wrote on the 13th inst. as follows:

"At a recent convention held at Ottawa, in this State, it was agreed by the County Commissioners along the line to submit the question to the people whether they would aid the Leavenworth, Lawrence and Fort Gibson Railroad to the amount of $900,000, bonds to be issued to the amount of $125,000 in each county. On the 12th of September the proposition is to be voted upon; it will probably carry in all the counties. The bonds are to be issued only as the road is completed through the respective counties.

"A most munificent grant of land was obtained last winter from Congress, to aid in the construction of the road. It is proposed to continue the road on through the Indian country to Galvaston Bay, where is one of the finest harbors in the world. The enterprise thus becomes of more than local importance. It is really national in its character. The advantage it will be to Chicago and the entire West can hardly be appreciated. It will become the Pacific Railroad of the South, the means by which the South will become connected with the Pacific slope. The leading roads of the South—to wit: from Charleston, New Orleans and Richmond—are pointing to some place on the Red River which this road would pass through, thus giving the entire South the advantages of connections with the Union Pacific Railroad. It is a physical impossibility for them to get a connection with the Union Pacific slope in any other way."

Union Pacific Railroad.

A number of gentlemen, heavily interested in the Pennsylvania Railroad and other roads connecting with it, have purchased one-half interest in the Union Pacific Railroad, leading from Wyandotte, in Kansas, through Lawrence toward the West. These gentlemen, and others connected with the Ohio roads, are now in St. Louis to make arrangements by which there will be a through connection between the Union Pacific Road, via the Missouri Pacific, the Ohio and Mississippi, and the Little Miami, the Columbus and Pittsburg and Pennsylvania roads to Philadelphia. The sale of half their road, supplies the Union Pacific Company with means to prosecute their road, and they can confidently expect to have it finished to Fort Riley by the 1st of June, 1866.—*Harrisburg Telegraph.*

Great Russian Railway.

The eighth annual general meeting of the Shareholders in this important undertaking has just been held at St. Petersburg, Count Baranoff presiding. The number of shares deposited for the meeting was 66,927, of which Paris furnished 14,711; Amsterdam, 13,555; and London, 19,982. The share capital of the Company is composed of 600,000 shares of £20 each, and the Company has besides issued 70,000 obligations of £80 each, and 18,877 of £20 each. The works of establishment have involved an outlay of nearly £24,000,000. In 1864 the net profits realised on the Warsaw and St. Petersburg line were £202,717 as compared with £257,473 in 1863. On the other hand the net profits of the line from Moscow to Nijni-Novgorod rose last year to £286.189 as compared with £232,899 in 1863. The total profits realised on the two combined were thus £488,906 last yaer as compared £490,372 in 1863. After making various deductions and additions, the net profits of 1864 were finally returned at £459,225. The Russian Government guarantees 5 per cent. upon all the capital engaged in the enterprise. This guarantee involves a charge of at least £900,000 for 1864, so that upon all the interest paid the Russian Treasury has to make good 10s. in the pound.

American Railroad Journal.

Saturday, August 19, 1865.

Stock Exchange and Money Market.

One of the most practical as well as interesting inquiries among our political economists, who do much of the thinking of the times, whether "in or out of place," is the actual pressure of our national debt upon the individuals who make up the nation. Several of our cotemporaries have accordingly exhibited tables illustrating this question. One of these now before us commences a comparative list with the United Kingdom, and puts it debt at £190,000,000. This would be but $950,000,000, when it was in fact in 1861, $3,890,155,911, thus showing a mistake in our cotemporary of nearly three thousand millions. It is certainly to be regretted that such inaccuracies should appear in a widely circulating and influential journal. The same paper also states that the rate per capita, counting the population of the empire at 29,000,000, is £27 5 0. When in fact, on the erroneous figures assumed, the per capita rate would be something between £6 and £7 merely. Now, in 1816 the rate was $222.79 per capita, there having been some reduction, and in 1861, $126.87. On the other hand, when the debt of the loyal States in 1861 was $967,199,727, the rate per capita was $40.30; and now with the debt about trebled, it would be $120.90. This brings us to the fact that our individual liability under the present debt of the country is as $129 90 to that of the United Kingdom $132 61. There has been a slight reduction of late in the British National debt, but nothing of any great consequence. It also appears that the debt of the Netherlands is £93,000,000, and the per capita charge £26 11 3. Now the country contains in all but 10,905 square miles, and not quite three millions of inhabitants, yet it manages to carry on a large commerce, and many manufactures, and sustain a good credit. The State of New York contains 47,000 square miles, and in 1860 had a population of 3,880,735. What should we think, however, if we in this State had to carry a debt of $465,000,000, the amount of the Holland debt; yet that we should be able to do so, if in that unhappy condition, cannot well be doubted, if we regard area and population. The city of Hamburg has a debt which per capita on its population is $104 64, having a population of about 153,000 and an area of but about 133 square miles; and still it flourishes. We give the rest of the table we have already alluded to, not vouching, however, for its accuracy:

Countries.	*National Debt.*	*Population.*	*Per Head.* £ s. d.
France	£400,000,000	36,500,000	11 0 0
Portugal	30,000,000	4,000,000	7 10 0
Spain	107,000,000	16,000,000	6 13 0
Austria	224,000,000	35,000,000	6 8 0
Belgium	26,200,000	4,500,000	5 15 9
Bavaria	26,000,000	4,600,000	5 14 0
Hanover	7,900,000	1,800,000	3 15 0
Brunswick	1,500,000	273,000	5 5 8
Saxony	9,500,000	2,100,000	4 10 0
Denmark	12,000,000	2,600,000	4 9 0
Greece	4,000,000	1,070,000	3 14 0
Russia	231,000,000	75,000,000	3 1 3
Prussia	42,000,000	18,000,000	2 7 0
Wurtenb'g.	5,000,000	1,700,000	2 19 0
Oldenburg.	600,000	294,000	2 0 2
Brazil	15,400,000	7,700,000	1 19 2
Chile	1,500,000	1,400,000	1 2 9
Norway	1,500,000	1,500,000	1 9 0
Sweden	1,700,000	3,700,000	0 9 2

It will appear from this, that the countries with the least public debt and per capita liability, are those with the least maritime power and national rank; a curious fact. From some of them, large emigration continues to the United States, so that other considerations than taxation enter into the minds of the people, or they would not seek to change their position as residents of a country comparatively free from debt, for one unfortunately saddled, by means of a rebellion, with a very heavy one. From these facts, however, we may infer that we are fully able to meet our liabilities, by the ordinary means open to other governments not only, but by the rapid increase of our population and resources, nowhere rivalled on this globe in growth or industry. When the day shall arrive that we shall have a sound currency, and some stability in values and prices, we

shall find a real advance in our financial strength, and a positive gain in our financial ability. What we want is industry and economy, and all will be well. Speculation can no more help us out of our trouble than it did France in the days of the *Assignats*.

Looking over our late foreign files, we find that the British financial writers are much puzzled by an article which recently appeared in that famous French journal, the *Revue des deux Mondes*, from the pen of Mr. George Walker, of Boston, who has boldly and ably maintained the power of the present condition of American finances. His article has astonished the economists and capitalists of Europe. The London *Times*, always inimical to us since the rebellion at first took on an appearance of success, though at its commencement it was on the other side, as is well known, commenting on this article in the *Revue*, demands that the statements of Mr. Walker shall be "promptly suppressed." The London *News*, which has always been friendly and fair to us, replies in a most unanswerable article, fairly demolishing the writer in the *Times*, and turning its own objections against it in the clearest manner. We regret we have not space for its entire insertion. We make, however, one quotation in regard to the destructiveness of war, urged by the *Times*, which is thus answered by the *News*:

"Mr. Walker states, for example, that the funds of the savings banks have rapidly increased during the last four years; that rents of buildings have advanced more rapidly than gold; that the dividends of corporate companies, banks, railways, manufacturing, insuring, and mining companies, have been larger, when reduced to gold values, than during similar periods prior to the war—statements which he illustrates by pertinent statistics. With any of these statements our cotemporary does not attempt to grapple; but he meets them with the general assertion that war is a destructive process, from which he deduces the conclusion that the wealth of the country has receded since 1860 to the point, or nearly so, at which it stood in 1850—a retrogression equivalent to a diminution of the national wealth to the extent of one-half. For this monstrous proposition, not an iota of proof is given, except the presumption founded upon the generalization to which we have referred. The position of the *Times* is that, because war is a destructive operation, *therefore* the wealth of the United States has been actually reduced by one-half during the struggle; as if during the course of such a struggle influences might not be developed tending to neutralize the waste which it causes. Our own wars at the commencement of the century, as we have already remarked, furnish an instance in point; and though we should hesitate to accept Mr. Walker's inferences in their full extent, we are inclined to believe *that the United States in the present instance offers another*."

There is no doubt but that Mr. Walker has taken a wide view of the financial power and national resources of this country, and that in his article he has done it a great service. Without intending to compare what has appeared in this JOURNAL, in the same spirit, we claim for it that in the numerons foreign banking houses where it has been taken and studied for years, it has done its full share in maintaining the credit of the country.

The weekly averages of the Associated Banks for the week ending August 19th, shew a decrease in loans of $4,631,781; in specie, of $553,656; in deposits, of $1,145,169; and an increase of $2,577,560 in legal tenders. The circulation is reported at $7,639,575. The balance in the Sub-Treasury on Tuesday, was still heavy, being $54,-638,529 03.

With regard to the Government Securities, we have to notice that they are firm and are entirely unaffected by the decline in the London market. The truth is, that the price at home must regulate the price abroad, since the currency is abundant and worth in gold four hundred millions of dollars. We consider, therefore, that no permanent decline can be effected by the foreign dealers, let them do what they will. With regard to railway securities and shares, we may remark that the companies generally, are increasing their earnings and reducing their expenses, so that it is rational to believe they will still survive every attempt to break them down, as there seems sometimes a desire to do, even in "the house of their friends." More than this, we perceive that quite a number of new organizations are on foot by enterprising capitalists—a sure indication of their opinion at least. The market is quite firm, notwithstanding the effect produced temporarily by the recent failures of leading houses. New York apparently can bear the loss of millions without more than a slight check to its business. This may be seen in the fact that losses by fire in this city within a few years past are estimated to amount to the vast sum of two thousand millions of dollars, and yet the traces of conflagration are scarcely perceptible.

Money continues easy, and is freely offered at 7 per cent. on mixed collaterals, though lower rates, even 4 and 5 per cent., are obtained on the impregnable basis of Government Securities.

Gold has varied a little in price, the curve of its motion being small. A trifling amount was shipped during the past week, but its departure was scarcely felt. Exchange, which sympathises with its price, took heart and rose a little. For some time past the English financial writers have admitted that the shipment of this commodity did not pay, and even now no one will get very rich in the business.

We notice that a very important movement has recently been made by the Liverpool Chamber of Commerce in relation to establishing a uniform system of international averages and freights; and it is proposed that the British Government shall properly communicate on the subject with foreign Chambers of Commerce. It has already been considered by the Government of Belgium, and been discussed in the New York Chamber of Commerce by one of its members, formerly Admiralty Judge in Florida and now its Provisional Governor, Mr. Marvin. It is full of difficulty, yet as the tendency of commerce is at this time very much in the direction of uniformity, something may come out of these efforts by-and-bye.

The foreign Cotton Market is much disturbed by the question of how much of the article there is in the United States, and what part of it may be expected in the British market. It is stated in a late number of *Gore's Liverpool General Advertiser*, which makes this subject a speciality, that a deception may have been practised from motives of self-interest on the part of our government. It does not understand that the Treasury, in making public the reports received by it from the Cotton States, has acted in good faith, or that the accounts constantly coming in, justify the expectation that there is a considerable quantity on hand, and the Manchester people may as well know this now as hereafter.

An intelligent, and well-informed writer in a cotemporary, asserts that the cotton crop of 1866 will be of so much value that it will not only aid in an early return to specie payments, but be able to sustain a paper circulation of $600,-000,000.

The last advices from Liverpool are to the effect that an unfavorable change in the weather has rendered it pretty certain that the wheat crop will be so short as to make it necessary to largely import. The *Times* says that the imports for the last year from the United States were but 3 per cent. of the whole, and it expresses the opinion that we shall from high prices of labor here, be unable to export it. This depends entirely on the price, and almost any rise will show this theory to be incorrect. If our shipments of grain fell off during the war, a good reason for it was the large home demand for the use of our soldiers and seamen, and the enormous waste always attending military consumption.

The aggregate amount of exports for this port for the week ending August 22, exclusive of specie, was $3,395,622.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—New York State, 7s, 100½; Indiana 5s, 87; Galena and Chicago 2d mort., 95; Joliet and Chicago R. R., 90; New Jersey R. R., 135; Sixth Avenue R. ☞ The Philadelphia and Baltimore Central Railroad Company have commenced laying the track beyond Oxford Borough. The cars have been running from Philadelphia to Oxford for some years. The track is now laid one mile beyond Oxford, in the direction of Port Deposit, and will be laid a mile or two further in a few days.

The Gravity Roads of Carbon County.

An interesting portion of the Anthracite Coal Region to visit, is between Tamaqua and Mauch Chunk. Now that we have direct railway communication with Tamaqua the trip can be made with comfort, the only bit of staging being six miles from Tamaqua to Summit Hill. The gravity planes and roads of the Lehigh Company, from their mines to Mauch Chunk, are among the most interesting objects to be seen in the Region. The Company has four planes which hoist and send their loaded coal cars by gravity to Mauch Chunk and return them empty to the mines. One man takes from the mines to Manch Chunk in a day, from three to four hundred tons of coal, the cheapest mode of transportation known. It would be very advantageous to the trade if a similar system could be adopted in this Region.

The grades of the roads are from one to three hundred feet of the mile. A train is composed of ten or fifteen cars. The momentum of the train is controlled by a man who sits on the rear car and works a windlass. A chain from the windlass runs the entire length of the train. A rope from the brake of each car is connected with the chain. The speed run is about fifteen miles an hour. The trains start about ten minutes apart. The two finest planes of the company, are at Mount Pisgah and Mount Jefferson, the former at Mauch Chunk, the other several miles nearer Summit Hill. These planes hoist the cars which have delivered coal at the Mauch Chunk schutes, and return them to the mines.

The plane at Mount Pisgah is twenty-four hundred feet in length. The cars are hoisted by a stationary engine and by two flat bands of iron, about six inches wide and one quarter of an inch in thickness. The advantage of these bands, is, that a flaw is more easily detected than in wire rope, and that if one breaks the other will hold the train. As an additional precaution, there are safety trucks, which in case the bands break, will throw the cars immediately from the track. The arrangement of these planes is most complet. One of the loveliest views is from the summit of the plane on Mount Pisgah. Mauch Chunk lies nestling on the banks of the Lehigh at the foot of the Mount. Hill and dale, fertile farms, the silvery threads of winding streams, the cloud-capped summits of distant mountains, are embraced within the view from the summit, while forty miles beyond the spot on which the beholder stands, can be distinctly seen on a clear day, the Deleware Water Gap. It is an inspiring scene, yet as charming as the most finished cultivated view in the country.—*Miners' Journal.*

Gen. Webster and the Southern Railroads.

The press of this city are jubilant over the arrival of Brigadier General James D. Webster, Chief of Major General Sherman's staff. General Webster is on a tour of inspection on the condition of Southern railroads. His orders from Washington are, to report, if possible, the cost of placing them in running order. This mission is supposed to be preparatory to an offer of sufficient aid from the government to restore these roads to operation at the earliest possible moment. This would be an act of noble generosity on the part of the government, and at the same time one by which the whole country would largely profit. Speedy and safe means of inter-communication are absolutely necessary for the revival of business prosperity in the South, and upon this prosperity a great deal of the success of the North is dependent; and the era of restored harmony and good feeling will also be hastened by the same means. Nor is this all the benefit the nation may derive by assisting to refit and repair the southern railroads. In case of war with the French in Mexico—an event by no means improbable, or one against which the feelings of the American people would rebel—every line of railroad in the South would be needed for the transportation of men, supplies, and munitions of war to the Atlantic Gulf ports, and President Johnson is too farsighted not to have thought of this momentous fact. We again say that General Webster's is a highly important mission.—*New Orleans True Delta.*

Southern Pacific R. R.

A correspondent of the New Orleans *Times* writing from Shreveport says: "A committee of the Board of Directors of the Southern Pacific Railroad arrived in this city yesterday, to see Gen. Veatch commanding the northern division of Louisania, in regard to the completion of the railroad between this place and Marshall, Texas, there being a gap of eleven miles to complete it. This part of the road is graded, and only needs laying the iron to make the connection complete; and, with the assistance of the government, it can be done in thirty days, thus opening means of transportation for the large amount of cotton and other resources of northern Texas to this market."

☞ We invite the attention of our readers to the Card of Messrs. Aburtus & Constant, Bankers, whose office is at the corner of Fulton and Water streets. This house is reputed to be very wealthy, and their reputation as business men is of the best. One of their specialties is dealing in Canada money, and another the furnishing of exchange in large or small sums on London. They also deal largely and liberally in Government securities, and allow four per cent. interest on deposits.

☞ A correspondent of the Indianapolis *Journal*, writing from Henry Co., says that "the Fort Wayne and Southern Railroad is now a fixed fact. The president of the road has negotiated in London for the iron, and will be ready to commence work within forty days from this time. The road will run through Henry and Rush counties, on the Holwon and Coffin route, crossing the Bellefontaine Railroad near Muncie, the Cincinnati and Chicago Railroad near New Castle, the Columbus and Great Western at Coffin's Station, and the Indianapolis and Lawrenceburg at Greensburg."

☞ The Ithaca and Towanda railroad is to be pushed forward to speedy completion. It will be some 50 miles in length. The officers are: Ezra Cornell President, William Andrews Vice-President, L. Freeman Secretary, and A. E. Cornell Treasurer. The office of the Company is at Ithaca, N. Y.

☞ The rails on the Cape Cod Central railroad are being laid at the rate of a mile and a-half a week. It is said that the road will be completed and the cars running in six or eight weeks.

☞ The repairs on the Montgomery and West Point Road will be finished by Monday next. This will make the connection complete from Montgomery, via West Point, to Atlanta, and thence North and East by the way of Chattanooga and Nashville.

☞ The Indianapolis and Cincinnati Railroad is pushing its line up to the Whitewater Valley towards Brookville. It is also surveying a line along the Ohio River to Louisville.

☞ The Mississippi and and Missouri Railroad is completed to Kellogg Station, 12 miles east side of Grinnell, and the trains are actually running to that station.

☞ Anthony McLean has been appointed Treasurer of the Orange and Alexandria railroad company in the place of James Reid.

Pacific Railroad Lands.

We have received the following communication from a correspondent at Neillsburg, Placer county:

The settlers about here are somewhat exercised in their minds at present, and an excitement is arising in regard to the railroad lands. What the people wish to know is, whether those that settled on these lands prior to the passage of the Pacific Railroad bill, giving to the company the odd sections, can avail themselves of the benefits of the United States Homestead Law, where they chance to be located on odd sections, or whether they will be obliged to purchase those prior settled odd sections, of the railroad company, at their optional price or prices.

We have made the proper inquiries, and say a person who has resided on and cultivated a tract of land on odd sections within the railroad reservation, prior to the grant to the railroad company, has the right under the law to file his declaratory statement within three months of the filing of the approved survey in the United States Land Office, and prove up and perfect his pre-emption. A homestead right can only accure from the date of filing the application. A person who has lived on and cultivated a part of an odd section prior to the grant to the railroad, can perfect his pre-emption but cannot file a homestead claim, for the reason that before he can file his homestead he must abandon his right of pre-emption; and the moment he abandons his pre-emption the land falls to the railroad. The railroad company has given notice through its land agent that where parties have acquired a right to pre-empt under the law, it will sell at the same price that the National Government has fixed for the same land.—*Sacramento Union, July* 14.

Railroad Earnings--Monthly.

The following is a statement of the business done by the Illinois Central Railroad for the month of July, 1865:

LAND DEPARTMENT.

Acres Construction Lands Sold	6,003.54 for	$67,376 41
Acres Int. Fund Lands sold	303.63 for	5,092 80
Acres Free Lands sold	840.00 for	10,643 20
Total sales during month of June, 1865	7,147.17 for	$83,112 41
To which add Town Lot Sales		1,045 00
Total of all		$84,157 41
Cash collected in June		$106,347 48

TRAFFIC DEPARTMENT.

Receipts from	Passengers	$201,404 50
do.	Freight	306,483 50
do.	Mails	6,358 33
do.	Rent of Road	4,750 00
do.	Other Sources	13,000 00
Total Receipts in month of July, 1865		$531,996 33
Total Receipts in month of July, 1864		403,838 75

The earnings of the Chicago and Rock Island Railroad Company for the month of July, 1865, were $232,287 00
Corresponding month of previous year 224,980 00

Increase $7,307 00

The earnings of the Atlantic and Great Western Railway for the month of July, 1865, were $595,523 00
Corresponding month of previous year 332,098 00

Increase $263,425 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the month of July, 1865, were $309,083 00
Corresponding month of previous year 278,891 00

Increase $30,192 00

The earnings of the Chicago and Northwestern Railroad in July 1865, were $688,171 60
Same period last year 477,742 75

Increase $210,428 85

The earnings of the Michigan Central Railroad for the month of July, 1865, were $329,105 15
Corresponding month of previous year 263,244 58

Increase $65,860 57

The earnings of the Housatonic Railroad for the month of July, 1865, were $40,954 36
Corresponding period of previous year. 35,765 39

Increase $5,188 96

The traffic receipts of the European and North American Railway for the month of July, 1865, compared with the corresponding month last year, is as follows:

	1865.	1864.
Passengers	$7,879 40	$8,178 85
Freight	5,693 19	6,137 59
Mails and Sundries	512 00	406 80
Total	$14,084 59	$14,723 24
Decrease in 1865	$638 65.	

The approximate earnings of the Pittsburg, Ft. Wayne and Chicago Railway Company during the month of July, compared with the same period last year, were as follows, viz:

	1865.	1864.
Freight	$300,524 20	$316,693 67
Passengers	282,876 55	166,645 58
Express matter	11,328 65	5,200 00
Mails	7,825 00	7,825 00
Rent of railway	7,083 33	7,083 33
Miscellaneous	2,489 96	3,192 96
Total	$612,127 69	$506,640 54

Earnings from Jan. 1, to July 31:

1865. $4,828,015 97
1864. 3,512,569 11

The earnings of the Rome, Watertown and Ogdensburg railroad for July, were $90,050 07
Corresponding month of 1864 71,351 50

Increase $18,698 57

The earnings of the Erie Railway for the month of July, 1865, were $1,152,803 17
Corresponding month last year 994,316 85

Increase $158,486 32

The earnings of the Cleveland and Pittsburg Railroad for the month of July, were $226,048 23
Corresponding month of 1864 214,533 66

Increase $11,514 57

The earnings of the Chicago and Alton Railroad for July, 1865, were $315,944 00
July, 1864 224,257 00

Increase $91,687 00

The earnings of the Toledo and Wabash Railroad for the month of July, 1865 $271,798 69
Corresponding month of 1864 139,626 43

Increase $132,172 26

The earnings of the St. Louis, Alton and Terre Haute Railroad for the month of July, 1865, were $162,570 62
Corresponding month of previous year 144,941 73

Increase $17,628 89

The earnings of the Milwaukee and Prairie du Chien Railroad for the month of July, 1865, were $217,159 46
Corresponding month of previous year 139,547 31

Increase $77,612 15

Railroads in Michigan.

The officers of the Grand River Valley Railroad have advertised to let contracts for grading, etc., 51 miles, or more than half of their road. Monthly assessments upon the capital stock have been ordered, and the company have opened an office in Jackson.

The company who have purchased the property, franchises and stock of the Port Huron and Owasso Company, call themselves the Port Huron and Lake Michigan Railroad Company. The managers of this corporation are magnificently sanguine. They propose to build a link in an independent line of railroad, of uniform gauge, between Chicago and New York, and Boston, Portland, Quebec, and ultimately Halifax. It is claimed that 30 miles of the road, to the west line of St. Clair county can be completed at any time within sixty days from the time work is begun on the road. The subscriptions in Lapeer county, it is said, will exceed $150,000, and that this sum, with the St. Clair county subscriptions, will construct over 12 miles of the road. It is stated that 30 miles of the road are already graded, and the right of way secured for two-thirds the length of the road, and that its franchises and property are worth to-day over $500,000, with stock subscriptions and other valued aid to nearly a half a million more. This road also expects to secure the Congressional land grant of 40,000 acres of land. The directors say they have had propositions both from Lapeer and Flint, to run the road from these points to Lansing, but that they intended to select the most direct route to Chicago! It will be seen that our enterprising friends in Port Huron look for nothing less than another Grand Trunk line across Michigan, leaving Detroit at one side. Lapeer county seems to be wide awake upon the subject, and a number of her towns have voted liberal aid.—*Detroit Advertiser.*

Finances of Canada.

The affairs of the British North American Provinces, have of late been very prominently before the people, for two reasons in particular; the one is that an attempt is making to unite the colonies in a General Government; the other, that their former commercial relatinn with the United States, under the Reciprocity treaty of 1854, is about to cease.

In view of these two questions, the financial condition becomes an interestiug subject; since it determines, to some extent, the result of Government and its material power. It is unfortunate for our race, that as soon as civil institutions assume a regular systematic shape, as soon as we settle down under laws and rules, whether with our own consent or not, that moment national debt and heavy taxation exhibit themselves as an incubus upon progress. All the nations of the world are bowed down with heavy pecuniary obligations, and he is considered a great financier and statesman who can contrive how to pay readily, even the interest on these sums. The United States is the only country in the world that has ever been able to pay its national debt. This it has twice done; and while it is entirely the determination of the people that this third, and as we hope our last national debt, shall also be paid, yet it must be admitted we have a mighty task before us to effect it. Canada which besides its own inherent resources has had large assistance from the Mother Country to which it has steadily adhered from first to last, would seem to have had more than an ordinary chance to escape financial difficulties and to have profited by its position to maintain a very simple and economical Government. But it is no exception to the rule. Vast amounts of money are required even in Canada to

carry it on, and it has now a very large public debt computed to be at least $60,000,000. The present condition of its finances show a considerable deficit for the last 18 months ending the 30 of June, which is the latest period to which the accounts have been made up. The following are the figures.

RECEIPTS.

Customs	$8,731,000
Excise	1,655,950
Post Office	928,750
Public Works	501,250
Crown Lands	1,675,750
Miscellaneous	2,258,550
	15,751,250

EXPENDITURES.

Total	16,147,250
Deficit	395,450

The Toronto *Globe* remarks that the Customs receipts, taking the whole period together, show a greater average than preceding years did. The following table shows the Customs receipts for each half year since the beginning of 1863:

Half year ending	June 30, 1863,	$2,103,087	48
" "	Dec'r 31, 1863,	3,067,992	84
" "	June 30, 1864,	3,074,799	92
" "	Dec'r 31, 1864,	3,589,200	
" "	June 30, 1865,	2,067,000	

The receipts of the last half-year, therefore, are by small difference less than the receipts of the corresponding period in 1863, and much less than the receipts of an intervening period of six months. The last half of the year, however, usually gives a larger revenue revival of trade this autumn, and there is no doubt that the six months ending on the 31st of December next will show a pretty large increase over the two millions of duties collected in the first half of the present year.

The revenue from Excise, appears to be increasing as will be seen from the following half-yearly return since 1863:

Half year ending	June 30, 1863	$418,162	24
" "	Dec'r 31, 1863	411,639	53
" "	June 30, 1864	519,351	15
" "	Dec'r 31, 1854	340,650	00
" "	June 30, 1865	794,950	00

From an average of a little more than $400,000 for the half-year to nearly 800,000, is a large advance for that period.

The Post office receipts for the eighteen months are more than double the usual recepts for a single year; but the seeming increase is, we think, arrived at by adding a large sum received last year for ocean postage—an item usually given separately. The receipts from public works are about the average of years when the tolls on the St. Lawrence canal are remitted. The Crown Lands receipts seem to have made an extraordinary advance. In 1861, the Territorial Revenue $678,992 82; in 1862, $629,886 12; in 1863, $682,795 74; and in 1864 $584,000. Taking this last sum from the total of 1,675,750, given in *La Minerve* as the income for 1864 and six months of 1865, we have the surprising sum of $1,091,000 received during the six months ending June 30, 1864—at least three times the usual average.

The total expenditure, exclusive of redemptions of debt, that are balanced by the sale of debentures, is of the usual average. The net expenditures for 1862 was $10,971,681, and for 1863, $10,742,807 41; being just about equal to the expenditure for the 18 months ending 30 of June last.

The admitted deficiency, therefore, proves to be much less than was feared, and even predicted by many Canadians. Instead of being less than half a million, it was confidently said it would be five millions. The Toronto *Globe* claims for Canada a most healthful and properous state of things in all branches of commerce, agriculture and industry; and produces figures comparatively to show that in many respects it is advancing more rapidly than the United States. Adroit manipulation of figures can be made sometimes with surprising effect, but we cannot reconcile its statements with other well known facts, of a general lack of enterprise in Canada, constant emigration from it to the United States, and above all the great decline in the value of property there, and the extensive difficulty of disposing of it at almost any price, except perhaps in the commercial towns.

The true policy of the Provinces is to confederate and arrange their institutions on the most economical footing, then to agree with Great Britain and the United States that they may remain neutral during all foreign wars. This would save both countries enormous sums of money, do away with the necessity of Lake fleets and frontier fortifications, and preserve uninterrupted peace. Canada could thus feel at ease and look at the future without apprehension, which it cannot at present. Indeed there is no doubt but the conviction that in case of war the provinces would be overrun and devastated is a real cause of the check to enterprise and the desire of accumulation. Men cannot be hearty in their pursuits and business, when they see that by the conduct of a distant country over which they have no control, they may be involved in complete ruin.

Union Pacific Railroad.

INDIANAPOLIS, IND., Aug. 19, 1865.

A long train of cars loaded with Howe's truss bridges to replace the bridges recently destroyed on the Union Pacific Railway, Eastern Division, by the unprecedented high waters in the Kansas rivers, passing West to-day in charge of Major Henning, the General Agent. Meantime the business of the road continues without interruption, temporary bridges having been constructed to enable trains to pass along. The present energetic directors of the road are sparing no expense to make the road first class.

Railways in France.

The great centralisation of railway undertakings in France is reflected forcibly in the fact that out of every 21 miles conceded 19⅜ miles are under the control and worked by the six leading Companies, the Northern, the Eastern, the Western, the Orleans, the Paris, Lyons, and Mediterranean, and the Southern. The outlay made by all the French Companies on capital account to the the close of 1864 amounted to £220,691,000, to which must be added £40,800,000 for expenses incurred by the State, making the aggregate outlay of capital for French railways to the close of 1864 about £261,471,000.

☞ The Judicial Committee of the Privy Council confirmed the decision of the Court of Error, in refusing a new trial on the application of the Commercial Bank of Canada, appellants, *vs.* the Great Western Railway Company, of Canada, respondents. Appeal dismissed, with costs. The claim of the bank against the railway company was for $945,000.

☞ A meeting was held at Owego, on the 9th inst., for the purpose of instituting measures to construct a railroad from Lake Ontario, through Auburn, Moravia, Groton, Dryden and Newark Valley to Owego.

☞ The Pennsylvania Railroad Company is offering 6 per cent. mortgage bonds of the Connecting Railway Company, between the station of the Pennsylvania Railroad Company in West Philadelphia and Frankford, a distance of seven miles. The bonds are in sums of one thousand dollars, with interest coupons attached, payable on the 15th day of March and September. The principal payable in five equal amounts at the rate of $200,000 per annum—the first series on September 15, A. D. 1900. The principal and interest are secured by a mortgage of one million of dollars upon all the railway and property of the company, and are guaranteed by the Pennsylvania Railroad Company, free of State taxes. This road perfects the connection between the Pennsylvania Railroad and the New York lines. The Philadelphia and Trenton Railroad leases the road, and agrees to pay an annual rent for 999 years of six per centum upon the cost of the road, clear of taxes.

Minnesota Valley R. R.

The General Land Office has just filed a map of the survey and line of route of the Minnesota Valley Railroad, the former embracing a stretch of country from township 137 and range 31, to township 144 and range 39. Instructions have been issued to the local land agencies in the above State, to withhold from settlement the land lying on each side of the entire route to the depth of twenty miles. The Congressional act of March 3, 1857, granted to Minnesota, for this railroad, six alternating sections of land to each mile of the route, and by the act of May 12, 1864, four additional alternating sections per mile were granted to the same road.

☞ A corrected map has just been received at the several land offices, showing the progress of the public surveys in 1865 in Kansas and Nebraska, indicating also the tiers of townships intended to be subdivisionally surveyed along the proposed lines of the Pacific Railroad routes, also along the Butterfield Overland Mail and Express route. The contemplated subdivisional and other surveys will sweep along westward a distance of some seventy miles in the northern part of Kansas, and an equal distance in the southern part of Nebraska.

☞ Many of the Engines and car-wheels used by Government on the Virginia Railroads have been sold to the Virginia Company on six months credit. The remainder will be sold at auction for cash. Thirty locomotives and 290 cars will be sold at Manchester on the 3d of October, and 50 engines, 750 cars and 2,000 tons railroad iron at Alexandria on the 17th of the same month.

☞ The Providence, Hartford and Fishkill Railroad is deing an unprecedently large business this summer, both in passengers and freight traffic. The receipts at Hartford for passenger tickets during July were nearly three times as much as in July of 1861, and were considerable larger than in July of last year. The road is well officered and carefully managed.

☞ The State officers to be elected this year, in New York, are, Secretary of State, Treasurer, Comptroller, Attorney General, State Engineer, Canal Commissioner, State Prison Inspector, two Judges of the Court of Appeals and a Clerk of the same Court.

Roman Railways.

The great aggregation of Italian lines known as the Roman system will not be fully carried out until 1869. In the meantime interest is being distributed on the shares out of capital. When completed, the network as at present conceded will comprise between 1,200 and 1,300 miles of railway. The Directors have been authorised by a general meeting of the Shareholders to issue 200,000 obligations, which will assure the progress of the works up to 1867.

☞ The Land Commissioner has just received the annual report of the Surveyor-General of Dakota and Montana Territories, showing the progress of surveys in that distant and extensive department. The field operations are in extent equal to 900 lineal miles, and the surveys being adjacent to the western boundary of Minnesota, chiefly along the branch of the Big Sioux River, between 43° 30′ and 44° North latitude. The lands are reported to be peculiarly adapted to agriculture and stock raising.

☞ We learn from Quebec that surveys and estimates for the Intercolonial railway have been submitted. The route recommended is via river Du Loup, bay of Chaleur, Frederickton and Pictou, to Halifax, and will cost about twenty-five millions, or forty thousand dollars per mile.

☞ The earnings on forty miles of the McGregor Western railway in July were $27,697 24. The net earnings, as rendered by the Milwaukee and Prairie-du-Chien Railway Company lessees, after deducting amount of rolling stock and all operating expenses, were $14,998 74; the monthly interest on bonds was $6,300, leaving a surplus applicable to stock of $8,698 74.

☞ The great iron bridge over the Ohio river at Steubenville, connecting the Steubenville and Ohio Railroad with the short line to Pittsburg, will be ready for trains to pass over it on the first day of September.

☞ The total amount of circulation issued to the National Banks to August 19, was $172,664,460. The whole number of banks now authorized is 1,530, with a total capital of $390,000,000.

☞ The rails are now laid upon the Albany and Susquehanna railroad as far as Oneonta, to which place it is expected the cars will be run by the first of September. Oneonta is half way between Albany and Binghamton.

ABURTUS & CONSTANT,

BANKERS,

Cor. of FULTON and WATER STS,

Buy and sell UNITED STATES SECURITIES of all kinds at favorable rates.

COLLECTIONS promptly made on all accessible points of the United States and Canada.

UNCURRENT AND CANADA MONEY, and SPECIE bought and sold at best rates.

ARE prepared to contract to build for early delivery, Freight or Passenger Locomotives of the design and celebrated coal burning boiler of Mr. JAMES MILLHOLLAND, Engineer, &c., of Philadelphia and Reading Railroad Company.

NORRIS BROTHERS,
LANCASTER, PA.

Notice to Contractors.

THE BOARD OF PUBLIC WORKS of the City of Chicago will receive sealed proposals until and during the first day of September next, for the Excavation necessary to deepen the Illinois and Michigan Canal, according to the plan adopted, from Chicago River to Summit Lock No. 2, a distance of about 26 miles.

Maps, Profiles, Specifications, &c., will be exhibited at the Office of the Board of Public Works in Chicago, on and after Wednesday, the 23d of August, until the day of letting. There will be some 2,000,000 cubic yards of earth excavation some of it quite hard, and embracing considerable detached rock, and about 500,000 cubic yards of Stratified Limestone.

It is believed that the most of the excavation, except the stratified rock, can be done with steam dredges without interfering with the navigation of the Canal, but the rock excavation will all have to be done between the close of navigation in the fall and the opening in the spring. The whole of the work must be done on or before the end of the third such season of the suspension of navigation.

A large amount of machinery will be required to excavate the work within the time required, consisting mainly of steam dredges, scows and cranes for the earth work and drilling machines, pumping machinery and cranes for the rock.

The Board reserve the right to reject any or all bids, and no bid will be accepted unless the party proposing gives evidence satisfactory to the Board of Public Works that he is competent, reliable and responsible.

The bids will be directed to the Board of Public Works indorsed "Proposal for Excavating Illinois and Michigan Canal," and accompanied with the usual $200 bond, blanks for which will be furnished at this office.

Satisfactory security for the faithful performance of the work will be required of any party whose bid may be accepted.

J. G. GINDELE,
FRED. LETZ,
O. J. ROSE,
WM. GOODING,
R. B. MASON,
Board of Public Works.

Natural Lubricating Oil

FROM THE

HICKORY FARM OIL CO.'S

NEW WELL, NO. 2,

ON WEST HICKORY CREEK,

VENANGO COUNTY, PA.

This company are now receiving oil from the above well, of which they are exclusive owners, and are prepared to fill orders for delivery at this port or at the well.

The oil is of a specific gravity of 32 degrees Beaume, and has been pronounced, by all who have tested it, the best lubricator in the market.

Orders from railroad companies, jobbers and large manufacturers are solicited, and will receive prompt attention. Parties can at all times rely on a pure and uniform article.

American Railroad Journal.

New York, Saturday, September 2, 1865.

Columbia and Augusta Railroad.

This road was begun during the late war, and would have been carried on to completion had not the unexampled depreciation of the currency of the South compelled perforce a suspension of the work.

Its officers are: President, Wm. Johnston, of Charlotte, N. C.; Chief Engineer, Fleming Gardner; Secretary and Treasurer, Henry Moore, Augusta, Ga. Length of road seventy-nine miles.

The financial condition of the company is as follows:

Capital paid in	$500,000
This is represented by—	
Graduation finished	$70,000
Cotton on hand	425,000
Mules, carts, etc	5,000

The amount required, in addition to the above, in order to complete the road, is $1,000,000, which will furnish and stock it in a first class manner, and enable the company to erect permanent iron bridges over both the Congaree and Savannah rivers. It is proposed to increase the capital stock to the above amount. A glance at the map will show that its character as a paying investment is guaranteed by its geographical location. It is a link which saves in one stretch fifty-six miles of distance in that great Southern Metropolitan line of railway, which, starting from our National seat of government, passes through seven Southern States, and through the capitals of five of them, to Marshall in Texas, where it is merged into the Southern Pacific Railroad. Owing to the topographical features of the country, this route is about the shortest practicable one—the sum total of reduction of distance over the old route being 158 miles between Richmond and Macon alone. This is divided as below:

Completion of Danville extension	52 miles.
Columbia and Augusta, when completed	56 "
Mayfield & Milledgeville, when comple'd	50 "
Total saving	158 "

When the two cuts offs, i. e., the Augusta and Columbia and Mayfield and Milledgeville road, are finished, the traveller going South will pass through Richmond, Danville, Greensborough, Charlotte, Columbia, Augusta, Milledgeville, Macon, Columbus, Montgomery, Selma, Demopolis, Meridian, Jackson, Vicksburg, and Shreveport, to Marshall Texas, and with facilities for connecting with nearly every railroad in every State he passes through.

Railroad Routes to the South and Southwest.—Their Condition, etc.

The Richmond and Fredericksburg Railroad is completed to Fredericksburg. Here a gap occnrs consisting of the Rappahannock bridge and six miles of track; thence the road is completed to Aquia Creek. Three months' work will be required to finish it.

The Virginia Central Railroad is completed to Jacksons river, but with only temporary bridges as yet.

SOUTH EASTERN ROUTE.

The Richmond and Petersburg Railroad bridge over James river is destroyed, ten months will be acquired to rebuild it. The cars run to Petersburg from the south side of the river. At Petersburg there is a short stage connection. Cars run thence to Gaston, where the Roanoke river is crossed in ferry. From this point there is unbroken connection, *via* Raleigh, as far as Winnsboro, S. C., and *via* Weldon to Wilmington. On the Wilmington and Manchester Railroad, the Brunswick and Great Pedee bridges are gone.

Passengers cross in ferries and have trains to Florence, and thence westward to Camden Junction, and Southward by the North East Railroad to the Santee bridge, which structure is also destroyed.

WESTERN ROUTE FROM RICHMOND SOUTH.

The Richmond and Danville Railroad bridge at Richmond is gone, and only a temporary structure at Staunton river. The connection is unbroken from south side of James river to Winnsboro, S. C., *via* Greensboro and Charlotte. At Winnsboro passengers south find hacks for Columbia and Orangeburg, from which last place they can reach the cars for Charleston.

From Winnsboro to Congaree bridge above Orangeburg, there is an unbroken gap of fifty-one miles of destroyed railway track and bridges. The track from the east *via* Camden Junction has already been pushed across the Wateree. Passengers from Winnsboro west take hack for Alston, where they take the cars of the Greenville and Columbia Railroad, and proceed to Abbeville, where a second line of hacks carries them to Washington, Ga. From this point almost the entire southwest can be reached by rail, the connection between Atlanta and Montgomery being now completed. On the Milledgeville and Macon route there is a gap of thirty-three miles staging, the road is graded but no track as yet laid.

From Augusta eastward the South Carolina road runs to Aiken, 21 miles; the track is destroyed from thence to Branchville or near it—leaving a gap of about 46 miles upon which little work is doing. From Charleston upwards, and from the Wateree westward and towards Columbia, this Company is doing all it can with its present limited means.

From Augusta westward the Georgia Railroad is complete; but the Georgia Central is so only as far as Waynesboro. From here the gap is a tripartite one, covering, as it does, the Augusta, Macon and Savannah branches of this road, all three of which concentre at Millen. With this last as the initial point, the gap extends as follows: toward Augusta 21 miles; toward Savannah 33

miles; and toward Macon 91 miles. In three weeks the Augusta and Savannah gaps will be reduced each fifteen miles.

The route from Richmond west, *via* Knoxville and Chattanooga, is also now open with numerous temporary stream crossings, and we believe one ferry, but of this we are not assured. Information as to the roads west of Georgia we will lay before our readers at an early day.

Our Railway Securities Abroad.

It is a curious fact that while British journalists and capitalists, have uniformly disparaged our National, they have not been so disposed towards our Railway securities. So far from returning such as they held for sale in this market, they have continued to increase their investments; and in some of our companies to seek a control. The Atlantic and Great Western is chiefly the result of foreign capital, and it is now said that a majority of the stock of the Erie is also held abroad. In the New York Central it is believed many European capitalists are interested.

Probably the opportunities offering in the proposed re-construction of the Southern lines will not be overlooked, so that the amount of foreign capital taking this direction may be expected to be largely increased. All this is a practical rebuke of those American operators, who, in their haste to get rich, do not scruple to attack our railways with every weapon they can lay hands upon. Really there must be at bottom a want of moral principle, in those who are perpetually misrepresenting the condition, the business and the earnings of some of our most prosperous companies; bearing the stock, alarming the holders, contriving corners, and resorting to all those devices to advance their own interests at the expense of the credulous, the unsuspecting and timid. By such acts as these we have seen the valuable stock of a city railway actually broken down from the par of a 100 to 20, and when it was in this stage, to be bought up and held, this being only for a short time either, until it now brings 300. And in this operation, men esteemed honorable, were engaged, and successfully. Our object, however, in bringing this subject to the attention of our readers, is rather to warn the holders of our Railway stocks against being frightened out of their property by any such management. Our companies almost without exception, are doing well. Those who will take the trouble to look at our weekly tables, which are always to be relied on, will find that the earnings are on the increase, and the debts and the expenses decreasing. Ordinary fidelity on the part of directors and managers, is certain to improve rapidly the value of railway property; and all the stockholders have to do is to see that the right men occupy the responsible places.

In corroboration of our assertion, that these securities are duly understood and appreciated abroad, we make the following extract from the *London Circular* of Messrs. Satterthwaite & Co.:

"In reference to American Railroads, we note the encouraging feature of a continuous increase in their receipts. During the war, it was stoutly contended that, at its conclusion, railroad traffics would seriously fall off, and such opinions were made to tell in deterring investments in American Railroad securities; these predictions have, as might have been expected, proved singularly wrong, for it cannot be that, in an improving country such as the United States is, with increasing population both on Western prairies and in the great cities situated in the Atlantic States, railroad traffics can diminish, all experience everywhere shows an entirely opposite result; hence we hold that *nothing is safer or sounder as a security than American Railroad Bonds*, and if we take such as have the interest payable in London, investers may feel as sure of a certain income, as from any Debentures either of *English, Continental, or Indian lines*."

Nothing can be more frank, and plain spoken than this opinion of a well informed and leading house in London.

The London *Daily Star*, a journal of large circulation, sound judgment, and great influence, says of our railroads that "*they exhibit a continuance of great prosperity;* in fact, as far as the Northern States are concerned, the *whole country appears to be marching forward in everything that constitutes material wealth, just as though she had all along been at peace*, instead of, as she is, just emerging from the most gigantic struggle in war the world has ever seen."

Really when foreigners speak in this way of our Railway securities, it is time for the croakers and disparagers of Wall street to hold their peace.

New York and New Haven Railroad.

The income of this company for the years ending March 31, 1864 and 1865, have been as follows:

	1864.	1865.
From passengers	$1,134,899 23	$1,500,333 74
From freight	214,354 02	263,904 30
From mails, expresses, extra baggage, and interest	75,519 06	83,053 77
	$1,424,772 31	$1,847,291 81
Expenses, viz.:		
Transportation exp.	$313,614 23	$485,452 68
Repairs of road, etc.	54,417 59	220,915 10
" equipment.	151,690 46	226,296 16
Fuel, oil and waste	136,188 20	214,902 27
Haulage by horse power	43,399 50	77,128 75
	$704,309 98	$1,224,694 96
Leaving as earnings on transportation	$720,462 33	$622,596 85

The resources for the year and their disposal have been as follows:

RESOURCES.

Cash on hand, April 1st, 1864	$330,410 10
Materials	222,347 22
Earnings on transportation business, as above shown	622,596 85
Increase of accounts payable	11,499 12
Sale of small piece of land at Stamford	150 00
	$1,187,003 29

PAYMENTS.

Coupons for the year	$129,120 00
Loss, in operating the "Canal Road"	28,905 03
Dividends, paid during the year	324,897 00
Materials, for the coming year	362,321 98
Equipment, viz: 4 new locomotives, 6 new passenger cars, 45 new freight cars, and our proportion (nearly one-third) of 4 new passenger cars, 3 baggage cars, and 3 Post-office cars, for the "Boston Line"	167,487 85
Completion of new engine house at Stamford	4,184 08
Shop extension at New Haven	3,641 93
Cash on hand, April 1st, 1865	166,445 42
	$1,187,003 29

The result of the year's business has been as follows:

Earnings		$1,847,291 81
Transportation exp.	$1,224,694 96	
Renewals of equipm't, completion of engine house, and shop extension	175,313 86	
Loss operating canal road	28,905 03	
Coupons for the year	129,120 00	
		1,558,033 85
Leaving applicable to dividends		$289,257 96

Of the three dividends, of three per cent. each, paid during the past fiscal year ending on March 31st, 1865, the first, amounting to $107,865, was paid out of the previous year's earnings, and the two remaining dividends, amounting to $217,032, are chargeable to the net earnings of the year under review.

The Board having deemed it advisable to declare semi-annual dividends hereafter, the next would be in July, and will be in accordance with whatever ability the company may have at the time the same is declared.

The expenses during the past year, for everything connected with Railroad management, have been far beyond any previous experience; these, in connection with the national and state taxes, on a similar scale, have greatly increased our former aggregate of annual expense; but in this connection, the Board take much pleasure in reporting to you that it is recently noticed a considerable reduction in the cost of many articles is already apparent, and the tendency is still in the same direction—while the earnings of the Road, both from passenger and freight business, are on a very satisfactory scale.

We have due us, for Transportation, from the Government, accounts from the 1st of July last, settlements of which we are promised at the earliest moment that the Quarter-Master is in funds for that purpose.

Since your last annual meeting, there have been adjusted 475 shares of the outstanding spurious stock issued by Robert Schuyler, and the capital stock of the company has been increased to 36,196 shares. Annexed to this report will be found a list of these additional settlements.

Appeals have been taken from the Supreme Court to the Court of Appeals in all the adjudicated cases arising from the Schuyler Fraud, and it is probable the same will be heard at an early day.

Under the head of "Payments," will be noticed the large item for materials on hand for the coming year, amounting to $362,321 98—also, for new equipment, the sum of $167,487 85—and for the completion of a new engine-house and turn-table, at Stamford, and the extension of shops, at New Haven, $7,826 01. The arrangements for repairs of track, having been made in good time and on a liberal scale, gives assurance that the condition of the road will be continued fully up to the requirements of the travelling public.

The number of miles run by passenger trains during the year was 530,138; by freight trains, 104,623; by service trains, 17,994—total, 652,755. Number of passengers carried, 1,833,575; do., carried one mile, 68,737,307. Tons of freight moved, 168,360; do., moved one mile, 6,048,608. Of the passengers carried, 1,346,933 were local, and 486,582 to and from other roads; 814,869 were passengers over Harlem road; 354,293 commuters over do., and 664,413 passengers beyond do. Of the freight moved, 48,592 tons were local and 54,803 tons to and from other roads.

The equipment consists of: 33 locomotives, 85 passenger, 18 baggage and mail, and 409 freight cars—of which, 6 locomotives, 6 passenger, 3 baggage and mail, and about 200 freight cars are used to operate the Canal railroad.

The cost of fuel for running the trains the past year has been $178,194 43, or 27.3 cents per mile run, against 20.5 cents the preceding year. Tons of coal used, 12,258; cords of wood, 324; cords of kindlings, 1,452.

The number of miles run by engines on the canal road was 110,585. Tons of coal used, 1,969; cords of wood, 805; cords of kindlings, 236.

The earnings of the canal road were $201,295 67; and the expenses $230,200 70—loss, $28,905 03.

CONDENSED BALANCE SHEET.

Railroad; including the franchise Right of Way, grading, masonry, bridging, fencing, superstructure, iron, station-houses, shops, fixtures, furniture, machinery, engineering, agencies, interest, discount on bonds	$4,664,102 46

Profit and loss; being the surplus of earnings not paid out in dividends, (but of which $661,973 31 has been expended for additional second track, new bridges, depots and other buildings, equipments, retiring bonds, &c., &c.	967,543 90	
Accounts payable; being coupons due April 1st, 1865, March pay-rolls, and balances due other roads	223,196 81	
	$6,810,340 71	

Officers of the corporation chosen May 19th, 1864:

President.—GEO. B. CARHART.

Directors.—George B. Carhart, George N. Miller, Abraham R. Van Nest, James J. Rosevelt, Wilson G. Hunt, New York; John Bradley, E. C. Scranton, New Haven; John W. Leeds, Stamford; Jonathan Godfrey, Southport.

Superintendent.—JAMES H. HOYT.

Treasurer.—WILLIAM BEMENT.

Secretary.—E. S. ABERNETHY.

New Route from New York to Boston.

Contracts have been completed between the Neptune steamship Company, the Providence, Warren and Bristol Railroad Company, and the Boston and Providence Railroad Company for the establishment of a new line of travel between Boston and New York by way of Bristol. The Neptune Company will furnish first class side-wheel steamers, to be constructed with special reference to the service, that they may be entirely secure in the roughest weather. These boats the Company have already contracted for, and work upon them has commenced. The Bristol Railroad Company have awarded to A. Dawson the contract for the extension of wharf facilities at Bristol, and that work is also progressing. The Boston and Providence Company are now building a number of first class modern passenger-cars for the line and a powerful locomotive will be at once put under contract. The steamboat train between Boston and Bristol will be a "lightening express" to go through over the Seekonk branch in one and a half hours. It is proposed to make this exclusively a passenger route. Passengers will arrive in Bristol from Boston so as to make the transfer to the boat by daylight, in the summer season, and will be able to get supper before they leave the bay. Passengers from New York will have a good nights rest, and yet arrive in Boston in season for the earliest trains for the North and East. The boats, we believe, are to come to Providence from Bristol, leaving each afternoon in time to connect with the train at Bristol. The new line is to go into operation on the first of June next.—*Providence Journal.*

Central Railroad and Banking Company of Georgia.

This company is now in the market for a loan of $1,000,000; the security offered being first mortgage seven per cent. bonds of $1,000 each, redeemable in ten years, with coupons payable semi-annually in New York. The proceeds to be applied to the repair of damages sustained by the road during the war. The road is 190½ miles in length, extending from Savannah to Macon. Its earnings during the fiscal years ending November 30, 1859 and 1860, were as follows:

	1859.	1860.
Up freight	$588,116 55	$668,048 00
Down "	677,401 50	659,961 13
Through pass.	97,704 44	103,986 06
Way "	179,444 87	174,495 85
Gordon, Milledgeville and Eatonton R. R.	20,438 17	21,358 92
U. S. mails	32,625 01	36,450 00
Express, etc.	38,217 30	50,725 05
Total	$1,633,947 84	$1,715,025 01
Expenses, viz:		
Transportation exp	$187,651 91	$230,734 86
Motive power	156,065 75	227,916 45
Maintenance of cars	92,199 64	109,533 92
Damages	8,278 71	10,905 06
Repairs of road, etc.	243,319 07	242,002 29
Incidental exp	19,701 55	21,890 46
Extraordinary exp.	87,126 83	107,467 18
	$794,343 46	$950,450 22
Net earnings	$839,604 38	$764,574 79

The increase of net earnings in 1859 over 1858 was $83,989 46. The decrease of net earnings in 1860 was $75,029 59. This was caused mainly by increased expenditure for new equipment, etc., 5 new locomotives and 85 freight cars having been added during the year.

The company had at the close of 1860, 59 locomotives; 22 first class and 6 second class passenger and baggage cars; 4 mail, 14 baggage, 3 express, 23 conductor's, and 657 cars for freight, etc.

The cash receipts from road and bank were in—

	1859.	1860.
From road	$1,645,554 09	$1,696,998 52
" bank	81,080 72	113,371 10
	$1,726,634 81	$1,810,369 62
Disposed of as follows:		
Road expenses	$794,343 46	$950,450 22
Bank "	14,651 92	17,569 39
Interest on bonds	11,994 52	6,959 24
Dividends declared	600,000 00	458,340 00

Bids will be received until the 10th instant, by Messrs. WINSLOW, LANIER & Co., 52 Wall street, for $1,000,000 first mortgage seven per cent. of this company. For further particulars see Advertisement in another column.

Pacific (Mo.) Railroad.

There remain only 17 miles to finish on the Missouri Pacific Railroad, and that space is already far along toward completion. All the bridges, culverts and grading are finished, and ties and rails are being laid with great rapidity. The rains of the past four weeks injured the grading somewhat and required several sections to be done a second time, but the prospect is fair for the opening of the road through to Kansas City before October.

☞ The Central Pacific Railroad is now graded to the new town of Colfax, which is close to Illinoistown, and the cars are expected to be run to that point in September. In the recent report of the directors they express their conviction that the cars will be running to Austin within three years.

☞ The Albany and Susquehanna Railroad was opened to Oneonta, a distance of eighty-two miles, on Tuesday last. Fifty-eight miles more will complete the road to Binghamton.

☞ It is said that there is not a single ton of iron in the whole Lehigh Valley remaining unsold at the present day, and many of the establishments have orders ahead.

☞ On Tuesday last, at Mauch Chunk, the Lehigh Navigation Company allotted contracts for building two railroad bridges to span the Lehigh River and Canal at Bethlehem, and thereby connect the Canal Company's Railroad with the North Pennsylvania Railroad. The railroad bridge will cross the river in an oblique direction from a point west and near the south end of the existing wagon bridge, and the new railroad will cross the Lehigh Valley Railroad at grade, near the east end of the passenger station at Bethlehem

Journal of Railroad Law.

POWER OF LEGISLATURE TO BIND RAILROAD COMPANIES BY SUBSEQUENT LEGISLATION,—VESTED RIGHT OF A RAILROAD COMPANY IN CONNECTING LINES.

The multiplication of city railroads, and the conflicting grants which have created disputes as to the right of way, have given rise to some nice questions, the solution of which is of great moment. The main question is, however, whether the legislature loses all control over a railroad when once chartered; and this is a question of almost equal importance to all classes of railroads. Upon this question the following case will throw much light.

This was a proceeding in equity for an injunction to restrain the city of Philadelphia from removing the track of the City Railroad on Broad street from Vine to South street. It was alleged that its removal would inflict "grevious and irreparable injury" upon the Southwark Railroad Company whose track connected with that of the City Railroad.

The motion was heard before a full bench.

The facts were as follows:

On the 21st day of March 1831 the Legislature (P. L. 1831, P. 194) directed the Canal Commissioners to complete a Railroad from the Schuylkill to the Susquehanna, "beginning at Vine and Broad streets, and thence to the Canal Basin at Columbia eighty one and three quarter miles," with the proviso, that before the Canal Commissioners should come west of the Schuylkill, the City of Philadelphia "shall engage to construct a branch railroad from any point east of Schuylkill to any point on the Schuylkill or Delaware within the City.

On the 28th of April 1831, the City Councils pledged the faith of the City to the State to construct a road from Vine and Broad streets to Cedar street according "to the true intent and meaning of the act" above quoted.

On the 6th of May 1831, a copy of this resolution of Councils being before the Canal Commissioners they resolved that they were thereby justified "in entering into contract for such part of the work as was made by said act dependent on such pledge."

January 10th 1833, an ordinance was passed providing "that the Philadelphia and Columbia Railroad should be continued along the centre of Broad street from the north side of Vine street to the south side of Cedar street." Under this ordinance the road was laid, and on the 27th of February 1834, the city directed the appointment of a Superintendant, who was to receive the tolls, to be the same as those charged on the Columbia Railroad."

The Southwark Railroad Company, by their Charter of April 2nd, 1831, (P. L. 1831 p 360–1) were "authorized to construct a railroad of one or more tracks from the Delaware to Broad and Cedar streets, in such direction as they should deem best to connect with the termination of the City Railroad." April 10th, 1849, (P. L. 642–3), the Legislature abandoned the whole road east of a point eight miles west of the inclined plane.

The 38th Section of that law required the Canal Commissioners to locate a railroad to avoid the inclined plane on the Columbia railroad, commencing at a point not more than eight miles from the head of the plane, and terminating on the west or east side of Schuylkill, as they shall deem best." The same section gave the city and districts "authority to construct a railroad from any point in the limits and cross the Schuylkill, connecting with the said railroad."

It also authorized a loan of $400,000, to build the road to be called the "Inclined Plane Loan," and provided that "any surplus, together with the proceeds from the iron and other old materials and buildings, from the portion of the state railroad rendered useless by the adoption of the road herein provided for," should be appropriated to relaying the road west of the junction.

In 1850, the state (P. L. 1850 p. 738,) authorized the sale of the bridge and all the road east of the Inclined Plane.

By act passed April 15th, 1851, (P. L. 684 § 40), $40,180 was appropriated to pay to that part of the West Philadelphia Railroad "which is now used by the commissioners in the construction of the road to avoid the inclined plane."

And by section 44, the Canal Commissioners are authorized to sell "all that part of the Philadelphia and Columbia Railroad from the foot of the inclined plane to the intersection of the road construction to avoid said plane." And the whole road from the new road eight miles west was sold.

Meanwhile the Reading Railroad had become the purchasers of the old track, and her trade and the Baltimore Railroad required a connection with each other and the Pennsylvania Railroad.

Accordingly by act passed May 3d 1860, (P. L. 780) the Junction Railroad Company was incorporated "to construct a railroad from a point on the Reading Railroad near Peters Island to a point on the Pennsylvania Railroad and thence * * * to a point upon the Baltimore Railroad."

By act of May 16th, 1861, § 9 (P. L. 693), it was declared, "that when the Pennsylvania Railroad Company shall complete their connection with the Baltimore Railroad, and the councils of the city shall direct the removal of the rails now laid in Broad street, from South to Chestnut street, the Navy Yard Company shall with the materials be required to pave," &c. The ordinance directing the removal of the railroad upon Broad street between Olive and South, was approved May 18th 1863, whereupon the bill in this case was filed as above stated.

The opinion of the Court was delivered by *Agnew J.* This case comes before us upon a motion for a special injunction to prevent the removal of the Railroad upon Broad street, between Olive and South streets under an ordinance of the City approved the 18th of May 1863.

The railroad along Broad street, from Vine to Cedar now South Street, was laid down under an ordinance of the City passed the 10th of January 1833, under the following circumstances.

The Act of the 21st of March 1831, providing for the construction of the Railroad from Philadelphia to Columbia, contained the following clause: "And provided also, that before the Canal Commissioners shall contract for any part of a railroad between the western shore of the river Schuylkill and the intersection of Vine and Broad streets, the Mayor, Alderman, and Citizens of Philadelphia by their proper authorities shall engage to construct and continue the railroad from the intersection of Vine and Broad streets down Broad street to Cedar street," &c.

This pledge was given by the City Councils on the 28th of April 1831, and the Canal Commissioners accordingly on the 6th of May 1831, authorized the construction of the Columbia Railroad from the Schuylkill to the intersection of Vine and Broad streets. The state entered upon the work and the City in process of time passed the ordinance of the 10th of January 1833, already referred to in fulfilment of the pledge.

As between the commonwealth and the city there can be no doubt these proceedings created a contract for the maintenance of the railroad along Broad, and from Vine to Cedar street, but neither the commonwealth herself, nor any one in her behalf, is here insisting in this bill upon her right to enforce the contract.

Whatever authority may be supposed to be necessary to lay down the Railroad upon the street as a public highway, there cannot be any doubt of the authority of the city, under its general powers in the acts of incorporation to remove the rails and clear the highways of the obstruction when in the judgment of the Councils, it becomes necessary or convenient for the government or welfare of the city. The 16th Section of the Charter of 1789 is full to this purpose. The consolidation act of 1864 continues the powers of the former corporation, and confers "all the powers, right, privileges, and immunities incident to a municipal corporation" upon the present city.

The doctrine of Pennsylvania, as in England, is that "highways being universally the property of the state, are subject to its absolute direction and control." Philadelphia and Trenton Railroad Company, 6 Whart. 43, 44; Commonwealth *vs.* Erie and N. E. Railroad Co., 3 Casey 354, subject to the paramount authority of the Commonwealth, the regulation and control of the streets, which are the great highways of the city, belong to the city government. This is clearly within the wide domain of power, conferred in the Charters of 1789 and 1854, subject only to the exception, "provided the same should not be repugnant to the laws and constitution of this Commonwealth." Coupled with the power given to pass laws, &c., is the authority "at their pleasure to revoke, alter, and make anew, as occasion may require."

The right of the City to pass the ordinance of 1863 to remove the track from Olive to Cedar street, and thereby to repeal so much of the ordinance of 1863, cannot therefore be disputed, except by the Commonwealth, or unless the complainant is protected by a vested right.

The Commonwealth does not dissent, so far as we know, and on the contrary, by her laws and acts, seems to acquiesce. By act of 10th of April 1849, the Canal Commissioners were authorized and required to locate and put under contract a railroad to avoid the inclined plane, on the Columbia Railroad, near the Schuylkill.

To counteract the probable effect of this action, the same act authorized the city and adjoining districts to create and construct a railroad to connect with the eastern termination of the state road by bridges across the Schuylkill, and to take the tolls thereupon. This connection has been made via Market street. In addition to this, by the Act of 10th of May 1850, the Commonwealth authorized the sale of all that part of the state road lying east of the inclined plane "rendered useless

by the new road to avoid the Schuylkill inclined plane,"

This portion of the road was accordingly sold by the Canal Commissioners to the Philadelphia and Reading Railroad Company, by deed dated 27th of December 1850, for $243,000. The latter company having connected their road with the state road at the west side of the Schuylkill, and now use the bridge and state road to its termination at Broad and Vine streets, thus securing to the city the trade of the Philadelphia and Reading Railroad Company.

By further Legislation, the Commonwealth has secured by the act of May 3d 1860, a connection for her assignee, the Pennsylvania Railroad Company with the Philadelphia and Reading railroad, and the Baltimore Railroad, on the west side of the Schuylkill, thus superseding to a great extent the necessity so far as she is concerned of continuing the railroad from Market, down Broad to South street.

All this seems to have been done harmoniously, as we hear of no remonstrance or complaint from either the City or the Commonwealth.

Finally in the act of the 10th of May 1861, incorporating the Navy Yard, Broad street and Fairmount Railway Company it was provided in the 9th Section that " when the Pennsylvania Railroad Company shall complete their connection with the Philadelphia, Wilmington and Baltimore Railroad, and the Councils of the City of Philadelphia shall direct the removal of the rails now laid in Broad street from South to Chestnut street, the Navy Yard, Broad street and Fairmount Railway Company shall with the appurtenances and materials thus removed, be required to place Broad street from South to Chestnut street, in such a condition as far as the paving, curbing and macadamizing is concerned as will accord with any plan which may be adopted for the improvement of said street by the Councils of said City."

This act authorizes the Navy Yard, Broad street and Fairmount Railway Company to lay down a double track upon Broad street.

From all these laws and acts of the Commonwealth, it is very manifest that the ordinance of 1863, authorizing the removal of the rails from Olive to South street is not against, but with the assent of the state. Olive street is South of Chestnut street. The ordinance is therefore valid unless the Southwark Railroad Company, the Complainants in this bill, have vested rights which it impairs.

The Southwark Railroad Company was incorporated under an act of the 2nd of April 1831, P. L. 360. The 22d Section authorizes the company " to construct a railroad of one or more tracks from the River Delaware in the district of Southwark and thence through the County of Philadelphia to Broad and Cedar streets, in such direction as they should deem best to connect with the termination of the City Railroad."

It is argued that this permission to connect with the termination of the City Railroad is a contract on the part of the Commonwealth, which is infringed by the taking up of this portion of the City Railroad, between Olive and South or Cedar streets; and reference has been made to many cases, deciding that a grant of franchise to a private corporation is a contract which cannot be impaired by subsequent legislation.

Many of these cases were examined and the doctrine summed up by Justice Woodward in The City Bank *vs.* The City of Pittsburg, 1 Wight 340, wherein he states "that a grant of land or of a corporate franchise by an act of legislation is a contract between the state and the grantee, the obligation of which a subsequent legislature cannot impair," P. 347.

This being the admitted principle, it becomes a question of interpretation only, and the point is what contract did the state make with the Southwark Railroad Company when she authorized them to construct a railroad in such " direction as they shall deem best to connect with the termination of the City Railroad.

Before solving this it is necessary to state the rule which must guide the interpretation in this case. It is one well settled in the Courts of the United States and of this State.

In the case of The Charles River bridge *vs.* The Warren Bridge 11 Peters, 544, Chief Justice Taney, following the language of an English decision stated the rule to be " that any ambiguity in the terms of the contract must operate against the adventurers and in favor of the public, and the plaintiffs can claim nothing that is not clearly given them by the act." In the Susquehanna Canal Company *vs.* Wright 9. W. & S. 11, Chief Justice Gibson restates the rule, as decided in the Monongahela Navigation Company *vs.* Coons, 6 W. & S. 113, to be, " that the state is never presumed to have parted with one of its franchises in the absence of conclusive proof of such an intention.

Chief Justice Black afterwards stated the rule in these words. " If anything is settled, it is this rule of construction, that a corporation takes nothing by its charter, except what is plainly, expressly, and unequivocally granted." Bank of Pennsylvania *vs.* Commonwealth 7, Harri 155.

In the Commonwealth *vs.* Erie and N. E. Railroad Company this rule of interpretation is still more strongly stated; 8, Casey 359.

In the present case, what was the authority conferred upon the Southwark Railroad Company? It was simply to construct their railroad " in such direction as they shall deem best to connect with the termination of the City Railroad." The authority is not expressly to connect with the City Railroad but merely to the end that they might do so. Clearly the utmost that can be asked for these words is a permission to connect. That it was nothing more than a mere license is evident, not only from the language thus used, but from the attending circumstances. The City Railroad then had no existence in fact or in contract. It was not until the 20th of April 1831, twenty six days after the passage of the Charter in question, that the city gave the pledge to make the City Railroad, in order to have the State Railroad continued from the Schuylkill to Broad and Vine streets, nor until the 10th of January 1833, that the ordinance was passed to construct it.

Besides this, the city Railroad was not a creation of the state, but of the city; while in the law authorizing the extension of the State Railroad to Broad street upon the pledge of the city and in the resolutions of the Canal Commissioners founded upon it, there was no provision for the exercise of any authority by the state over the City Railroad after its completion. It is clear therefore that at the time of the charter of the Southwark Railroad Company the state had no power whatever to compel a connection between the two roads.

There was nothing then in being to which a vested right could attach, nothing but a mere expectancy, and a legislative license to seek the connection when the city built her road, and permitted the connection. If any authority were necessary, whence a decision directly on the point in the case of The North Branch Passenger Railway Company *vs.* The City Railway Company, 2 Wright 361.

As between the State and the Southwark Railroad Company, the contract could rise no higher than the franchise granted, and the state became bound only not to withdraw from the company the permission or license she had given.

It involved no guaranty on the part of the state that the City Railroad should be continued a day or an hour. It is impossible to discover in the language of the license any contract for the perpetuity of the railroad to be connected with, and therefore according to the rule laid down, none can be implied.

So far then as the state is concerned the complainants can draw no authority from her acts to bind the City to continue her railroad and they must resort to their contract with the city (if any) in order to stop her. But here they are met by the fact that no contract regulating the connection between their road and the City Railroad was ever made, for none is set forth.

All we have in the case is that the Southwark Railroad Company was chartered before the City Railroad was authorized to be built, and that after it was built, a connection between the roads was permitted by the city, and this is only an implication from the fact stated. No time and no terms are stated to have been agreed upon, and no consideration paid. Clearly such a license is revocable, but admitting that it might endure while the City Railroad should last, where is the contract or guaranty on the part of the city that she should keep up her road forever, or so long at the least as the Southwark Company should require the use of the connection. Suppose the Southwark Company should choose to abandon its road at this point, and pass directly from the Delaware to the Schuylkill, is there any contract in favor of the city which she could enforce to prevent the abandonment?

We have seen no evidence of any such. Yet the obligation to be effectual must be mutual.

Upon the whole, therefore, we perceive no ground in law upon which the complainants can compel the city to maintain a railroad in existence which from the passage of the ordinance to abandon we must presume to be no longer profitable, but to be against her welfare. The facts stated and proved clearly create no ground for an equitable estoppel.

The special injunction is therefore refused.

Richmond and York River Railroad.

Alexander Dudley, Esq., President of the Richmond and York River Railroad, who was recently pardoned by the President, will at once proceed to rebuild the railroad over which he has presided for many years, the iron of which was taken up by the confederacy to construct the Piedmont Branch railroad.

American Railroad Journal.

Saturday, September 2, 1865.

Stock Exchange and Money Market.

Our readers will have noticed that we have always maintained that the cotton to be found on hand in this country would, at the end of the war, play a large part in our financial affairs. One of the puzzles of the hour, both here and abroad, is to know in reality what is the amount, and what the money value of the stock on hand. It is a fact, that the deliveries at the principal marts since the 1st of July last, have been far greater than the most sanguine anticipated, the deliveries at this port alone, between the 31 of July and the 21 of August, were 47,680 bales, making 171,182 since the 1st of May, being largely in excess of the average of 1860, and in gold the value is three times what it was in 1860. Even at this moment, it is pretty well ascertained that the stocks on hand at the principal commercial points are as follows:

New York	110,000 bales.
New Orleans	90,000 "
Mobile	45,000 "
All other points	55,000 "
Total	300,000 "

These in value are estimated to be worth as much as 1,200,000 bales at former prices. The receipts at New Orleans are said to be 3,000 bales per day; and in this city, not counting the New Orleans shipments, 2,000 bales per day. Considerable quantities are constantly going up the Mississippi from Vicksburg and Memphis, and find their way over the Illinois Central Railroad to the Northern Mills. The whole deliveries are estimated at 50,000 bales per week, equal to 2,600,000 bales per annum, or 10 millions of bales at the old prices. If this be true, and it has every appearance of truth, the consequences are of the highest importance, and will steady our system of finance in a surprising manner. Liverpool is now taking from us 5,000 bales per week, and paying 40 cents a pound which, calling the bale 450 lbs. is $180 per bale, or $940,000 per week. This ought to tell on exchange, and must tell upon it. And if the crop proves short, the price is the greater; if it is large, the reduction in price will be made up in quantity. Either way the effect is the same. We therefore cannot see, except there is an immense importation of foreign goods, how exchange can long continue at anything above par. It is worthy of note that recently the great auction houses in this city are advertising the importations of foreign houses, manufacturers, at 4 months' credit. German and British dress goods, Swiss curtain laces, Belgian cloths, French ribbons, silks and worsteds, all the rich and costly products of Paris and Lyons, are thrown upon our market at 4 months' credit, and the names of the foreign manufacturers given as authority for the sales. Much as these people predicted our financial embarrassments, they are not afraid to consign very large amounts of valuable goods to this market, and to give credit to the purchasers, in the most unreserved manner. What a reply is this to those foreign houses that have been expecting our overthrow, if not wishing it. That their reliance on our ability to pay is really undisturbed, is evident from what we have stated; and we have stated nothing but facts. We have, however, a continuance of the clamor for a reduction of the tariff on foreign goods, no doubt inspired by these same foreign agencies, some of whom have appealed to the public under their own names, avowing at the same time their personal interest in the change proposed.

We do not propose at this time to discuss the subject of a low tariff, or of free trade; but we put on record one fact recently made known in England, which our readers may apply for themselves. It is well-known that in that country meat has risen largely in price, and is scarce at that. What is the explanation given in the English papers? It is that since cattle from the Continent have been admitted at low or nominal duties, the traders of cattle in England have very generally abandoned the raising of them, particularly in the districts where the black cattle so called were so numerous and so profitable. Com-

petition being destroyed by the low duties a scarcity has arisen, and people who once ate meat have to give it up. Comment is needless.

At a proper time we propose to give a sketch of the 5 and 3 per cent. duties which were paid in several states while we were only confederated, and before the adoption of the present constitution; and also what happened when we had free ports. Mr. Cary, in his celebrated work, called the "Olive Branch," had an instructive historical chapter on this subject. That our British friends should endeavor to proselyte us to their commercial principles, is not strange. It is for their advantage to deal largely with a country in which the surplus of their looms and forges, in fact the sweepings of their warehouses, can, through the medium of our auction houses, be remitted to the consignors in 60 days. No such facilities for trade exist in connection with any other country with which they deal, and as our Western mountains and gorges are masses of silver and gold, it is not strange they wish to get all they can of them. It was ascertained not long since by a commission, that of British goods exported to foreign countries, 7 cents worth were annually consumed by each Prussian, 15 cents worth by each Russian, 17 cents worth by each Dane, 20 cents worth by each Frenchman, while the average consumption annually of each inhabitant of the United States amounted to $4.02! No doubt our foreign friends would like to do all our manufacturing for us, close our cotton and woollen mills, our furnaces and forges, our iron and coal mines, and rely on them for all articles of necessity. We hope the day is far distant when we shall listen to any such advice or adopt any policy which should reduce us to such a condition.

We observe that the Philadelphia *News* devotes considerable space to the consideration of our last week's money article, which was intended to show the pressure of our debt as compared with that of the principal nations of Europe. If we understood it rightly, it maintains that the people of Holland, with a debt of 400 millions of dollars, are better off than the State of New York, with 30 millions; and that their money will purchase more of the necessaries and comforts of life than ours will here. We doubt this. Things may in the abstract be cheaper there than here, but there is not as much money in the hands of the people to buy them.

Wages here are much higher than in Holland, and when reduced to gold are still so. Many important articles are yet moderate in price, notwithstanding our inflated currency, which no one more than ourselves, not even our cotemporary, is more anxious to see reduced in amount; but taking wages and prices at the gold standard, there is no doubt whatever that the people of this Country are far better off than those of Holland; have more of the comforts and luxuries of life, of which last the Dutch people generally know nothing, and are better able to meet taxation than those of the Fatherland.

We again perceive that the large Treasury balances from week to week are made the basis of fresh outcries against the policy of Mr. McCulloch, who is charged with curtailing thereby the means of the country and injuring its business. This is not only a groundless but silly complaint. If the Treasury has every week a balance over from 50 to 60 millions, it is the best proof in the world that the Secretary is managing with skill and success. That it does not affect the Money Market, is apparent from the plentifulness of money and the low rate of interest. It is also a proof of the increasing strength of his means. The internal revenue is said to have amounted to 48 millions since the 1st of July; and if it is to go on at this rate, we may expect to see our way out of our difficulties at no distant period. The first great relief for the country will be the appreciation of our currency; and as soon as the Secretary has a fair opportunity, we hope to see some of his weekly balances in the shape of legal tenders cancelled and withdrawn from circulation. The assistant Treasurer's balance on Tuesday was $58,436,981 59.

The report of the associated banks for the week ending the 26th ult., showed an increase of loans of $1,404,276; of deposits, $4,490,660; of legal tenders, $8,665,818; and a decrease in specie of $3,586,021. This last is attributed to withdrawals for the purchase of Southern produce, particularly cotton, and the large amounts required for the Custom House.

It is generally conceded that the Autumn trade is likely to be very large and profitable. The stocks are said to require replenishing, and the Southern demand to be large and increasing, which statement is borne out by the fact that our steam navigation with Southern ports is being extended in a wonderful manner. The resumption of mail facilities in the South, by the direction of our able Postmaster General, will do much to increase our internal traffic by water and rail.

Our last foreign advices bring us the news that Government securities are again advancing, a higher price being still maintained for them on the Continent than in the London market. We also perceive that a considerable advance has taken place in American provisions generally. For beef there was great inquiry, 3,000 tierces being disposed of the week previous to the sailing of the last steamer. The stock of pork was reduced so much as to cause an advance. Bacon had risen suddenly 50 cents per cwt., and cheese commanded full terms. We also learn that a considerable reduction in the duties on imported sugars has taken place, under an recent act of Parliament; and while we are on this subject we have to announce the following important information from Brazil, which will have the effect greatly to stimulate our enterprise in that quarter. We cannot see why such changes in foreign commercial regulations should not be officially announced from time to time at Washington. Surely if our foreign consuls do their duty they should at once announce such changes to the Department of State, and that, or the Treasury department, should make an official publication of them. The Brazil news is as follows, and is derived from our latest exchanges:

"On the 21st of June last the Brazilian Chamber of Representatives passed a law opening the coasting trade to Foreign flags indiscriminately, and repealing or reducing a variety of charges hereinto levied on shipping and on foreign produce in the ports of Brazil. As a further proof of the desire of the Brazilian Legislature to facilitate the operations of maritime commerce, the new law provides for the free admission of anchors, chains, sails, and all articles employed in the equipment of ships, and which will be more fully specified in the notifications to be issued by the Brazilian authorities. To this is added a provision for rendering the Customs' regulations at the ports of entry in Brazil less complicated and less onerous to shipping, the expressed object being to facilitate the movements of trade, and to clear the Brazilian custom-house system of needless and embarrassing formalities. Permission is accorded to foreign ships to load with salt at the ports of Macao, in the province of Rio Grande du Nord, at the St. Christopher's, in the province of Lergipe, and at Cape Frio, in Rio Janeiro; and lastly, the Government of Brazil are empowered to grant to any foreign company, or foreign adventurers, the right of navigating with steamboats between the ports of the interior and the ports of entry on the coast, and also between the various ports on the rivers Parguay, San Francisco, and Amazon—thus completing the repeal of the Brazilian navigation laws by opening the great rivers of Brazil, as well as her coasting trade, to the shipping of foreign States."

The price of money on Tuesday was 5 per cent. to responsible parties; while to the necessitous, as usual, it was any rate they could be made to pay. There is always a class of borrowers in this city that will agree to pay anything demanded, and the bill brokers know their men. Railway securities are dull, but they are not likely to be much depressed, as the roads are all doing a good business, and most of them rapidly increasing their earnings. As it is generally admitted that the fall business is to assume vast proportions, we shall probably see a corresponding increase in railway traffic. Governments stand firm, with a tendency to advance. Foreign exchange is not so strong, as cotton bills are coming into the market.

On the whole the report of the week is favorable in all respects.

The exports from this port, exclusive of specie, for the week ending August 28th, were $2,919,607.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Charlotte and South Carolina Railroad.

This road is 110 miles in length. The officers are: President, Wm. Johnston, Charlotte, N. C.; Sup't, Jas. Anderson, Chester, S. C.; Sec'y and Treasurer, C. Bouknight, Chester, S. C.

The financial condition of the company is as follows:

Capital, shares paid in	$1,550,000
Bonded debt	275,000
Floating debt	40,000

There is no mortgage on the road: prior to the war, bonds were being taken up with a sinking fund of $25,000 per annum. The excess of net earnings carried to surplus fund in 1861, was $45,000. Net receipts in same year, $193,000.

The condition of the track and rolling stock is as follows:

Destroyed by Sherman	55 miles.
Re-laid since then	20 "
To be re-laid with straightened iron	10 "
New rail required with chairs and spikes	25 "
New engines required	3

The bridge across Catawba river, 1,125 feet in length, is destroyed. Six months and $50,000 will be required to re-build it. Work begun.

The workshops at Columbia, and the depots and water stations from there to Blackstocks, 55 miles, are all burned, as also the freight depot at Charlotte.

The sum total required to repair damages is $250,000. The company is in the market for a loan, and offer to pledge the receipts of the road, and secure by individual notes of president and directors. By the completion of the Danville extension, the Charlotte route has become fifty-two miles the shortest to the South and Southwest, and therefore the re-building of this road to Columbia ensures early and large receipts.

Opening of Southern Lines.

The Tennessee and Alabama railroad is said to be in running order. Only two bridges now remain to be built to make complete the great eastern thoroughfare, the Virginia and East Tennessee Railroad. But a week or two more will be required to put the road in first-rate order.

The East Tennessee and Georgia Railroad has been turned over to the company. The Nashville and Northwestern Road has been offered to the company, but they decline to accept it unless they can secure the control of the Chattanooga Road in addition, in order to merge the two roads into one route.

☞ The Titusville *Herald* says "the Atlantic and Great Western Railroad Company are building a branch road from Oil City to Venango, an embryo "burg" at the mouth of Pithole Creek. From thence a horse railroad will be immediately built to Pithole City."

☞ The Petersburg railroad bridges, spanning the James River in Richmond, destroyed by fire on the 3d of April last, will soon be replaced by a neat and substantial structure, to be built by Samuel Strong of Washington.

Cairo and St. Louis Railroad.

At a recent meeting of the directors of this company, at Cairo, Ills., S. S. Taylor, Esq., was elected President, and D. T. Linegar, Secretary.

Hon. Sharon Tyndale was appointed Engineer, and directed to have surveys made from Cairo to St. Louis, and authorized to employ a commissioner to secure the right of way and solicit subscriptions to the stock of the company.

A committee was appointed to procure, by subscription, the necessary funds to defray the expenses of the preliminary surveys, which expenses it was estimated would amount to $3,000. Of this amount $1,100 was secured on the spot.

From estimates submitted to the Directors, it was concluded that the cost of grading and superstructure of the entire road from Cairo to East St. Louis would not exceed $2,000,000.

Uniformity in Weights and Measures.

The following interesting and valuable communication has been received from our esteemed correspondent at Albany, which explains itself, and is worthy of particular consideration:

In my opinion it is doubtful if the French system of weights and measures (although possessing great advantages) would meet with general favor in this country and in England. The change from existing standards would be too great and could not be as readily enforced as in countries possessed of more arbitrary governments. It is true that the French system is rapidly growing in favor on the continent of Europe, but there, ideas and institutions more readily assimilate to those of France than in the United States and England.

If the efforts of those interested in the subject were confined exclusively to simplifying the English and American standards, and making them uniform, they would be much more likely to result in success.

Nothing need be said of the superiority of decimal over vulgar fractions for all purposes of mathematical calculation. It was for this reason that the Gunter chains of one hundred links was adopted in land surveying. In railroad surveying also, decimals are indispensable, and the engineer uses a chain of one hundred feet and divides the feet on his leveling rod into tenths.

Our present system of weights and measures is almost barbarous in its nomenclature and irregularity. I subjoin a list of tables which I think will combine at once simplicity and uniformity, with the merit of preserving the standards which are best known and in most common use. It is true that the standards are arbitrary, but it is also true that the French metre though nominally derived from the measurement of a degree of the earth's surface is practically as arbitrary as the English foot.

My plan is to retain as the standard for all measurements of length and distance including the measurement of cloth, the foot. For square measure the square foot, and for cubic measure the cubic foot, dividing each into tenths and hundredths, thus:

For all length and distances, including cloth measure would be expressed in feet instead of yards.

10 Lines = 1 inch,
10 Inches = 1 foot,
100 Feet = 1 chain.

The mile of 5280 as it seldom enters into any computations may be left as it is.

Square measure:

10 square hundredths = 1 square tenth,
10 square tenths = 1 square foot;
10,000 square feet = 1 square chain.

The chain being the standard for land measure, and as 43,560 feet go to the acre it would be easy compare with old standards.

Cubic measure:

10 cubic hundredths = 1 cubic tenth,
10 cubic tenths = 1 cubic foot, .

For measuring all descriptions of liquids also for dry measure—retain the gallon and divide into tenths and hundredths, thus:

10 pints = 1 quart,
10 quarts = 1 gallon.

For weighing every description of merchandise also medicines and drugs, in lieu of the three tables of apothecaries, Troy and avoirdupois weight, retain as the standard the pound avoirdupois and divide thus:

10 drams = 1 ounce,
10 ounces = 1 pound,
100 pounds = 1 cental.

The cental for measuring all kinds of grain as I explained in my last, also coal, iron, and other heavy articles.

I submit this plan, thinking that all that is necessary to recommend it is a comparison with the multitudinous and irregular tables of weights and measures now in use.

Very Respectfully, Yours.

A. K. Shepard.

The Pacific Railroad.

Congress, by an act approved July 1, 1862, and an amendatory act approved July 2, 1864, provided for the construction of a railroad from the Missouri River to the navigable waters of the Pacific, by authorizing the incorporation of a Company to construct a line of road from Omaha City, in Nebraska Territory, to the western border of the State of Nevada; and by authorizing the Central Pacific Railroad Company of California to construct a road from the navigable waters of the western terminus of the Sacramento River to the above mentioned road; and the Leavenworth, Pawnee and Western Railroad Company to construct a branch road from Kansas City, to unite with the main trunk on the 100th meridian; and the Hannibal and St. Joseph and Pacific Railroad Company of Missouri to construct a branch road through Kansas, to connect with the Kansas branch, or with the main trunk; and also authorizing the Union Pacific Railroad Company, or other legally authorized Company, to be indicated by the President of the United States, to construct a road from Sioux City, in the State of Iowa, to unite with the main trunk line not further west than the 100th meridian—this main trunk railroad and branches to be so constructed as to form one continuous railroad of the same gauge from the navigable waters of the Pacific to the Missouri River, and there connecting with the main lines extending to the principal cities on the Atlantic coast.

Under this authority, the work on various portions of the line at the East and in the west has been vigorously commenced and carried on.

The Central Pacific Railroad Company, reported as completed on the 31st day of August, 1864, a section of thirty-one miles, which report having been approved by the President, entitled them under the statute to receive from the Secretary of the Interior certificates for 396,800 acres of land, and also to receive from the Secretary of the Treasury United States Bonds to the amount of $456,000.

Twelve miles additional have since been completed, and reported as ready for inspection.

The Union Pacific Railroad Company proper commenced work about one year since at a point indicated by the President of the United States, near Omaha City, in the Territory of Nebraska, the contractors obligating themselves to construct 100 miles of the road westward at the rate of $50,000 per mile. The work has been progressing satisfactorily, and it is hoped that that part of the road will be completed within the time indicated by Congress. Some delay, however, has been occasioned by an application of the Company to the President of the United States, for permission to change the location of about twenty miles of the line westward from Omaha City, so as to secure an easier grade, which proposed new location, *if adopted would increase the distance on that section about nine miles.*

As this increase of distance would necessarily call for a larger grant of bonds from the Government than the shorter line, as well as a very much larger amount of land, in short, the apparent pecuniary advantage to the property would be so great resulting for this proposed change and lengthening of line, it induced the Secretary of the Interior to recommend that this change of line should not be approved by the President until its re-examination had been thoroughly made by a competent Engineer. For this end Lieut. Col. Simpson, of the Engineer Corps, was sent to the road, and he is now preparing his report at Washington, which however appears will be of no use.

The amount of subsidy allowed by Congress to these Companies for the least difficult parts of the construction is 12,800 acres of land, and $16,000 in United States Bonds per mile; for three hundred miles of the *most* difficult, to wit, in the Rocky and Sierra Nevada Mountains they are to receive three times that amount, and for the remainder only twice as much. The portion of the Central Pacific road already completed only calls for the smallest quota of subsidy.

Work was commenced on the Kansas branch, leading from Kansas City to the one-hundreth meridian by the Leavenworth, Pawnee and Western Railroad Company, a company authorized by the Territorial laws of Kansas, now known as the Union Pacific Railroad Company, eastern division, under the auspices of Gen. Fremont. But difficulties arising between the personal friends of Gen. Fremont and those of Mr. Hallett, who had negotiated the purchase, the stockholders became divided in their adhesion to these respective leaders, presenting the anomaly of two organizations, each claiming to be the legitimate representative of the Company.

Hallett and his friends, after the work had been some time in progress under the direction of the adherents of Gen. Fremont, succeeded, it is stated, in driving the laborers from their work, being aided by the military under an order emanating from Gen. Ewing, he being, it is said, a large stockholder himself, since which time the Hallett organization, now in other hands, has had the control of the line.

This contract for the construction of the road at $50,000 per mile has been the occasion of some comment. The Government directors, however, while they do not fully justify the action of the Company in making this contract, have given to the Secretary of the Interior this explanation: That the law required certain sections of this road to be completed within a given period. The Company were consequently compelled to commence the work at a time when gold was above 250, and when labor, and iron, and other materials were at a correspondingly high price. Reducing this $50,000, which was currency, to a coin standard, shows the actual cost to be less than $20,000 per mile, which cannot be considered an extravagant cost for a first class railroad in that locality.

They also state that the stockholders advanced the means to the contractor, on private account, to enable him to proceed with the work—that all the stockholders were invited to participate in the advantages of this arrangement, if any should accrue, in proportion to the funds they were willing to advance—and that at the time this arrangement was made they were enabled to induce outside capitalists to advance the necessary means for the prosecution of the enterprise.

A difficulty arose soon after the appointment of the present Secretary of the Interior, between him and his predecessor, Mr. Usher, who has accepted the Presidency of the late Company first known as the Leavenworth, Pawnee and Western, and now as the Union Pacific, Eastern division. The Commissioner, S. J. Crawford, reported to the President favorably on the portion constructed. viz: 38¼ miles nearly; and also on a branch from as the mouth of the Kansas river, in Wyandotte, up the Kansas Valley, for a distance of about 1⅔ miles, the whole making over 40 miles; and thus entitling them to the subvention of money and lands under the law. The Secretary, however did not consider the report strictly conformable thereto, and advised a new Board of examiners. The President at first assented to his suggestions, but subsequently, at the request of the Company, changed his determination; and to avoid delay, permitted additional testimony to be received affirming and enlarging the first report. This testimony was given by the Chief Engineer, and by the officers of the Allentown Rolling Mills, particularly as to the quality and weight of the rails, and was submitted to Gen. McCallum, Superintendant of Military Roads, and was accepted by him as, in his opinion, satisfactory. The President, on receiving it, approved of the original report. At this stage of the proceedings, the Co mpany, known as the Fremont organisation interfered, complained of its ouster by the Hallett organization, as well as the conduct of Mr. Usher; and it is understood that the subvention will not be allowed to be made to the present Company until there is had a full investigation of the merits of the controversy. In the meantime, to prevent all future difficulty as to the claims any Company may hereafter make for the Government lands, the Secretary of the Interior, in a letter to the Commissioner of the Central Pacific Railroad, has laid down the following rules by which all future reports must be made.

DEPARTMENT OF THE INTERIOR,
WASHINGTON, D. C. July 25, 1865,

GENTLEMEN: The Surveyor-General of the State of California, has transmitted to the President of the United States a certified copy of the verified statement of Leland Sanford, esq., President of the Central Pacific Railroad Company of California, in relation to the construction of twelve consecutive miles of railroad, commencing at the termination of the 31 miles of railroad and telegraph line described in the statement made by said Company, August 31, 1864, and ending at the place or town known as "Clipper Gap," in the County of Placer, in said State.

The original statement was filed in the office of the Surveyor-General, pursuant to the provisions of the act entitled "An act to aid in the construction of a railroad and telegraph line from the Missouri River to the Pacific Ocean, and to secure to the Government the use of the same for postal, military, and other purposes, approved July 1, 1862, and the act amendatory thereof, July 2, 1864. I presume, for I have no information on the subject, that you have been notified of the filing of the statement, in order that you may proceed without delay to examine that part of the railroad and telegraph line to which it relates, and report thereon to the President of the United States.

The President must depend on the information embodied in your report to enable him to discharge th duty of determining whether tle Company has complied with the conditions and requirements of the acts of Congress touching the completion and equipment of this particular portion of the road. He therefore instructs me to say that he desires that your report should contain,

First: A statement of the number of degrees of curved and the length of straight lines, the width of embankments and excavations at the grade line, and the rates of inclinations on the slopes.

Second: A description of the culverts, their number and size; whether built of stone, brick or wood; the number and span of open box and arch.

Third: A description of bridges; whether of iron, stone or wood; the plan on which they are built; their number and maximum span; the abutments and piers of each, whether temporary or permanent, and if of stone, brick, or wood; also, the length, height and spans of trestle work, and whether built on curved or straight line.

Fourth: A statement of the number of cattle-guards and road-crossings; the number of rods of post and board and rail fence, and the number of farm gates.

Fifth: A description of the superstructure, containing the number of miles of main track; the number of miles of side track; the weight of the rails per lineal yard; the number of chairs to the mile; the weight of each and whether of cast or wrought iron; the number and weight of spike to the mile; the number of ties to the mile, their length, breadth and thickness, and the kind of timber composing them: the number of miles of main and side track ballasted; the number of cubic yards of ballast to the yard forward, and the kind of material used for ballast.

Sixth: A description of the stations, with the number of passenger and freight houses, machine shops, woodsheds and water tanks, the material of which they are built; the number of engine-houses, the number of stalls in each and the material of which they are built; and a description of the signals, whether plain or "semaphore."

Seventh: A description of the rolling stock, setting forth the number of locomotives, the weight, cost and quality of each, and the name of the works where manufactured; the number of passenger, express, freight, platform, gravel, repair and hand cars, the cost of each, &c.

Eighth: A statement of the number of miles that passenger trains can be run over the said extension per hour with safety.

Ninth: Any other facts that may aid him in forming a correct opinion of the character of the road said to be completed.

You will also transmit with your report a map of this part of the road on a scale of twenty (Gunther's) chains to an inch which shall show the radii and lengths of curves, the directions and lengths of tangents, and a profile of the line on a scale of 500 feet to an inch horizontal, and 25 feet to the inch vertical, showing the ascent or descent of each grade per mile.

I am sirs, very respectfully, your obedient servant, JAMES HARLAN, Secretary,

To F. F. LOW, P. H. SIBLEY, JOSIAH JOHNSON, esqs., San Francisco, California.

Railroad Earnings.--Weekly.

The earnings of the Marietta and Cincinnati Railroad for the 3d week in August, 1865, were:

	1865.	1864.
Passengers	$11,346 05	$12,841 23
Freight	10,025 00	8,853 88
Mail, express & telegraph	1,200 00	1,125 58
Total	$22,571 05	$22,820 69
Total this month to date	70,683 75	61,382 17
Total for the fiscal year commencing Jan. 1	$723,791 93	$616,685 07

The traffic of the Great Western Railroad for the week ending August 25, 1865, was as follows:

Passengers	$37,698 32
Freight and live stock	25,407 68
Mails and sundries	1,745 60
Total	$64,851 60
Corresponding week of 1864	55,255 54
Increase	$9,596 06

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending August 21, were:

	1865.	1864.
Passengers	$3,202 65	$2,813 44
Freight	8,686 23	8,408 22
Express	130 22	104 16
Mail	296 58	296 58
Total	$12,315 68	$11,622 40

Receipts from January 1 to August 21:

1865	$400,377 94
1864	348,894 91
Increase	$51,483 03

The earnings of the Chicago and Northwestern Railway for the third week in August, 1865, were $159,772 88
Corresponding week of previous year. 108,669 46
Increase $51,103 42

The earnings of the Grand Trunk Railway for the week ending Aug. 19, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$54,311 00
Express, freight, mails and sundries	4,036 00
Freight and live stock	58,438 00
Total	$116,785 00
Corresponding week, 1864	109,172 00
Increase	$7,613 00

The earnings of the Michigan Central Railroad for the 3d week in August, 1865, were. $87,418 98
Corresponding week of previous year. 77,972 48
Increase $9,446 50

The earnings of the Chicago and Rock Island Railroad for the third week in August, 1865, were $70,353 00
Corresponding week of previous year. 79,989 00
Decrease $9,636 00

☞ A large and distinguished party of European capitalists are now on their way to New York, for the purpose of examining the Erie and Atlantic and Great Western Railways. The party, who were to leave England in the Scotia on the 26th ult., comprises: Sir Morton Peto, Bart., the English Railway constructor; Monsieur Leon Lillo, Banker, and representative of the Marquis of Salamanca, and the Duke de Reintzeres; James McHenry, Esq., one of the principal promoters of the Atlantic and Great Western; E. F. Satterthwaite, the London Broker; Malton Betts, Esq., of Liverpool; the Hon. Arthur Kinnaird, M. P. from Scotland; the Hon. Charles Warring, M. P.; Andrew Cosschian, Esq., coal miner; the Hon. Michael Belcher of Liverpool, and about twenty others. The party will include about thirty gentlemen, all of whom are more or less interested in the Atlantic and Great Western and Erie Railways. It is estimated that about 90,000 of the 165,000 shares of the common stock of the Erie Railway Company are held abroad. It is not improbable that Messrs. McHenry and Satterthwaite will bring a large amount of proxies for the Erie election.

Railroad from Blairsville to Freeport.

The branch railroad from Blairsville, on the Pennsylvania Railroad to Freeport, on the Allegheny river is completed and ready for use. At Freeport this line strikes that of the Alegheny Valley Railroad, running thence to Kittanning, and now in progress of extension beyond that point to the oil region. This branch having been built by the Pennsylvania Railroad, will be worked by that company as an avenue for the coal, iron and petroleum trade between the Allegheny valley and Philadelphia. Previously all those staples had to go to Pittsburg to find shipping hither. Now the commerce floating down the Allegheny river may find a depot for shipment east at Freeport.

This branch may, and doubtless will, also be worked as a part of a through route between Pittsburg and Harrisburg via Freeport and Blairsville, using the Allegheny Valley Railroad from Pittsburg to Freeport. The overcrowding of the main line of the Pennsylvania Railroad will bring this much into use.—*Phila. North American.*

The Moselem Railroad.

We are beginning to have strong hopes that this important link of railroad will now be speedily put under contract, the President of the Reading Railroad Company having been to this city for the purpose of consulting Messrs. Nicolls and Millholland concerning this matter, who were no doubt able to convince Mr. Smith that the contemplated road will not only pay, but will become a valuable adjunct to the main line of the Reading road. It is proposed to run it through one of the richest iron ore districts in this State, which it will develop to an extent not yet dreamed of, and will be the means also, of sending coal from the Schulkill region to New York, in a few years at most, on equal terms with those from any other region.—*Reading Daily Times*, Aug. 24.

☞ An informal meeting of the President and Directors of the Pittsburgh Maysville and Cincinnati Railroad Company was held at McConnelsville, on the 22d ult. The general interest and prospects of the road were freely discussed, and it was conceded that it is in a fair way to be put on its feet again. The sum of $30,000 has been subscribed at Sharon towards its completion, and much more in other places, it is said.

☞ The Dubuque and Sioux City railroad has been completed to Applington a point twenty-four miles west of Cedar Falls. Trains will hereafter run daily to and from that place.

Intercolonial Railway.

Mr. Fleming's report of the survey of the Intercolonial Railway shows a central route as follows: From River du Loup by way of the River Toledi, Green River, and Gennamitz Valley, thence by Two Brooks, Wapskehegan, the upper waters of the Miramichi and Nashwaak, by the Keswick Valley and St. John River to opposite Frederickton, thence by the head of Grand Lake and Chowan's Gulch to Apobaqui station. It embraces also the section from the New Brunswick Railway to Truro in Nova Scotia. This total sum, divided by the length of line to be constructed, gives an average of very nearly $46,000 per mile. Distance to be built, 340 miles. Estimated cost, $20,635,000; or, with deductions on Moncton to Truro section, $5,200,000 less.

☞ The Pittsburgh and Steubenville, "Short Cut" Railroad is completed, from the Virginia side of the Ohio river, opposite Steubenville, to Pittsburgh. All that now remains to open up a railroad communication between Steubenville and Pittsburgh, via the Pan-handle, reducing the distance to a fraction over forty miles—is the completion of a bridge over the river in Steubenville, which it is supposed will be finished by the 10th inst. ready for business.

PROPOSALS FOR
$1,000,000
GEORGIA CENTRAL R. R.
AND
BANKING COMPANY
First Mortgage Seven Per Cent. Bonds,
OF $1,000 EACH,
REDEEMABLE IN TEN YEARS,
WITH COUPONS PAYABLE IN NEW YORK
1st March and September.

—o—

These Bonds are secured by a 1st Mortgage to MOSES TAYLOR and JAMES ROBB, Trustees, upon the Railroad of the Company from Savannah to Macon, Georgia, (190½ miles). The Trustees' deed has been made under the advice and direction of SAMUEL J. TILDEN, Esq.

The proceeds of the Bonds are required to repair damages to the Railroad sustained by the late invasion of Georgia.

The Georgia Central Railroad and Banking Company constructed its railroad without contracting any bonded debt, and its capital account, represented by shares, amounts to $1,666,800, upon which, for several years preceding the war, its dividends were large, and, in 1860, amounted to 26 per cent. It possesses valuable assets, consisting of bonds and stocks in other Railroad Corporations for over One Million of Dollars, all of which are expected to prove good with a few years of peace.

The Georgia Central Railroad, connecting at Millen and Macon with the entire system of railways in Georgia, the South Atlantic and Southwestern States, is certain to command a traffic of value and importance; and it is not doubted that the active and enterprising people of Georgia will promptly accept the new state of affairs, and at an early day recover the prosperity lost by war.

We commend these bonds to the public as a safe and reliable security, and proposals will be received for the whole or any part thereof until the 10th day of September, when the bonds will be ready for delivery, or at any time thereafter within thirty days, at the option of the bidder, on a deposit of ten per cent.

The right to reject any or all of the bids is reserved, but if any bid be accepted all bonds bid for at a higher rate shall be awarded to the bidders at the rate of the lowest bid accepted.

The bonds will be coupon, with the right of registration, or, by surrender of the coupons, made transferable on the books of the Company, at the pleasure of the holders.

Parties making proposals are requested to address us in writing, and state the amount of bonds desired.

WINSLOW, LANIER & CO., Bankers,
52 Wall street.

Natural Lubricating Oil
FROM THE
HICKORY FARM OIL CO.'S
NEW WELL, NO. 2,
ON WEST HICKORY CREEK,
VENANGO COUNTY, PA.

This company are now receiving oil from the above well, of which they are exclusive owners, and are prepared to fill orders for delivery at this port or at the well.

The oil is of a specific gravity of 32 degrees Beaume, and has been pronounced, by all who have tested it, the best lubricator in the market.

Orders from railroad companies, jobbers and large manufacturers are solicited, and will receive prompt attention. Parties can at all times rely on a pure and uniform article.

Office of the Company, No. 92 Maiden Lane, New York. 3m-27

New York, Saturday, September 9, 1865.

The Iron Mining Regions of New York and New Jersey.—Railroads in Progress.

In the great mineral regions which traverse the counties of Orange and Rockland, in this State, and those of Passaic, Sussex, Morris, Warren and Hunterdon, in New Jersey, many and important improvements, have lately commenced. That section is not as well known as it ought to be, and as we believe it would be, were it situated in Upper Michigan, Colorado, or Missouri; yet ores having no superiority on the globe, as respects richness and strength, abound there, it might almost be said in inexhaustible quantities. The most celebrated of these is probably the Sterling Hill mine, about nine miles north of the village of Ramapo, on the Erie Railway. That hill is half a mile in length, and rises 350 feet above a lake close by, 1,000 feet above the tide level. It consists of one vast deposit of iron ore, so rich that its yield in metal averages fully fifty per cent. After working it for a century and a half, they have done little more than make a few holes in the huge mass. Levels have been driven into the hill across the deposit to a distance of 70 feet, without any appearance of reaching the limit in that direction, any more than of touching bottom downward, at the depth of 160 feet.

About 18 months ago, this property, comprising 22,500 acres of mineral and woodlands, was sold by its former owner, Mr. Jacob Townsend of this city, to a company composed chiefly of Pennsylvanians, and known as the Sterling Mountain Railway and Mining Company. They had a route for a railroad surveyed immediately, and the work put under way. It is now so near completion that it will probably be open by the 1st of next month. One locomotive and a large number of cars have already been provided.

The road is substantially built, the design being to operate it by means of steam-power. The rail used weighs 56 lbs., to the yard. Length of road, eight miles; steepest grade, 150 feet to the mile, the descent being in favor of the passage of heavy freight. It terminates at Sterling Hill, where mining can be carried on for years in open day, by simply blasting the ore and shoveling it, as it falls, into the cars.

The company have also converted one of their two charcoal furnaces into an anthracite hot air furnace, which will be driven by a steam engine of 150 horse power. The whole works are being reconstructed and enlarged. Besides the iron made on the ground, it is also designed to transport large quantities of ore by railroad to Piermont, whence it will be shipped to Pennsylvania to mix with the soft hematite ores of that State.

From Rockaway, on the line of the Morris Canal and of the Morris and Essex Railroad, two branch railways are now in operation. The older of these is five miles long, with numerous branches, and owned by the Mount Hope Mining Co., now a part of the Lackawanna Iron and Coal Co. This road was built seven or eight years ago, to be run on the gravity principle, the grade being 100 feet to the mile for most of its length. The superstructure is light, the rail being not over 30 lbs. to the yard. The gauge is about 40 inches. The frequent repairs called for will probably justify the company in reconstructing it in a more substantial manner. Six trains conveying 250 tons of ore, pass daily over the line between Rockaway and Mount Hope. This ore is shipped by canal to Scranton, Pennsylvania.

From Rockaway another line was built and opened, about two years ago, terminating at the Hibernia mine, with a branch to the Beach Glen. The latter is owned by Messrs. Fuller, Lord, & Co., of Boonton, New Jersey; the former is leased to and operated by the Trenton Iron Co. The road is owned by stockholders in both, and conveys about the same quantity of ore as its Mount Hope neighbor. Its length is four miles. The track is substantially built, and laid with a rail weighing about 50 lbs., so that it can be operated by steam. The gauge corresponds with the Morris and Essex. At present horse-power only is used. It is understood to be sufficiently profitable.

Still another line is in progress near the western margin of Morris county and north of the canal. From Shippingport the summit level of that route, a range of hills, known as Mine Hill or Schooley's Mountain, extends north-east and south-west, containing immense and rich veins of iron ore, though sulphury in places. The most extensive as well as the purest, of these is the Ogden mine, about seven miles north-east from the head of Lake Hopatcong. That property, some time last year, passed into the hands of the Ogden Mining R. R. and Manufacturing Co., chartered by the Legislature of New Jersey, the most of its stock being held in Pennsylvania, and by persons who have an interest in the Glendon Iron Works, to which the ore will be sent.

The new company at once proceeded to make the necessary surveys for a first-class railway to their extensive property; and shortly afterwards set a body of laborers at work in grading the line. Its length will be 10 miles, terminating for the present at a point on the eastern shore of Lake Hopatcong, about half-way down the lake, where there is always a sufficient depth of water. Thence it works its way through a very rugged section of country to the mine, which is nearly 600 feet above the lake, or 1,500 above the sea. It will be laid with a 68 lb. rail, and finished in the most substantial manner, so as to be operated by steam. It is expected to be in operation by the spring of 1866. Something like 150 men and horses are

now at work, and we learn that all the means required for its completion have already been furnished. This road will transport ore for the Weldon, the Ford, the Schofield, and other mines in that neighborhood.

It is in contemplation, however, to extend this line to a point on the Morris and Essex, enabling the owners to transport ore westward during the winter season, as well as by the canal in the summer. To the northward surveys have been made across the mountains as far as the village of Franklin in Sussex county, noted for its immense deposits of zinc and franklinite, which are now worked by three or four companies. The ores or metals have now to be transported by wagon eight or ten miles, either to Andover on the Newton Branch Railroad, or Woodport at the head of Lake Hopatcong. A railroad to those mines would return its whole cost to the companies before five years.

The difficulty in descending the western slope of the mountains would be serious, the best grade being 180 feet to the mile. The company, however, would seem to be as determined as they are quiet in their movements, so that other interests threatened by it are bestirring themselves in the matter. We hear that the managers of the Sussex road have at last been aroused to the necessity of building another branch from their line at Andover, passing through the villages of Sparta, Franklin and Hamburg, and terminating at the State line near Warwick, to which point a branch of the Erie is now in successful operation. This, or the extension of the Morris and Essex, would open a new line between the Hudson at Newburgh and the Delaware at Easton, traversing one of the most beautiful and fertile valleys on the American continent.

We hear that the Morris and Essex company are also taking steps to build an independent line from Stanhope on their road, northward to Warwick, for which they have also the requisite legislative authority. It may be added that a clause in the charter of the Ogden company, empowers them to manufacture iron, as well as dig the ore. It is not improbable that in time the far seeing managers may establish blast furnaces and rolling mills among those iron hills, instead of transporting their ores to Pennsylvania and the iron back to New York for a market.

Still another work of the kind is about to be undertaken in the same range of mountains. A mine known as the "Forrest and Dean," and situated five miles from the Hudson river at Fort Montgomery, having recently passed into the hands of the Poughkeepsie Iron Company, its managers are taking steps for an immediate survey, and the construction of a railway thither. The mine is fully 600 feet above the river, with an uninterrupted descent, so that it is believed the loaded cars can descend all the way by their own gravity. At the landing trestle-work and shutes will be constructed so that the cars can discharge ore directly into the boats. The mine is unusually rich, and will probably yield 30,000 tons of ore annually, after the present year, out of which at least 12,000 tons of first-class iron can be made. The railroad is to be in operation early next year.

☞ The work of laying the track of the railroad between Princess Anne and Salisbury, Md., has been commenced.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley, left at tide water from the commencement of navigation to the 31st ult., inclusive, during the years 1864 and 1865, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1864	556,200	9,933,300	5,537,200	166,100
1865	391,600	4,686,600	7,054,000	174,800
Dec.	164,600	5,246,700	Inc 1,516,800	In. 8,700

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows a deficiency of 1,213,940 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 31st of August, in the years indicated:

	1863.	1864.	1865.
Canal opened—	May 1.	April 30.	May 1.
Flour, bbls	725,000	556,200	391,000
Wheat, bush	10,557,100	9,933,300	4,686,600
Corn, bush	14,685,100	5,537,200	7,054,000
Barley, bush	73,700	166,100	170,800
Oats, bush	5,099,200	4,979,200	5,341,400
Rye, bush	252,200	80,900	282,600
Malt, bush	.....	.....	355,300
Beef, bbls	9,870	5,400	7,190
Pork, bbls	227,000	54,700	14,350
Bacon, lbs	3,371,900	559,300	1,258,100
Butter, lbs	78,300	20,100	52,400
Lard, lbs	18,545,200	1,451,600	1,750,400
Cheese, lbs	368,100	49,100	2,842,800
Wool	58,400	233,600	341,900

Morris and Essex Railroad.

The earnings of this road for the years ending December 31, 1864, have been as follows:

From passengers		$401,684 58
" freight		158,994 19
" mails and sundries		10,085 25
		$570,764 03
Expenses viz:		
Repairs of road, bridge, buildings, etc.	$84,995 88	
Repairs of engines & cars	80,106 45	
Wood, oil and waste	88,003 17	
Operating the road and transporting passengers and freight	115,455 40	
Salaries and insurance	13,554 55	
Government tax on receipts and dividends	16,893 84	
		399,009 29
Net earnings		$171,754 74
Interest on debt	$37,506 08	
Less interest	1,541 41	
		35,964 67
Balance		$135,890 07

Two semi-annual dividends and one semi-annual interest dividend have been made during the year, payable in cash, and amounting to $121,440 12. The directors in their report say:

The construction of the road, from Hackettstown to Phillsburg, contracts for which had been made at the time of our last Annual Report, will, in the opinion of the Chief Engineer, be so far completed as to bring the same into use by the 1st of October next. Additional right of way has been purchased, and a second track laid from Bergen Tunnel to Roseville, thus making a complete double track from Hoboken to Roseville. With a view to the expected requirements of the business of the company, as soon as the whole line shall be completed and in operation, there have been purchased and added to the equipment sixteen first-class Locomotives, twelve Passenger-cars and fifty-eight Freight-cars. Contracts have also been entered into for the delivery, by October of twelve additional locomotives, four hundred eight-wheel coal-cars and ninety eight-wheel freight-cars. An agreement has been concluded with Mr. Edwin A. Stevens, for the purchase of two tracts of land adjoining the company's original purchase at Hoboken, and exceeding it in extent. A portion of these tracts fronts on the river. The settlement for this purchase is to be by a mortgage on the same property.

This addition to the depot facilities at Hoboken, together with the expected completion of the Phillipsburgh extension by next October, and the preparations that have been made in reference to locomotives and coal-cars, lead the Board confidently to expect, that the transportation of coal over the road will be commenced during the coming fall. Of course it will not be practicable at first to transact the full complement of business, for which the line will ultimately be capacitated. The present road east of Morristown was not constructed for such an extensive and heavy transportation as the coal business must become. Hence the Board have anxiously turned their attention to a more feasible outlet for this branch of their anticipated traffic.

A late supplement to the charter authorizes the construction of a branch road from Denville to Boonton; thence through the Great Notch in First Mountain; and thence to connect with some point of the main road, east of said mountain. A survey of this route has been made and adopted, and filed in the office of the Secretary of State.

The examinations have been conducted in the most thorough manner, and the survey made with the utmost care and attention by the Chief Engineer, and reviewed and approved by an engineer of the very highest qualifications. The Board of Directors, from a full and careful consideration of the subject, have been finally led to the conclusion, that the interests of the company will be promoted by constructing this branch. It is advisable that the construction of the section from Denville to Boonton should not be delayed; and that, before the expiration of another year, the other portions of the work be prosecuted under such arrangements as to insure its early completion.

In their last annual report the board stated, that it was proposed to issue three millions five hundred thousand dollars of bonds, to meet the financial requirements of the company, in view of the improvements which were contemplated. This amount of bonds, and also the mortgage on the company's works to secure the same, have been executed; and a portion of the bonds has been issued. The bonds are seven per cent. coupons, redeemable A. D., 1914. The proceeds of those which have been already issued have been expended on the works and in the purchase of iron and rolling-stock. The proceeds of the residue are to be used for completing the extension of the road, purchasing equipments, erecting works at Hoboken, and for other improvements, contemplated for making the road a first-class through route for coal and other transportation.

The mortgage provides for an additional issue of bonds to the amount of one million and a half of dollars, should the necessities of the company require it. This margin will enable the Company to construct the Denville Branch; so that, under any reasonably favorable condition of the monetary affairs of the country, the financial arrangements of the company are adequate to the completion of all their contemplated improvements, with a full equipment for successful operation.

During the year, the capital stock has been increased $1,884,150, and the funded debt $824,500; and the floating debt has been reduced $[illegible]55 879 84.

The net receipts exceed those of the previous year $68,108 88. This result may be regarded as more favorable than could be expected at this time, considering that a considerable portion of the capital has been recently invested for improvements from Hoboken to Hackettstown, in view of the increased business anticipated upon the completion of the road from Easton to New York. And, besides, the line has not yet been into use in a manner to obtain such adequate

turns as may be expected when the whole is completed. In other words, much of the capital has been expended in view of the contemplated business of the Phillipsburgh extension, and not with regard to the present business of the road. The greatly increased rate of expenses, of every kind, during the past year, must also be taken into consideration. The above statement, however, shows, that the local business alone sustains the present road; and may lead us to indulge in the anticipation of a very prosperous and remunerative business, when the entire line shall be completed.

The receipts for the first five months of the current year show an increase over the corresponding period of the year 1864, of $73,772 03.

The expenses show an increase greater than the increase of receipts, being for the same months, $88,685 85, a result which arises from the advance of compensation to all the employees of the company, and in the cost of iron, ties, wood, and every article required in operating the road. Taxes now constitute a large item of expenditure.

The equipment of the road consists of 24 locomotives; 43 passenger, 7 baggage, and 217 freight, etc., cars. Miles run by passenger trains, 189,650; by freight trains, 60,000; by gravel and wood trains, 20,350—total 270,000. Number of passengers carried 1,032,978.

The following statement shows the financial condition of the company, December 31st, 1864:

Capital stock	$3,041,950 00
Funded debt	1,164,500 00
Floating debt	31,200 00
Contingent fund	299,266 07
	$4,536,916 07
Cost of road and appendages	$4,057,275 97
Capital stock N. & B. R. R. Co.	55,000 00
Wood on hand, paid for	18,800 00
Cash and cash items	405,840 10
	$4,536,916 07

Connecticut and Passumpsic Rivers R. R.

The receipts and expenses of this road for the years ending May 31, 1864 and 1865, have been as follows:

Receipts:	1864.	1865.
From Passengers	$130,261 64	$172,385 17
" Freights	165,593 28	240,975 67
" Mails	9,725 00	10,600 00
" Express	2,416 67	3,000 00
" Rents	852 48	1,219 50
	$308,850 07	$428,180 34
Expenses, viz:		
Maintenance of road	$38,980 94	$58,950 77
Motive power	38,081 39	83,664 73
Fuel	10,428 80	28,961 92
Oil and waste	3,258 27	4,306 59
Passenger department.	9,088 38	13,983 61
Freight department	15,417 41	19,498 67
Loss and damage	2,750 70	5,323 36
Repairs of buildings	5,928 39	5,051 70
Insurance	1,736 07	1,495 57
Miscellaneous expenses	15,749 83	22,453 18
	$441,420 18	$243,710 10
Net balance	$167,429 89	$184,470 24

The track and road-bed are in good condition, 17,968 sleepers have been laid, 146½ tons iron re-rolled, and 2,557 rails repaired during the past year.

The increased business of the road has required large outlay for rolling stock during the past year. Locomotive "Clyde," formerly used on the train, has been rebuilt and is now a first-class passenger engine, and a new freight engine recently completed. We have added to our rolling stock the past year, 8 box, 17 rack, and 2 baggage cars, besides thoroughly repairing and increasing the value of the cars on hand at the time of making up our last Report.

In order to keep up our equipments with the increase of business, and to do so economically, an addition to our machine shop at St. Johnsbury of some sixty feet has been erected, and a larger engine procured for motive power; additions have also been made to car houses.

The gross amount of earnings shows a satisfactory increase of business in freight and passengers over any previous year, but the expenses have increased in a greater proportion, owing to the unprecedented high prices of supplies and labor, leaving a net increase of $17,040 35 over the year previous.

During the year $64,000 has been paid for interest on Bonds and to Trustees of the Sinking Fund; also two dividends of three dollars each, per share, on the Preferred Stock, amounting to $95,503 68, including tax on same to government of $4,774 68—also $5,341 for interest on notes.

Two thousand two hundred and eighty-nine shares of old stock have been preferred, agreeably to a vote of the stockholders at the last annual meeting.

The inflated prices of all articles used in railway construction, have prevented any progress being made to give us a connection with Canadian roads, but we may reasonably hope that with a return to something near a specie basis and the prospect that the stock will be remunerative, that sufficient encouragement from capitalists and parties in interest will be given, to go forward and complete the enterprise.

The equipment of the road consists of: 9 locomotives, 8 passenger, 6 baggage and mail, 1 drovers', 110 box, 42 rack, 62 platform, 13 coal, 10 gravel, 26 hand, and 10 wood cars, valued at $170,765. Value of materials on hand, $98,131 13. Miles run by locomotives, 164,794. Passengers carried, 110,275; do. carried one mile, 3,650,854.

TRIAL BALANCE, *July* 15, 1865.

Construction	$2,880,277 39

President.—HENRY KEYES.
Treasurer.—N. P. LOVERING.

☞ The Liverpool *Post* of 26th ult., says: Sir Morton Peto, Mr. James McHenry, Mr. Brassey, jr., and a party of friends leave by the Scotia, today for America. It is their intention to visit the oil wells and inspect the works for the International Bridge which is to connect the American and Canadian lines of railway. Sir Morton Peto has taken the contract for its construction."

☞ The Mississippi Central Railroad will be completed and in running order by the 1st of October.

Interest and Dividends.

The Chemung Railroad Company will pay on demand, at Treasurer's office, No. 9 Broad street, a quarterly dividend of two per cent. free of tax.

The Bay de Noquet and Marquette Railroad Company of Michigan announce a dividend of 3½ per cent., payable at the office of Jos. F. Greenough, 10 Railroad Exchange, Boston.

The Lykens Valley Railroad and Coal Company have declared a dividend of four and one-half per cent., free of Government tax, payable on the 12th instant..

Railroads in South Carolina.

A correspondent of the *Herald* writing from Hilton Head, S. C., August 25th, says that Hilton Head will soon lose its commercial importance, unless one of the several railroad schemes now under consideration, is carried out. There are two principal projects—one for a road from St. Helena, on the opposite side of the harbor, to connect with the Savannah and Charleston road, which would make Hilton Head a sort of suburb of the new city; and the other for a road from this island across Skull creek, and the Savannah and Charleston road, to the Georgia Central road. Both parties are laboring for the roads in which they are respectfully interested very earnestly. Joseph H. Sears, Esq., of the *New South*—one of the oldest and most prominent citizens—is one of the principal workers for the Hilton Head line, and is confident of success. It is estimated that $400,000 will be all the capital required and claimed; that investments will soon prove of almost unprecedented profit. Whether either road is built remains yet to be seen.

Freights and Tolls on Coal.

The freights and tolls on the Philadelphia and Reading railroad were increased 50 cents a ton on the 1st instant. The rates are now as follows:

	To Pt. Richmond.	Phila.
From Port Carbon	$3 08	$3 18
" Mount Carbon	3 07	3 17
" Schuylkill Haven	3 00	3 10
" Auburn	2 90	3 00
" Port Clinton	2 85	2 95

The tolls and freights by canal have been advanced 45 cents a ton—30 cents toll and 15 cents on freights—which would make freights and tolls as follows from Port Carbon:

Tolls from Port Carbon to Philadelphia	$1 63
Freights " " "	1 35
Freights " " New York	2 75

From Schuylkill Haven the tolls and freights are 8 cents a ton less than from Port Carbon, and 18 or 20 cents a ton less from Port Clinton.

Central Pacific Railroad.

A dispatch from San Francisco dated August 29th, says: "The Central Pacific Railroad Company has purchased a controlling interest in the Valley Railroad, extending from Sacramento City to Folsom, thereby securing the central route between Sacramento and Washoe, *via* Placerville, and retaining also possession of their original route to Washoe *via* Dutch Flat. This has been followed by the consolidation of the two stage companies hitherto using both routes over the mountains, and their concentration on the Dutch Flat route. This movement greatly strengthens the Pacific Railroad Company by destroying all opposition, enabling it to charge much higher rates for passage and freight, as will make the completed portion of their road pay handsomely."

The following is the detailed official statement of the public debt, just issued by Hon. HUGH McCULLOCH, Secretary of the Treasury:

The National Debt.

plimentary terms to the services of E. C. Delavan, E. P. Prentice and Richard Franchot, the former Presidents of the company, and the great labor and sacrifices of several of the Directors and other friends of the enterprise in securing its success thus far, and that he hoped before many months to congratulate them upon the final completion of the road to Binghamton.

Albany and Susquehanna Railroad.

By the recent extension of this road its whole traversable length is now 82 miles, leaving 58 to be finished. The part opened is that between Cobleskill and Oneonta, running through Schoharie and Otsego Counties, and a beautiful, productive and picturesque country. On Tuesday, 29th ult., the opening to Oneonta was duly celebrated. A fine train of new cars started from Albany well filled with persons of note; among whom were the principal State officers. At all the principal stations the party was received with due honor, and at the last mentioned place a sumptuous collation was provided, at which appropriate addresses were made. The following were the remarks of Mr. Ramsey, the President, under whose direction the road has been constructed:

In reaching Oneonta it might truthfully be said we had penetrated the "Sequestered Region." Nearly 82 of the 140 miles between, are now completed and in operation through a portion of Albany, Schenectady, Schoharie and Otsego counties. Thirty-seven miles of the track has been laid from Cobleskill to this place since the first of May last. Most of the grading has been done for the next twenty miles to Unadilla, to which point we hope to extend the track by winter. Considerable work has been done beyond that, with the "right of way" secured the entire distance to Binghamton. There is no place of more interest to the enterprise than Oneonta. It was here the first meeting was held that has resulted, thus far at least, in opening this secluded section, and placing it upon a level, to a considerable extent, with other and more favored portions of the State. It was here, in the spring of 1851, that E. C. Delavan and Robert H. Pruyn, of Albany, with Charles Courter and John Westover, of Schoharie, George W. Chase, Jared Goodyear, E. R. Ford, A. B. Watson, of Otsego, and other enterprising citizens, met and formed a nucleus of what has since been known as the Albany and Susquehanna Railroad Company.

Enterprises of this character usually have their trials and vicissitudes; but this seems to have had more than its full share. No one can estimate the labor and toil that had to be gone through with in carrying it forward, except those who have participated in it. In the first place over one million dollars, individual subscriptions to the stock, were obtained in comparatively small amounts; of which, be it said to her credit, Otsego county contributed more, in proportion, than any other part of the line. After this, Albany came forward nobly, and, in addition to a liberal stock subscription, proposed to loan the company one million of her bonds, upon substantially the same terms she had before that made a loan to the Boston road; with this basis, and the bonds of the company, it was supposed, as other roads had before then been constructed, the road could be built. The work was accordingly let and commenced in the fall of 1853. It was continued up to the spring of 1854, when the revulsion came which not only suspended the further prosecution of this work, but almost every other in progress in the country; then came the reaction and the question was settled; the road could not be built without an increase of the stock basis.

It was, at this crisis, determined to increase the stock by town subscriptions. An act of the Legislature was obtained authorizing it, under which about one million was added to the stock, including the Binghamton subscription of fifty thousand. Work was again resumed in the fall of 1858, and has been continued up to the present time.

Mr. Ramsey then referred to the several applications for State aid, and the four several bills passed by the Legislature for that purpose, which were vetoed by Gov. Morgan—to the fifth and last bill passed granting State aid to the enterprise, which, to his honor be it said, received the signature of Gov. Seymour. He referred in com-

Compound int. notes, Act of June 30, 1864.	202,024,160
Total	$684,138,959

The foregoing is a correct statement of the public debt, as appears from the books, Treasurer's returns and requisitions in the department on the 31st of August, 1865.

HUGH McCULLOCH,
Secretary of the Treasury.

☞ The Board of Public Works of Chicago has let the contract of building a tunnel under the river at Washington street, in that city, and the work will be commenced forthwith. The tunnel is to be 1,450 feet long. The estimated cost is $200,000.

☞ The passage of a boat through the Suez Canal and the alleged opening of the canal prove to be a very small affair. It is asserted that, so far from being open, the canal will not be open for three years at least, and the question will then arise how it can be made available for large ships.

California and Columbia River R. R. Co.

We received some time since from a gentleman of high standing in Oregon, a letter on the subject of the California and Columbia River Railroad, and a map showing the route. As we take a deep interest in all such works of internal improvement, and wish great success to their promoters, we give an abstract of the statements contained in that communication, remarking that the project seeks support in the Eastern States, and the personal assistance especially, of our enterprising capitalists in this city.

The Oregon Railroads are as yet in their infancy, none having been actually undertaken through any portion of the State. The company whose title is at the head of this notice, was organized about a year and a half ago for the purpose of presenting its claims to Congress in connection with a similar enterprise in California, the effect of which would be to extend the Pacific Railroad northward through Oregon to the Columbia River and Puget Sound. Col. Barry has fully surveyed the route and made a full report on the subject, of which we gave an abstract some months ago. The line on the map shows a connection with California at the Siskeyou mountains, and runs north parallel to the coast through the 9th standard into the 3d, to Eugene City, and from thence North in nearly a straight line to (at or near) St. Helens on the Columbia, a short distance from its mouth which is its contemplated terminus. Portland, recently described so glowingly by Mr. Colfax, enjoys the present trade of the Willamette Valley. This town is situated on a narrow river bottom on the Willamette River, about 12 miles from the Columbia River, and 115 from its mouth, containing about 4,000 inhabitants. The navigation is much impeded by the sand bars in the summer and by ice in winter, and the navigation is only adapted to vessels of light draught. Those of more capacity have to lighten 12 miles from the Columbia, and employ small steamers and sailing craft, which causes an expense of about $6,000 per month, and the damage to freight is also found to be considerable under these circumstances. It is also said that the work of the mines on the streams emptying into the Columbia is forming a serious obstruction to the navigation, particularly at the mouth of the Willamette. Besides this continually increasing bar, others quite as serious exist, and vessels have sometimes to entirely discharge their cargoes to get afloat. Portland is also surrounded by mountains, and has no back country to support it. At present it is sustained chiefly through the business of the farmers of Willamette Valley, who have to haul their produce and supplies over distances of 20 to 115 miles; and Portland being their shortest distance, they have been compelled to traffic there. But now the question is whether the old wagon route or a railway shall prevail; and the farmers, escaping the charges for lighterage, shall also escape monopolies and enjoy the fruits of their industry. The terminus of this railroad, if it be at Portland, it is contended, will not aid them in this particular; and in consequence two schemes are being agitated, one to make Portland the terminus of the Willamette Valley road, and the other St. Helens further down, thus avoiding all the present obstructions, and being accessible to ocean steamers. This last mentioned plan is being agitated to procure a connection with the line connecting California and Oregon.

Neither will, however, be probably attempted for some time to come without assistance; and will be compelled to seek the aid of Eastern capital. The writer of the communication disavows all personal interest in the matter, but prefers the route of the Columbia and Willamette Valley Railroad from Eugene to St. Helens, for which object an organization has already taken place which has made considerable progress. Its assets are subscriptions by the farmers principally, about $500,000, payable in 2 or 3 years, half a dozen good town sites, including the one on Columbia river of the value of $1,000,000, and 500,000 acres of valuable and productive land, worth even now $1 per acre, to be trebled in value by the making of the road. A transportation company on the Columbia River is expected to add to these resources a million more. It is argued then with much force, that in the hands of a good company and proper management, the road should be able to borrow on its bonds bearing interest in gold all it needs. The road will be only 130 miles in length, and will cost when completed about $4,500,000. Upon this statement the enterprise appears to be not only a paying one, but likely to prove very valuable, and as such we commend it to the notice of those enterprising men who look for investments of this kind.

The map and statements are at their service.

Winona and St. Peter Railroad.

We are enabled to state, on what may be considered reliable authority, that the iron necessary to compete the Winona and St. Peter Railroad from Rochester to Mantorville has been purchased, and that orders have been received here from the President of the company in New York, to commence track laying beyond Rochester at the earliest practicable moment after the arrival of the iron, which is now on the way to this place.

The extension of the road to Mantorville, distant from Winona about 68 miles, will open a home market to large portions of the fertile counties of Dodge, Waseca, Steele, Goodhue, Rice, Freeborn, and even Blue Earth, such as they have never had hitherto, and will consequently lighten the labor of their inhabitants as well as add to their wealth.

The road, we may reasonably expect, will be completed to the point named by the 1st of November, if not before. This will be in time for the greater portion of this year's crops, which are extraordinarily heavy and of the best quality.—*Winona Republican.*

Winchester and Potomac Railroad.

The Government is still running this road from Harper's Ferry to Stephenson's Depot, in a greatly improved condition over former times, having renewed the track with heavy rails in place of the flat ones. There is a probability that the road will eventually go into the hands of the Baltimore and Ohio Railroad Company, and will be continued to Winchester, its former terminus, and perhaps extended to Strasburg.

☞ The Seaboard and Roanoke Railroad, extending from Portsmouth, Va., to Weldon, N. C., 80 miles, will be in running order in a few days. A large gang of workmen is employed putting the road in order, and all the needed rolling stock is on hand.

☞ The dummy engine experiment has now been tried a year in Chicago, and is pronounced successful.

rapidly increasing, and that by the fresh issue of compound interest notes the inflation of the currency was improperly kept up.

It now turns out that there was not a word of truth in these assertions. The Secretary's statement has disproved all these, and we have besides an explanation with regard to the issue of the compound interest notes which also disposes of that matter. It seems that a large amount of these notes had come into the possession of the Government at par as they had been passing, and that instead of reissuing them, others were substituted in their place, so that in the first place the interest on the old issue amounting to more than three hundred thousand dollars was saved and written off, and that the use of an equivalent amount payable at a future day had been retained. In our opinion this was a financial movement of a most opportune and judicious character, and shows the skill of the Secretary in a very striking way.

But a closer analysis shows the following gratifying results: The decrease in debt bearing interest in coin is $352,450, and interest on the same $21,247. The decrease in debt bearing interest in currency $14,678,442, and in interest on the same $1,209,593. The decrease in debt bearing no interest is $13,030,290, and in that which interest has ceased $24,100. It also appears that the aggregate decrease of debt is $28,085,282. Aggregate decrease of interest on the same $2,230,840. The decrease of currency in the Treasury is $38,619,491. Increase of coin in the same $10,097,914. Decrease of balance in the same is $28,521,577. It will thus be seen that this result is in all respects a favorable one. The effect of this is plainly observed in the tone of the market. The Government is seen practically to have left it as a borrower; more than this, its specie balance is $10,000,000 more than it was in July.

Connected with these facts is another, that our 5-20s have advanced in the foreign market, the customs for the week were three and a quarter millions, ten millions in gold are fully counted upon as the receipts of the present month, and we have over 100,000 bales of cotton in this port alone, the arrivals being 28,468 bales the week preceding the present one. In New Orleans the stock on hand at last date was about 90,000 bales. The receipts from internal revenue continue to be large, far beyond the expectations of the most sanguine. On Monday week the receipts were actually $4,200,000 for that day, and now it is admitted in quarters that have for some time been saying hard things against the management in the Treasury department, that it is "in an easier position than there was reason not long since to suppose it would be at this time." An admission which should cause such prophets to cease their predictions. Again the same writers who have foretold a drain of specie, in fact a specie bankruptcy, now admit that in the Sub-Treasury we have a balance of 45½ millions in gold! We trust their apprehensions as well as those of our foreign critics, who have asserted that we could not meet our gold interest, will be allayed. We notice that attempts are being made to array popular feeling against the holders of United States securities, by the cry that they are the aristocracy of the country and should be looked upon with suspicion, when the fact is patent that

American Railroad Journal.

Saturday, September 9, 1865.

Stock Exchange and Money Market.

Since our last we have been put in possession of the official statement of the condition of the Treasury department on the 31st ult.; and we but echo public opinion when we state that it is a most satisfactory document, and sustains the reputation of the Secretary as a man of clear perceptions, good judgment and eminent financial skill. It will have been noticed that it had been given out in advance by a class of journals whose principal object seems to be the disparagement of the National credit and resources, that we should have no statement at all, and it was even proposed he should be called to account for the probable neglect of his duty. It was also asserted by the same journals that the debt of the country was

the last loans have been mostly taken in small amounts by individuals in moderate circumstances, by persons both male and female who have earned their money by labor, and who practise habitual economy. The object of this outcry is nothing more or less than repudiation, and we venture to say such a policy will overwhelm, and justly, any class of men who shall adopt it. The money loaned the Government has from first to last been loaned by the patriotic portion of the nation, and those who have thus far defended the integrity of the country will maintain it.

It appears that for the period between the 31st of December last and the 2d September inst., the foreign imports at this port have been $125,250,992, against $176,498,813 for the same time in 1864, showing a decrease in amount of $53,247,831, and the exports of specie for the same period have been $20,403,559, against $32,166,744 the same time in 1864. At the same time and during the same, the receipts from California have been $11,701,028, against $7,779,452 in 1864, showing an increase of $3,921,571. The customs paid in gold at this port from and including 1st of Janu- last, have been $61,001,937, and the gold interest paid during the same time $24,120,876.

This shows power, resources and ability of the most reliable character, and when the Secretary's present statement gets to Europe, we cannot see why our National securities will not continue to advance. No country in the Old World can show any such record or balance sheet.

In looking over our last foreign files we find that in Great Britain it is now admitted that a large falling off in the crops of the season has taken place. The following extract from a leading London journal clearly shows this apprehension:

"A strange, fickle season for harvest operations is the present. From all parts of the country there are reports unfavorable to the prospect of a plenteous yield. In the markets wheat has advanced two, and in some cases three shillings per quarter during the past week, while the farmers are looking as anxiously for a few days of fine settled weather, as England but a short time since looked for the Great Eastern and news of the Atlantic cable. It is not for the purpose of creating alarm that we refer to this subject; but rather that possible evils awaiting us may be met manfully and as intelligent men should meet them. We are evidently menaced by two calamities. The first is a poor harvest, the second a scarcity of animal food. Our bread and our meat are threatened; and it is difficult to find graver matter for contemplation than this fact affords. Seldom has there been a more trying and ill-regulated year than the present. It has abounded in startling atmospheric phenomena, and sharp alternations of temperature. We have had great heats and intense colds within the twenty-four hours; we have had prolonged droughts, and soaking, destructive rains, while blights of a peculiar nature have swept over the fields and orchards, and injured or capriciously destroyed the fruits of the land.

"Throughout the United Kingdom generally, it is plain that the expectations of a month or so ago have in nowise been realized; and it is not too much to say that while wheat has thus suffered, oats and barley have on many lands experienced a similar visitation of evil. Thus, the prospects of the harvest home cannot be regarded with general satisfaction. Not even the known ability of Lord Palmerston's Government to perform all the beneficent offices for which it takes credit, can fill the granaries with food and make of a deficient harvest a good one. We are in the hands, not of the Whigs and Radicals, but of Providence in this matter. Above all, we must look the entire matter in the face, and not blink truths that are plain to all who have their wits about them."

As this information corresponds with what we stated some weeks since, we consider it is to be relied upon and the consequence must necessarily be that our cereals and provisions must increase in demand abroad, and add materially to our foreign exports as well as affect the price of foreign exchange.

The Money Market continues easy, and we see no reason why it should not. There is undoubtedly more money afloat and in banks, saving and other institutions than can be advantageously employed in the opinion of capitalists. Enormous deposit balances are held by our city banks. The only visible direction just now which capital seems to take, is southward, in the establishment of new steamship lines which are increasing at an unusual rate, and all doing a good business. As European ships have not yet commenced making direct voyages to our Southern ports in any considerable numbers, so far, the business incident to them is almost exclusively confined at present to our own vessels, and of course much to their advantage. This trade is now entirely free and unshackled, and is pursued by our merchants and shippers with great activity. The rates of money continue to be moderate, yet we see occasional signs of a great want of it. Thus on Wednesday morning we noticed an advertisement of a person who offered to sell a good mortgage on city property for $20,000, for $15,000, because he could not wait the time necessary to obtain it by foreclosure.

There is a great opening for investment in several new railways and schemes of internal improvement, the projects being sure of being carried through at some future day if not now. Some of these are offering a high rate of interest in gold. If our railways were managed more for the public than operators in the street they would be more in favor.

In the Southern States there many roads which require renewal, and there are many gaps in long and important lines to be filled up. These deserve attention, since the return to a proper spirit of loyalty there might be much easier, if intercourse and communication should be more generally practicable in those fertile regions.

Railway shares command fair prices with a tendency to remain at present quotations. Good management would cause an advance quicker than anything else. A suspicion of the motives with which they are carried on, destroys the desire of large numbers of persons to hold property in them except for temporary purposes.

Gold remains very steady at about the same line it has held for some time past. There is no demand for shipment, but a considerable one for the customs. There are some who believe that if the Secretary of the Treasury should dispose of 10 millions of notes receivable for customs, and sell them for what they would bring after public notice, he could reduce the premium at once to 15 per cent. Others again maintain that it is of no consequence whether the premium remains where it is, or not, there being full compensation in the abundant means for the promotion of industry of all kinds. We have before us a letter from a Banker of wealth and reputation who maintains this doctrine, but which we cannot accept. In illegitimate speculation there is certainly much activity, but the surplus money now in circulation seems chiefly to employ itself in purely gambling operations in the street, and in wasteful and extravagant expenditure on the part of those who still manage to keep out of prison and carry on their business.

Government securities stand firm and in good demand. These investments are so simple and so secure, so easily handled, controlled and disposed of, the interest is paid so promptly and conveniently, and they are so entirely beyond the reach of defalcations and rogues that it is no wonder they are universal favorites, and have in fact a preference over all other kinds.

Foreign exchange remains without much change. The amount of exports from this port for the week ending September 4 excluding specie was $2,323,000.

The balance in the Sub-Treasury on Tuesday was still large viz., $63,591,407 30.

☞ A letter to the *Tribune* from Brownsville, Texas, dated August 8th, says: "the railroad has now got as far as Boca Chica—that is about 5½ miles from Brazos—and there is an engine on the track to assist in construction. It will be the end of October before the road can reach Brownsville, for all the material has to be brought in transports from Mobile, and there are not many of the latter."

☞ Mr. E. B. Phillips, the Superintendent of the Boston and Worcester Railroad, has resigned his position to accept the Presidency of the Michigan Southern and Northern Indiana railroad company.

Willamette Falls Canal Company.

This is a project somewhat adverse in its character to that we have spoken of in another column. We copy the following from a communication from a respectable source which speaks for itself:

"The business of the company is to construct and operate a steamboat canal around the falls at Oregon City, in the Willamette River. The canal will be about one-half mile in length, and made up of rock excavation for about 500 feet of the length and width of the canal, and at a point where the locks in the canal would be placed. The balance of the canal is simply and easily constructed by running a cobble rock, or cut stone wall from the head of the rapids to the head of the hocks and forming a basin for that distance, a natural basin now existing. The wall to be constructed would be laid on solid rock, need not be more than eight feet in height to raise it above all floods, the opposing wall being a natural one of solid Basalt some twenty feet in height. I of course cannot give you a complete idea without the surveyors' maps and sections; but it having been surveyed by competent engineers, the cost at the extreme is $300,000 in coin.

"The falls which it is proposed to pass, form an impassible barrier to navigation, being 30 feet of a perpendicular fall. The country drained by the river which this will open to navigation, embraces nearly all the agricultural land in the State, of which only about one-tenth is now under cultivation. From the steamboats plying on the river above the falls, and likewise from those connecting below, we make up the estimates of present income to the canal (if now finished,) and they may be relied on. The great Willamette Valley is rapidly filling up with enterprising farmers from the East, and it must be that the business on the river will be greatly increased.

"The canal company desire to borrow the means to build this canal. Everybody out here is running wild after gold and silver mines, and the people are yet poor, so that between the capitalists who think that gold and silver mines offer a better field, and those who loan their money at two per cent. per month, and the farmers who are yet too poor to invest in public works, there is no chance of getting the money here, on such terms as will enable the company to hold on to its valuable franchise. It will be observed here, that the company is organized under a general law which imposes no restrictions or limitations, not even that of common carrier, on our company, so that when our canal is finished we control the navigation of the river, and can add to the revenues of the canal the profits of transportation. (The steamboats have already netted this year, since January last, the sum of $80,000 in gold, on a capital of about $100,000 invested in boats.) We desire to borrow the money in New York to construct the work, either by sales of our coupon bonds or otherwise. The security we can give, is a stock subscription good for $40,000, gold, a subsidy of $25,000 per annum in gold, granted by the State for five years, to be then returned with interest, provided we finish the work by January, 1867, which we can do if we get the funds in season, and a mortgage on the work. We would not want the money faster than expended, receiving it in instalments. We would be willing to have the work inspected by some disinterested and competent man, as the money is expended, and upon the condition that, we should not further draw if we did not conduct the construction and management properly. We can satisfy capitalists that our directory is competent and respectable and worthy of confidence. I enclose prospectus. It will require from $300,000 to $400,000 in greenbacks at present rates in this country. We are willing to pay 8 per cent. interest in gold, payable semi-annually, or ten per cent. in currency, in the same manner. We can of course supply all necessary references, papers, vouchers, maps, estimates, &c., that will be desired by capitalists."

The prospectus alluded to may be seen at this office. It contains estimates of the cost of construction and probable revenue, and some extracts from the by-laws which are stringent against contracts to be made by officers, require publication of the same, and forbid the transfer of stock until liabilities of the holder are first settled.

Central Railroad and Banking Company of Georgia.

A correspondent of the *N. Y. Herald*, writing from Savannah, under date of August 31st, says:

One of the greatest events of the season occurred yesterday—the running of the first train for passengers over the Central Railroad. The road has been completed and put in good running order for a distance of forty-five miles out, to station Four-and-a-half. To that point trains will now run regularly, leaving Savannah at half-past six o'clock each morning. From there passengers will be taken through to Waynesboro, fifty-one miles by stages, and thence to Augusta by train, the whole trip from Augusta occupying only twenty hours. Many thousand bales of cotton hitherto awaiting transportation will now come at once to market. A correspondent informs me that for days wagons loaded with cotton have been arriving at Station No. 4. As soon as the road is completed through to Waynesboro, which is promised before November, the corporation will do an immense freight business.

The work on the Gulf road is being rapidly pushed. We have communication already with the lower portion, which is in running order, by steamers which run regularly between here and Doctortown. The completion of this road will give us direct daily communication with Southern Georgia and with Florida.

The trade with Augusta, even before the opening of the Central road, had materially increased, and is constantly improving.

☞ A communication to the *Tribune*, dated Matamoras, August 14th, says: "It is now settled that the new road to the coast is to run to a port named Carbonero, which lies at the mouth of the San Fernando River, about 45 miles to the south of the Rio Grande. The line of railroad will be about 70 miles long, and the road seems to me to be a set-off against our road from Brazos to Brownsville. I learn that the depth of water on the Bar of the San Fernando range from 8 to 12 feet."

☞ Mr. Walker of Atlanta has been appointed superintendent of the Macon and Western Railroad. The Montgomery and West Point Road was completed on the 13th ult.

☞ Col. Edmund Fontaine, President of the Virginia Central Railroad, has received a pardon from the President.

☞ Col. Enos has been appointed Superintendent of the Nashville and Chattanooga Railroad by the company.

Railroad Earnings---Monthly.

The earnings of the Chicago and Rock Island Railroad Company for the month of August, 1865, were..... $288,095 00

Total	$41,472 10	$32,993 05
Total this month to date	112,155 85	94,375 22
Total for the fiscal year commencing Jan. 1	$765,264 03	$588,295 95

The traffic of the Great Western Railroad for the week ending Sept. 1, 1865, was as follows:

Passengers $41,471 31
Freight and live stock..... 31,339 91
Mails and sundries..... 1,882 38

Total $74,693 60
Corresponding week of 1864 ..... 58,805 45

Increase..... $15,888 15

The earnings of the Grand Trunk Railway for the week ending Aug. 28, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers $56,341 00
Express, freight, mails and sundries.. 4,036 00
Freight and live stock..... 61,391 00

Total $121,768 00
Corresponding week, 1864 ..... 107,510 00

Increase..... $14,258 00

The earnings of the Chicago and Northwestern Railway for the fourth week in August, 1865, were..... $291,176 89
Corresponding week of previous year. 197,590 48

Increase..... $93,586 41

The earnings of the Chicago and Rock Island Railroad for the fourth week in August, 1865, were..... $98,579 00
Corresponding week of previous year.. 98,972 00

Decrease..... $383 00

The Detroit and Milwaukee Railroad traffic for the 4th week in August, was $37,177 00
Corresponding week of previous year.. 33,089 00

Increase..... $4,028 00

Journal of Railroad Law.

CORPORATION BONDS, WHERE PAYABLE.—WHEN INTEREST CEASES TO RUN.

The issue of railroad bonds having many years to run, without specifying a place of payment, is a practice that naturally involves some embarrassment in case the holder does not present them for payment when due, and the company does not wish to renew them. The following case is a very clear illustration of the law in such instances:

This was an action of covenant by Deborah Emlon against the Lehigh Coal and Navigation Company, in which the following special verdict was found by the jury:

"The defendants are an incorporated company, under the act of February 13th, 1822, and its supplements.

"The plaintiff on the 21st of April, 1840, lent to the defendants the sum of $1,900, on the terms set forth in the following certificate:

Lehigh Coal and Navigation Company Loan.

No. 6798. $1900

Lehigh Coal and Navigation Co. Loan.

This is to certify, that there is due from the "Lehigh Coal and Navigation Company," to Miss Deborah Emlon the sum of $1900 payable to her, or her assigns at the expiration of fifteen years from the 1st day of October, 1838, and bearing interest at the rate of 6 per cent. per annum, payable quarterly yearly, viz., on the 1st day of January, April, July and October of each and every year; this amount being borrowed in pursuance of authority granted by the stockholders, and for the punctual payment of which the company is hereby pledged.

Transferable at the company's office only.

Witness the corporate seal of the company, and the signature of the President and Secretary affixed at Philadelphia the 21st day of April, 1840.

Corporate seal.

By order of the Board of Managers.
Joseph Watson, President.

Signed
Edwin Walter, Secretary.

Incorporated February 13th, 1822.

On the 12th October, 1861, the defendants paid to William S. Vaux, the Attorney in fact of the plaintiff under a written power of Attorney, executed at London, September, 1861, the principal of said loan.

"That on the 3d December, 1862, defendants paid to said Vaux, Attorney as aforesaid, the arrears of interest on said loan down to October 1st, 1853.

"That said payments were made without prejudice to either party.

"That the plaintiff on the 1st of October, 1853, was absent from the United States, being somewhere in the central part of Europe, and had been absent from the United States for several years previously, and had no fixed residence in Europe.

"That the loan above referred to was made by the plaintiff through the said William S. Vaux, as her representative.

"That the said Vaux down to and on the 5th of January, 1842, had received from defendants interest on the said loan under a power of Attorney, theretofore given by the plaintiff to one Bartholomew Wistar, which contained a power of substitution, and the said Vaux having been substituted for the said Wistar thereunder.

"That the said Wistar died in or about the year 1842.

"That subsequently thereto, and prior to October 12th, 1861, the said Vaux demanded at the office of the defendant interest on said loan, which had become in arrear since the prior payments thereof, which demand was refused on the ground that the said Vaux had no power of Attorney.

"That said defendants, on and at all times after October 1st, 1851, had in bank cash to their credit sufficient to pay the loan to said plaintiff, principal and interest and all other accruing and payable debts of the said company, but the said defendants did not keep the principal of said loan, or the interest thereof, separate and apart from the rest of their funds.

"That the said company had a known office at No. 122 South Second street in the city of Philadelphia, when the said loan was created, and prior thereto and constantly thereafter, at which office all payments on their account were made by their officers.

"That on the 15th September, 1853, the following notice was published in the city of Philadelphia, to wit:

"OFFICE OF THE LEHIGH COAL AND NAVIGATION Co., Philadelphia, September 15th, 1853.

"Notice is hereby given that the certificates of the Lehigh Coal Navigation Company Loan, falling due on the 1st of October next, will then be paid on presentation of said certificates at this office; and notice is also given, that the interest on all certificates so falling due, will cease on the 1st of October aforesaid.

"By order of the Board of Managers,
"Otis Ammedon, Treasurer."

"That no personal notice was communicated to plaintiff of the contents of said published notice.

"That no demand was made by the plaintiff upon the defendants for payment of principal or interest of said loan other than as hereinbefore set forth.

"That no payments on account of said loan have been made to the plaintiff by said defendants, other than as hereinbefore set forth."

On these facts the learned judge, before whom the case was tried, (Stroud, J.) delivered the following opinion:

"The defendant corporation did not set apart, or in any way retain money specifically to pay either the principal of the loan by the plaintiff to the corporation, or the interest which is claimed. All that is found by the special verdict is, 'that the said defendants on, and at all times after October 1st, 1853, had in bank cash to their credit sufficient to pay the loan of said plaintiff, principal and interest, and all other accruing and payable debts of the said company, but that the said defendants did not keep the principal of said loan, or the interest thereof separate and apart from the rest of the funds.'

"This is nothing more than could be said of any debtor of large means in respect to his business affairs. Money thus placed and kept in bank is entirely subject to the control of the depositor, may be drawn upon by him at pleasure, and constitute the source of general credit. It might also be attached in the custody of the bank to answer any claim or judgment against the com-

pany, whether that judgment had been recovered upon a contract, or on account of negligence or torts. All that the special verdict finds is that the company 'had in bank cash to their credit sufficient to pay the loan of said plaintiff, and all other accruing and payable debts of the said company.' They had no provision for the great risks to which they are continually exposed, of a destruction of their dams and canal, by which they had been brought to the brink of insolvency again and again, nor for the heavy verdicts which are often visited upon corporations for injuries to others through the negligence of their numerous officials and other agents.

"Nothing short of a setting apart specifically, for the benefit of their debtor, so as to be entirely beyond their own control, or subject, under any contingency for their debts or other liabilities, ought to exempt them from a charge for interest accruing upon loan.

"Nothing short of this would satisfy the requirements of the law on the subject of tender, which is referred to by the Court in Miller *vs.* Bank of Orleans, 5 Whart., 503 and 505 as a proper test on a question like the present.

"Fasholt *vs.* Reed, 16, S. & R., 266, and Commonwealth *vs.* Crever, 3 Binn, 121, which are cited by the Court in Miller *vs.* Bank of Orleans; Troubat *vs.* Hunter, 5 Rawle, 257, Martin *vs.* Schaeffer, 9, S. & R., 263; and Hummel *vs.* Brown, 24 P. S. R., 310, are authorities on the same point."

The opinion of the Court was delivered, March 28th, 1864, by READ, J.—The general rule in this state is, that all debts draw interest, the legal rate of which, for one hundred and forty-one years, has been six per cent. This moderate and uniform rate has arisen in a great measure from our short and inexpensive proceedings in the case of mortgages, which securities have formed a permanent standard for other money contracts. There are, however, exceptions to the general rule as in the case of banks, who are the debtors of their depositors, and of trustees who have not failed in the discharge of their trusts. And we must undoubtedly add the cases which the United States and the several States have been prepared to pay their landholders when their loan fell due, of which it is their practice to notify their creditors beforehand. It is true that these Governments cannot be sued except by their own consent, and can therefore impose terms upon their creditors; but this is not the only reason, for it is obvious that they cannot go round the world searching for the individuals to whom they owe money. The result is that these debts are payable at a fixed and known place of payment and at a known period, at which time and place the loanholder is to present his evidence of debt and receive payment. Whether he does or not interest stops from that moment.

Within the present century large loans have been effected by great municipalities, and by canal and railroad companies of large capital, which are assimilated in amount and extent to at least the loans by the State Governments. The city of Philadelphia has a funded debt of nearly twenty-five millions of dollars, and the Pennsylvania Railroad Company has home mortgage debts of over seven million five hundred thousand dollars. Both these large corporations have their known officers in the city of Philadelphia, and the only real difference between their situation and that of a State Government is, that they can be sued. The same rule might therefore be properly applied to them with perhaps the proper condition that they should be able to show that they always had on hand a sum sufficient to pay the principal and any interest that may be due. In the present case the defendants are one of those large canal and railroad companies, whose office and place of business have always been in the city of Philadelphia, and they had in bank, when the bond of the plaintiff fell due, and at all times afterwards, cash to their credit sufficient to pay the loan to the plaintiff, principal and interest and all other accruing and payable debts of the company, but they did not keep the principal of said loan or the interest thereof, separate and apart from the rest of their funds. The plaintiff's bond was dated 21st of April, 1840, for $1900, payable on 1st of October, 1853, with six per cent. interest payable quarterly. No interest was paid from 1842, when her Attorney in fact, Mr. Wistar, died. The plaintiff having no fixed residence, and having no person here authorized to act as agent until by power of Attorney, executed in London in September, 1861, she appointed Wm. S. Vaux her Attorney in fact, who received the principal on the 12th October, 1861, and their arrears of interest up to 1st October, 1853, on the 3d of December, 1862.

On the 15th of September, 1853, the defendants published a notice in the newspapers of Philadelphia, that the certificates of the company falling due on the 1st of October, 1853, would be paid on presentation of said certificates at their office, and also that the interest on all certificates so falling due would cease on the 1st of October aforesaid.

The company were not bound to seek their creditors in a foreign country, (Co. Litt., 210 b.;) and the only difference between us and the Court below is, that we think it was not necessary for the defendants to set apart specifically for the benefit of their debtor, so as to be entirely beyond their own control, or subject under any contingency for their debts or other liabilities, a sum sufficient to cover the debt principal and interest. We are of opinion that the company did not show their willingness and ample ability to pay the debt at all times, and that it was the negligence of the plaintiff only, which prevented her receiving it when it fell due. In Miller *vs.* The Bank of Orleans, 5 Whart., 503, if it had been shown that the acceptors always had in bank a sum sufficient to pay their acceptances, although the balance to their credit was always being used for the general purposes of the business, they would not been held liable to pay interest on it.

Judgment reversed, and judgment entered on the special verdict for defendant.

Mississippi Central Railroad.

The force now employed on the Mississippi Central Railroad, between Holly Springs and Grand Junction, will have completed their work on that section within a week, and immediately afterward the united forces will be brought to operate upon the north section of the road, extending from Grand Junction to Jackson, with the view of pushing the work through with as little delay as possible. Within the space of three or four weeks, it is thought, all necessary repairs will be completed, and the road in good order, and in operation the entire length.

Lebanon and Pinegrove Railroad.

The surveys for this road have been completed and the work will soon be put under contract, with a view to its early completion. The length of the road located from Pinegrove to Lebanon is about twenty-three miles, with a maximum grade not exceeding thirty feet in the mile, against the coal trade, encountered in mounting over the gravel ridge through which the Union canal passes in a tunnel.

The Blue Mountain which is between Lebanon and Pinegrove, is cut to its base by the Swatara creek, through which gap the railroad will pass.

The North Lebanon railroad was built to carry iron ore from the Cornwall Hills to Lebanon, and the Pinegrove road will be built to carry anthracite coal to Lebanon, thereby giving Lebanon great advantages for the manufacture of pig iron, by reason of its proximity to ore and coal. And when the railroad surveyed from Carlisle to the South Mountain Iron Company's vast deposit of hematite ores shall have been completed, those ores will be mixed with the magnetic ores of Cornwall, just as iron ores of New Jersey are carried into the Lehigh Valley for admixture with Lehigh ores.

Lebanon is a most favorable point for the manufacture of pig iron, and must become a place distinguished as well for the quantity and quality as for the cheapness of its pig metal; for Lebanon is near anthracite mines, is close to mountains of magnetic ores, is convenient to richest hematites, and is in the lap of a limestone valley of unrivaled rural beauty and agricultural productiveness.

Railroads in Virginia.

The Superintendent of Construction of the Orange and Alexandria Railroad says the road to Lynchburg is now in full working order for freight as well as for passenger trains, and that the route from Lynchburg *via* Gordonsville is the only one by rail from the former place to Richmond.

Communication by rail is now complete to Staunton and to Lynchburg, and beyond Lynchburg to Bristol, in Southwestern Virginia or East Tennessee.

In a few weeks the road beyond Bristol will be finished, when the railroad communication will be complete to New-Orleans.

Troy and Greenfield Railroad.

The following gentlemen have been elected directors for the ensuing year: Alvah Crocker, Fitchburg; Harry Arnold, North Adams; George Grinnell, Greenfield; Otis T. Ruggles, Fitchburg; James Cheever, Geo. P. Sanger, Levi Rice, Otis Clapp and F. H. Forbes. The Board was subsequently organized by the choice of Hon. Alvah Crocker, President and W. T. Davis, Secretary and Treasurer.

☞ The work on the Allegheny Valley Railroad, between Kittanning and the mouth of Mahoning, is progressing briskly, and will be completed in a few weeks. The survey of the entire route of the road has been completed.

☞ The survey now being made for the railroad between Clearfield and Phillipsburg has established the fact that the summit will be surmounted at an elevation of seventy-five feet to the mile—thus making the grade much lighter than was generally anticipated.

Texas Indemnity Bonds.

The Secretary of the Treasury is now paying the Texas indemnity bonds, so called, which were issued by the United States to the State of Texas under the act of Sept. 9, 1850, when such bonds are presented by loyal holders, with evidence that they have passed through the hands of loyal citizens only.

☞ The public debt of Russia amounts to about $1,450,000,000, one-half of which is non-consolidated, two-thirds of the latter portion being paper money and one-third consisting of Treasury bills and other bonds bearing interest. The annual revenue of the country is nearly two hundred and thirteen millions of dollars.

☞ The interest of the City of Baltimore in the Northern Central Railroad Company was sold on the 1st inst., for $881,000. It is understood that the Northern Central Railroad Company were the purchasers.

☞ A steam street car with a dummy engine is in successful operation at St. Louis, making an average speed of fifteen miles an hour and running without noise or smoke.

☞ Major Thomas Colloway has been appointed President of the East Tennessee and Georgia Railroad, and H. H. Talmadge has been appointed Superintendent,

☞ The Cape Breton *News* says that the capital stock of the Marine Railway Company at North Sydney has been subscribed in full. It is in contemplation to construct two slips at a cost of fifty thousand dollars.

Natural Lubricating Oil
FROM THE
HICKORY FARM OIL CO.'S
NEW WELL, NO. 2,
ON WEST HICKORY CREEK,
VENANGO COUNTY, PA.

This company are now receiving oil from the above well, of which they are exclusive owners, and are prepared to fill orders for delivery at this port or at the well.

The oil is of a specific gravity of 32 degrees Beaume, and has been pronounced, by all who have tested it, the best lubricator in the market.

Orders from railroad companies, jobbers and large manufacturers are solicited, and will receive prompt attention. Parties can at all times rely on a pure and uniform article.

Also, the survey of Estates, Water Powers, &c., and will receive a limited number of Pupils for instruction in their Profession. 3m-33

PROPOSALS FOR
$1,000,000
GEORGIA CENTRAL R. R.
AND
BANKING COMPANY
First Mortgage Seven Per Cent. Bonds,
OF $1,000 EACH,
REDEEMABLE IN TEN YEARS,
WITH COUPONS PAYABLE IN NEW YORK
1st March and September.

These Bonds are secured by a 1st Mortgage to MOSES TAYLOR and JAMES ROBB, Trustees, upon the Railroad of the Company from Savannah to Macon, Georgia, (190¼ miles). The Trustees' deed has been made under the advice and direction of SAMUEL J. TILDEN, Esq.

The proceeds of the Bonds are required to repair damages to the Railroad sustained by the late invasion of Georgia.

The Georgia Central Railroad and Banking Company constructed its railroad without contracting any bonded debt, and its capital account, represented by shares, amounts to $4,666,800, upon which, for several years preceding the war, its dividends were large, and, in 1860, amounted to 26 per cent. It possesses valuable assets, consisting of bonds and stocks in other Railroad Corporations for over One Million of Dollars, all of which are expected to prove good with a few years of peace.

The Georgia Central Railroad, connecting at Millen and Macon with the entire system of railways in Georgia, the South Atlantic and Southwestern States, is certain to command a traffic of value and importance; and it is not doubted that the active and enterprising people of Georgia will promptly accept the new state of affairs, and at an early day recover the prosperity lost by war.

We commend these bonds to the public as a safe and reliable security, and proposals will be received for the whole or any part thereof until the 10th day of September, when the bonds will be ready for delivery, or at any time thereafter within thirty days, at the option of the bidder, on a deposit of ten per cent.

The right to reject any or all of the bids is reserved, but if any bid be accepted all bonds bid for at a higher rate shall be awarded to the bidders at the rate of the lowest bid accepted.

The bonds will be coupon, with the right of registration, or, by surrender of the coupons, made transferable on the books of the Company, at the pleasure of the holders.

Parties making proposals are requested to address us in writing, and state the amount of bonds desired.

WINSLOW, LANIER & CO., Bankers,
31-35 52 Wall street.

Statistics of Iron Mining.

In the Highlands of this State and New Jersey the principal mines occur in two great ranges or systems. Those in the more easterly are the Forrest and Dean, the Greenwood, and the Sterling, in this State; and the Ringwood, on the New Jersey side of the line. For the next 12 or 15 miles of its course no mining operations of any account are carried on at present; but in the same range of mountains in Morris County we find the Beach Glen, the Hibernia, the Mount Pleasant, the Mount Hope, the Richard, the Allen, the Swede, the Irondale, the Byram, the Dickerson and other mines—all within a breadth of two miles from northwest to southeast.

The Forest and Dean is five miles from the Hudson River at Fort Montgomery, with which it will shortly be connected by a railroad, five miles long, with a descent of 600 feet. This property was recently purchased by the Poughkeepsie Iron Company, who are making improvements with a view to making the mine more productive than formerly. Since the 1st of May about 2,500 tons of ore have been taken out and shipped. The number of miners now at work is 25, and about 20 others are engaged in making repairs. The vein worked is 60 feet wide at the depth of 135 feet perpendicular. Iron made from it of the best quality.

The Greenwood mines comprise three—the Bull, the Surebridge, and the O'Neill—the last yielding a celebrated ore. These, with a tract of 8,000 acres of land, and an anthracite and a charcoal furnace, are owned by Messrs. Robert P. and Peter P. Parrott, whose guns, manufactured at the West Point Foundry, have been in the habit of *speaking* for themselves to some purpose. The product of these mines last year, was about 20,000 tons, out of which were made 6,800 tons of metal. The anthracite furnace is now idle, but preparing to resume. Number of miners now engaged, about 75; and the whole force of employes is nearly 200.

The Sterling mine has lately been sold by Mr. P. Townsend to a party of Pennsylvania capitalists, known as the Mount Sterling Railway and Mining Company, who are constructing a first class railroad to their principal mine, to be operated by steam. They are also converting a charcoal furnace into a hot blast anthracite, to be driven by a steam engine of 150 horse power. Product of the works, last year, about 8,000 tons of ore, or 3,500 of metal. The number of employes in all departments, except railroad building, is about 135. Mr. Chas. T. Ford is Superintendent.

The Ringwood mine, with two forges, belongs to Messrs. Cooper, Hewitt & Miller, who purchased that extensive tract from the Trenton Iron Company. A branch Railroad to the Erie is in contemplation. Quantity of ore taken out last year, about 2,000 tons. Mr. Philip R. George is Superintendent.

The Beach Glen, the Swede, the Orchard and the Mt. Pleasant mines belong to Messrs. Fuller, Lord & Co., whose extensive works are at Boonton. Number of employes, about 120; quality of ore taken out last year, about 24,000 tons. Mr. Robert Oram is Superintendent, and in his absence, Mr. Joseph Richards.

The Hibernia mine is leased by the Trenton Iron Company. A substantially built railroad connects the works with the Morris Canal at Rockaway, four miles. Raised, last year, between 15,000 and 16,000 tons of ore. Number of empioyes, about 40. Mr. Richard George, Superintendent.

Another mine on the Hibernia tract belongs to the Glendon Iron Company, who employ about 125 men; raised, last year, nearly 20,000 tons of ore. Mr. George Richards, Superintendent.

The Trenton Iron Company own the Allen, the Dell, the Rosedell, and one of the Hurd mines. Quantity of ore taken out, last year, about 20,000 tons. Number of employes now, about 20, three of these mines lying idle. Ore shipped to Philipsburg, where are the company's blast furnaces. It is thence sent to the rolling mill at Trenton.

The Mount Hope mine, with a railroad four miles long, belongs to the Lackawanna Iron and Coal Company, who transport the ore by canal and railroad to Scranton, Pa., where it is converted into pig and bar iron. Number of employes, about 350, under the superintendence of Mr. Richard Stevens. Quantity taken out last fiscal year, 58,572 tons, of which 7,260 were raised in June. Included in the above, are the products of the Taylor, the Febo, and the Brannin mines.

The Thomas Iron Company, of Pennsylvania own the Richard mine, which turned out about 19,000 tons last year. Mr. D. Jenkins is the Superintendent. Number of employes at present, about 75.

The Irondale mines, half a dozen in number, lie on the south side of the Morris Canal and the Morris and Essex Railroad. They belong to the Sussex Iron Company, who sell the ore to various interests. The number of employes is about 70; quantity of ore raised in 1864, about 25,000 tons. Mr. John Hance is Superintendent.

The Lehigh Crane Iron Company of Pennsylvania own the Randall Hill mine, under the management of Mr. David Jenkins, with 25 men, who took out 4,500 tons last year; also the Hilts, the Solomon, and a few others in the western range. Most of these are for the present doing little.

The Dover Iron Company own the Byram mine, the deepest in New Jersey, the incline reaching to 550 feet without any appearance of exhaustion.

A magnificent steam engine of 100 horse power has just been put up on the property, under the directions of Mr. Charles King. Nothing has been done here for some years; but operations will soon be resumed.

The Allentown (Pa.) Iron Company lease and work the Dickerson mine, one of the richest and best in the country, which yielded, last year, 12,000 tons, and is still keeping up to that figure. Number of employes, 72, under the general superintendence of Mr. Canfield, assisted by Mr. W. F. Potter.

The Bethlehem (Pa.) Iron Company, own or lease the Logan mine, which yields about 500 tons annually; also the Birch and Wilkinson mines on the western range. About a dozen men in all are employed in these works.

The principal mines in that range are the Hurd, the Weldon, the Schofield, the Ford and the Ogden.

The first of these, on the northeastern shore of Lake Hopatcong, is leased by the Glendon Iron Company, who employ about 45 men. Took out, last year, 13,000 tons. Mr. George Richards, Superintendent. This year the product is expected to be only 10,000. There are two principal veins on this property, each from 6 to 10 feet thick, and somewhat sulphury, especially near the surface. The Ford mine, also leased by the same company, is now idle; last year shipped 2,200 tons, besides a considerable quantity which could not be sent off.

The Schofield mine, also idle, is owned and operated by the Lehigh Crane Iron Company, who shipped about 4,000 tons in 1864. This and the Ford are expected to resume shortly.

The Weldon is an old mine, which lately passed into the hands of a gentleman in Morristown. At present, about 30 men are at work, mostly sinking shafts and driving levels. Took out, last year, about 4,500 tons.

The Ogden mine is the most valuable on that whole range. It belongs to a company of Pennsylvanians, known as the Ogden Mining, Railway and Manufacturing Company. As implied by this title, they are constructing a first class railroad, 10 miles in length, from Lake Hopatcong to their property, to be operated by steam. They are also authorized to extend it in both directions, and engage in the manufacture of iron. No ore is being raised at present, on account of the difficulty of transportation. Last year, employed about 25 men, who took out 35,000 tons. Mr. George Richards, Superintendent. These veins, five in number, are entirely free from sulphur, and yield iron of the best quality.

Besides the works mentioned above, are probably a dozen others, each employing about as many men in brisk times, but for the most part now idle. They are owned by individuals, who sell the ore at the pits or on the canal.

At Potchuck, a few miles north of Franklin Furnace, are beds of *hematite ore*, believed to be quite extensive. More than a dozen years since, they were worked by the late Col. Edsall, who mixed with that variety of ore the magnetic kind obtained in the hills to the eastward. The product was an article which commanded the highest prices in market. Since his death, however, the works (such as they were,) have lain idle. The lack of sufficient railroad facilities is one of the chief drawbacks to the full development of this property. It is understood that a gentleman from Franklin Furnace is preparing to reopen that valuable deposit; and doubtless it will be turned to good account, if any of the three or four projects for building a railway along that beautiful valley are carried into effect.

From the statements given above it will be seen that seven-eighths of the iron ore mined in New Jersey are transported westward to be manufactured at points along or beyond the Delaware, the pig or bar iron to be re-shipped eastward to New York. The arguments advanced for this roundabout process, is that it is less costly than to ship to the iron fields of New Jersey the brown hematites of Pennsylvania, which do not ordinarily contain more than 25 or 30 per cent. of metal; while the ores of New Jersey contain from 50 to 70. Again, as it takes fully three tons of coal to mix in the furnace with two of ore, it is alleged the balance would be against any change in the situation of the works, or any transfer of the manufacture to this side of the Delaware.

But the fact that hematite already exists in New Jersey, within six miles of one of the richest and most extensive mines in the State, must suffice to neutralize the first part of the argument.

The cost of conveying coal to the iron would be little heavier, if anything, than that of conveying the ore in one direction, and the manufactured iron in another; and the difference would be fully made up by the saving of time, which is money.

But the grand consideration in favor of establishing anthracite furnaces in New Jersey and this State is, that millions of tons of ore, in mines which are now considered too lean to be profitably worked, would at once be available, their quality being as good as any, though the proportion of metal to ore is comparatively small. Few establishments in the country can boast of having enjoyed greater prosperity than the Boonton works, which make use of some ores not yielding above 25 or 30 per cent. If practical iron makers from Pennsylvania see fit to establish an anthracite furnace at Sterling, there are few other points in the Highlands where coal can be delivered more cheaply; consequently where the elements of success are within as easy reach.

THE ZINC AND FRANKLINITE MINES.

These ores are found in a range of hills, consisting chiefly of white crystaline limestone, and lying to the westward of the Highlands. The vein is first found at Sterling Hill, about four miles north of Sparta, extending from the north for three miles to Franklin Furnace, where it bends to the east in the direction of the mountains and disappears. At their highest summits these hills are only about 300 feet above the valley. Geologically, they form the boundary line between the primary gneiss, granite, &c., on the east, and the blue limestones on the west. At Sterling (which is not to be confounded with that near the Ramapo Valley,) the zinc and franklinite form two distinct beds, leaning against the southeast face of the hill, for about 160 feet above the valley. The dip of these veins is toward the southeast, and at about the angle usually found in iron mines. The principal shaft has been sunk 300 feet below the river, or 460 feet from the highest point.

The veins are two in number, separated by a smooth joint, the zinc lying to the east and the franklinite forming its foot-wall. The former is from 2 to 12 feet in thickness; the latter, from 5 to 15 feet. The former yields a greater proportion of zinc; the latter yields more iron. In point of fact, the zinc is mined and manufactured chiefly for the sake of the zinc; the franklinite, for sake of the iron contained in it. The zinc ore yields, on an average, about 25 per cent. of iron to 30 or 35 of zinc; the franklinite, about 30 per cent. of the former to 20 of the latter, when tested in the crucible.

Operations are now carried on by two companies, the Passaic and the New Jersey Zinc Companies. The former employ about 20 men, their works being situated at the southeast extremity of the vein; the latter, about 150, under the superintendence of Mr. John George. Works at Sterling Hill and Franklin Furnace. The former company transport their ores to Jersey City, where the zinc and iron are separated; the latter to their furnace at Newark. The products of the New Jersey mines, last year, amounted to about 7,000 tons, a rate which promises to be sustained, if not exceeded in future. Both companies are compelled to convey their ore long distances by wagon to reach the canal or the railroad.

There are other iron mines near Wawayanda, Warwick, and further northward, employing in all perhaps 100 men, the products of which we have been unable to gather.

RECAPITULATION.

We are now able to sum up the numbers of men employed at present, and the quantities of ore raised last year, which will be found nearly as follows:

Owners.	No. Employes.	Product of ore in tons.
Fuller, Lord & Co.	120	24,000
Poughkeepsie Iron Co.	45	.....
Parrott, Brothers	200	20,000
Sterling Mining Co	30	8,000
Cooper, Hewitt & Miller	250	4,000
Trenton Iron Co.	60	35,500
Glendon "	170	36,500
Lehigh Crane Iron Co.	25	11,500
Bethlehem "	12	1,000
Allentown "	72	12,000
Sussex "	70	25,000
Ogden Mining Co.	..	3,500
Lackawanna Iron & Coal Co.	350	58,500
Thomas Iron Co.	75	19,000
Dover "	15	.....
Others	150	60,000
Totals	1,644	318,500

Besides nearly 10,000 tons of zinc and franklinite ores, employing 200 men.

In addition to the number of employes given above might be reckoned those engaged in the Boonton works, now about 300, but in ordinary times nearly 600; also those in the numerous forges and other iron works in Sussex, Morris and Passaic Counties, amounting to at least 250 in ordinary times, but at present barely half that number. This would make the present aggregate of men about 2,500. Besides these are teamsters, boatmen, wood-choppers, &c., all dependent on the iron manufacture. Respectable as is the whole number, it is far from being what it might be, if the people of New Jersey were as wide-awake to their own interests as are their neighbors west of the Delaware.

Imperial Mexican Railway.

The report of the directors states that the works of this important enterprise are being executed by the contractors with vigor and despatch. The section between Vere Cruz and Paso del Macho, a distance of 48 miles, has been opened for traffic several months. The number of workmen employed upon the construction of the whole line has averaged daily 5,820, and in a few months the number of men will be doubled. The directors have arranged with the contractors for the completion of the railway between the city of Mexico and the junction with the Puebla branch in May next, and for completing the branch line to the city of Puebla in a few months afterwards. There will under this arrangement be opened for traffic not less than 160 miles of railway about this time next year, the greater part of which is expected to be worked at moderate cost. The population of the city of Mexico is about 500,000, and of Puebla 150,000. The gross amount of traffic earned on the two portions of line now open is exceedingly satisfactory under the circumstances. Upon the section from Vera Cruz to Paso del Macho the gross receipts from the 24th March to the 10th of June had been £19,684, and on the suburban line from Mexico to Guadalupe—3¾ miles—from 21st August, 1864, to 31st May, 1865, £5,143.

Boston, Concord and Montreal Railroad.

The receipts and expenditures of this road for the years ending March 31, 1864 and 1865 have been as follows:

Receipts:	1864.	1865.
From passengers	$113,868 59	$147,850 41
" freight	185,066 58	245,751 14
" mails	10,207 52	10,188 02
" express	3,000 00	3,500 00
" miscellaneous	1,281 20	1,098 79
Total receipts	$313,423 89	$408,388 36
Expenditures, viz:		
Maintenance of way	$61,718 00	$102,693 36
" motive power	34,844 23	50,765 42
Cost of working road	56,668 18	75,980 42
" management	6,601 55	7,790 93
Miscellaneous	18,181 76	29,751 31
Total expenditures	$178,013 72	$266,981 44
Net balance	$135,410 17	$141,406 92
Balance from last report	9,171 21	48,630 25
Interest received	1,504 00	3,003 00
Total income	$146,085 38	$193,040 17
Appropriated as follows:		
Paid coupons	$68,272 12	$61,003 96
Trustees of sinking fund	12,500 00	12,500 00
Patent rights, etc	1,417 50	2,325 00
Pemigewasset House	10,000 00	6,000 00
Materials, more than last year	2,201 50	5,996 10
In hands of superintendent more than last year	3,164 01	15,214 10
Cash on hand	48,630 25	90,001 01
	$146,085 38	$193,040 17

The receipts of 1864 exceed those of 1863 $66,-144 46; the expenses, $50,080 41; and the net receipts, $16,064 05.

Compared with 1865, the receipts of 1864 show an increase of $94,964 47; with an increase in expenditures of $78,967 72—making the increase in net receipts of $5,996 75.

The amount paid for taxes in 1863 was $4,799 18; in 1864, $10,300 38; in 1865, $18,975 81.

In the report of 1863, it was stated that this corporation had taken an interest in the new hotel at Plymouth, sufficient to insure its being kept as a first class house. The amount charged to that account in 1864 was $10,000; in 1865, $6,000.

The contract with the White Mountains Railroad expired February 1, 1864. The directors have made a new contract for the use of that road for 20 years from that date. The report says:

The high price for all materials and labor has largely increased the cost of working the road the last year. We have paid an increase of taxes this year over last year of $8,674. We have purchased and re-rolled 177 tons of iron, and laid 15,333 sleepers more than last year. Have purchased 10 new platform cars; besides building, and making more repairs to both freight and passenger cars in our own shops.

The motive power, freight and passenger cars are all in as good condition as last year.

The roadway and superstructure, when we have laid 100 tons of new iron, which will be done in the month of May, will also be in as good condition as last year.

The extended mortgage bonds ($500,000) become due in August next. We have the means to arrange for a part of these bonds, and we propose to the holders to give them in exchange the sinking fund bonds due in 1889. The redemption of these sinking fund bonds is provided for by a sinking fund, to which $12,500 is paid annually, and which, with the interest now amounts to $137,800, and will absorb all the bonded debt of the road before it becomes due. This makes these bonds the safest and most desirable security to be had. We also invite the stockholders to take their share of the amount, as it is all-important to them to have this debt arranged; for as soon as this is done there can be regular dividends made on the stock.

The number of passengers carried in 1863 was 86,430; in 1864, 105,322; in 1865, 115,356. Tons of freight carried in 1863, 42,706; in 1864, 50,032; in 1865, 51,583.

The following statement will show the financial condition of the company on the 31st of March, 1864 and 1865:

	1864.	1865.
Construction	$2,850,000 00	$2,850,000 00
Wood & oil on hand.	8,400 65	5,695 91
Stock, etc., on hand.	18,248 11	26,948 95
Bonds on hand	800 00	800 00
Trustees of S. F.	89,000 00	101,500 00
Pemigewasset House.	10,000 00	16,000 00
Superintendent	14,931 60	30,145 70

	$3,060,010 61	$3,141,091 57

President.—JOHN E. LYON.

Directors.—John E. Lyon, Holmes Hinkley, Alexander H. Tilton, Joseph P. Pitman, John L. Rix, John A. Parks, Joseph W. Lang.

Superintendent.—J. A. DODGE.

Treasurer.—EDWARD D. HARLOW.

☞ Six miles of the iron on the Cape Cod Central Railroad are laid, and construction trains now run within three miles of Harwich Centre.

Railways in Switzerland.

It appears from a report of the Minister of the Interior of the Helvetic Confederation that at the end of 1864 Switzerland had 818¾ miles of railway in operation, while a further length of 57½ miles was in course of construction. The State had also accorded concessions of other lines to the extent of 115⅝ miles. Swiss railways have not been very brilliant successes in a financial point of view, but it appears that 565 yards of line had, nevertheless, been constructed at the close of last year for every 1,000 inhabitants.

Albany and Susquehanna Railroad.

The following gentlemen have been elected directors of this company for the ensuing year: Joseph H. Ramsey, Jacob Leonard, Peter Cagger, Edward C. Delavan, Albany; Charles Courter, Cobleskill; John Westover, Richmondville; John Cools, Worcester; Jared Goodyear, Colliersville; Eliakim R. Ford, Oneonta; Arnold B. Watson, Unadilla; Louis Northrup, Centre Village; Alonzo Everts, Binghamton; Daniel Drew, New York.

At a meeting of the Directors, Joseph H. Ramsey was chosen President, and Jared Goodyear Vice President for the ensuing year.

The Colebrookdale Railroad.

A corps of engineers are now engaged in locating the route of this proposed new railroad, which is to run from Pottstown to Boyertown, and thence to a point on the East Pennsylvania Railroad. The road will undoubtedly be built. A meeting of the stockholders and all parties interested in this enterprise, is to be held this afternoon at Boyertown, for the purpose of taking measures to raise the sum of money required to place the road under contract.—*Reading Gazette, Sept.* 2.

Railways in France.

The French Chamber of Commerce has just published the annual statistics of railways in France. According to this document it appears that 12,417 miles of railway were conceded in that country up to Jan. 1, 1865, and 8,113 miles opened for traffic. The fastest express train is that between Paris and Marseilles, which performs the distance (536 miles) at the average rate of 35.05 miles an hour.

Another Railroad in Chili.

Henry Meigs, of California notoriety, has closed a contract to build a railroad from the port of Tougal to the mine of Tamayo, in Chili. The contract stipulates that if Meigs fails to complete the road in eighteen months, his bondsmen are to pay the company $10,000 for each month after the time fixed upon for its completion. If completed before the time, he is to receive $10,000 a month for all time in advance of the time set.

☞ The exports of Specie from the port of Boston during the first seven months of 1865 were $1,301,798, against $300,971 in the corresponding period of 1864; and the imports, $97,-634, against $58,721—the increase in exports being $1,000,827, and in imports $38,913, making the excess of exports over imports $961,914.

☞ The receipts of cotton at Savannah during the months of July and August were 28,220 bales; and the exports during same time, 20,778 bales—stock on hand September 1, 1865, 4,241 bales.

☞ News from New Westminster to the 5th inst., *via* San Francisco, 7th, says the telegraph is now completed 370 miles northward from that place.

Right of Bondholder of Railroad Company to Convert Bonds into Stock.

This interesting question is discussed at length in a late case in Pennsylvania. The court held that where by the terms of a Railroad bond, a period was fixed within which it might be converted into stock at the option of the holder, an agreement for the extension of the time of payment before maturity of the bond did not extend the right of conversion after the time limited. The plaintiff Henry H. Mullenburg set forth in his bill, that he was the owner of two bonds of the defendants, the Philadelphia and Reading Railroad Company, issued in 1844 payable July 1st 1860, secured by a mortgage; that there was a stipulation in them that the holder, at any time before the 1st of July 1860, should be entitled to convert the principal sum into the capital stock of the company, at the rate of $50 for each share, on surrendering the bond with the dividend warrants annexed; that before maturity, the company issued proposals to renew the loan, and the contract securing it; that among the inducements offered was this: that the holders should retain their bonds in the precise condition that they were in, the defendants proposing to extend them for twenty years; that one of the conditions or terms of the original contract was the right to convert and participate in the increased value of the corporate property; and that this as well as all other stipulations was included in the proposed extension; and that if it was not intended to be included, it should have been distinctly excluded; that with the proposal, the defendants sent a printed form for assenting, which the complainant signed and received the bonus; and that his bond was stamped as extended, and the coupons for future interest received; that defendants now refuse to comply with their agreement to issue stock in exchange for bonds, and declined doing so on demand. Praying for a decree compelling defendants to receive the bonds, and issue certificates for shares of their capital stock at $50 per share as shall equal the amount of the bond and unpaid interest, &c.

The answer of defendants admitted that the complainant is the holder of two bonds issued by these respondents; that the copy annexed to the bill was a true copy thereof, and that they agreed as therein; that they may, if the complainant be thereto entitled, have authority to issue additional capital stock, but as the same was matter of law, they referred to their charter and the various supplements thereto, and submitted the same to the judgment and decree of this court; that a large number of bonds issued to raise money for the construction and completion of the said road become due and payable on the 1st of July A. D. 1860; that it was not then convenient for these respondents to make payment of the whole thereof, and that they desired to obtain an extension of time for twenty years, from the holders thereof; that accordingly they issued and published in the newspapers, and in the form of a circular, addressed to the bondholders a paper, a copy of which was annexed to the bill, which paper was accompanied by the opinion of counsel, and the form of the proposed contract; that at the time of the issue of the said circular, and at the time of the signing of the contract by complainant and other bondholders, as hereinafter mentioned, the market value of the stock was from $19 to $19 50 per share, nor was it nor could it have been anticipated that the market value thereof would increase as it has done, to the sum of $64 25 per share; but they desired that the right of conversion of the said bond into the capital stock of the company was or could have been deemed a right of any substantial practical value at that time; that the complainant with a full knowledge of the facts set forth in the said circular, and of the terms of the agreement proposed for his signature, afterwards, viz., on the 31st of January, A. D. 1860, came to the office of the said company, executed and delivered the contract mentioned, received the cash payment with the sheets of coupons referred to, and had his bonds stamped; that the said contract, so sealed and delivered, was the final binding obligation between the complainant and the respondents, and by the terms and provisions thereof they submitted that he and they are absolutely and exclusively bound; that by the terms of the said contract complainant is not entitled to convert the said bonds into the capital stock of the said corporation; that the value of the stock of the corporation respondent in the market is $57 per share, and that the very large amounts thereof are sold and purchased in the full faith and belief that the extended bonds, such as those held by the complainant, sell in the market for the sum of $110 for each $100 thereof, while the other bonds of the company, due and payable in the year 1866, and having the right of conversion have sold and do sell for the price of about $120 for each $100 thereof, that they are ready and willing to do and perform whatever in equity or justice can be required of them, but believing that they are not in good faith bound to comply with the request of the complainant, and that it would be great injustice to those who have purchased other securities of the company as above expressed; they prayed to be hence dismissed with their reasonable costs.

The circular issued by the company was as follows:

"Office of the Philadelphia and Reading R.R. Co.
"January 1860.

"The holders of bonds of this company, due July 1st 1860, can now receive upon application at this office 10 per cent. cash, upon the terms specified in the circular attached.

"The holders are also entitled to the benefit of a sinking fund of $140,000 per annum, as established by the stockholders at their annual meeting, held January 9th 1860, and in pursuance of the contract, entered into by the company and duly recorded, to carry the same into effect.

"S. Bradford, Treasurer."

"Circular."

"Notice to the holders of Philadelphia and Reading Railroad Co. Mortgage Bonds due July 1st 1860.

"These bonds are secured by the first mortgages on the road amounting in the aggregate to $8,308,400. The net revenue for the last fiscal year was six times the amount of the annual interest on these bonds.

"The managers propose to extend them for a period of twenty years, the holders retaining the bonds, and the security of the mortgages in the precise condition in which they are now held. Fresh sheets of coupons for the interest, payable half yearly will be issued.

"A bonus of 10 per cent, will be given to the holders, in consideration of their assenting to the extension. This bonus will be paid in cash to the bearers of the bonds, on their signing a receipt and presenting their respective bonds at the office of the company, or to its agents, for indorsement.

"Forms of receipt and endorsement will be furnished on application.

"By order of the Board of Managers,
W. H. McIlhenny, Secretary."

The contract executed by complainant was in these words:

"The undersigned holder of $2,000 of the bonds of the Philadelphia and Reading Railroad Co., due 1st July 1860, and numbered 126 and 1,425, of $1,000 loan, 1844–'60, and secured by a mortgage, dated the 16th day of January, A. D. 1844, does in consideration of the payment in cash of a sum equal to 10 per cent. of the amount of said bond, the receipt whereof is hereby acknowledged, hereby agree with said company, that if the interest upon the said bond shall be well and punctually paid, upon demand and presentation of coupons, that the time of payment of the principal of said bond shall be extended to July 1st 1880.

"And the undersigned acknowledges to have received from said company, two sheets of half-yearly coupons or interest warrants, for the interest upon said bond which will be due and payable from July 1st 1860, to the time to which they are hereby extended, and upon presentation of the appropriate coupons the interest is to be paid. If the interest thus payable is in default, the bond thereupon becomes due, and this extension void.

"Nothing herein contained shall prejudice, in any manner whatsoever, the security for the payment of said bond given by said mortgage.

"Witness my hand and seal, this 31st day of January, A. D. 1860.

H. H. Muhlenberg. (seal.)

Witness: "John Walker, Jr."

On hearing the learned judge at Nisi Prius, without delivering any opinion, dismissed the complainant's bill; which was the error assigned.

The opinion of the court was delivered March 10th 1864, by Thompson, J.—It was optional with the complainant, by the terms of the bonds, the subject of this bill, to have converted them into stock of the company any time before the 1st July 1860. If the election were not made within that period, neither at law nor in equity could the company be compelled to submit to this conversion by reason of anything contained in the bonds. The option was for evergone, and could only be renewed, or the right to exercise its revived by virtue of a new contract. The time has long since elapsed within which the election could have been made without the right having been exercised, and the company refuse its exercise now. To compel them is the object of this proceeding in equity.

Neither in equity no more than at law, are courts at liberty to make contracts for parties. Their business is with the enforcement of these already made. The application to a court of equity to compel the specific performance of a contract, (which is this case), implies an obligation on part of the complainant to exhibit one entitled to be enforced. In this consists the difficulty here.

The contract of the plaintiff, accepted and acceded to by the company, is entirely silent on a

subject of a right to convert his bonds into stock after the 1st of July 1860, or at any time between that and the 1st of July 1880.

At the date of that contract, it is quite apparent that such a right was considered of no value. The bonds were a much better investment than the stock, and human foresight was not keen enough to perceive what has since taken place—that out of disaster to the country would come prosperity to the company. This was not anticipated, and accounts undoubtedly for the fact that no provision was made on the subject. It is quite evident that the arrangement made, resulting in the contract between the parties, was with the single view of postponing the day of payment of the bonds for twenty years. To this expressly is the consideration of ten per cent. referred, together with the stipulation for the prompt payment of interest in future. The right of converting the bonds after the 1st July 1860, rested therefore, upon no consideration whatever, after the original consideration had exhausted its purpose by the lapse of time. On the face of the plaintiff's contract, this is the state of the case.

But it is claimed that the right is substantially asserted in the circular of the company which was their proposal for extension. But the proposal is not accepted, or referred to in the plaintiff's agreement with the company, nor in any way made parcel of it.

The contract is independent of it, and must, on every principle, be considered the final consumation of the bargaining between the parties; unless, indeed, it could have been shown that it ought to be reformed under some head of equitable interference, which was not attempted or pretended here. Had there been a simple acceptance of the proposal of the company by the complainant, there would have been more plausibility, at least, in the argument of his counsel. But that was not the case. The plaintiff fixed his own terms of acceptance, and he did so without the remotest reference to the proposal, and in it he clearly discloses both the object of the arrangement and the consideration for it.

This view renders unnecessary any extended discussion of the clause of the proposal relied upon by the plaintiff's counsel, and which he seems to think preserves the right of the plaintiff to convert his bonds into stock.

That clause says the company "proposes to extend them (the bonds, and security of the mortgage, in the precise condition in which they are now held." We have said that these terms were not accepted, but others better adapted to the plaintiff's own views, and this might be enough to say of it; but I doubt much if even accepted expressly, it would have the meaning attributed to it.

It was unnecessary to stipulate that the holders should retain their bonds in the condition they were. That they would do without any stipulation, so far as form and obligation was concerned; but it was deemed material that the company should propose to hold the securities for their eventual payment in the precise condition in which they were. I think this was what the clause meant. The loss by lapse of time of the right to convert the bonds into stock would not change their "precise condition," they would be precisely the same in form and substance as bonds with a term of satisfaction gone; and that this was not regarded is shown by the care with which it was thought necessary that the assurance should be given that the securities should be held intact.

That this was what was understood by it, so far as the plaintiff is concerned, is plainly to be seen in what he chose to say in regard to this very matter himself. In speaking, in his contract, of the terms on which he agreed to hold the bonds in controversy, after stipulating for an extension for the consideration of ten per cent., and future prompt payment of interest he adds: "nothing herein contained shall prejudice in any manner, whatever the security for the payment of said bonds given by the mortgage." This was all he stipulated for, and he must be bound by it; and it accords exactly with what I conceive was meant in the circular. But whether or not, these are the terms of his acceptance, and no other, and he cannot enlarge or alter them. As we think the complainant is not entitled to the relief prayed the decree at Nisi Prius dismissing the bill, is affirmed.

Decree affirmed at the costs of the appellant.

Railroad Earnings—Monthly.

The earnings of the Erie Railway for the month of Aug., 1865, were..... $1,364,125 89
Corresponding month last year..... 1,105,364 58

Increase..... $258,761 31

The following is a statement of the business done by the Illinois Central Railroad for the month of August, 1865:

LAND DEPARTMENT.

Acres Construction Lands Sold.....	8,228.29 for	$92,452 69
Acres Int. Fund Lands sold.....	185.20 for	3,096 20
Acres Free Lands sold..	1,556.26 for	20,168 69
Total sales during month of Aug., 1865.....	9,969.57 for	$115,712 58
To which add Town Lot Sales.....		1,585 00
Total of all.....		$117,297 58
Cash collected in August.....		$180,616 12

TRAFFIC DEPARTMENT.

Receipts from	Passengers.....	$243,343 17
do.	Freight.....	397,846 90
do.	Mails.....	6,358 33
do.	Rent of Road.....	4,000 00
do.	Other Sources.....	10,000 00
Total Receipts in month of Aug., 1865.		$661,548 40
Total Receipts in month of Aug., 1864.		586,964 55

☞ The latest advices from Mexico, *via* Vera Cruz and Havana, include several items of interest; among which is the following: The Emperor has conceded to Mr. Charles J. Arnoux, who represents various New York capitalists, the privilege of building telegraph lines, which will connect Toluca, Morelia, Ramora, Barca, Guadalajara, Tepic, San Blas, Mazatlan, Culiacan, and Guaymas, with San Francisco; another reaching from Mazatlan to Durango, Cuencame Parras, Villa Aldamas, Cerralvo, and Camargo, and another from Manzanillo to the city of Guadalajara. The terms of the telegraph contract oblige the successful capitalists to complete, within eight months, at least 210 kilometers of the telegraph line. The line from Mexico to San Blas must be finished in two years, and all the lines in five years. The builders have the monopoly of these lines for 15 years.

Cape Cod Railroad.

The report of the Directors of the Cape Cod Railroad Company for the year ending May 31, 1865, makes the following exhibit:—The receipts of the company from May 31, 1864, to May 31, 1865, were $161,047 10, and the expenses for the same period were $87,926 28, giving a net income of $73,120 82. Interest and taxes paid amounted to $14,936 88, leaving a balance of $58,183 94. The net income of the preceding year was $80,387 12, and the interest paid was $7,238 68, leaving a balance of $73,148 44, showing a decrease in the last year in net income compared with the preceding year, of $7,266 30, and a decrease in net income after paying interest on debt, of $14,964 50.

By the preceding report, the debt of the company stood at $117,300 12. The debt of the company now stands at $92,458 05, showing a reduction of the debt during the year of $24,842 07. The receipts of the company for the year ending May 31, 1865, were $17,686 56 more than in the preceding year, and the expenses $24,952 86 more.

In the year ending May 31, 1864, the receipts for passengers were.....	$105,744 90
In the year ending May 31, 1865.....	120,421 48
Increase in passenger receipts.....	$14,676 58
The receipts for freight in the former year were.....	$28 563 [illegible]
In the year ending May 31, 1865.....	32,738 31
Increase of freight receipts.....	$3,174 33

It will be seen that the net earnings for the year, after deducting interest on debt, and excise on earnings, are $66,542 04, or over 11 per cent. on the capital stock.

The road and rolling stock are in good condition.

Oil Creek Railroad.

Two locomotives have been purchased for the Pithole City and Oil City Railroad. The construction of the road from the city to Oleopolis, at the mouth of the creek, will occupy, it is thought about sixty days.

☞ The contract for the construction of the Springfield, Ill., and Northwestern Railroad has been let to Messrs. Ball & Schofield, at a cost $910,000 for the 42 miles complete, and is to be turned over to the company, finished by the 1st day of January, 1867.

☞ The Illinois and Michigan Canal is to be deepened so as to cleanse the Chicago river. The Chicago *Journal* says that the Board of Public Works has awarded to Messrs. Hasbrouck and Conro, of Milwaukee, sections one to thirty-eight inclusive, embracing 2,625,865 cubic yards of earth, at twenty-nine cents per yard, amounting to $708,500 85.

☞ The Allegheny Valley Railroad will soon be completed to Orrsville, at the mouth of Mahoning, about ten miles north of Kittanning. It will eventually be extended to Oil City.

☞ There will be held at Cedar Rapids, Linn Co., Iowa, on the 27th inst., a grand railroad convention of the friends of North Missouri and Cedar Rapids, to adopt means by which to reunite the commercial interests of St. Louis and Iowa, and to further the completion of the North Missouri and Cedar Rapids Railroad.

American Railroad Journal.

Saturday, September 16, 1865.

Stock Exchange and Money Market.

To no other part of the world do emigrants from Europe come in such numbers as to the United States. On Monday last nearly 2,000 arrived in steamers from England and Germany. Upwards of 34,000 are reported to have come from the port of Bremen to New York during the present year. This is an element of strength which cannot be overlooked. The value of this immigration whether we consider the amount of physical strength it brings, or the funds, or the value of its labor at the high wages it earns, can scarcely be computed. From the 30th of Sept., 1819 to 1860, inclusive, the number of foreign emigrants who have made this country their home, was 5,062,414, and this added to the previous arrivals from the time we became an independent nation, makes a grand total of 7,406,414. This represents a larger population than the whole of that of Ireland at the present day. Australia is the only other country in the world where emigration has had any success, and this been comparatively small. Though settled as early as 1788, it had in 1860, with its group of islands only 1,445,000 inhabitants, while here we are recruiting our numbers by yearly additions from foreign countries of from 150 to 400,000. It is easy to ascertain by taking the probable earnings of adults alone per month, that they amount to millions of dollars a year.

We well know that when a long time ago colonies of Flemings and other Germans emigrated in some small number to England, their arrival was hailed as an advantage to some species of manufactures, but so far from a desire to encourage immigration into Great Britain, there has been on the contrary a wish to get rid of its redundant population, and parliamentary inquiry has several times in late years been made, to see how this could be best accomplished. Great efforts have been made to get rid of this redundancy by assisting parties to reach Australia and Canada, but they have not checked in the least the disposition to prefer the United States. Now that we have shown ourselves so powerful, by the successful termination of a rebellion on a vast scale, and have been able to raise among ourselves twenty-seven hundred millions of dollars to suppress it, and also find ourselves rich enough to pay our taxes readily with the certainty that the debt itself, instead of being a perpetual burden like that of England, can readily be paid off within a reasonable time, it cannot be doubted but these facts being comprehended abroad, emigration to this country will be continued on an enormous scale. And though our currency is at present depreciated, it is notwithstanding easily to be demonstrated, that even now, wages are when reduced to the gold standard, much higher than in Europe. We propose at an early day to show this by proper figures and calculations, founded on official returns made to Parliament, and the statements of agriculturists employing laborers on our fields, and the managers of factories in the neighboring States as well as our own. Our foreign readers perhaps cannot imagine the changes which take place here in a short time in the condition of the industrious immigrants that come among us. The men who land here in very rough and cheap attire are very soon seen in the finest broadcloths of fashionable cut, and the women who at first wander from the ships that bring them, through our streets without bonnets, and often without stockings, are very shortly seen wearing silks and laces and bonnets of the latest shapes, and costing one pound if not two pounds each. Personal comfort and good food are the certain gains of industrious foreigners coming to labor among us. Good agricultural labor has been paid for the last summer on many estates at the rate of $35 and $40 per month, besides board and lodging. Female servants, and farm assistants have received as much as $10 per month. Certainly we have reason to believe that as these facts are known abroad emigration will be largely increased.

A most influential society in this city is in fact publishing a weekly paper in which these and

other facts of similar purport appear, and which are carefully tabulated and in this shape sent abroad.

We must therefore insist upon it that the wealth, resources and population of this country from this one source must be largely progressive.

There being no considerable demand for gold for export, in fact according to the calculations of the London bankers it does not pay to import it at present, the price is mainly kept up by the demand for customs duties alone. In this condition of things it is quite natural that some relief should be sought by the importers and those who are compelled to use gold in their business. Whenever the Secretary of the Treasury sells any to help the market, there are journalists who abuse him roundly for so doing, while at the same time he is censured for not withdrawing his circulation in paper. The Chamber of Commerce at the instance of its President, has taken up the subject, and a report may be expected from it in the course of next month.

The plan suggested is, that 10, 15, or 20 per cent. of legal tenders should be received as a portion of any duties payable at the Custom House, and in this way there would be effected a gradual diminution of the currency, and also a reduction in the price of gold. But by this plan the merchants would be the only class immediately benefitted. Other holders of legal currency would gain nothing directly at least, the process of the reduction of the premium would be too slow, and consumers would be imposed upon just as they are now, by those who happen to occupy the position of producers or sellers. Many kinds of goods are higher now than when gold was 280, a fact that speaks volumes as to the mischievous consequences of an inflated currency, which furnishes the excuse for extortion and rapacity, and blinds the judgment of the people as to the real value of an article.

Now there are those who believe that the better way to accomplish the desired result will be for the Secretary of the Treasury, after ascertaining precisely what surplus in gold he has, after calculating all demands upon it for interest, falling due for months ahead, to issue interest notes, notes with nominal interest only, which shall be receivable in all the custom houses in the Union for duties *as gold*. These notes when prepared, to be sold for legal tenders publicly, and with due notice for the largest premium that can be obtained for them. In this way he can at present prices, realise over 40 per cent., and could cancel that amount without difficulty. For example there is no doubt but at this very moment he could well spare $10,000,000 of his gold. This would give him at present prices $40,000,000 in greenbacks as profit, or proportionably as the rate declined. This sum put upon the street would be more than the gold operators could stand. The small sums sold by the assistant Treasurer from time to time amount to nothing. It is very easy to use up half a million or a million by the houses engaged in this business, but ten millions would trouble them considerably. The effect of such a measure would doubtless be to knock the price down in a few weeks to 25, and immediate relief in prices would be felt by all consumers. This method pursued every few months, as the gold surplus warranted it, would destroy the whole business of the houses, who are getting wealthy by the manipulations of one article Mr. Low, the President of the Chamber of Commerce, asserted that at the present disproportion between gold and currency, very large profits were realised by the foreign importers. It really surprises us to examine their invoices, showing the intense folly of our own merchants. When tobacco of our own raising, and even old scrap iron can be imported into this country from England at a profit, we think we are losing not only all economy but the use of our senses. We believe upon good authority that Mr. McCulloch considers it inexpedient to receive anything but coin in payment of duties.

A very spirited discussion is now taking place among our Bank officers, as to the propriety of compelling the National Banks of the interior to redeem their bills either at Boston, Philadelphia or New York. It is contended that while the City Banks are compelled to receive these notes, they cannot pay them out again. We do not so understand it. There is no law compelling them to receive these notes, unless when national depositaries for tax money and revenue, and that they do pay out other notes than legal tenders to their customers cannot well be doubted. The fact is the City Banks want to hold large balances of the Country Banks, and in these to operate for their own benefit. This is all the regard they really entertain for the uniform currency about which they are so anxious. All they have to do is to receive these bills, and pay them out again as a systematic thing, and the difficulty vanishes. Let this be understood as the rule of any or all of the Banks, and the customers will gladly adopt it, and all our currency will be really at par.

The money market is easy, notwithstanding we are treated to a daily dish of stringency about to commence. Governments maintain their high reputation unchanged and are in fair demand. We see some persons are selling gold at 30 days, at a decline from the present quotations which indicates the expectation of a further fall. Bank stocks are lower in consequence of the recent robberies, forgeries and defalcations. People see how these Banking institutions are managed, and have not the confidence they had in them in former years. The street continues to be attracted by the operations going on in some of the leading Railway shares. Every great speculator who takes one of these companies under his control has always a large following who do just as the master spirit does. It is the kite and its tail. When the former keeps up majestically in the wind the latter streams behind with a very graceful and pleasing motion, but when the kite breaks from its string, the tail comes down ignominiously into the gutter. On the whole, railway securities maintain themselves very well. Despite the street operators the roads are doing well, and increasing their earnings.

The balance in the Sub-Treasury on Tuesday was, $69,039,398.

The receipts from the internal revenue continue on the most liberal scale, while the requisitions from the War Department are "unexpectedly light." In fact the department is getting on quite comfortably.

The exports for the week from this port exclusive of specie were $3,083,089.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

The Ramapo Car Factory.

About a dozen years ago a new car factory was built at Ramapo, on the line of the Erie Railway. This establishment has recently been greatly enlarged and fitted up with first class machinery. It is owned by Messrs. Pierson, who carry on the concern in the interest of the Atlantic and Great Railway Company, employing about 300 men in the different departments. Some of the finest passenger cars that we have seen, have just been turned out at these works.

☞ The receivers of the Vermont and Canada and Vermont Central Railroads have petitioned the chancellor of Vermont for authority to raise $700,000 by the issue of Canada stock or otherwise to enable them to carry out needed improvements.

The English Railroad Capitalists.

The large party of gentlemen who recently arrived in this country from England with the intention of examining the Atlantic and Great Western line, as well as the other important railroads in this country. At the last accounts were at Cincinnati on their way to St. Louis. They have everywhere been received with great attention, and appear to be highly gratified with their reception. Sir Morton Peto, the great contractor, is the principal celebrity of the party, and is accompanied by Mr. McHenry, of Liverpool, the promoter of the Atlantic and Great Western, and the fast friend of this country; also by other gentlemen of note representing French, English and Spanish interests.

Sanderson, Brothers & Co.

This well known and celebrated house has a specialty of its own, that of the manufacture of cast steel, warranted and known to be the very best material for tools. No less than three important and extensive works in Sheffield, England, are under their management, and produce the article in immense quantities, for which they find a steady demand in all parts of the civilized world. They have two establishments for its sale in this city, 16 Cliff street, and 241 Pearl street, besides agencies in Philadelphia, New Orleans, Baltimore and Montreal. Their reputation is of the first class, and they stand at the head of British manufactures.

Commission and Financial Agency.

August Limbert and Charles H. Leland, the latter Consul for the Republic of Uruguay, have formed a co-partnership for the purpose of buying and selling gold and Government securities, bills of exchange, commercial paper, and the collection of coupons and dividends. Their references are of the very highest character. Mr. Limbert has had the valuable experience of twelve years service in the well-known house of Schuchardt & Gebhard, and is well-known in the street.

The Pacific Railroad.

The importance of an early completion of the Pacific Railroad manifests itself more and more distinctly every day. The United States Government is represented in its Board of direction by gentlemen no doubt highly respectable, and for ought we know very trustworthy politicians. As to their other qualifications, especially those suitable for the positions they occupy, we are not quite so certain. For if ever there was a project in which the Government should take a lively and positive interest, it is that of the Pacific Railroad. The necessity of its being pushed to an early completion is now obvious. A contract for the establishment of a line of steamers to Japan and China of from 3,000 to 4,000 tons, with a subvention of half a million of dollars annually, has actually been made with responsible parties. The effect of this is already seen and felt abroad. The British press admits that the present route of the East India mails and travel must be changed, and that passengers cannot much longer submit to be many weeks exposed as they are, to a burning tropical sun and intense heat in going to and returningfrom India, when by the new route, *via* the United States, they may enjoy cool weather, and save many days in time. Even the London *Times* admits, reluctantly enough, no doubt that the California route must have the preference. Even now the mails and news by that route have beaten the Oriental and Peninsular line full three weeks in time. It in fact occupies ordinarily 24 days longer time to communicate by the latter than the other channel. It has recently taken but thirty days to forward dispatches from Japan to Leavenworth city. If we can do so much without the Pacific Railroad, what splendid, nay almost incalculable benefits would arise from its completion.

We have from time to time recorded the activity and zeal with which the western division of this work is being pressed forward; and the progress also making on the eastern divison. Yet, notwithstanding this, it seems that many years must elapse before the whole route is open to travel. We think there is no necessity for this delay. Our readers will remember that at the close of the war we advocated the employment of a large body of our disbanding soldiers, with their consent, and with certainty of pay and grants of land as a reward for their labor, upon the whole line at once. This suggestion was well received by some members of the cabinet, and was approved by some of the press. But there was no one to push the subject, and it has been forgotten. Meanwhile there are thousands of these very men, who are clamoring for office and for employment, and already complaining that they have not the opportunity of earning even a daily subsistence. Had our suggestions been adopted, by this time a hundred thousand men might have been at work earning good wages, been certain of receiving grants of land on which to settle and retire; and the whole road could have been finished in the coming year. We should then have permanent settlements along the line; towns and cities begun and populated; in fact a well settled street all the way from the Missouri river to California. Not only this we should have all the correspondence, all the remittances, and a great part of the traffic of the East Indies coming and going this way; most assuredly, the spices, gums, silks, and the most valuable of all its products. Besides this foreign transit, we should be practically opening our gold and silver mines by the thousand, as the facilities of reaching them, transporting machinery for working them, and laborers to operate the machinery would be illimitable, and the results be beyond the most sanguine expectation.

We therefore hope that congress will at its next session look at this question in all its breadth, length and depth, and take such measures as will secure the immediate construction of the whole line. We have hosts of Engineers leaving the army who could safely be placed at the head of the force required; and there are also hundreds of thousands of tried faithful and hardy soldiers now begging for employment, who would be but too happy to engage in this work. Mr. Stewart senator from Nevada, has publicly declared his approbation of the plan, and we hope he will have persistence enough, as he has talent and energy enough to press the subject on the attention of the next congress, and carry it through triumphantly.

The Pacific Railroad will directly and indirectly do more to pay off the National debt, and lessen the burden of taxation, than any other method which the wit of man can design.

The arrival in this country of a number of dis-

tinguished capitalists and contractors, has led to the supposition that they might be induced to take hold of this great work. But our plan is, that our own Government should have the entire control of the work, which would enable it to secure its speedy completion irrespective of jobbers and speculators. With 5,000 laborers, the Atlantic and Great Western Railway Company constructed some portions of their line at the rate of a mile a day; a hundred thousand men, under good discipline, at this rate of construction, could easily finish the road at the rate of 20 miles a day.

The London *Economist* praising the latent power of this country, says unhesitatingly "its wonderful capacity has unlimited extent." Here is precisely a case where it may be exercised.

☞ The St. Paul *Pioneer* learns from Hon. Edmund Rice, that while in England he effected arrangements whereby the construction of the St Paul and Winona Railroad will be commenced immediately, and pushed to completion next summer. The ground will be broken as soon as working parties can be organized, and it is hoped that ten or twenty miles will be graded this season.

☞ The Punjaub Railway, 252 miles in length, was opened for through traffic on the 24th of April.

Railroad Earnings.--Weekly.

The earnings of the Marietta and Cincinnati Railroad for the 1st week in Sept., 1865, were:

	1865.	1864.
Passengers	$15,072 50	$12,983 06
Freight	14,322 25	8,370 50
Mail, express & telegraph	1,100 00	1,119 58
Total	$30,494 75	$22,473 14
Total for the fiscal year commencing Jan. 1	$795,758 78	$610,769 09

The traffic of the Great Western Railroad for the week ending Sept. 8, 1865, was as follows:

Passengers	$44,189 21
Freight and live stock	34,487 32
Mails and sundries	1,858 21
Total	$80,534 74
Corresponding week of 1864	65,374 75
Increase	$15,159 99

The earnings of the Grand Trunk Railway for the week ending Sept. 2, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$55,293 00
Express, freight, mails and sundries	4,036 00
Freight and live stock	74,344 00
Total	$133,673 00
Corresponding week, 1864	116,520 00
Increase	$17,153 00

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending August 31, were:

	1865.	1864.
Passengers	$5,402 28	$4,872 84
Freight	15,048 86	14,336 30
Express	265 22	104 16
Mail	296 58	296 58
Total	$21,012 94	$19,609 88

Receipts from January 1 to August 31:

1865	$421,390 88
1864	368,504 79
Increase	$52,886 09

The earnings of the Michigan Central Railroad for the 1st week in Sept., 1865, were. $108,416 95
Corresponding week of previous year.. 94,081 82

Increase. $9,335 63

The earnings of the Chicago and Rock Island Railroad for the first week in September, 1865, were $105,959 00
Corresponding week of previous year.. 90,853 00

Increase $15,106 00

The earnings of the Chicago and Northwestern Railway for the first week in September, 1865, were $216,965 88
Corresponding week of previous year. 130,639 61

Increase $86,326 27

Egyptian Railways.—The Isthmus Transit.

We copy from the correspondence of the *Herald* the following account of the railways across the isthmus, between Alexandria on the Mediterranean and the Red Sea. It states some interesting facts, one especially in relation to the manner in which the track is placed on the road bed, or the sections of sand over which it passes, While the railway itself is a great advantage to Eastern travellers, it is yet deficient in complete accommodation. What is said of the preference given by the Viceroy to American cars and engines is very gratifying, and is highly complimentary to American taste and skill:

The first stage of the journey from the Mediterranean to the Red Sea is from Alexandria to Cairo, a distance of one hundred and twenty miles over the Viceroy's railroad. There are daily two trains each way over the road—one at nine o'clock A. M., and the other at four o'clock P. M. In order to escape the intense heat of the middle of the day I chose the afternoon train. Selecting a seat in one of the first class carriages, I stepped out on the platform to await the signal for departure. Although the time announced for leaving is specific, it does not follow when the time arrives that the train is off. Everything on the road is subject to the convenience of the Viceroy. If he happens to be at Cairo, or at one of the villages on the way, no train is allowed to depart until he has ended his journey. Consequently it often happens that passengers are delayed from six to twenty-four hours. There would be some apology for this if there were no telegraphs, but no less than ten wires extend between Alexandria and Cairo. But it is part of the system of government. Everything, the country and the people, is subservient to the will and convenience of one man.

An Egyptian railroad train is quite a curiosity. The locomotives and carriages for ordinary use are English built. The first class carriages are of the same abominable pattern found in England and nearly all parts of the Continent. They are divided each into three compartments, entered by doors on the sides, and capable each of seating eight persons, or a total of twenty-four to each carriage. The interior is lined with buff leather, much the worse for wear, both in regard to cleanliness and repair. The car itself is a frail piece of work, on four very light iron wheels, not capable of the least strain. One of these cars off the track would stand about the chances of a pasteboard box suddenly thrown from a train rapidly in motion. The first-class carriages are patronized almost entirely by Europeans crossing the country. The second class carriages are constructed on the principle of the first-class; but are less expensively finished, and have an open space over the backs of the seats, looking from one compartment to the other. These carriages are patronized by the wealthier Turks, Arabs and Egyptians. The third class cars, English pattern, are the same used for the transportation of merchandize and live stock—without seats, and rarely with even a covering over head. The scene presented by one of these cars is quite picturesque, and suggestive of anything but comfort. The passengers of this class are entirely natives. They are crowded into one car perpendicularly, like cattle, until quite full, when the surplus are permitted to fill up a second or third, as the case may be. The sides of these cars are about four feet high, so that standing in them very little more than the head and shoulders of the occupants are to be seen. There is the red tarboosh, the fez, white and red turbans, caftans of every hue; women, with their veiled faces, probably a youngster mounted astride his mother's shoulders. Overhanging the sides of the car may be seen an innumerable variety of pipes, all patterns and lengths of stems, ranging from six inches to four feet. Tracing these pipes to their source, a platoon of faces of all moulds and colors, from the flat-nosed, dusky-skinned Nubian and Abyssinian to the light brown tinge and oval face of the Arab were to be seen. The odor of a third class car can better be imagined than described.

About the middle of the train is the mail car, a square box on wheels, painted red, with a door on either side, fastened by an immense lock, ponderous enough for a prison gate. At the mail stations I observed the most successful manner of unlocking this huge piece of machinery was by means of a huge sledge, with which a portly Egyptian, kept for the purpose, belabored alternately the car and the lock, until, unable to make further resistance, the door was forced open. I believe it costs one lock per train to secure the post.

The last car is always the baggage van, somewhat similar in build to that used for the post, with the addition of a small box for the employes on the train.

Though the locomotive and carriages for the public are all English built, those used by the Viceroy himself are all American. Of these the Viceroy has at present for his own use three. As pieces of mechanical skill they are the admiration of all Egypt. It would be useless to describe these evidences of our skill; they are the same as used by our first class passenger trains, with the exception of a more artistic finish. But the Viceroy not only shows his preference for our locomotives, but also our passenger cars. Of these he has thirty, three for his private use and the remainder for his court and the harems. The cars are built on the pattern used on our first-class trains, but more elaborately finished. The interior of the Viceroy's cars is a miniature of the apartments of his palace. The richest Turkish and Persian mats cover the floors, while the walls of the cars are veneered with the richest woods and adorned with beautiful mirrors and curtains of silk and gold. On the sides are arranged luxurious divans and cushions, all of silk, lace and gold. The cars of the harems are even more elaborate. The divans here possess a greater variety of geometrical lines, and possess a greater profusion of silk and gold. There are other cars fitted up as saloons, apartments for the viceroyal *suite* and attendants. In fact, all the luxury and appliances of an Oriental court have thus been put on wheels, and in his frequent excursions to his many palaces at Alexandria, Cairo and Ramle the Viceroy moves from place to place as comfortably as if he were seated cross-legged in state or yielding to delightful relaxation in his magnificent palace, looking out upon the beautiful Bay of Alexandria.

The confidence of the Viceroy in his American engines and cars is so great that he frequently runs between Cairo and Alexandria in two hours, which requires a speed of sixty miles per hour. The best English engine on the road cannot perform the same journey in less than five hours. The Viceroy keeps his engines and cars in Cairo or Alexandria, according to his own whereabouts, or of the harem. At both places he has a depot of his own, which can be visited by application to the proper authorities.

After passing half an hour in awaiting the sig-

nal to start, I took the hint given by the ringing of an immense dinner bell in the hands of an Egyptian, and took my seat in the carriage. In five minutes more a second bell was rung by the same individual, and the train commenced slowly to move out of the depot. In a few moments we were clear of the enclosure of the railroad buildings, cars and shops, and had an open view of the country on both sides of the road. On the right extended a strip of desert, with Lake Mareotis in the distance. On the left we passed within a short distance of the Mahamodic canal. The country along the road for some distance continued wretched, that on the left being the better on account of the irrigation from the canal. As we progressed in a southeasterly direction the road entered the well cultivated plain of the Delta. Rich fields of growing or harvested crops, and thousands of industrious natives, with camels, oxen and donkeys, engaged at their work, could be seen as far as the eye could reach.

In riding along we passed numerous villages, located on artificial or natural knolls, in order to protect them from the annual inundations of the Nile. The villages are universally built either of a composition of straw and clay or sun-dried bricks, one story high and covered with straw. There is no regularity in the arrangement of the houses, insomuch that at a distance an Egyptian village has more the appearance of a series of mud lumps of different heights than the domiciles of human beings.

After leaving the village of Dauar we stopped a few moments at the Damanhoor. This place possesses a number of mosques and quite a profusion of minarets, but in general has the appearance of poverty. By six o'clock we reached Kafr Sejat, situated on the left bank of the Rosetta arm of the Nile. The village has no attractions in itself, but the railroad bridge crossing here is a fine piece of work. It is built of heavy wrought iron plates, riveted together, and has not only the appearance, but is in reality, a structure of great strength. The bed of this arm of the Nile is about one-quarter of a mile in width, and the color of the water very similar to our own Mississippi at the mouth of the Ohio. The channel of the river runs near the east bank. Over this is a draw, by opening which the river craft are allowed to pass. At this season the river is very low, and navigation, except with small craft, entirely suspended. In crossing the stream I noticed a small steamer tied up at the bank.

From the Rosetta arm the railroad strikes off in the direction of Tanta. This is rather a large town, and is the seat of an annual fair, at which the whole of lower Egypt is represented. From this point the road extends more to the southeast, to Benha, where it crosses the Damietta arm of the Nile. The bridge here is very similar to that at Kafr Sejat. From Benha the road runs due South, entering Cairo at the east gate, towards Suez.

Owing to the almost level configuration of the plain of the Nile the direction of the railroad is for the most part straight, and the few curves necessary in connecting the cities at its extremeties are very extensive. The road consists mainly of an embankment about fifteen feet high, with but few excavations the entire length. The bed of the road is of sand from the desert. There are two lines of rails, which, instead of resting on wooden ties, are fastened with wedges on cast iron chairs resembling dishes, and eighteen inches in diameter, the rail being supported in a frame on the convex side, while the concave portion rests upon the bed of the road. The rails are held parallel by rolled iron bars about three inches wide by three-quarters of an inch in thickness. On account of the high winds sweeping from the deserts the bed of the road is frequently blown completely clear of the chairs, and the rails disarranged. It will undoubtedly be necessary, before the rails can be considered secure from these disturbances, to face the sides with stone or a thick lavor of gravel.

The superintendence of the railroad is entrusted to Hubar Pacha; but the working men of the management are Europeans. This, however, is no compliment to the road or its control. On the trains there are no guards, and, strange to say, notwithstanding the roving bands continually prowling over Fgypt, no molestation has yet been sustained. The stations on the line are small stone and sometimes clay built structures. The former are occupied by the agents.

It was eleven o'clock at night when I reached Cairo. About a mile from the city the train stopped to allow the conductor time to collect the tickets, after which it ran up to the platforms which constitute the landing place for passengers.

The distance from Cairo to Suez is about ninety miles. Leaving the former city at thirty minutes past eight A. M., it was nearly three in the afternoon before the train reached its destination. The ride was anything but comfortable, the hot winds blowing off the desert almost stifling, and the reflection of the intense light and heat very painful to the eyes.

The construction of the line from Suez to Cairo is the same as from Cairo to Alexandria, with the exception, in the present case, of a single track. The cars are English built, and the running of trains managed by Europeans, assisted by Turks.

The country, after leaving Boolak, a suburb of Cairo, is desert in the fullest sense of the term. Not a tree nor a shrub to be seen on the whole route, except in the very small gardens at some of the stations. On both sides of the road are immense sandhills heaped up by the wind, and, with the exception of a yellowish color, are the image of huge snowbanks. These drifts and ridges give the desert an undulating appearance. About half way on our journey we struck a range of calcareous elevations called the Attaka Mountains, which terminate in the Red Sea about two miles distant.

I find here a comfortable and well kept hotel belonging to the company of the English line of steamers, and superintended by an Italian. The hotel is located within a few steps of the railroad depot and landing of the steam lighters plying between the city and the shipping anchored in an arm of the Gulf of Suez, about five miles distant. Tfus to passengers landing or embarking or arriving and departing by rail the convenience of its location is admirable.

I close this letter for a journey up the desert to view the works of the French maritime canal at Challiu. Upon my return I will write in detail concerning Suez and the canal, with accompanying maps.

☞ The St. John *Telegraph* says that Mr. James Harris, of Portland, N. B., has just completed a fine locomotive for the St. George and Chignecto coal mines, in Cumberland County, N. S., worked by an American Company, who are now constructing a railroad from their mines to a place of shipment about five miles distant. The engine is of twenty horse-power; its peculiarities are these: It has only four wheels, all of which are drivers; it has no tender, but will carry the fuel (which will be coal) in bunks on either side of the platform, upon which the attendant will stand. The water for supplying the boiler is contained in a tank placed on the top of the boiler, and by which it will be partially hea ted before entering the same.

☞ From Omaha, N. T., Sept. 7th, we learn that the overland telegraph line to California is in excellent working order. There are no Indians on the route and no further troubles from that source are anticipated.

☞ The valuation of Boston as returned by the assessors is as follows:

	Real Estate.	Personal Estate.
1864.....	$182,072,300	$150,377,600
1865.....	201,628,900	177,263,875
Gain in 1865.....	$19,556,600	$19,886,275

☞ The Commissioners of the Sinking Fund of Pennsylvania, pursuant to the requirements of the law, on the 5th instant, cancelled $745,811 26 of the public debt of the Commonwealth, as follows, viz: Five per cent. loan of the Commonwealth, $436,824 62; coupon loan, $230,000; war loan, $76,400; interest certificates redeemed, $2,008 64; domestic creditors, $578.

☞ The Mount Royal (Montreal) Railway Bill was carried through the Railway Committee on the 8th inst., but without the right to use dummy engines.

H. L. Routh, L. Chaput, Henry Bulmer, Alfred Perry, Joseph Barsalow, Victor Hudon, and John Pratt Esqs., are the directors. Capital $200,000.

☞ A meeting was held in Davenport, on the 6th inst., and measures adopted for procuring a speedy survey of the route for a canal from the Mississippi River to Lake Michigan, and for a canal around the upper rapids.

☞ Mr. Abraham Frith has been appointed Superintendent of the Boston and Worcester Railroad, *vice* E. B. Phillips, Esq., resigned, and will enter upon the discharge of his duties on the 1st of October.

☞ Col. Joseph D. Potts, general manager of the Philadelphia and Erie Railroad, has resigned, and Alfred L. Tyler, late Superintendent of the Macon and Western Railroad, has been appointed in his stead.

☞ Gen. McCallum has left Washington for the Southwest to turn over to the Boards of Public Works in the States in that section, the various railroads which have been used by the Government during the war. Arrangements will be made by which the rolling stock furnished through the War Department will be sold to the respective companies on credit.

☞ The receipts of the Western Union Telegraph Company, from all sources for July, 1865, were $239,854 23, and for the corresponding month last year, $181,288. Increase, $58,566 23. The total earnings from Jan. 1 to July 31, 1865, were $1,137,540 33, and for the same time in 1864, $1,148,329 83. Increase, $589,210 50.

The Portage Lake Copper District.

A correspondent of the Detroit *Tribune*, writing from Houghton, August 10th, says:

The mines of the Portage Lake District, as a whole, are the youngest upon Lake Superior. They are also at present the most profitable and productive, and their importance has been and is developing with great rapidity. They are scarcely a score in number, and yet their yield for 1864 nearly equalled that of all the other copper mines combined. The chief is the

Quincy.—This celebrated mine is located on the brow of the hill above the village of Hancock, and is working what is known as "the Pewabic lode"—the same that the Pewabic and Franklin Companies are also mining. It is the most productive mine upon the lake, its return for the month of July aggregating 108 tons, 1,495 pounds. Its yield is chiefly stamp work, and its barrel work is also subjected to heavy stamps, and classed under the former head. The proportion of mass copper is less than one-tenth of the whole amount. The Agent and Mining Captain being absent, I failed to obtain any statistics from them, and am compelled to rely upon a copy of the annual report, submitted upon the 1st of March,

ult. The product of the mine for 1864 was 1,485 tons, 1,462 pounds of mineral, and its gross earnings $1,120,482 52. The average proportion of pure metal in the mineral smelted was 80½ per cent. The net profits of the year were $379,650 76, and there was paid to the stockholders in dividends the sum of $300,000. The capital stock of the company is $200,000, which has been fully paid up, and is held in 20,000 shares of $10 each. The cash surplus on hand at the close of 1864 amounted to the handsome sum of $190,000. The surface improvements and real estate of the company are estimated to be worth over $400,000. Under the first head is included several powerful engines, the stamp mill, dock, warehouses, and many substantial buildings. The mine has six shafts, the deepest being below the hundred fathom level. These are connected with the stamp mill at the foot of the bluff by a substantial tramway. The stamp mill contains 72 head of Wayne's stamps, capable of crushing 170 tons of rock per day. The washers are designed by Mr. Schlerman, the superintendent of the mill. The proportion of copper in the stamp rock is 2¼ per cent. The "Pewabic lode" gives yet no signs of exhaustion, and recent explorations have determined the existence of many other rich and untried "lodes" upon the "location." It is therefore, safe to predict the continued prosperity of this substantial corporation.

Pewabic.—The Pewabic is also working the "lode" of that name, immediately beyond the Quincy, and has been considered the second mine in the district. During the month of July, however, it was surpassed by the Franklin in product by a very slight amount. From its annual report of 1864 the following facts are condensed: The product of ingot copper for the year was 714 tons, 1,857 pounds, averaging 76.68 per cent. of the mineral. During the year a dividend was paid of $7 per share. The property of the company, aside from that which is known as personal, is estimated at $417,939 42; the surface improvements, machinery, real estate, etc., having actually cost that amount. The shafts of the mine are eight in number, and in some cases are below the 130 fathom level. Two of these are upon a conglomerate lode, which has been found to be very rich upon exploration, and is now being opened. The main workings, however, are upon the "Pewabic," as was stated above. The machinery connected with this mine is of the finest character. It employs Ball's stamps and washers, the nature of which may be inferred from the fact that they cost, with the building, etc., over $100,000. Its hoisting apparatus, tramways, etc., are all of the same durable and valuable character. This mine has been working since 1855, and up to the close of 1864 had produced copper to the value of $2,273,210 46. Its yield for July last was reported at 105 tons, 1,000 pounds.

Franklin.—This mine is also working the "Pewabic lode," just beyond (northeast) the Pewabic. It has hitherto ranked as the third mine in the district, but is fast rivalling the Pewabic, which it slightly surpassed last month in yield, its return being 107 tons, 125 pounds. Both mines were until recently under the same management, but at present they are almost entirely disconnected. The buildings and general arrangement of the Franklin are of the first class, and in its "show" of copper it can be surpassed but by very few mines upon the lake. During 1864 it produced 605 tons, 1,335 pounds of ingot copper, and paid its stockholders a dividend of $5 per share in August last, and an additional one of $3 in April, 1865. Its shafts are five in number, and have penetrated below the 60-fathom level. The mine has been worked since 1857. It uses Ball's stamps and washers and its hoisting apparatus is of admirable and novel character. All its external indications are those of prosperity and thrift, and a visit to its "location" is well repaid by the privilege of inspecting its efficiently managed workings. From present appearances its stock will prove hereafter a far more lucrative investment than has been generally expected. I regret that in this case also the failure to find the agent of the mine has forced me to rely entirely for my statistics upon the annual report, submitted in March last.

American Railroad Journal.

New York, Saturday, September 23, 1865.

Gravity Railroads.—New Projects.

We learn that surveys for a new gravity railroad have lately been executed, and that the work of construction will probably be let out early next year. The road will commence at a point in the Lackawanna and Bloomsburg Railroad, about a mile from Wilkesbarre, Pennsylvania, and pass eastward up the Moosie range of mountains, terminating on the Delaware, Lackawanna and Western, near Pocono Summit, or about mid-way between Scranton and the Water Gap. The height to be climbed is fully 1,500 feet, on a distance of rather less than 50 miles. From the junction there will be an uninterrupted descending grade to the Delaware.

This work will shorten the distance between the lower end of the Luzerne county coal field and the City of New York. In fact, it will be equivalent to the opening of a *new* avenue to the anthracite regions, as the sections of the Delaware, Lackawanna and Western, between Scranton and the summit requires double the power to work it, that is needed elsewhere. That section of the road is already severely tasked during the winter season.

For heavy freighting only on lines which require to climb high elevations, the gravity principle offers advantages superior to the common locomotive road. Its first cost is perhaps a little greater, since the tracks are laid on two entirely separate lines, in many places half a mile apart. The heavy stationary engines at the planes with the apparatus attached also cost a little more than the same number of locomotives.

On the other hand, a lighter rail can be used, the coal cars not being nearly so severe on the track as locomotives. On the Pennsylvania Coal Company's gravity road, between Hawley and Pittston, 47 miles, the rail usually weighs only 40 lbs. to the yard. One of about the same size is used on the Delaware and Hudson Canal Company's gravity road, from Honesdale over the mountains to near Scranton, the lower section of that road being operated by locomotives.

The length of the largest planes on the former of these lines is 2,250 feet, with a rise of one in ten. The levels have a descending grade of about 44 feet to the mile. At this rate to climb an elevation of 1,500 feet, the planes would require an aggregate perpendicular ascent of at least 2,000, or possibly 2,500 feet. The speed attained is from six to ten miles an hour. Ordinary laborers in a short time can be trained to take charge of the trains, thus effecting a considerable saving in running expense. The number of accidents on these lines is said by experienced men to be inconsiderable, rather under, than over those happening on lines where locomotives are in use.

On the other hand, we learn that the Lehigh and Susquehanna Railroad Company are building a locomotive road 13 miles long, up the west slope of the mountains, this side of its terminus at Wilkesbarre, so as to avoid three miles of planes. But the difficulty in this case appears to arise rather from the imperfect construction of the present track than essential defects in a gravity railroad. As we have been credibly informed, the superstructure of that part of their line was such that its capacity was fully reached, when, instead of suspending operations to rebuild it, the managers deemed it preferable to construct a new line altogether, enabling them to operate *the whole* by locomotives, instead of but a part. It is obvious that one or the other method of operating a railroad should be resorted to, whenever practicable; and that either may be less objectionable than a combination of the two.

Pennsylvania, with its immense deposits of coal and iron, its high and broad ranges of mountains, which have to be crossed to reach tide water, may be regarded as the home of the gravity railroad. In no other State are the difficulties to be overcome so great, and the freight offering so immense, compared with the passenger business of these lines.

Hawley Branch Railroad.

This is the name of a railroad extending from Lackawaxen, on the Delaware Division of the Erie Railway, to Hawley, the northern terminus of the Pennsylvania Coal Company's gravity road. Its entire length is 16 miles, following the south bank of the Lackawaxen. The grades are easy, the maximum being only 26 feet to the mile, and that favorable to the passage of heavy freight. The curves are, however, if not very abrupt, yet so numerous as to make the line exceedingly sinuous. The road-bed and superstructure are executed in the most thorough style, the rail weighing about 60 lbs. to the yard, and the track being universally smooth and pleasant.

The stock was subscribed and the road is owned by the Pennsylvania Coal Company; but built and operated by the Erie under contract. Its cost, we learn, was little over $40,000 per mile—a moderate figure, considering that it was built during the war, the line having been opened in December, 1863. The object of its construction was to free that coal company from the control of the Delaware and Hudson Canal, which passes up along the opposite bank of the river. The road is understood to be quite successful as a financial enterprise. Indeed, there is great need for its extension to Honesdale and further into that country, which is far behind in regard to facilities for travel.

Only one passenger train is run daily each way. The principal business is the transportation of coal to the Erie. For some weeks this has stopped altogether, owing to an extensive strike among the miners, which extends all through Car-

bondale, Scranton, Pittston, &c. There are, however, indications that the men will resume work at an early day. Public opinion, with scarcely an exception, is very decided against them.

European and North American Railway.

The Government of New Brunswick, approving of the arrangements entered into with the Maine companies for the construction of the New Brunswick portion of the E. & N. A. Railway to the American frontier, and of their ability to execute the work, have decided to grant the subsidy of $10,000 a mile. There is a condition, however, attached to this decision, and that is, that the St. John Company to be entitled to the grant must raise their stock to $200,000. The stock books of the company reveal the fact that there is already subscribed over $100,000 of reliable stock, leaving about $80,000 more to raise the sum to the required amount. All that the people of St. John have, therefore, to do in order to secure the long talked of work is to subscribe this latter sum. Six per cent. on their investments is guaranteed to all shareholders of the company, every possible precaution has been adopted to render the completion of the road certain and the expenditure of the company's funds judicious, and estimates have been supplied proving incontestably the ability of the parties agreeing to operate on the work to do all they profess a willingness to do. The St. John *News* publishes the following statement of the directors as to the present position and future prospects of "Western extension," in which they thus refer briefly to their labors for some months past:

After the Common Council refused to aid the work on the part of the City of St. John, the Directors, desiring to push the enterprise to a successful termination, entered into an agreement with the European and N. A. R. R. Co. of Maine, to build "Western Extension" for the company here, on the basis of the subsidy of $10,000 per mile and the taking of stock in our company to the extent of $200,000; the company in Maine to furnish the remainder of the money requisite to complete the road; the Maine Company agreeing, at the same time, to build the road from Bangor to the boundary of New Brunswick.

This agreement was entered into in June last. The company in Maine have secured the money, as they assure us, to carry out the agreement on their part; and the company here only require to raise their subscription of $200,000 to secure an early commencement of the work.

The whole line from Bangor to St. John has been put under contract to be built within four years after the Government of this Province shall agree to grant us the subsidy of $10,000 per mile, and we obtain stock subscription to the amount of $200,000.

During the last week the Directors laid the matter of their contract before the Government of this Province, asking their approval and consent to give the subsidy. To this application the Government have replied that they will cheerfully aid us to the extent of the law, which is all that we asked for, and only require from us that our stock should be subscribed for to the extent of $200,000. Of this amount our company have in undoubted subscriptions the sum of over $100,000, and now require additional stock to the extent of about $80,000 in order to the immediate commencement of this great work; and for the securing this stock the Directors intend applying to the people of this city.

"Western Extension" has long been most anxiously desired by the people of St. John. The idea of the European and North American Railway has been before this country for many years, and much labor has been expended in keeping it alive. The road from this city to Moncton is part of the enterprise. The line from Truro to Halifax is another link. The part that will connect Truro with Moncton is now under contract. The means to unite Bangor and St. John are ready, less the amount above stated, and this appeal to the citizens of St. John is now made to raise the sum of about $80,000, in order to set in motion the machinery that will lead to the completion of the entire line, and connect St. John with Halifax on the East, and the United States on the West.

Under the agreement with the Maine Company, interest at six per cent. per annum is guaranteed upon the $200,000, so that persons taking the stock required will at the same time aid a great public work, in which the future welfare of this city is most deeply interested, and secure a profitable investment for their money.

Connecticut River Railroad.

The earnings, expenses, etc., of this road for the years ending November 30, 1863 and 1864, have been as follows:

Earnings:	1863.	1864.
From passengers	$178,265 77	$253,106 43
" freights	154,102 69	206,486 02
" mails	6,125 40	6,140 40
" express	3,600 00	4,200 00

Balance—Surplus	102,185 99	148,881 52
	$233,436 04	$303,633 00

Compared with 1863 the gross earnings of 1864 show an increase of $128,126 66; with an increase in expenses of $100,296 48—making the increase in net earnings $27,830 18.

The report says:

The proportion which the expenses bear to the receipts is greater than in preceding years, being 56 per cent., a condition of things likely to be presented by the reports of many other roads, and which seems not only to suggest but demand some further advance in the rates of passenger and freight transportation.

The large increase in the gross sum charged to expense account is due chiefly to the enhanced cost of labor and materials; but it is proper to observe that, of the expenditures, a considerable sum has been paid for additional equipment and for permanent improvements in the property of the Company. Early in the year it was found that the largely increased passenger business demanded for its accommodation four additional passenger cars, which were procured, at a cost of $15,157 60. The car equipment has been further improved by the construction at our own shops of two additional house and six additional platform freight cars, besides the rebuilding of two passenger cars and five platform freight cars.

The repairs of locomotives have been unusually heavy, several of them having met with disabling accidents calling for large outlays; all the machines are now in perfect order.

A second car house at Springfield, imperatively required for the proper protection of the passenger equipment, has been erected at a cost of $4,686 44, and with a capacity for six long cars. A boiler shop has also been added to the general repair establishment at Springfield, at a cost of $2,941 74.

A permanent improvement of great value has been made near the Springfield station by the construction of a bridge under our tracks for the road leading into Hampden Park. The material excavated for the bridge was used to build a road leading thence to the Connecticut River. The total cost was about $4,600. By this expenditure we not only do away with a troublesome and dangerous crossing of our rails at that point, but have been able to procure the formal discontinuance of another grade crossing at a point further south, in exchange for the new and more convenient access to the river which is afforded to the public by way of the bridge.

Notwithstanding the high price of labor and materials, a full complement of men has been kept employed on the roadway. About 395 tons of new rails have taken the place of a like amount of worn out rails in the track, at double the cost of the same kind of work last year. Ten thousand new cross ties have been laid, and about 237 tons of rails have been taken out, repaired and replaced. The track was never in better order than at present. A bridge, 155 feet long, over the upper canal at Holyoke, has been rebuilt and thoroughly protected from the weather. This completes the renewal of the three large bridges near that station.

An addition to the passenger house at Greenfield, adapting it to the growing business, has been erected at a cost of $5,280, thus securing at that station accommodations equal if not superior to those of any other station on the road. At the request of the people of Hatfield, the station in that town has been moved three-fourths of a mile south to a point which is believed to be more conveniently situated for a large portion of the business. As an inducement to us to make the change, the petitioners volunteered to meet the cost of a new passenger house and new freight house of ample dimensions for the rapidly increasing business of the station, in exchange for the buildings at the old site.

A valuable improvement, estimated to cost $4,000, commenced late in the year and only partially completed, consists in the erection of a continuous wall along the bank of the canal in Chicopee and the substitution of a solid road-bed of earth for the original structure of piers and stringers. The difficulty and expense of maintaining the road at this point has for some time indicated the necessity of making this improvement. In view however of the other large demands upon our income account, it would have been postponed to another year but for the fact that the company owning the canal were about making some improvements with which our work could be connected, at a saving of between two and three thousand dollars.

The time is rapidly approaching when a due regard for the convenience of the traveling public and the interests of the corporation will require the construction of a second track between Springfield and Chicopee. There are now twenty-four daily trains over this part of the road. Of course an increase of capital stock must be provided for whenever the additional track is built.

A night train with sleeping cars attached, between Springfield and Montreal, in connection with a day train between New York and Springfield, has been run throughout the year with as much success as could have been reasonably anticipated for a new train. There is no question of the advisability of continuing this train, for al-

though it cannot be said to have paid more than its expenses thus far, yet there is little question that it will speedily become one of our best trains.

Since the last annual report, no change has taken place in the relations of this Company to the New Haven and Northampton Company, each corporation occupying a separate passenger house at Northampton.

A negotiation, conditioned upon the approval of the stockholders at the approaching annual meeting, is in progress with the directors of the Vermont and Massachusetts Railroad Company, looking to an arrangement by which we shall furnish power and men to run the trains of the River Line over the ten miles of their road between South Vernon and Brattleboro', for a period of ten years. An equitable arrangement of this kind would benefit both corporations and promote the interests of the great line of roads leading from New York through the Connecticut River Valley to Vermont, New Hampshire and Canada.

The Commissioners of the Sinking Fund established for the redemption of the mortgage bonds of the Company report the present value of the fund at $35,129 32. This sum includes four annual payments from the Treasurer amounting to $32,000 00. The balance, $3,129 32, represents the accumulation of interest. The substance of their annual report to the Directors is herewith presented.

The company have twelve locomotives.

The office of the company is at Springfield, Mass. The officers and directors are:

President.—DANIEL L. HARRIS.

Directors.—Ignatius Sargent, I. M. Spelman, Edward A. Dana, Chester W. Chapin, John Chase, J. H. Butler, Henry W. Clapp, Roland Mather.

Treasurer.—SETH HUNT.

Sup't and Engineer.—W. B. BRINSMADE.

Master Mechanic.—JOHN MULLIGAN.

☞ The Boston, Hartford and Erie Railroad Company have made a contract to complete the railroad between Woonsocket and Slatersville, within three months. The work will not stop on being completed to Slatersville, but efforts will be made to complete it to Pascoag during next year.

Washington County Railroad.

At a meeting of the Board of Directors of the Baltimore and Ohio Railroad Company, held at Camden Station yesterday, it was unanimously resolved to make an absolute subscription of four hundred thousand dollars on the part of the company to the stock of the Washington County Railroad Company. This company, it will be recollected, was chartered to build a road from Hagerstown, in Washington County, to a point on the line of the Baltimore and Ohio Railroad. A majority of the county commissioners of Washington County were also present at Camden Station, and on this liberal subscription being made by the company, they immediately subscribed, absolutely, $150,000, to the same undertaking. There was also subscribed at once, in addition to the above amounts, $12,000 by Johns Hopkins, Esq.; $10,000 by R. Garrett & Sons; $10,000 by Robert Fowler, Esq.; $4,000 by A. Gregg & Co., and $2,000 by Samuel Wilhelm. The county commissioners of Washington County, who were present, expressed the utmost confidence in the co-operation of the citizens of that county in the work, and these opinions were concurred in by other prominent citizens of the county, who were present also. In announcing to these gentlemen the action of the Board of the Baltimore and Ohio Railroad Company, Mr. Garrett informed them that he was now certain of the immediate commencement and early completion of the new road to Hagerstown. He said also that the subject would be brought at once to the attention of the people of Baltimore, and that the result would be, by the construction of this direct line, the restoration to this city of a trade properly belonging to it, which had been, for a long period, diverted to other cities.—*Balt. Sun, Sept.* 14.

Vermont and Canada and Vermont Central Railroads.

The hearing upon the petition of the Trustees took place at Burlington, Vermont, on the 14th inst., and they offered conclusive testimony of the necessity of certain new and enlarged buildings at St. Albans and Burlington, and of great additions to the equipment. Many of the leading bondholders were present, and no attempt was made to invalidate the testimony of the Trustees.

The President and a majority of the Directors of the Vermont and Canada Railroad were present, and denied that any part of said expenditures should be represented by a new issue of Vermont and Canada Railroad stock, and the Trustees abandoned the claim for stock and obtained from the Chancellor a decree authorizing them to issue bonds to any amount not exceeding seven hundred thousand dollars, payable in ten years, with interest at the rate of eight per cent. per annum, free of Government tax, and secured by a sinking fund to be created by setting apart the car service of the new cars on the Vermont Central line from Boston to Ogdensburg.

The managers of the road are confident that, with the increased equipment, there can be realized a net income of six hundred thousand dollars per annum. Recent reports as to the income of the road were incorrect as to the amount of income, and especially as to the expenses, which were stated without discriminating between ordinary and extraordinary expenses.

From official sources the gross income for the year ending June 1, 1865, was $1,477,782 26, expenditures for same period for ordinary purposes, $1,143,455 74—$334,326 52, the net income, being more than enough to pay the rent to Vermont and Canada Railroad and the interest to the first mortgage bondholders. A conference is about to be held between the principal holders of the first and second mortgage bonds, and it has been proposed that the second mortgage bondholders shall take a certain part of the sinking fund bonds as a consideration for a reduction to be made by the first mortgage bondholders of all over fifty per cent. of the unpaid interest on the first mortgage bonds, the unpaid interest being at least seventy per cent.

The prospects of business on the road are so good that there is every inducement for the parties interested to furnish the necessary capital, and no doubt it will be furnished. The Vermont Central, with the Vermont and Canada, is likely to realize all the income which was anticipated by the founders and early friends of the road. The only embarrassment now is from an excess of business over and above the means afforded by the present buildings and equipment, and with the additional capital a period of great prosperity is anticipated.

Oswego and Rome Railroad.

The Oswego and Rome Railroad, which intersects the Rome, Watertown and Ogdensburg Road at Richland Station, has been completed westward as far as Mexico. The road is being pushed forward for completion as fast as possible, and it is expected that the track will be laid to Oswego by the latter part of October.

Lancaster and Manheim Railroad.

The contracts for building the branch of the Reading and Columbia Railroad, running from Lancaster to Manheim, have been awarded. Six sections to H. R. Hawman & Co., of Reading, the remaining three sections to James March & Co., of Lebanon. These are old and successful contractors, and are sure to complete their work without failure or delay. The work will be commenced at once and will be pushed forward vigorously.—*Columbia Spy, Sept.* 2.

Western Maryland Railroad.

A large number of the heaviest tax payers of Washington county petition the board of commissioners to purchase $150,000 of the stock of the Western Maryland railroad. In their petition they set forth the advantages which must accrue to the county and State by the extension of this popular thoroughfare to Hagerstown, and urge that the commissioners furnish the aid solicited from the county to carry the enterprise to a successful termination.—*Hagerstown Herald.*

Kent County Railroad.

Another effort, it is understood, will be made at an early date to complete the subscriptions to this road. An increased interest is now manifested in railroad connection with the Delaware Road. The peach interest of this county has become so great that it is estimated that freights from this source alone will go a great way in sustaining the road. The Delaware Road now runs two trains daily exclusively for peaches.—*Chestertown Transcript.*

☞ The *Commercial Bulletin* says that General Fremont designs establishing at St. Louis the manufacture of railroad iron, railroad engines and rolling stock. He is president of the Missouri Company—a corporation chartered in 1864 by the Legislature—and that company will, as soon as the proper arrangements can be completed, engage in that business.

☞ The Belmont Iron Works of Wheeling, turn out 3,600 kegs of nails a week. These works have manufactured 88,000 kegs of nails in six months, using eighty machines, eighteen boiling furnaces, and running day and night, and fifteen thousand bushels of coal per week. They employ 420 workmen.

☞ The rolling mill at East St. Louis, Ill., is getting out new rails, made of Missouri iron, and designed for the Chicago, Alton and St. Louis Railroad.

Liability of Railroad Companies for Injuries to Employees.

In a late article we adverted casually to this subject, and stated the rule to be that, in general, a servant of a railroad company could not recover against the company for an injury occurring in the course of his employment as such servant. The reason of the rule is, that the servant must judge for himself whether there is any probability of injury arising to himself, and he is not bound to incur risk in the service. He has the same and oftentimes better opportunities of judging of the probability of injury than his employers, and is in a position to decline the service, if he chooses to do so. The case of Hutchinson *vs.* N. York & B. R. R. Co., 6, Rail Ca., 580, will serve to illustrate the law upon this subject. The plaintiff's delaration stated that H. was in the service of the defendants, and that in discharge of his duties as such servant, he became a passenger in a car of the defendants drawn by a steam engine under the guidance of the defendants; that the defendants were possessed of another steam engine which then was drawing other cars under the guidance of the defendants by their servants. Yet defendants acted so negligently in and about the guidance of the first mentioned engine, and in and about the other engine, that a collision took place and H. was killed. The defendants pleaded that the collision took place solely through the carelessness, negligence, &c., of the defendant's servants, who were fit and competent persons to have the guidance of the same, and that the negligence, &c., was not authorized by the defendants and was without their leave. It was held by the Court that the declaration did not disclose any cause of action, and the action could not be maintained, although the company it seems, would have been liable, had H. not been, at the time of the accident in the actual service of the company. There are, however,

EXCEPTIONS TO THE RULE.

There seems to be no doubt that if there be any fault on the part of the company in the selection of the other servants, or in continuing them in their places after they have proved incompetent, or in the employing of unsafe machinery, the company *will be answerable* for all injury to their servants in consequence.

A railroad company which continues in use a dangerous and defective locomotive engine, after notice of its dangerous condition, is liable to one of its servants engaged in running such engine for an injury sustained by him, (without negligence on his part,) in consequence of such defects. This law was laid down by the Court of Appeals of this State in the case of Keegan *vs.* The Western Railroad Company, 4 Selden, 175. The Chief Justice in rendering the opinion of the Court in that case, remarks, that the cases in which it has been held that a principal is not liable to one agent or servant for an injury sustained by him in consequence of the misfeasance or negligence of another agent or servant of the same principal while engaged in the same general business, are only applicable when the injury complained of happened without any actual fault or misconduct of the principal, either in the act which caused the injury or in the selection and employment of the agent by whose fault it did happen.

Whenever the injury results from the actual negligence or misfeasance of the principal, he is liable as well in the case of one of his servants as in any other. But where the injury results from the actual fault of a competent and careful agent, (as may sometimes happen,) the fault will not be imputed to the principal when the injury falls upon another servant, as it will where the injury falls upon a third person, as for instance upon a passenger. In the case of a passenger, the actual fault is imputed to the company itself, on the grounds of public policy; in the case of a servant it is not.

It makes no difference in regard to the liability of the company, that the person came into the service voluntarily, to assist the servants of the company in a particular emergency, and was killed by the negligence of some of the servants.

In the case of McMillan *vs.* The Saratoga and Washington Railroad Company, 20 Barb., 449, it was held that to entitle a servant, for example, a locomotive engineer, to recover for an injury happening to him in the course of his service, through defects in the machinery, &c., used in the discharge of his duties, he must prove actual notice to his principal of the defects.

But we think it may be doubted whether actual notice is necessary in a case of *culpable* negligence on the part of the company. Thus, if the master might have known the exposure of the servant, but for his own want of ordinary care, as in the use of a defective locomotive engine, which exploded and injured the servant through defective construction, the master is liable for the injury. (Noyes *vs.* Smith, 28 Vt. Rep., 59.)

Of course, if the servant knew of the defects, and did not inform the company, or if the defects were known to both the servant and the company, and the servant makes no objection to continue the service, he probably could not recover of the company for any damage in consequence. But if the company knew of the defect, and directs the servant to continue the service in a prescribed manner, they are undoubtedly responsible for consequences.

A railroad company cannot be regarded as in any sense guarantors of the sufficiency and safety of their machinery, but are responsible only, when injury occurs to servants without fault on their part, and through the neglect of the company to furnish machinery and apparatus reasonably safe for the uses to which it is put. (See 5 Ohio R. 91.) A conductor or engineer, for instance, may demand of the company reasonable care and diligence in procuring and keeping such machinery and apparatus, as is safe for the uses to which it is put; and beyond this, it is one of the hazards of his contract, that such conductor must take the risk of accidents.

But a conductor, not being under the control of any superior, in immediate and constant contact, is bound to exercise an independent and prudent forecast as to perils; and inspection of the machinery to guard against such perils and the liability to accidents; and if he receive an injury, while neglecting such duty, or through mismanagement of his train in any particular, or through any defect or insufficiency of the machinery of which he was previously aware, or which would have been discovered by that careful inspection which it was his duty to have made, he cannot recover of the company; nor can he recover, if the defect in the machinery causing the accident, were unknown both to the conductor and the company, and neither party was in fault. It is the duty of the company to furnish the requisite number of hands, for the safe management of their trains; and if they do not, the conductor may legally decline to continue in the service; but if under these circumstances, he still continues to operate the train, he voluntarily assumes the risk and waives the obligation of the company in this respect to himself, and can have no redress for damages so incurred.

SERVANTS IN DIFFERENT GRADES OF EMPLOYMENT.

There has been a good deal of discussion in the books as to whether the rule that servants cannot recover for injuries received in the course of their employment, as stated above, applies to servants of every grade. Thus in a case decided in Georgia, (Scudder *vs.* Woodbridge, 1 Ga., 195,) the Court held that the rule, that the master is not liable for an injury to one servant, inflicted by the want of care or skill in a fellow servant, does not apply to the case of slaves employed on the road; and in Scotland the law seems well settled, that servants who have no employment in the matter wherein the accident occurs, may recover for injuries received thereby.

In Ohio it has been held that a day laborer upon a railroad, who was not under any obligation to renew his work from day to day, and who was injured through the negligence of the conductor of one of the company's trains, upon which he was returning home, free of charge after completing his day's work, could recover. (20 Ohio R., 415; 3 Ohio State R., 202.)

Where laborers upon a railway were transported to and from their labor and meals upon the gravel trains of the company which they were employed in loading and unloading, but had no agency in managing, and in such transportation by the gross negligence and unskilfulness of the engineer, were injured, it was held that the company were liable.

But this doctrine has not met with favor, and the rule is well settled in this State, at least, that a servant who sustains an injury from the negligence of a superior agent engaged in the same general business cannot maintain an action against their common employer, although he was subject to the control of such superior agent, and could not guard against his negligence or its consequences. The law is laid down in the case of Sherman *vs.* Rochester and Syracuse Railroad Company, 17 N. Y., 153.

In that case, the plaintiff's husband was a brakeman in the employ of the defendants, whose duty it was to apply the brakes as often as he should be signaled to do so by the engineer or conductor, and was bound to obey the instructions of his superior officers. The train was running the unusual and dangerous speed of eighty miles an hour, by reason of which it could not be stopped in sufficient time to prevent its collision with cattle upon the track. Several cars were thrown from the track, and the brakeman was killed. The Court held that notwithstanding this culpable negligence on the part of the engineer and conductor, the widow of the brakeman could not recover damages against the company. The Court remarks, in that case, that the same rule of

liability which we have above stated in general, must necessarily apply as well where the employments of the servants are distinct as to cases where they are one; and to the several grades of employments where those in the inferior are subject to the direction and control of those in the higher grades, as to cases where all occupy a common footing and possess equal authority. No distinction or exception as to liability of the principal, resting upon the inability of the injured party to protect himself in the particular case, can therefore be made, without abrogating the entire rule.

The case of Russell *vs.* The Hudson River Railroad Company, 17 N. Y., 134, was one in which it appeared that plaintiff was employed by the company in loading gravel and sand at the pits where they were dug, for transportation to places upon the road where filling was required. It was the practice of those workmen who lived in New York to come and go home on the cars, paying no fare either way. On the day the accident occurred, the plaintiff went upon the cars with every load of gravel for the purpose of assisting to unload it. After discharging the gravel the train went to New York with the workmen residing there, the day's work being finished. The train ran off the track into Spuyten Duyvel Creek, and the plaintiff was injured. The Court held, in opposition to the Ohio cases before cited, that the plaintiff could not recover, and that a laborer employed to work in connection with a train, under an arrangement by which he is to be conveyed home every night in such cars, free of charge, cannot maintain an action against the company for any injury received while thus riding home, in consequence of the negligence of the engineer. This decision is also in opposition to the case of Fitzpatrick *vs.* New Albany and Salem Railroad Company, 7 Porter (Ind.,) 436. (See also Timmons *vs.* Central Ohio Railroad Company, 6 Ohio St., 105.)

But this rule cannot be applied to the cases of carpenters or civil engineers, or other employees who go out of their regular course of employment by direction of the company, and, while so engaged, suffer injuries by the negligence of the company's servants.

Thus a carpenter employed by a railway company to build one of their bridges, and who took passage in their cars by their directions, to go to a certain point, for the purpose of loading timber to be used in building the bridge, and who was injured in the course of the passage by the negligent conduct of the train, is entitled to recover of the company, the plaintiff having no particular connection with the conduct of the business with which he was injured. Gillenwater *vs.* Madison and Indianapolis Railway, 5 Ind. R., 340.

And where a contractor engaged in repairing a bridge upon a railroad for the company, employs men to work thereon by the day, and one of them while thus employed on the bridge receives an injury from a passing train, he may maintain an action for damages against the company; provided he can show that the injury was caused by the negligence of the company's servants or agents in charge of the train, without any fault or negligence on his part. For in this case, the injured man was not the servant of the company, but of the contractor. (Young *vs.* New York Central Railroad Company, 30 Barb., 229.) It cannot be presumed that he contracted with reference to any risk arising from the running of trains on the road, but only with reference to accidents arising from the nature of his own occupation, independent of the road. (3 Mees. & Wels., 1; 4 Metc., 49; 8 N. Y., 175; 18 Id., 432; 18 Id., 136, 156; 6 Barb., 231; 5 N. Y., 50; 5 Barn. & Cres., 560; 12 Adol. & Ellis, 737.)

European and North American Railway.

We are glad to be able to announce, that the contract for completing the entire line of railway from the depot of the Maine Central Railroad in Bangor, to the Suspension Bridge at St. John city, was finally closed on Friday last, with Messrs. George H. Pierce and Albert Blaisdell, contractors.

The delay in consummating the contract has arisen from the fact that the character of the bridge across the Kenduskeag, and of the line through the city, was made subject to the determination of the Board of Railroad Commissioners, by the act of February, 1864. This board, consisting of Hon. Geo. P. Sewall of Oldtown, Col. A. W. Wildes, Engineer, of Skowhegan, and Allen Haines, Esq., of Portland, met in this city on the 23d of August and heard all parties interested, and agreed on an award, which was made known to the company on Friday, and estimates based on their award submitted to the contractors, who are to build the entire line, including the bridge across the Kenduskeag and the grading of Front street. This one mile from the Maine Central depot to the point of rocks at Newbury street, has always been a bugbear in the way of a railroad up river, from the difficulty in forming a connection with the western road. The award of the Railroad Commissioners will do much to relieve the anxiety of our people in relation to the harbor, for it requires a truss bridge on piers, with open spaces or spans of not less than 100 feet each, and two draws of 38 feet each.

It is a favorable circumstance that the expense of the heavy excavations required through Front street is now offset by the demand for all this material, to fill in the new steamboat wharf, just undertaken by the owners of the Katahdin steamer.

A contract between the railway company and the city of Bangor, secures a commercial avenue or street 90 feet in width, from the Maine Central depot to the west line of French street, a distance of nearly half a mile.

Col. Pierce, one of the contractors, passed over the line with the President and other Directors of the company on Friday, as far as Passadumkeag. They will commence work as soon as the $500,000 of new stock is subscribed, as contemplated in their contract. On the completion of this subscription of $500,000 the entire capital is secured for completing the line from Bangor to St. John City.—*Bangor Whig, Sept.* 11.

Intercolonial Railway.

Advices by telegraph inform us that the Hon. Albert J. Smith, Premier of New Brunswick, returned from England by the late steamer at Halifax, having closed a contract with the International Contract Company of England for constructing the railway line from Moncton to Truro, a distance of 109 miles, which will complete the chain from St. John to Halifax, a distance of 262 miles. The cost of the line from Moncton to Truro is $40,000 per mile. Of this distance, 36 miles are in New Brunswick, and 73 miles in Nova Scotia. The line to be completed in four years.—*Bangor Whig.*

☞ It is reported that the Northern Central Railway Company have become the proprietors of a large tract of valuable coal lands in the Shamokin region, which, it is understood, is to be put into a coal company, and divided among shareholders in the Northern Central Railroad Company, at a merely nominal sum per share.

Canal Stock Debt Paid.

Since the 30th of September, 1864, $2,694,224 76 of the 6 and 7 per cent. Canal Stocks of this State, covering the debt created prior to 1846, have matured, and $2,517,574 76 have been actually paid and stock cancelled. Funds to reimburse the remainder when presented are in deposit with the Manhattan Company, New York. This amount of debt has been paid out of the "surplus revenues" of the Canals accumulated in the Sinking Fund.

In addition to this, $50,000 of the 6 per cent. Canal Stock, created since 1846, under the provisions of section 10 of article 7 of the Constitution, which matured in July last, has been paid from the revenues of the General Fund.

Southern Central Railroad.

A company has been formed for building a railroad from Owego to Sodus Bay, on Lake Ontario, *via* Newark Valley, Dryden, Groton, Moravia and Auburn. The name of the railroad will be "The Southern Central." Mr. Cyrus C. Demus of Auburn was elected President, and the Hon. John J. Taylor of Owego Vice-President. It was resolved by the Convention (which met at Auburn and organized the Company) to secure the sum of $2,000,000, to build said road, and to refund all amounts paid, unless the whole sum should be secured.

Sanderson, Brothers & Co.

This well known and celebrated house has a speciality of its own, that of the manufacture of cast steel, warranted and known to be the very best material for tools. No less than three important and extensive works in Sheffield, England, are under their management, and produce the article in immense quantities, for which they find a steady demand in all parts of the civilized world. They have two establishments for its sale in this city, 16 Cliff street, and 241 Pearl street, besides agencies in Philadelphia, New Orleans, Baltimore and Montreal. Their reputation is of the first class, and they stand at the head of British manufacturers.

Commission and Financial Agency.

August Limbert and Charles H. Leland, the latter Consul for the Republic of Uruguay, have formed a co-partnership for the purpose of buying and selling gold and Government securities, bills of exchange, commercial paper, and the collection of coupons and dividends. Their references are of the very highest character. Mr. Limbert has had the valuable experience of twelve years service in the well-known house of Schuchardt & Gebhard, and is well-known in the street.

Canal Tolls.

The following is a comparative statement of the receipts of canal tolls from the opening of navigation to the 31st of August:

1865	$1,895,243	1862	$2,819,467
1864	2,342,327	1861	1,919,653
1863	2,675,529	1860	1,568,912

Gross receipts of tolls from August 31, 1864, to close of navigation	$1,634,654
Gross receipts from the opening of navigation to Aug. 31, 1865	1,895,243
Total for fiscal year	$3,529,897
Deduct appropriations for repairs and maintenance	1,964,565
Remainder for sinking funds	$1,565,332

MINING STOCKS—GOLD, SILVER, COPPER, IRON, LEAD, ETC.

American Railroad Journal.

Saturday, September 23, 1865.

Stock Exchange and Money Market.

We have on former occasions expressed the opinion that the London stock-jobbers are combined to a considerable extent to depress the prices of American securities on their Exchange. To this end, Reuter's telegrams are evidently made use of with some effect. One of these lately informed the British public that our Secretary of the Treasury was about coming into the market with a new loan. This, though based on pretended advices from this country, was entirely without foundation, as Mr. Reuter was informed by other advices which reached him at the same moment. But his false information was eagerly seized upon to depress our 5-20s, which accordingly declined. It was also made use of in the London *Times* on which to found some depreciating remarks.

The Birmingham *Iron Trade Circular*, which, while it devotes itself principally to the consideration of the great British trade in metals, nevertheless expresses many opinions on finance and commerce, and evidently has the eye of the mercantile classes, in a late issue, asks if the debt of the United States is to be transferred to England, and what has become of the national profits of £70,000,000, evidently in some fear that it is being invested in this country. More than this, it admits that our former suspicions are founded on fact, for it says :

"It is plain that our seventy millions of profits, money earned, have been absorbed, but where? and to what point is the Gold still running? European capitalists are on their guard against a translation of the United States' Debt from New York to the Continent, and we have reason to believe that a similar apprehension exists, and *has made itself active towards repression*, in our Commercial and Monetary Circles. The *Economist* puts strongly what we have before pointed out, when it says:—'There are increased symptoms that our capital is very narrowly used up.'"

And yet it admits, (we quote its own words) that our finances, even taking our Secretary's report previous to the last, are doing well. It says :

"The Government now can afford to sell from the stock of Gold they kept in hand to meet contingencies a million of dollars in gold daily for several weeks, and they state it to be their intention to reduce the amount of gold in hand to twenty millions of dollars, say four millions sterling. Events, and the steadiness of their own conduct, have told most favorably for the finances of the United States. Our readers will find in another portion of our paper, more conveniently placed, the official tabular statement of the American National Debt, a clear exposition of which as there produced, is of the utmost consequence to the commercial interests of both Countries at the present period. The increase in the public debt, since the close of May last, has been, in round numbers only $122,000,000. The actual figures are these—on May 31, $2,635,205,753; on July 31, $2,757,253,275. In considering the exceedingly small increment in public indebtedness shown by this Treasury exhibit, the reader must remember not merely the period covered by it, but the events and circumstances that took place during that time. The two months of June and July were those in which the gigantic work of disbanding the forces of the army and navy was commenced and almost consummated, and in which the expenditures consequent upon settling up the accounts of the troops reached their maximum. Of the hundreds of thousands of men sent from the pursuits of war and destruction, to the pursuits of industry and production, all have had their accounts promptly settled by the Treasury. They are not only paid off, as regards the past, but they have been paid off for the last time; and instead of being a charge hereafter upon the resources of the nation, they will themselves be contributors to the enlargement of those resources; instead of being mere consumers at the public expense, they will become producers for the public benefit. Besides this, large numbers of heavy contracts have, during these two months been closed and settled; large numbers of vessels in government employ have been put out of commission and settled with, and innumerable minor sources of expenditure relating to all departments and branches of the public service, have been terminated. As we said, with reference to the disbanded troops, so with reference to all the foregoing—they re-appear hereafter no more as items in the public expense. The main reliance of the Treasury now to meet current expenses and the interest of the debt, is upon the receipts from internal revenue and from the custom duties, and

American Railroad Journal.

Saturday, September 23, 1865.

Stock Exchange and Money Market.

We have on former occasions expressed the opinion that the London stock-jobbers are combined to a considerable extent to depress the prices of American securities on their Exchange. To this end, Reuter's telegrams are evidently made use of with some effect. One of these lately informed the British public that our Secretary of the Treasury was about coming into the market with a new loan. This, though based on pretended advices from this country, was entirely without foundation, as Mr. Reuter was informed by other advices which reached him at the same moment. But his false information was eagerly seized upon to depress our 5-20s, which accordingly declined. It was also made use of in the London *Times* on which to found some depreciating remarks.

The Birmingham *Iron Trade Circular*, which, while it devotes itself principally to the consideration of the great British trade in metals, nevertheless expresses many opinions on finance and commerce, and evidently has the eye of the mercantile classes, in a late issue, asks if the debt of the United States is to be transferred to England, and what has become of the national profits of £70,000,000, evidently in some fear that it is being invested in this country. More than this, it admits that our former suspicions are founded on fact, for it says :

"It is plain that our seventy millions of profits, money earned, have been absorbed, but where? and to what point is the Gold still running? European capitalists are on their guard against a translation of the United States' Debt from New York to the Continent, and we have reason to believe that a similar apprehension exists, and *has made itself active towards repression*, in our Commercial and Monetary Circles. The *Economist* puts strongly what we have before pointed out, when it says :—'There are increased symptoms that our capital is very narrowly used up.'"

And yet it admits, (we quote its own words) that our finances, even taking our Secretary's report previous to the last, are doing well. It says :

"The Government now can afford to sell from the stock of Gold they kept in hand to meet contingencies a million of dollars in gold daily for several weeks, and they state it to be their intention to reduce the amount of gold in hand to twenty millions of dollars, say four millions sterling. Events, and the steadiness of their own conduct, have told most favorably for the finances of the United States. Our readers will find in another portion of our paper, more conveniently placed, the official tabular statement of the American National Debt, a clear exposition of which as there produced, is of the utmost consequence to the commercial interests of both Countries at the present period. The increase in the public debt, since the close of May last, has been, in round numbers only $122,000,000. The actual figures are these—on May 31, $2,635,205,753; on July 31, $2,757,253,275. In considering the amazingly small increment in public indebtedness shown by this Treasury exhibit, the reader must remember not merely the period covered by it, but the events and circumstances that took place during that time. The two months of June and July were those in which the gigantic work of disbanding the forces of the army and navy was commenced and almost consummated, and in which the expenditures consequent upon settling up the accounts of the troops reached their maximum. Of the hundreds of thousands of men sent from the pursuits of war and destruction, to the pursuits of industry and production, all have had their accounts promptly settled by the Treasury. They are not only paid off, as regards the past, but they have been paid off for the last time; and instead of being a charge hereafter upon the resources of the nation, they will henceforth be contributors to the enlargement of those resources; instead of being mere consumers at the public expense, they will become producers for the public benefit. Besides this, large numbers of heavy contracts have, during these two months been closed and settled; large numbers of vessels in government employ have been put out of commission and settled with, and innumerable minor sources of expenditure relating to all departments and branches of the public service, have been terminated. As we said, with reference to the disbanded troops, so with reference to all the foregoing—they re-appear hereafter no more as items in the public expense. The main reliance of the Treasury now to meet current expenses and the interest of the debt, is upon the receipts from internal revenue and from the custom duties, and

upon the accumulation in the Treasury. The internal revenue receipts for July were twenty-two millions of dollars, and the Treasury anticipates from this source an average of about a million dollars a day for the next three months. The most trustworthy estimate of the receipts from custom (in gold) during the coming months of the current fiscal year, put them at the average of fully eleven million dollars a month. As to the accumulations in the hands of the Treasury, they are shown by the statement of this morning to be: Amount of coin in the Treasury, $85,338,000 and of currency $81,402,000, or a total in the Treasury of $116,740,000. During the past month, there have been some considerable returns to the treasury from sales of vessels, naval stock and military material; but much heavier returns will come from this source in the current month. The Quartermaster's Department is rapidly preparing for the disposal of the immense amount of government property in its hands, and now no longer required. Two millions of dollars' worth of marine property has been advertised for sale in the cities of Washington, D. C., Cincinnati, Louisville, St. Louis, Nashville, Natchez, Vicksburg, Little Rock, New Orleans, and Mobile."

When it comes to see the report however at the close of August, it will have much more to say of the favorable aspect of our financial condition. The truth is, it is rapidly improving under its present wise management, aided by the patriotic efforts of the tax-payers of the country. The revenues appear not only to be on the increase, but are likely to become much larger as re-construction proceeds under the plan of the President, and additional resources from the restored States swell the grand total. The attempt at the *repression* spoken of appears to prove an entire failure.

Always attentive to our commercial interests, we have from time to time alluded to important changes going on abroad which seem to escape the attention of the authorities at Washington. Our foreign trade is conducted too much under obsolete commercial treaties. We have for example pointed out to our readers, who learn nowhere else that we know of, the radical changes that have recently been made by the Brazilian Government. We now have to add another instance. We have before us an official notice of the Governor General of India, declaring a very important change in the previous law relating to the customs duties "on goods imported and exported by sea." The following articles are by schedule A declared free: Grain and pulse, horses and other living animals, ice, coal, coke, bricks, chalk, stones, cotton wool, flax, hemp, jute, raw hides and skins, books, papers, maps, prints, music and works of art. Agricultural implements, firewood, machinery used exclusively for purposes of agriculture, navigation, mining, manufacturing, or for railroad purposes and the component parts thereof; guano and manures of all kinds, and bottles. The duties on other articles are as follows: Wines and liquors one rupee, or 63 cents per imperial gallon; porter, ale, beer, cider and other similar fermented liquors one anna, 16th of a rupee, the imperial gallon; spirits three rupees per gallon, or 10 per cent. ad valorem, when imported for use in arts and manufactures; iron not including iron mongery, cutlery or hardwares, one per cent. ad valorem; hops one per cent., ditto, tobacco manufactured or unmanufactured 10 per cent. ad valorem; piece goods 5 per cent., ditto, twist 3½ per cent., ditto. All other goods not included in the above list, 7½ per cent., ditto. Among the articles exported also free of duty are: rum, cotton, wool, flax and hemp, teak, coffee, tea, sugar, wool, hides and skins raw, raw silk, and silk Chusam. Now as our imports from the British East Indies in 1861 were of the value of between 4 and 5 millions of dollars, the facts we have given appear to us to be of some importance, and very proper for publication in this JOURNAL, which extends its observation to commerce, navigation and finance, as well as railways.

With regard to the condition of our own market, we have to observe that Government securities are steady, and compound interest notes have advanced. And here it may be well enough to remark, that beyond all doubt the prices of these will be governed by the home quotations. The rate in New York unquestionably fixes that abroad, so that if the holders wish to make money on them, it is their best policy to keep them up here. If they should for any reason advance 5 or 10 per cent. here, they would very certainly bring that advance abroad. So that those who are engaged in the business of depressing them are in fact injuring themselves. It is said that very little commercial paper is afloat in the street, or within reach of bill brokers. The discount on this is said to be lower than usual, the rate of the best of it being only about 6 per cent., while the less esteemed kind is worked off at 8 to 8¼ per cent. The amount of currency of the National Banks is now computed at 183 millions. The plan of redemption in the three great cities of the Union has not yet been adopted, there evidently being considerable opposition to it in influential quarters. We have expressed our opinion of this measure, and believe the true way is to receive these notes and send them home for redemption if they become too plentiful. The keeping of large balances by these institutions in those of this city, is doubtless beneficial to the latter, and this is probably the secret of the movement. On the other hand, those banks not the depositaries of the Government are not obliged to receive them, and may thus by their refusal, protect themselves from inconvenience without requiring any protection. This seems to us a common sense view of the subject.

The internal revenue seems to be on the increase. Since the 1st of July last to the 17th inst., the receipts were $80,479,502 41, much more than the estimate. The balance in the Sub-Treasury on Tuesday last was large, though it includes but a part of the sum at the disposal of the Government. Railroad shares are quiet, not being at present the subject of much speculation. Meanwhile the earnings continue large.

The business of the city and the country appears to be reviving on an immense scale. The numerous steamers relieved from the Government service, find a very ready sale at good prices, and are directly put in commission by their purchasers who find immediate and profitable employment for them. No surer evidence can be had than this, of our reviving commerce. We perceive from our late foreign exchanges, that great relaxation in commercial restraints are going on in several countries besides those already pointed out. These should be watched and promulgated for the benefit of shippers, importers and exporters. We would not allude to this subject so frequently were it not for the fact, that constant notices of the subject are absolutely necessary to fix the attention of the public upon it. We would also revert to another topic, viz., that the supplies of cotton going forward to Europe are beginning to attract much attention there, and much surprise. It is the interest of foreign holders that the supply should be short, but they will find much more here than they hoped, and the recent Treasury order having liberated the present stock on hand from one of its chief restraints, is likely to bring it out from its concealment or place of deposit.

We perceive with much satisfaction that the construction of railways on new lines is agitated in various quarters; new companies are being formed in this State, among which we notice one from Sodus to Oswego, the former place having in the early days of our western settlements been highly esteemed for its large, safe and commodious harbor, the best probably on Lake Ontario. The Southern lines are also being reconstructed as fast as possible, thus renewing profitable commercial lines.

We observe in the report of a speech recently made on his Western tour, by Sir Morton Peto, the greatest railroad contractor of our day, that he condemns the practice quite common with American companies to expend their profits in construction, to the damage of shareholders; asserting that this would not be tolerated in England for a moment. We presume this criticism will not be without effect.

Exchange has taken a small rise upwards, and so has gold. The small sums occasionally sold by the Assistant Treasurer have no visible effect on the market, nor will have. At least ten millions of the surplus should be disposed of at one time to have any effect on the combination.

The balance in the Sub-Treasury is increasing. On Tuesday it amounted to the unprecedented sum of $71,631,717.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—McGregor Western R. R., 18; New Jersey R. R., 140; Central R. R. of New Jersey, 122; Second Avenue R. R., 65; N. Y. North Carolina R. R.

We learn that the North Carolina Railroad, extending from Goldsboro' to Charlotte, N. C., a distance of 225 miles, is now in good working order, having been fully equipped, with new engines, rails, &c., &c., and that the officers of the company are using every exertion to make it one of the first-class roads of the country.

The business of the road during the war enabled it to reduce its floating debt materially; and since the close of the war its receipts have averaged nearly $60,000 per month. Besides which the company hold a considerable amount of cotton, rosin, &c., with which it has been enabled to purchase a complete modern equipment. The passenger traffic on this s exceeded the most sanguine expectations of its friends. There are now running two mail and two accommodation trains per day, besides four freight trains.

The officers of the road, are: Hon. Nath. Boyden, President; E. Wilkes, Eng. and Gen. Sup't; R. Lea, Treasurer; F. A. Stagg, Secretary; R. D. Wade, Master Mechanic; and Chas. Parmenter, Master of Transportation.

☞ The Baltimore and Ohio Railroad Company is at present building a considerable stretch of doubls track east of Cumberland, and will no doubt ere long extend the same the entire length of the road.

☞ The Wilmington and Weldon Railroad has been turned over to its owners, but the North Carolina and Atlantic and North Carolina roads are still in the hands of the military.

☞ The Western and Atlantic Railroad, between Atlanta and Chattanooga, is to be turned over to the civil authorities. It belongs to the State of Georgia, and before the war was valued at nearly six millions of dollars.

Ithaca and Towanda Railroad.

The route proposed by the projectors of this road is through Spencer, to Waverly and Towanda in Pennsylvania, there to connect with the road to the Barckley Coal Mines. Also to continue down the Susquehanna River to Pittston, there to connect with a road to Philadelphia. Ithaca is but 65 miles from the bituminous coal fields which contain immense quantities of this article, 70 miles from a great deposit of semi-bituminous, and 100 from the anthracite region. The grades are light, not more than from 30 to 50 feet in the mile. Ithaca is at present a distributing point for coal brought successfully over a much greater distance, and by the new route will become a much greater one.

Foote, Vibbard & Co.

This new house recently established in this city at No. 40 Broadway, for the purpose of transacting a general business in railway supplies, is deserving of very particular notice, since it is composed of the Messrs. Foote, both having been long engaged in the manufacture of boilers and other machinery, while Mr. Vibbard was the well-known Superintendent of the New York Central Railroad, having had thirty years' experience of management. No one can be possibly better able to act for the interests of railroad companies, or the machinists and manufacturers who furnish them with their fabrics. They are also intimately acquainted with the home and foreign markets, possessing sound judgment and financial ability. Their enterprise is one which must be highly advantageous to all the interests which are to be served by their agency, and must command the good-will and patronage of our railroad companies.

Locomotive Building at Scranton.

For some time the proprietors of the Cliff Works, (now consolidated with the Dickson Works,) at Scranton, Pennsylvania, have been turning their attention to locomotive building. The Superintendent of the former is Mr. Wm. Cooke, brother to the well-known Superintendent of the Danforth establishment in Paterson, N. J., where the former spent many years as assistant. At Scranton they have already turned out nine or ten locomotives, which have given the most entire satisfaction, besides doing a great deal of repairing in the same line. Most of the engines have gone to the Delaware, Lackawanna and Western Railroad, where the strongest machines are in demand to overcome its long and heavy grades, and to haul the enormous tonnage of coal, which is ordinarily sent from that valley.

With coal and iron close by, with railroad communications to all parts of the country, and with abundance of skilled labor in all departments of locomotive building, Scranton offers first class advantages for the establishment of this branch of industry, and we doubt not that in the energetic hands of Messrs. Cooke & Dickson it will be successful.

☞ S. L. Niblach, President of the Florida Central Railroad, extending from Jacksonville to Lake City, passed through Savannah recently on his way north to procure rolling stock for the road. He spoke very hopefully of the future prospects of Florida.

upon the accumulation in the Treasury. The internal revenue receipts for July were twenty-two millions of dollars, and the Treasury anticipates from this source an average of about a million dollars a day for the next three months. The most trustworthy estimate of the receipts from custom (in gold) during the coming months of the current fiscal year, put them at the average of fully eleven million dollars a month. As to the accumulations in the hands of the Treasury, they are shown by the statement of this morning to be: Amount of coin in the Treasury, $35,338,000 and of currency $81,402,000, or a total in the Treasury of $116,740,000. During the past month, there have been some considerable returns to the treasury from sales of vessels, naval stock and military material; but much heavier returns will come from this source in the current month. The Quartermaster's Department is rapidly preparing for the disposal of the immense amount of government property in its hands, and now no longer required. Two millions of dollars' worth of marine property has been advertised for sale in the cities of Washington, D. C., Cincinnati, Louisville, St. Louis, Nashville, Natchez, Vicksburg, Little Rock, New Orleans, and Mobile."

When it comes to see the report however at the close of August, it will have much more to say of the favorable aspect of our financial condition. The truth is, it is rapidly improving under its present wise management, aided by the patriotic efforts of the tax-payers of the country. The revenues appear not only to be on the increase, but are likely to become much larger as re-construction proceeds under the plan of the President, and additional resources from the restored States swell the grand total. The attempt at the *repression* spoken of appears to prove an entire failure.

Always attentive to our commercial interests, we have from time to time alluded to important changes going on abroad which seem to escape the attention of the authorities at Washington. Our foreign trade is conducted too much under obsolete commercial treaties. We have for example pointed out to our readers, who learn nowhere else that we know of, the radical changes that have recently been made by the Brazilian Government. We now have to add another instance. We have before us an official notice of the Governor General of India, declaring a very important change in the previous law relating to the customs duties "on goods imported and exported by sea." The following articles are by schedule A declared free: Grain and pulse, horses and other living animals, ice, coal, coke, bricks, chalk, stones, cotton, wool, flax, hemp, jute, raw hides and skins. Books, papers, maps, prints, music and works of art. Agricultural implements, firewood, machinery used exclusively for purposes of agriculture, navigation, mining, manufacturing, or for railroad purposes and the component parts thereof; guano and manures of all kinds, and bottles. The duties on other articles are as follows: Wines and liquors one rupee, or 62 cents per imperial gallon; porter, ale, beer, cider and other similar fermented liquors one anna, 16th of a rupee, the imperial gallon; shipits three rupees per gallon, or 10 per cent. ad valorem, when imported for use in arts and manufactures; iron not including iron mongery, cutlery or hardwares, one per cent. ad valorem; hops one per cent., ditto, tobacco manufactured or unmanufactured 10 per cent. ad valorem; piece goods 5 per cent., ditto, twist 3½ per cent., ditto. All other goods not included in the above list, 7½ per cent., ditto. Among the articles exported also free of duty are: rum, cotton, wool, flax and hemp, teak, coffee, tea, sugar, wool, hides and skins raw, raw silk, and silk Chusam. Now as our imports from the British East Indies in 1861 were of the value of between 4 and 5 millions of dollars, the facts we have given appear to us to be of some importance, and very proper for publication in this JOURNAL, which extends its observation to commerce, navigation and finance, as well as railways.

With regard to the condition of our own market, we have to observe that Government securities are steady, and compound interest notes have advanced. And here it may be well enough to remark, that beyond all doubt the prices of these will be governed by the home quotations. The rate in New York unquestionably fixes that abroad, so that if the holders wish to make money on them, it is their best policy to keep them up here. If they should for any reason advance 5 or 10 per cent. here, they would very certainly bring that advance abroad. So that those who are engaged in the business of depressing them are in fact injuring themselves. It is said that very little commercial paper is afloat in the street, or within reach of bill brokers. The discount on this is said to be lower than usual, the rate of the best of it being only about 6 per cent., while the less esteemed kind is worked off at 8 to 8¼ per cent. The amount of currency of the National Banks is now computed at 183 millions. The plan of redemption in the three great cities of the Union has not yet been adopted, there evidently being considerable opposition to it in influential quarters. We have expressed our opinion of this measure, and believe the true way is to receive these notes and send them home for redemption if they become too plentiful. The keeping of large balances by these institutions in those of this city, is doubtless beneficial to the latter, and this is probabiy the secret of the movement. On the other hand, those banks not the depositaries of the Government are not obliged to receive them, and may thus by their refusal, protect themselves from inconvenience without requiring any protection. This seems to us a common sense view of the subject.

The internal revenue seems to be on the increase. Since the 1st of July last to the 17th inst., the receipts were $80,479,502 41, much more than the estimate. The balance in the Sub-Treasury on Tuesday last was large, though it includes but a part of the sum at the disposal of the Government. North Carolina R. R.

We learn that the North Carolina Railroad, extending from Goldsboro' to Charlotte, N. C., a distance of 225 miles, is now in good working order, having been fully equipped, with new engines, rails, &c., &c., and that the officers of the company are using every exertion to make it one of the first-class roads of the country.

The business of the road during the war enabled it to reduce its floating debt materially; and since the close of the war its receipts have averaged nearly $60,000 per month. Besides which the company hold a considerable amount of cotton, rosin, &c., with which it has been enabled to purchase a complete modern equipment. The passenger traffic on this s exceeded the most sanguine expectations of its friends. There are now running two mail and two accommodation trains per day, besides four freight trains.

The officers of the road, are: Hon. Nath. Boyden, President; E. Wilkes, Eng. and Gen. Sup't; R. Lea, Treasurer; F. A. Stagg, Secretary; R. D. Wade, Master Mechanic; and Chas. Parmenter, Master of Transportation.

☞ The Baltimore and Ohio Railroad Company is at present building a considerable stretch of doubls track east of Cumberland, and will no doubt ere long extend the same the entire length of the road.

☞ The Wilmington and Weldon Railroad has been turned over to its owners, but the North Carolina and Atlantic and North Carolina roads are still in the hands of the military.

☞ The Western and Atlantic Railroad, between Atlanta and Chattanooga, is to be turned over to the civil authorities. It belongs to the State of Georgia, and before the war was valued at nearly six millions of dollars.

Ithaca and Towanda Railroad.

The route proposed by the projectors of this road is through Spencer, to Waverly and Towanda in Pennsylvania, there to connect with the road to the Barckley Coal Mines. Also to continue down the Susquehanna River to Pittston, there to connect with a road to Philadelphia. Ithaca is but 65 miles from the bituminous coal fields which contain immense quantities of this article, 70 miles from a great deposit of semi-bituminous, and 100 from the anthracite region. The grades are light, not more than from 30 to 50 feet in the mile. Ithaca is at present a distributing point for coal brought successfully over a much greater distance, and by the new route will become a much greater one.

Foote, Vibbard & Co.

This new house recently established in this city at No. 40 Broadway, for the purpose of transacting a general business in railway supplies, is deserving of very particular notice, since it is composed of the Messrs. Foote, both having been long engaged in the manufacture of boilers and other machinery, while Mr. Vibbard was the well-known Superintendent of the New York Central Railroad, having had thirty years' experience of management. No one can be possibly better able to act for the interests of railroad companies, or the machinists and manufacturers who furnish them with their fabrics. They are also intimately acquainted with the home and foreign markets, possessing sound judgment and financial ability. Their enterprise is one which must be highly advantageous to all the interests which are to be served by their agency, and must command the good-will and patronage of our railroad companies.

Locomotive Building at Scranton.

For some time the proprietors of the Cliff Works, (now consolidated with the Dickson Works,) at Scranton, Pennsylvania, have been turning their attention to locomotive building. The Superintendent of the former is Mr. Wm. Cooke, brother to the well-known Superintendent of the Danforth establishment in Paterson, N. J., where the former spent many years as assistant. At Scranton they have already turned out nine or ten locomotives, which have given the most entire satisfaction, besides doing a great deal of repairing in the same line. Most of the engines have gone to the Delaware, Lackawanna and Western Railroad, where the strongest machines are in demand to overcome its long and heavy grades, and to haul the enormous tonnage of coal, which is ordinarily sent from that valley.

With coal and iron close by, with railroad communications to all parts of the country, and with abundance of skilled labor in all departments of locomotive building, Scranton offers first class advantages for the establishment of this branch of industry; and we doubt not that in the energetic hands of Messrs. Cooke & Dickson it will be successful.

☞ S. L. Niblach, President of the Florida Central Railroad, extending from Jacksonville to Lake City, passed through Savannah recently on his way north to procure rolling stock for the road. He spoke very hopefully of the future prospects of Florida.

Railroad Earnings.--Weekly.

The earnings of the Marietta and Cincinnati Railroad for the 2d week in Sept., 1865, were:

	1865.	1864.
Passengers	$10,692 75	$11,101 60
Freight	15,655 75	9,308 74
Mail, express & telegraph	1,500 00	1,119 58
Total	$27,848 50	$21,529,92
Total for the fiscal year commencing Jan. 1	$823,607 28	$632,299 01

The traffic of the Great Western Railroad for the week ending Sept. 15, 1865, was as follows:

Passengers	$42,948 02
Freight and live stock	32,358 59
Mails and sundries	3,997 85
Total	$79,299 46
Corresponding week of 1864	63,445 54
Increase	$15,853 92

The earnings of the Grand Trunk Railway for the week ending Sept. 9, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$59,835 00
Express, freight, mails and sundries	4,036 00
Freight and live stock	75,733 00
Total	$139,604 00
Corresponding week, 1864	124,129 00
Increase	$15,475 00

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Sept. 7, were:

	1865.	1864.
Passengers	$4,447 52	$3,450 12
Freight	10,470 09	9,394 67
Express	130 22	104 16
Mail	296 58	296 58
Total	$15,344 41	$13,245 58

Receipts from January 1 to Sept 7:

1865	$436,735 29
1864	381,750 32
Increase	$54,984 97

The earnings of the Michigan Central Railroad for the 2d week in Sept., 1865, were.. $109,372 00
Corresponding week of previous year.. 84,349 00
Increase $25,023 00

The earnings of the Chicago and Rock Island Railroad for the second week in September, 1865, were $93,921 00
Corresponding week of previous year.. 76,159 00
Increase $17,762 00

The earnings of the Chicago and Northwestern Railway for the second week in September, 1865, were $204,885 44
Corresponding week of previous year. 151,635 97
Increase $53,249 47

The Michigan Southern road earned the 2d week in Sept., 1865 $98,606 00
Corresponding week of 1864 85,708 00
Increase $12,898 00

The Detroit and Milwaukee Railroad traffic for the 2d week in Sept., was $42,339 00
Corresponding week of previous year.. 31,986 00
Increase $10,353 00

The earnings of the Chicago and Alton Railroad for the 2d week in Sept., 1865.. $104,273 00
Corresponding week of previous year.. 72,376 00
Increase $31,897 00

American Mechanics.

A recent number of Ryland's *Iron Trade Circular*, published in Birmingham, England, contains a long and interesting article, which under the title of "Labor Saving Appliances," is highly complimentary to American Mechanics, so much so that it is worthy of a brief review. It commences by saying "Our American cousins, despite their general *tall-talk*, have certainly set us many examples from which it would not be unwise to learn a lesson." It then proceeds to describe the manner in which our houses are erected, and especially the labor-saving machinery used in their construction. By this aid is prepared the moulded work which comes out from the machine "sharp, smooth, and beautifully moulded;" the stuff having been kiln-dried and seasoned. The excavation is made, if it be of any size, by the use of plough and scraper; a hydrant is brought to bear on the spot, and the hoisting done by horse-power. The floor joists are thoroughly cross-bridged, and much deeper than they usually are in England; the floors laid in narrow widths, blind-nailed and deafened. The hard finish of the walls is much admired, which have a "beautiful surface for papering or painting."

The folding doors are large and well hung; the supplies of hot and cold water ample; the bathing-rooms are universal; the pantries and closets large, and well lighted. In short these dwellings show the application of "shrewd judgment and effectiveness, by means of mechanism." Speaking of the appliances ordinarily in use, the article alludes to the portable power-driven machinery; the circular saws; the planing machines; the moulders, supplied with knives to cut any pattern; the mortising machines, and the crescent and plate saws. The American wheel-barrows are highly approved, as being much better adapted to their purpose than those used in England, being "singularly convenient in form, and light in draft." Our axes are also praised, those of Collins' make, from the toy shingle of two or three inches' blade to the huge broad-axe of the lumberer. All having a world-wide reputation. Our construction of scaffolds for building is admitted to be much more thoroughly laid than in England, so that a lady may get about on them if she chooses "with perfect safety." Wood-work is also turned into square, hexagonal, or octangular forms, as cheaply as circular, even huge stones are changed into columns by the aid of machinery. In all these, as in other instances, American skill and ingenuity are admitted to be very superior. With regard to saws, it may be said with truth that the Americans not only are remarkable for their excellence but their variety. We have on a former occasion noticed a work of Mr. H. W. Holly, on the art of saw filing, scientifically treated, which gives complete descriptions with drawings of 42 different kinds of saws in use by our mechanics, who are practically full of "wise saws and modern instances."

It is also a well-known fact that in the building of powerful locomotives, on the most simple yet elegant plans, we can challenge competition with the best work shops in Europe. In some countries they already have obtained the preference, being supplied to Russia and Egypt where they are much preferred. For the manufacture of fire-arms, large artillery, swords that attract the admiration of our foreign military visitors; in hollow ware and in tools of all descriptions, we stand high in the ranks of manufacturers. American hats vie in shape and beauty with the best fabrics of Paris, and our cordwainers turn out the most elegant work for both males and females. In mining there are hundreds of practical inventions for crushing, and obtaining gold in the largest quantities, by ingenious crushing mills, hammers, rotary balls, or by the application of fire from gases and the use of acids. Indeed there is hardly a plan of saving labor which has not some representative machine.

The invention of the sewing machine is itself one of the most remarkable and useful of our time. One has but need to examine the manifests of our vessels bound to foreign ports to see that the shipments of this article are enormous; and that they are in demand in every part of the world. Our Patent Office is filled with new models and specifications, sent in quantities every week, displaying the untiring ingenuity of our people.

Large fortunes are generally made by the purchases of these inventions, generally capitalists who have the means and disposition to aid the inventors. Our agricultural implements are numerous and very much in demand. Our ploughs, our reapers, our hay cutting machines, our garden rakes and hoes cannot be excelled and are a great saving of labor to those who use them. Without the use of them, our immense prairie farms could not be well cultivated. While to the English mechanics we freely accord the merit of great strength and solidity in their work, and to the French, variety of design and extreme elegance of finish, to be attributed to their opportunity of visiting the finest art galleries in the world yet we must claim for our mechanics, shrewdness, inventiveness, economy of material, and power of adaptation quite unsurpassed.

Even in the finer fabrics, those purely of *luxe*, we are making rapid advances. Our furniture can now scarcely be distinguished from that of Paris, and our jewelry and silver plate are noted for their beauty and exquisite finish.

We might go on and enumerate other fabrics equally praiseworthy. No one for instance can visit the annual exhibition at the fair of the American Institute in this city without being amazed at the immense varieties of fabrics it exhibits, of American work. Our pianos especially, now claim a high rank among musical instruments, and are even shipped to Europe successfully against the competition of its most famous manufacturers.

The career of invention and production is in fact but recently commenced. Only within a few years, has its developement been rapid; but beyond doubt it is to continue in force, and influence, not only here, but in the whole commercial and manufacturing world.

☞ The Pittsburg *Chronicle* says: "It is expected the Youghiogheny Iron and Coal Company will commence to turn out iron by the last week in September, and the recent advance in iron is such as will give great vitality to the business. The market is now very bare of the various grades of pig iron, and it must be several months before the supply will fully equal the demand; so that all furnaces now or soon to be in blast, must be run with excellent profit.

The Proposed Russian Telegraphic Line to America.

The *Poste du Nord* gives some curious details respecting the construction of the telegraphic line which will connect Europe with America, passing through Russian territory. As far back as 1854 different companies made proposals to the Russian Government, but they were declined. The Government, at its own expense, ordered the construction of a line which passes from Moscow, by Kazan and Irkoutsk, to Verchneoudinsk, with a branch line to Kiachta. To continue this line to Nicolaieffsk, at the mouth of the Amour, there remains but little to be done, and then the works can be commenced which have been undertaken by an American company with a capital of 10 millions of dollars. According to the terms of the contract between the Russian Government and this company, telegraphic line is to be completed within five years, passing through the Behring Straits, the Russian possessions in America, and English Columbia to San Francisco, where it would join the American line. The conditions agreed to by the company are most advantageous to the public.. The privilege of the company for the line between Nicolaieffsk and the American lines is only for 35 years. The company undertakes to erect, at its own cost, along the whole line, roads, bridges and stations. As regards the latter, it reserves to itself the right of occupying them, as also the block houses of the company, should circumstances render such a step necessary. All the servants of the company upon Russian territory are to be of Russian nationality. —*St. Petersburg Journal.*

The Russian Telegraph Expedition.

A dispatch from Sitka, dated August 18th, *via* New Westminster September 5th, say: "The bark Clara Bell will sail from here to-morrow for New Westminster. The schooner Milton Badger will also sail for Anadyr bay to-morrow, with an exploring party on board and full supplies of equipment. This party will be the advance explorers of the route from the Anadyr river to the Amoor. The bark Golden Gate will also sail for Fort St. Michael and the Youkou river with the steamer Lizzie Horner on board. The parties who will explore the Youkou river are all on board the Golden Gate. The steamer Wright will also sail for the mouth of the Youkou river and the Gulf of Anadyr. Col. Charles S. Bulkley, engineer-in-chief of the overland telegraph expedition, goes on the latter, and, after directing the preliminary operations of the exploring of the Youkou, will proceed to Anadyr and Behring Straits. Everything pertaining to the great expedition is progressing favorably, and the Russian officials at Sitka have extended every aid in their power. The health of the expeditionary corps is excellent."

Cotton in Florida.

Since this port was re-opened about three months, since, there has been shipped from Jacksonville about six thousand bales of cotton, fully one-third of it long staple; three hundred and eighty thousand feet of sawed lumber; nine hundred and thirty-one-sticks square timber; seven hundred and ninety sticks cedar; one thousand and twenty-seven barrels tar; twenty barrels spirits turpentine; two hundred and twenty-two barrels crude turpentine. The best judges estimate the quantity of cotton in the State at the time of the surrender at twenty thousand bales. Of this quantity probably fully one-half has already found its way to market by the way of St. Marks, Pensacola, Apalachicola and Jacksonville. —*Jacksonville, (Fla.) Union, Sept. 9.*

☞ A. S. Buford has been elected president of the Richmond and Danville railroad.

Iron Manufacture.

The activity of the iron trade still continues. Manufacturers are reluctant to make contracts for future delivery, and the indications are that a large consumption with high prices must rule in the future. The iron interests of the country promise to assume a greater magnitude than at any time heretofore. This results from two causes: the large demand for many descriptions of articles of manufactured iron from interruption by reason of the war, and the difficulty now experienced in commanding the desired amount of skilled labor. We learn from a gentleman engaged in the business in this city, who has just returned from Europe, and who, during his stay there, spent much of his time with iron manufacturers, that the same scarcity of skilled workmen exists in the trade there as here, and that a scale of wages has been established not likely soon, if ever, to come down. The migration of such workmen to this country, tempted by the higher prices paid here for such labor, is a source of much annoyance to the foreign manufacturers, and as a means of stopping it, agents, it is said, have been sent to this country, whose mission is to tempt the workers in iron back to Europe, as well for the advantage of their individual labor, as for deterring by the effect of there return others from going abroad.—*Phila. Ledger.*

Improvements at Scranton, Penn.

The Delaware, Lackawanna and Western Railroad Company, are putting up a magnificent new round house at Scranton, the existing one being found too small to afford the requisite acommodations; while the dome covering it evinces appearances of becoming unsafe.

The new house will be 291 feet in diameter, affording stalls for 40 locomotives. The material used is brick. Instead of putting a dome over such a large edifice, the roof will slope inward, leaving the centre uncovered.

The same company are also building a new repair shop of like material. It will form three sides of a hollow square, the main building being 297 by 100 feet, and each of the two wings 200 by 75.

The cost of these improvements will be about $180,000, the designs being furnished by Mr. Watts Cooke, the efficient Superintendent of that company. Captain James Cooke has charge of all departments of the repair shops at that place.

We learn also that the Lackawanna Iron and Coal Company are putting up a new puddling mill, having 28 furnaces, which will probably be in operation by the early part of next year. No town or city east of the Allegheny Mountains shows a better record of progress, during the past ten years, than Scranton, Pennsylvania, a result which is largely due to the foresight and energy of a few men, among whom the Scranton family deserve honorable mention.

☞ We learn from Quebec that the Georgian Bay Canal was taken up by the Provincial Railway committee on the 9th inst., and passed, as was also the bill relating to the Cobourg and Peterboro' Railway. The opinion among members is decidedly favorable to bringing insolvent railway companies to the hammer, as provided in the case of the Ottawa and Prescott Railway last year.

☞ There are now nearly four hundred men at work on the line of the Grand Rapids and Indiana Railroad, between Sturgis and Kalmazoo, and the grade of that section will be complete before winter.

New Steam Car for Horse Railways.

A new steam car for horse railroads was exhibited a few days since on Summer street, East Boston, by its inventor, Mr. Jos. P. Woodbury. The car resembles in its exterior the ordinary steam vehicle. It is 30 feet long and will seat 40 passengers. The engine has a seven-inch cylinder, a fourteen inch stroke, with about fifteen horse power. It is controlled with entire facility. The engine rests upon a circular track in a manner so as to traverse the body of the car. This construction enables the car to pass over curves, even if very abrupt, without difficulty. The car was manufactured by the Salem Car Company, and the engine by Geo. M. Bird, of East Boston.

Cameron & Barkley.

We take great pleasure in calling the attention of our readers, to the advertisement in another column of Messrs. Cameron & Barkley, Commission Merchants, Charleston, S. C. It will be seen by their card they will receive on consignment, or otherwise, every kind of article pertaining to railroads, steamers or general machinery, all business entrusted to them, meeting with promptness and dispatch. Their references are of the first class, both in this city and elsewhere. We hail with satisfaction the intention of this house to engage in commercial transactions with the North, and we consider it an advantageous step in the right direction. The attention of engineers and machinists is particularly invited to the advertisement of Messrs. Cameron & Barkley.

☞ A letter from the Secretary of the Boston, Hartford and Erie R. R. Co., contradicts the statement recently published that the company had suspended operations. He says the work is progressing as rapidly and as satisfactorily as the circumstances will warrant.

☞ James Kidd has been elected president of the Albany Railroad Company; George Dawson, Vice-President; John W. McNamara, Secretary; and C. W. Armstrong, Treasurer.

☞ The committee appointed by the stockholders of the Virginia Central Railroad Company to examine the condition of that road, publish a report of their observations. All the bridges have been fully repaired or entirely rebuilt, and are now in good condition. The tunnels are also in splendid order, and the general condition of the bed and track is much better than it has been for a long time. The track on the worn-out sections is being relaid with new iron, and altogether the committee regard that road as, for some time to come, in good running order.

☞ The Pit Hole and Oil City Railroad is progressing finely. Between 400 and 500 hands are engaged on it. The road will be finished from the U. S. well to the mouth of Pit Hole, six miles, in ninety days from its commencement.

☞ The total taxable property of Saugamon County, Illinois, amounts to $14,860,159, or an increase of a little over $2,000,000 since September, 1864. Of this $8,000,000, or over one half the total amount, is in the City of Springfield.

☞ The Chesapeake and Ohio Canal has a descending lockage of 573 feet in a distance of 191 miles, from Cumberland to Georgetown, the descent being in the direction of its coal trade, from the Cumberland region to tide-water.

Railroad Earnings.—Weekly.

The earnings of the Marietta and Cincinnati Railroad for the 2d week in Sept., 1865, were:

	1865.	1864.
Passengers	$10,692 75	$11,101 60
Freight	15,655 75	9,308 74
Mail, express & telegraph	1,500 00	1,119 58
Total	$27,848 50	$21,529,92
Total for the fiscal year commencing Jan. 1	$823,607 28	$632,299 01

The traffic of the Great Western Railroad for the week ending Sept. 15, 1865, was as follows:

Passengers	$42,943 02
Freight and live stock	32,358 59
Mails and sundries	3,997 85
Total	$79,299 46
Corresponding week of 1864	63,445 54
Increase	$15,853 92

The earnings of the Grand Trunk Railway for the week ending Sept. 9, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$59,835 00
Express, freight, mails and sundries	4,036 00
Freight and live stock	75,733 00
Total	$139,604 00
Corresponding week, 1864	124,129 00
Increase	$15,475 00

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Sept. 7, were:

	1865.	1864.
Passengers	$4,447 52	$3,450 12
Freight	10,470 09	9,394 67
Express	130 22	104 16
Mail	296 58	296 58
Total	$15,344 41	$13,245 53

Receipts from January 1 to Sept 7:

1865	$436,735 29
1864	381,750 32
Increase	$54,984 97

The earnings of the Michigan Central Railroad for the 2d week in Sept., 1865, were.. $109,372 00
Corresponding week of previous year.. 84,349 00
Increase.. $25,023 00

The earnings of the Chicago and Rock Island Railroad for the second week in September, 1865, were.. $93,921 00
Corresponding week of previous year.. 76,159 00
Increase.. $17,762 00

The earnings of the Chicago and Northwestern Railway for the second week in September, 1865, were.. $204,885 44
Corresponding week of previous year. 151,635 97
Increase.. $53,249 47

The Michigan Southern road earned the 2d week in Sept., 1865 .. $98,606 00
Corresponding week of 1864 .. 85,708 00
Increase.. $12,898 00

The Detroit and Milwaukee Railroad traffic for the 2d week in Sept., was .. $42,339 00
Corresponding week of previous year.. 31,986 00
Increase.. $10,353 00

The earnings of the Chicago and Alton Railroad for the 2d week in Sept., 1865.. $104,273 00
Corresponding week of previous year.. 72,376 00
Increase.. $31,897 00

American Mechanics.

A recent number of Ryland's *Iron Trade Circular*, published in Birmingham, England, contains a long and interesting article, which under the title of "Labor Saving Appliances," is highly complimentary to American Mechanics, so much so that it is worthy of a brief review. It commences by saying "Our American cousins, despite their general *tall-talk*, have certainly set us many examples from which it would not be unwise to learn a lesson." It then proceeds to describe the manner in which our houses are erected, and especially the labor-saving machinery used in their construction. By this aid is prepared the moulded work which comes out from the machine "sharp, smooth, and beautifully moulded;" the stuff having been kiln-dried and seasoned. The excavation is made, if it be of any size, by the use of plough and scraper; a hydrant is brought to bear on the spot, and the hoisting done by horse-power. The floor joists are thoroughly cross-bridged, and much deeper than they usually are in England; the floors laid in narrow widths, blind-nailed and deafened. The hard finish of the walls is much admired, which have a "beautiful surface for papering or painting."

The folding doors are large and well hung; the supplies of hot and cold water ample; the bathing-rooms are universal; the pantries and closets large, and well lighted. In short these dwellings show the application of "shrewd judgment and effectiveness, by means of mechanism." Speaking of the appliances ordinarily in use, the article alludes to the portable power-driven machinery; the circular saws; the planing machines; the moulders, supplied with knives to cut any pattern; the mortising machines, and the crescent and plate saws. The American wheel-barrows are highly approved, as being much better adapted to their purpose than those used in England, being "singularly convenient in form, and light in draft." Our axes are also praised, those of Collins' make, from the toy shingle of two or three inches' blade to the huge broad-axe of the lumberer. All having a world-wide reputation. Our construction of scaffolds for building is admitted to be much more thoroughly laid than in England, so that a lady may get about on them if she chooses "with perfect safety." Wood-work is also turned into square, hexagonal, or octangular forms, as cheaply as circular, even huge stones are changed into columns by the aid of machinery. In all these, as in other instances, American skill and ingenuity are admitted to be very superior. With regard to saws, it may be said with truth that the Americans not only are remarkable for their excellence but their variety. We have on a former occasion noticed a work of Mr. H. W. Holly, on the art of saw filing, scientifically treated, which gives complete descriptions with drawings of 42 different kinds of saws in use by our mechanics, who are practically full of "wise saws and modern instances."

It is also a well-known fact that in the building of powerful locomotives, on the most simple yet elegant plans, we can challenge competition with the best work shops in Europe. In some countries they already have obtained the preference, being supplied to Russia and Egypt where they are much preferred. For the manufacture of fire-arms, large artillery, swords that attract the admiration of our foreign military visitors; in hollow ware and in tools of all descriptions, we stand high in the ranks of manufacturers. American hats vie in shape and beauty with the best fabrics of Paris, and our cordwainers turn out the most elegant work for both males and females. In mining there are hundreds of practical inventions for crushing, and obtaining gold in the largest quantities, by ingenious crushing mills, hammers, rotary balls, or by the application of fire from gases and the use of acids. Indeed there is hardly a plan of saving labor which has not some representative machine.

The invention of the sewing machine is itself one of the most remarkable and useful of our time. One has but need to examine the manifests of our vessels bound to foreign ports to see that the shipments of this article are enormous; and that they are in demand in every part of the world. Our Patent Office is filled with new models and specifications, sent in quantities every week, displaying the untiring ingenuity of our people.

Large fortunes are generally made by the purchases of these inventions, generally capitalists who have the means and disposition to aid the inventors. Our agricultural implements are numerous and very much in demand. Our ploughs, our reapers, our hay cutting machines, our garden rakes and hoes cannot be excelled and are a great saving of labor to those who use them. Without the use of them, our immense prairie farms could not be well cultivated. While to the English mechanics we freely accord the merit of great strength and solidity in their work, and to the French, variety of design and extreme elegance of finish, to be attributed to their opportunity of visiting the finest art galleries in the world yet we must claim for our mechanics, shrewdness, inventiveness, economy of material, and power of adaptation quite unsurpassed.

Even in the finer fabrics, those purely of *luxe*, we are making rapid advances. Our furniture can now scarcely be distinguished from that of Paris, and our jewelry and silver plate are noted for their beauty and exquisite finish.

We might go on and enumerate other fabrics equally praiseworthy. No one for instance can visit the annual exhibition at the fair of the American Institute in this city without being amazed at the immense varieties of fabrics it exhibits, of American work. Our pianos especially, now claim a high rank among musical instruments, and are even shipped to Europe successfully against the competition of its most famous manufacturers.

The career of invention and production is in fact but recently commenced. Only within a few years, has its developement been rapid; but beyond doubt it is to continue in force, and influence, not only here, but in the whole commercial and manufacturing world.

☞ The Pittsburg *Chronicle* says: "It is expected the Yougiogheny Iron and Coal Company will commence to turn out iron by the last week in September, and the recent advance in iron is such as will give great vitality to the business. The market is now very bare of the various grades of pig iron, and it must be several months before the supply will fully equal the demand; so that all furnaces now or soon to be in blast, must be run with excellent profit.

The Proposed Russian Telegraphic Line to America.

The *Poste du Nord* gives some curious details respecting the construction of the telegraphic line which will connect Europe with America, passing through Russian territory. As far back as 1854 different companies made proposals to the Russian Government, but they were declined. The Government, at its own expense, ordered the construction of a line which passes from Moscow, by Kazan and Irkoutsk, to Verchneoudinsk, with a branch line to Kiachta. To continue this line to Nicolaieffsk, at the mouth of the Amour, there remains but little to be done, and then the works can be commenced which have been undertaken by an American company with a capital of 10 millions of dollars. According to the terms of the contract between the Russian Government and this company, telegraphic line is to be completed within five years, passing through the Behring Straits, the Russian possessions in America, and English Columbia to San Francisco, where it would join the American line. The conditions agreed to by the company are most advantageous to the public. The privilege of the company for the line between Nicolaieffsk and the American lines is only for 35 years. The company undertakes to erect, at its own cost, along the whole line, roads, bridges and stations. As regards the latter, it reserves to itself the right of occupying them, as also the block houses of the company, should circumstances render such a step necessary. All the servants of the company upon Russian territory are to be of Russian nationality. —*St. Petersburg Journal.*

The Russian Telegraph Expedition.

A dispatch from Sitka, dated August 18th, *via* New Westminster September 5th, say: "The bark Clara Bell will sail from here to-morrow for New Westminster. The schooner Milton Badger will also sail for Anadyr bay to-morrow, with an exploring party on board and full supplies of equipment. This party will be the advance explorers of the route from the Anadyr river to the Amoor. The bark Golden Gate will also sail for Fort St. Michael and the Youkou river with the steamer Lizzie Horner on board. The parties who will explore the Youkou river are all on board the Golden Gate. The steamer Wright will also sail for the mouth of the Youkou river and the Gulf of Anadyr. Col. Charles S. Bulkley, engineer-in-chief of the overland telegraph expedition, goes on the latter, and, after directing the preliminary operations of the exploring of the Youkou, will proceed to Anadyr and Behring Straits. Everything pertaining to the great expedition is progressing favorably, and the Russian officials at Sitka have extended every aid in their power. The health of the expeditionary corps is excellent."

Cotton in Florida.

Since this port was re-opened about three months, since, there has been shipped from Jacksonville about six thousand bales of cotton, fully one-third of it long staple; three hundred and eighty thousand feet of sawed lumber; nine hundred and thirty-one-sticks square timber; seven hundred and ninety sticks cedar; one thousand and twenty-seven barrels tar; twenty barrels spirits turpentine; two hundred and twenty-two barrels crude turpentine. The best judges estimate the quantity of cotton in the State at the time of the surrender at twenty thousand bales. Of this quantity probably fully one-half has already found its way to market by the way of St. Marks, Pensacola, Apalachicola and Jacksonville. —*Jacksonville, (Fla.) Union, Sept.* 9.

☞ A. S. Buford has been elected president of the Richmond and Danville railroad.

Iron Manufacture.

The activity of the iron trade still continues. Manufacturers are reluctant to make contracts for future delivery, and the indications are that a large consumption with high prices must rule in the future. The iron interests of the country promise to assume a greater magnitude than at any time heretofore. This results from two causes: the large demand for many descriptions of articles of manufactured iron from interruption by reason of the war, and the difficulty now experienced in commanding the desired amount of skilled labor. We learn from a gentleman engaged in the business in this city, who has just returned from Europe, and who, during his stay there, spent much of his time with iron manufacturers, that the same scarcity of skilled workmen exists in the trade there as here, and that a scale of wages has been established not likely soon, if ever, to come down. The migration of such workmen to this country, tempted by the higher prices paid here for such labor, is a source of much annoyance to the foreign manufacturers, and as a means of stopping it, agents, it is said, have been sent to this country, whose mission is to tempt the workers in iron back to Europe, as well for the advantage of their individual labor, as for deterring by the effect of there return others from going abroad.—*Phila. Ledger.*

Improvements at Scranton, Penn.

The Delaware, Lackawanna and Western Railroad Company, are putting up a magnificent new round house at Scranton, the existing one being found too small to afford the requisite acommodations; while the dome covering it evinces appearances of becoming unsafe.

The new house will be 291 feet in diameter, affording stalls for 40 locomotives. The material used is brick. Instead of putting a dome over such a large edifice, the roof will slope inward, leaving the centre uncovered.

The same company are also building a new repair shop of like material. It will form three sides of a hollow square, the main building being 297 by 100 feet, and each of the two wings 200 by 75.

The cost of these improvements will be about $180,000, the designs being furnished by Mr. Watts Cooke, the efficient Superintendent of that company. Captain James Cooke has charge of all departments of the repair shops at that place.

We learn also that the Lackawanna Iron and Coal Company are putting up a new puddling mill, having 28 furnaces, which will probably be in operation by the early part of next year. No town or city east of the Allegheny Mountains shows a better record of progress, during the past ten years, than Scranton, Pennsylvania, a result which is largely due to the foresight and energy of a few men, among whom the Scranton family deserve honorable mention.

☞ We learn from Quebec that the Georgian Bay Canal was taken up by the Provincial Railway committee on the 9th inst., and passed, as was also the bill relating to the Cobourg and Peterboro' Railway. The opinion among members is decidedly favorable to bringing insolvent railway companies to the hammer, as provided in the case of the Ottawa and Prescott Railway last year.

☞ There are now nearly four hundred men at work on the line of the Grand Rapids and Indiana Railroad, between Sturgis and Kalmazoo, and the grade of that section will be complete before winter.

New Steam Car for Horse Railways.

A new steam car for horse railroads was exhibited a few days since on Summer street, East Boston, by its inventor, Mr. Jos. P. Woodbury. The car resembles in its exterior the ordinary steam vehicle. It is 30 feet long and will seat 40 passengers. The engine has a seven-inch cylinder, a fourteen inch stroke, with about fifteen horse power. It is controlled with entire facility. The engine rests upon a circular track in a manner so as to traverse the body of the car. This construction enables the car to pass over curves, even if very abrupt, without difficulty. The car was manufactured by the Salem Car Company, and the engine by Geo. M. Bird, of East Boston.

Cameron & Barkley.

We take great pleasure in calling the attention of our readers, to the advertisement in another column of Messrs. Cameron & Barkley, Commission Merchants, Charleston, S. C. It will be seen by their card they will receive on consignment, or otherwise, every kind of article pertaining to railroads, steamers or general machinery, all business entrusted to them, meeting with promptness and dispatch. Their references are of the first class, both in this city and elsewhere. We hail with satisfaction the intention of this house to engage in commercial transactions with the North, and we consider it an advantageous step in the right direction. The attention of engineers and machinists is particularly invited to the advertisement of Messrs. Cameron & Barkley.

☞ A letter from the Secretary of the Boston, Hartford and Erie R. R. Co., contradicts the statement recently published that the company had suspended operations. He says the work is progressing as rapidly and as satisfactorily as the circumstances will warrant.

☞ James Kidd has been elected president of the Albany Railroad Company; George Dawson, Vice-President; John W. McNamara, Secretary; and C. W. Armstrong, Treasurer.

☞ The committee appointed by the stockholders of the Virginia Central Railroad Company to examine the condition of that road, publish a report of their observations. All the bridges have been fully repaired or entirely rebuilt, and are now in good condition. The tunnels are also in splendid order, and the general condition of the bed and track is much better than it has been for a long time. The track on the worn-out sections is being relaid with new iron, and altogether the committee regard that road as, for some time to come, in good running order.

☞ The Pit Hole and Oil City Railroad is progressing finely. Between 400 and 500 hands are engaged on it. The road will be finished from the U. S. well to the mouth of Pit Hole, six miles, in ninety days from its commencement.

☞ The total taxable property of Saugamon County, Illinois, amounts to $14,860,159, or an increase of a little over $2,000,000 since September, 1864. Of this $8,000,000, or over one half the total amount, is in the City of Springfield.

☞ The Chesapeake and Ohio Canal has a descending lockage of 573 feet in a distance of 191 miles, from Cumberland to Georgetown, the descent being in the direction of its coal trade, from the Cumberland region to tide-water.

Railways in Russia.

The first section of the Odessa and Balta Railway, 93 wersts long, is now opened for the corn traffic, and a limited number of passengers forwarded by each train. The whole line will soon be opened, probably this month. The rails are being laid on the remaining section, and the arches of the last bridge are now being turned. Nine locomotives for this line have been ordered in the Mechanical Factory at Eislingen. The preliminary surveys for the Taganrog and Charkow line have given the most favorable results, and even exceeded the most sanguine expectations. The landed proprietors have everywhere declared their willingness to give up the land required for the railway without any compensation whatever, and their generous example has been followed by many of the towns, villages, and communes on the line.

☞ Contracts have been closed for carrying the United States mails with the Memphis and Charleston Railroad, from Memphis to Stevenson, 2,722 miles, daily, or oftener, if required, at the rate of $75 per mile per annum. Also for carrying the mails from Macon, Tenn., to Somerville, and from South Florence to Florence, at $30 per mile.

☞ A dispatch from San Francisco, dated Sept. 9th, says: "The first Cotton Manufacturing Company organized on the Pacific coast have commenced their operating mill in San Francisco, with a paid capital of $100,000, and they will begin manufacturing in November, with thirty-two looms, employing thirty operatives. They will manufacture drills and standard sheeting.

☞ The inauguration of the Halifax, N. S., horse railway was celebrated at that place on the 16th inst. It is said that the railway is an "established fact." W. D. O'Brien, Esq., of Brooklyn is the projector and proprietor of the railway.

☞ The Iowa Central Railroad had a formal commencement at Cedar Falls, Iowa, on the 19th inst. It will be pushed forward to completion as rapidly as men and money can accomplish it.

☞ The Lynchburg extension of the Orange and Alexandria Railroad is fully completed, and trains run now all the way through to Lynchburg.

TODD & RAFFRTYE,
Engineers & Machinists,
MANUFACTURERS OF
STATIONARY AND PORTABLE
STEAM ENGINES and BOILERS.
Flax, Hemp, Tow, Oakum and Rope Machinery; Lathes, Planers, Drills, Slotting and Shaping Machines, and all Machinist's Tools; also Wood Working Machinery of all kinds. Mill Gearing, Shafting, &c. Iron and Brass Castings, and General Machinery Merchants.
Works at Paterson, N. J.

American Railroad Journal.

New York, Saturday, September 30, 1865.

Union Pacific Railroad.

It has been intimated in quarters that have no fair excuse for not being better informed on the subject, that little progress has as yet been made in the construction of the Union Pacific Railroad, one of the most immediately important of the divisions of the whole line, as its completion will ensure the more rapid and economical completion of the remaining part of the work. We have for a long time been aware of the great difficulties which have obstructed the progress of this work, but which are now so entirely overcome by the resolution and energy of the Direction, that not only the first forty miles may be considered as very nearly finished, but the whole line to the 100th parallel is well under way; while the engineers are approaching the Rocky Mountains with the most flattering prospect of there securing a line of easy grades and cheap construction. But that it may be seen we are speaking on good authority, we propose to give an analysis of the recent report of Springer Harbough, Esq., a Government Director in the Union Pacific Company, made to the Hon. Mr. Harlan, Secretary of the Interior, and made by one thoroughly comprehending the responsibility he is under to furnish an accurate and impartial report as to the real condition of the company, and of the road it has thus far been engaged in constructing. His communication is dated at Pittsburg, July 20, 1865. It would seem from this, that he was detailed by the President of the United States, in connection with Lieut. Col. Simpson, of the Corps of Engineers of the regular service, "to examine and report upon the location of the line west from Omaha, both as heretofore established, and as now proposed to be changed," by the Union Pacific Railroad Company, a change which has occasioned some discussion. As the duty, however, of examining and reporting upon the line heretofore established, as well as the engineering question involved in the case, was specially imposed upon Lieut. Col. Simpson, Mr. Harbough particularly directed his attention to "the condition, management and progress of the work," as directed by the 13th section of the amended act of incorporation, and such information as was in possession of the Department of the Interior.

ROUTE OF MR. HARBOUGH.

He commenced his reconnoisance at Omaha City, on the Missouri River, the eastern terminus; thence along and over the proposed line westwardly to the head of the first grade; thence southwardly down the Mud Creek Valley to the Valley of the Papillion River; thence up that valley to a point where the line intersects its first established route, and from thence westwardly up the Valley of the Platte as far as the road is graded.

GRADING.

The grading on the first 53 miles is nearly completed, and as he believed would be ready for the superstructure by the 10th of August, following the date of his report, and for the whole distance.

BRIDGING.

The bridging of the first 32 miles consists of stone culverts, abutments and viaducts, and trestle and truss bridges, the latter on the plan of Mr. Howe.

The masonry on this part of the line is finished, except at the Elk Horn River; but this also was to have been completed by the 5th of August last. On these 32 miles, stone is used for the structures, and timber for the 22 miles; the material for which is delivered at Omaha, where also the frames are prepared ready to be put together.

CHARACTER OF THE WORK.

With the slight exception of two or three culverts, and a few drains near Omaha, the work has been done in a very thorough manner; and even with regard to the portions doubted by Mr. Harbough, he states that railroad engineers have expressed the opinion that the work upon them is considered sufficiently permanent.

CHARACTER OF MATERIALS.

The stone used is good limestone, found near the Papillion River and the Missouri River bluffs, with the exception of the masonry work on the Elk Horn River, which is of a dark colored sandstone, and which when first quarried is soft, but grows hard by exposure. This last quality was testified to by parties acquainted with the material, and confirmed by the personal examination of Mr. Harbough himself.

ROAD BED.

The road bed, where completed, is from 12½ to 14 feet wide, well finished up, with side ditches for drainage, 4 feet at top, 2 at bottom, and 2 feet deep, with berm of from 5 to 6 feet in the deep cuts, which are generally from 30 to 40 feet wide. In these cuts the sub-soil is argillaceous and not liable to be affected by frost or rain. As yet gravel has not been found for ballasting along the line or contiguous to it, which will have to be made of the best material at hand. The expense of procuring it at a distance is as yet too great to render its use possible.

LABOR.

Labor is becoming abundant and cheap; so much so, that the contractors are confident the whole of the first 100 miles will be graded and bridged by the 1st of October next, with the exception of the bridge over the Loup Fork. Mr. Harbough states that this assurance can be made good.

LUMBER.

A curious fact, and one that shows the great embarrassment the company has met with is the scarcity of lumber. All the shanties or huts used by the laborers, as well as tents, have

been brought all the way from the Mississippi River, across the State of Iowa, a distance of 300 miles, and have to be moved onward as the work progresses.

RETURN EXAMINATION.—MATERIALS ON HAND.

On returning to Omaha, there was an examination more in detail of that portion of the line first established between stations 900 and 150, which is given in the report as follows:

The materials then at Omaha ready for delivery were—

Cross ties	9,000
Rails	7,786
Chairs	7,530
Spikes	75,000

On board steamers on the rivers between St. Louis and Omaha were also

Rails	5,582
Chairs	8,710
Spikes	164,550

Above Omaha, twelve miles distant on the banks of the Missouri, were 40,000 cross ties to be rafted down immediately. Large quantities of these were also being shipped daily from Pittsburg. Chairs and spikes for the first 90 miles are at Omaha, and in transit; and for the first 60 miles of track, rails and spikes are ready at Omaha, and in transit.

TIES.

This important part of the structure is of oak, black walnut and cotton wood. This last being used from necessity is subjected to the process of burnetizing, a method invented some years' since in England by Sir Wm. Burnet, and is an application by heat in a proper vessel of iron of chloride of zinc, which was discovered by him to be an entire preservative of wood. His method has not only come into general use in England, but partially in the United States, having been adopted successfully at Lowell, Wilmington, Philadelphia and Baltimore.

To adopt this process on a large scale, the company have constructed adequate works, as well as numerous steam saw mills, stationary and portable, for cutting these ties. In this way the want of other lumber is obviated, and the ties when so treated hold spikes as firmly as oak.

TIES PER MILE.

It is proposed to lay down 2,500 per mile with 4 of hard wood to each rail.

RAILS.

800 lbs. gross weight of iron rails are to be laid to each lineal yard, generally of 24 feet in length, and the residue 28 feet in length.

ENGINEERS.

There are two full corps of Engineers engaged in further surveys, to and into the Rocky mountains, west of the head of the great valley of the Platte. One of these is running lines West from the eastern slope of the Black Hills, and the other engaged on the same work East of the great Salt Lake Valley, though not without embarrassment from tribes of predatory Indians.

EQUIPMENTS.

On the 10th of July last, the following was the character and number of the Engines, Cars, &c.:

1 Locomotive at Omaha.

1 on the Hannibal and St. Joseph Railroad, awaiting shipment.

1 on ditto., used in getting cars over that road.

2 on the Chicago and Alton Railroad, used in transporting iron over the same.

20 platform cars on Chicago, Burlington and Quincy Railroad, in the same service.

20 ditto., at Quincy and between that and St. Joseph, 8 being used in transporting trucks, and materials for passenger and box cars to be put together at Omaha.

10 platform cars on the road to Quincy. All were being sent forward as fast as possible. Besides these, 70 other cars are purchased, and the passenger cars are sent forward in sections.

TRACK LAYING.

The track laying was commenced on the 10th of July last, and the company expects to push this part of the work with diligence and rapidity.

BRICKS AND BUILDINGS.

Preparations on a very large scale are made for the construction of suitable shops and buildings, for the accommodation of the company and its rolling stock; but some unavoidable delay has occurred by a hesitation as to their location, by reason of the variation in the location of line.

MACHINERY.

It is stated that the machinery for the work shops, has already been sent forward from New York.

RIGHT OF WAY.

This is reported as being secured through Douglass, Sarpey and Dodge counties; has been generally arranged for, except in a few instances in Dodge, to obtain which, proper legal steps have been taken.

FUEL.

As yet coal has not been found in suitable quantities, and at convenient distances for the use of the road; but the opinion prevails that on proper investigation there will be no permanent inconvenience on this account, as it is believed ample supplies will shortly be obtained.

MR. HARBOUGHS' OPINIONS.

Having the knowledge that the other railways in progress are deficient at this time to the extent of 130 miles from the nearest terminus, with the great uncertainty in the river navigation, the scarcity of labor, and the innumerable difficulties which have arisen from time to time, Mr. Harbough is convinced after personal examination, and a full knowledge of what has been accomplished, that the work has been pushed forward with commendable zeal; and he is satisfied that the construction of the next 200 miles will be effected at a comparatively small cost.

Mr. Harbough particularly calls the attention of the Department to the fact that the Union Pacific Railroad Co., cannot so well prosecute its work until the roads of Iowa are connected with it at some point on the main Trunk; and that they are not pushed as rapidly as their interest demands. The nearest point of approach is by the Chicago, Iowa and Nebraska Railroad, at Boonsborough, a distance of 130 miles east, on the Missouri river. The Mississippi and Missouri Railroad, is only open to Grinnell, Iowa. Other roads, such as the Burlington and Missouri River, the Dubuque and Sioux City, and others pointing to a connection with the Pacific, might do much to increase their traffic, through the richest and most beautiful country in the world. The report closes with pertinent remarks on the importance of the work, and allusions to some slight difficulties as to the terminus, occasioned by the interests at Omaha—now believe accommodated, and of no particular importance to our readers.

We have so often expressed our opinions on the great importance of the Union Pacific Railroad, that we do not deem it necessary to do so now.

We have therefore, only to say that the report is not only a very satisfactory one, but it completely vindicates the company, its agents and contractors of any and all charges made against them by the ignorant, the misinformed, and the inimical, and is entitled to the just consideration of the Government in all respects. It is very evident that this report is a conclusive reply to the recent assaults made upon the road by parties who display not only a very bad spirit, but great ignorance of the subject; and who cannot even distinguish between one road and another.

Buffalo and Oil Creek Cross-cut R. R.

We learn from the Maysville, Pa., *Sentinel* that arrangments for this new railroad are progressing favorably. Two sets of engineers have commenced their surveys from Maysville. Mr. True, as engineer, and Mr. Peacock assistant, both of Buffalo, are first to run the line to Brockton, then to Westfield, and subsequently one to Bell's creek, in Westfield. Mr. Ewing, of Randolph, with his party, makes the survey to Corry, *via* the south branch of the Pendergrast creek and Panama. Mr. Crosswell, of Warren, has commenced a survey from Maysville to Corry *via* Sherman. When these surveys are all completed, the line for the road will be selected, and work will be commenced at no very distant day.

Sandusky, Dayton and Cincinnati R. R.

The earnings and expenses of this road for the years ending June 30, 1864 and 1865, have been as follows:

Earnings:	1864.	1865.
From passengers	$184,614 28	$242,274 87
" freight	381,072 58	435,801 54
" mail	16,080 00	16,080 00
" express, etc.	11,660 58	16,128 17
" car mileage	6,719 94	7,673 64
" storage	14 78	1,966 03
Totals	$600,162 16	$719,924 15
Expenses, viz:		
Maintenance of way	$136,039 43	$167,613 23
Locomotive power	122,054 29	163,903 94
Machine shop	22,744 44	35,574 22
Train expenses	73,574 10	84,213 07
Station "	63,586 19	75,156 87
Office establishment	39,938 43	38,468 34
General expenses	6,113 62	7,269 69
Loss and damage	2,342 27	1,824 84
Totals	$466,412 77	$574,024 20
Net earnings	$133,749 39	$145,899 95
Interest and taxes	75,359 94	141,326 45
Balance	$58,389 45	$4,573 50

The item of passenger receipts shows a gradual appreciation in the last four years of a decided and gratifying character. The lowest depression occurred in 1861 and 1862. In these two years they stood at $115,000 and $112,000, respectively. Last year they were $184,614—increase $57,660.

It need not now be stated that our road derives its principal support from local business. This is understood; and the fact applies with almost equal force to freight and passenger business. The largest receipts from passengers was in 1853–'54, $287,904. At that time this road constituted one of the main lines of travel from the southwest to the east. The total earnings attained that year their highest figure previous to the one just past, to wit, $705,783.

These facts are interesting only as showing the gradual development of the country through which our road passes. The business results in any department of such a line, may fairly be taken as disclosing the wants and capacity of the region through which it runs.

The additional thought obtrudes itself: If a road, without any proper connections or outlet at either end, can sustain itself and increase its earnings despite open combinations against it, (which the last few years of its existence have developed,) what might not be expected with sympathetic connections?

At our southern terminus we give—but receive nothing in return, beyond what belongs to us locally. At the north, the same remark applies, except during the season of lake navigation. The subject is suggestive, and should lead to the clear apprehension of the truth, applicable alike to all roads, that, when built, their existence as a living element must be recognized. A different course is neither wise as a measure of present economy or future safety, and cannot be adopted and sustained without warring on interests of broader scope than corporate profits. The people on a line of railroad may not always hold at their true value the advantages conferred by its presence, but they will be slow in consenting to be deprived of them.

Our expenditures continue to be large, and must so continue until the road is put in good order. Beyond the substitution of a T rail for the flat bar in 1852, but little was done to put the line in good operating condition. The track was imperfectly ballasted—ditches bad, and insufficient—few station houses, and rolling stock short in supply and in bad condition. The payment of dividends under such circumstances was a mistake. When made in money, it was borrowing of the future; when made in stock and bonds, it was an increase of debt, burdening future resources in another form. The increasing expenditures to meet the demands arising from imperfect organization, with decreasing receipts, brought affairs to a head in 1857. Then commenced the difficulties under which the corporation has ever since been laboring, to wit, the restoration of failing machinery, and building up the track on receding resources. A loan to at once cure the mistakes already made, and past recall, would have been true economy. Under a different policy we have been expending on the line what would have paid interest on a new loan and made a fair return to stock and bondholders; for it should be understood that one man on a well put up track with good iron, will do the work of three on a neglected track; and quite the same proportion of expenditure will mark the difference in repairs and renewal of operating machinery.

The business of the first eight months of the current fiscal year showed a gratifying increase of earnings. The suppression of the rebellion becoming apparent, there has since been a falling off in transportation on most roads, and ours is no exception. A state of peace has taken the Government out of the market, and time will be required for the business of the country to adjust itself to new channels, or rather to return to old ones. In the mean time, each separate interest will exert itself to shape its movements in harmony with the restoration.

Our rolling stock and machinery, with renewals and additions, is now efficient, and adequate to our present wants. The condition of our track has been improved; station houses and permanent structures have been built and overhauled; additions have been made to our passenger cars, during the year; and we have an outstanding contract for the delivery early in September of twenty box freight cars, to take the place of those broken up the past season. The high price of labor and materials has been felt in every department, and has swelled expenditures beyond ordinary proportions. These difficulties, it is to be hoped, are passing away, when a more equitable adjustment of the profits of capital and labor ay be effected to the mutual advantage of both.

Since our last annual report, we have secured title to the piece of ground, in Dayton, known as the "Phillips Depot," held under contract with the C., H. & D. R. R., (now owned in common by the two roads,) by payment of balance due. We have also purchased a tract of land of some six acres, situated near New Richland, Logan county, for its gravel, and have occupied it with a convenient building for the hands. The occupancy of the Dayton grounds, at an early day, has become a necessity for the receipt and delivery of freight from connecting roads.

The receipts and disbursements during the year ending June 30, 1865, were as follows:

RECEIPTS.

Balance on hand June 30, 1864		$80,734 07
Receipts from transportation		762,405 00
		$843,139 07

President.—O. FOLLETT.

Directors.—Theodore A. Neal, Jacob W. Pierce, I. M. Spelman, John P. Yelverton, Elisha C. Litchfield, Ralph M. Pomeroy, William Wilshire, Abm. Cahill, William Warder, O. Follett.

State Directors.—Isaac S. Gardner, Robt. G. Corwin, R. W. Shawhan.

Secretary and Treasurer.—L. H. LATHAM.

Superintendent.—HARVEY RICE.

Master Mechanic.—THEODORE LYMAN.

Central Pacific Railroad Bonds.

Some doubt existing as the course the government would adopt as to the payment of the Central Pacific Railroad bonds, the President of the Bank of the Metropolis in Washington, addressed a note to the Secretary of the Treasury on the subject, and received the following reply:

TREASURY DEPARTMENT, Sept. 18, 1865.

SIR: Your letter of to-day asking whether the obligation of the government to pay at maturity its bonds issued under the acts of July 1, 1862, and July 2, 1864, to aid in the construction of the Pacific Railroad is absolute or contingent upon the due performance of the railroad corporation of its obligations, is at hand. From an examination of the terms of the acts and the various provisions therein made, in respect to the issue of these bonds, I am satisfied that the faith of the government is pledged to their redemption in the hands of any lawful holder, and without regard to whether the obligations of the railroad company are ultimately fulfilled or not.

H. McCULLOCH, Secretary.

J. B. HUTCHINSON, Esq., Washington, D. C.

Vermont Central Railroad.

A meeting was recently held in Boston of the committees and trustees of the Vermont Central Railroad mortgage bonds, at which the basis of an arrangement or compromise was agreed upon. On the back coupons and interest on the first mortgage it was agreed to allow fifty per cent., or $1,000,000, making their claim $3,000,000 at seven per cent., and the second mortgage remaining $1,500,000 at seven per cent. It was thought that after 1867 the earnings of the road would enable them to pay the interest on the second mortgage. The amount of $700,000, now required to fully equip the road, is to be furnished equally by the two classes of bonds, on bonds payable in ten years, paying eight per cent. per annum, the specific earnings of the new stock from Ogdensburg to Boston being appropriated to the payment of the interest and a sinking fund which it is estimated would retire the new bonds in seven years. A meeting of the 1st mortgage bondholders was to have been called for the 20th inst., to consider if they would ratify these proceedings; the result of which conferance, if held, has escaped our notice.

Journal of Railroad Law.

REASONABLE CONDITIONS.—RESPONSIBILITY OF CATTLE CARRIERS.

It is obvious that common carriers—as all railroad companies are—must be kept under some restraint as to the terms upon which they transact business. The public good requires that they should not impose arbitrary and unreasonable conditions upon their customers, or they might, by combination, refuse to take any responsibility whatever. In a recent suit between a grazier named Gregory, and the West Midland Railway Company, the English court of Exchequer rendered a decision upon this point, worthy of note.

It appeared that, on March 6th, 1863, the plaintiff sent a cow and a heifer to the Abergavenny station of the department's railway to be carried from thence to Newport. The drover who brought the cattle paid 4s. 8d. for their carriage, and signed a cattle ticket specifying the rate of charge at the foot of which were the following words: "I hereby agree to the conditions of carriage on the back hereof." The conditions were as follows:

"CONDITIONS OF CARRIAGE.

"The Newport, Abergavenny and Hereford Railway Company, give public notice that they undertake the conveyance of horses in waggons, oxen, cows, sheep, calves or pigs, upon the terms and conditions hereinafter stated, and by such only will they be bound.

"1. They are to be free from all risk or responsibility with respect to any loss or damage arising in the loading or unloading, from suffocation or being trampled upon, bruised or otherwise injured in the transit from fire, or from any other cause whatsoever, it being hereby agreed that the same is to be carried at the owner's risk.

"2. They are not to be held responsible for carriage or delivery within any certain or definite time, or in time for any particular market.

"3. That as the charge for conveyance is for the use of the waggon and locomotive power, the owner or his representative is required to see to the efficiency of such waggon before he allows his stock to be placed therein; and complaint must be made in writing to the station inspector, or clerk in charge as to all alleged defects, either at the time of booking or before the waggon leaves the station.

"4. The owner or his drover shall ride free in the waggon in which his stock is loaded, and shall have the care thereof, but as no fare is charged it is agreed that such owner or driver shall so ride entirely at his own risk.

"This ticket is to be delivered up at the place of destination, in default of which the stock herein named will be retained, and remain at the owner's risk and expense."

The defendants' servants put the cow and heifer without halters, into a sheep or calf truck with low rails, and during the journey the cow jumped or fell out of the truck, and was greatly injured. The person on whose land the cow fell had some claim against the railway company, and he killed the cow and kept the carcase for his own use. When the drover paid the carriage and signed the ticket, he was told that the cow and heifer were in a truck ready to start, but he did not see either them or the truck.

It was submitted, on behalf of the defendants that they only undertook to carry upon the terms contained in the condition and therefore were not liable. It was contended on the part of the plaintiff that the conditions were unreasonable and void. A verdict was then entered for the plaintiff for £30 to be reduced to £15, if he should only be entitled to the carcase of the cow; and leave was reserved to the defendants to move to enter the verdict for them.

MARTIN, B.—Said I do not depart from the view which I took of this act of Parliament, in delivering my opinion in the House of Lords, in the case of Peck *vs.* The North Staffordshire Railway company, which I thought was the correct view. But, looking at the decision of the court of Exchequer Chamber in the case of McManus *vs.* The Lancashire and Yorkshire Railway company, 4 H. & N. 327, I consider that I am bound to decide against the railway company.

The first question is what is the meaning of these conditions? The railway company "Give public notice," (therefore I apprehend that these are conditions within the first proviso of the Act) "that they undertake the conveyance of horses in waggons, oxen &c., upon the terms and conditions hereinafter stated, and by such only will they be bound; first they are to be free from all risk of responsibility with respect to any loss or damage arising in the loading or unloading, from suffocations, or from being trampled upon, bruised, or otherwise injured in the transit from fire, or from any other cause whatsoever, it being hereby agreed that the same is to be carried at the owner's risk." It seems to me impossible for words to express more clearly that the company, so far as their will is concerned, are not to be responsible for any sort of loss or damage occurring from the commencement of the loading to the end of the journey. Then observe the mode in which they express themselves with respect to the waggons. "We will not be responsible for any damage arising from any defect in the waggon or locomotive power; but we require the owner to see the efficiency of such waggon before he allows his stock to be placed therein." Reading the first and third conditions together, they seem to me to express as plainly as language can do the will of the Railway Company not to be liable for any loss or damage whatever to cattle; and they declare as the reason, "We make no charge for the conveyance, but only for the use of the waggon and locomotive power."

It remains to consider whether these conditions, or special contract, are reasonable. Here the words are, not "subject to the owners' undertaking all risks of conveyance, loading and unloading whatsoever," as in McManus *vs.* The Lancashire and Yorkshire Railway Company, but "it being hereby agreed that the same is to be carried at the owner's risk." I am, however unable to distinguish this case from that; and taking the conditions together, as I am bound to do, they provide for the complete exemption of the company from all responsibility whatever, which that case has decided is unreasonable and are therefore void.

In my judgment this case is governed by McManus *vs.* The Lancashire and Yorkshire Railway Company, from which we cannot depart.

BRAMWELL, B.—I am of the same opinion. The House of Lords has decided that a particular contract no matter under what circumstances it is made may be reviewed by the judge before whom any question relating to is tried, and he is to determine whether it is just and reasonable. I confess I cannot understand that, nor do I very well see how it is to be applied. I am at a loss to comprehend how any one can determine whether a general condition with reference to all mankind, or a bargain which any two people are content to make, is reasonable or not. However, the question is now set at rest, and we have some rule to act upon. It is established that as a matter of law, the courts may decide whether particular conditions are just and reasonable. Now, though we may not agree with the court of error in the reasons for their decision, we are bound by it, and it is sufficient to say that this case must be decided in conformity with the case of McManus *vs.* The Lancashire and Yorkshire Railway Company, and consequently we must hold that the first condition is neither just or reasonable. It seems to me, however, that it would be far better to let people judge for themselves, and I should have thought that no condition was void which a person was willing to agree to. It is difficult to understand the third condition; but I cannot help thinking that its right interpretation is, that it supplements the first condition: whereas that condition extended to all other dangers and perils of the journey, the third requires the sender of the cattle "to see to the efficiency of the waggon," but no consequence is attached to his not doing so. It seems to me that the words are used as in common parlance: "You are to see to the efficiency of the waggon, for that is your affair." If that be so it is as unlimited with reference to the subject matter with which it deals as the first condition, which has been held to be unreasonable; and so, by parity of reasoning, I presume this third condition would be held by a court of error to be unreasonable, and therefore I now so hold it.

CHANNELL, B.—Said I am also of opinion that the rule ought to be discharged. Whether the first and third conditions be read as one or separate conditions, they are unreasonable. I think the construction put upon them is correct, and so construing them the case is governed by McManus *vs.* The Lancashire and Yorkshire Railway Company, and Peck *vs.* The North Staffordshire Railway Company.

Pittsburgh and Steubenville R. R.

The new bridge across the Ohio river at Steubenville has been completed and opened for travel. The new route to Cincinnati will be fully opened on the 1st of October, *via* Easton, Allentown, Reading, Harrisburg, Pittsburg, Steubenville and Columbus; the distance being 744 miles, and the only change of cars at Pittsburg. By this cut-off across a great bend in the Ohio, round which the route has hitherto gone, 26 miles of travel are saved, and passengers are enabled to reach Cincinnati one train earlier than by any other route. The opening on the 1st of October will be distinguished by a complete equipment of new and splendid cars, and as it will be one of the safest roads in the United States, and as it passes through as much variety of natural scenery as can be found in any other equal distance on the globe, it is expected that the diligence and energy of the managers will meet a liberal response from the traveling public.

Interest and Dividends.

The Hartford and New Haven Railroad Company have declared a quarterly dividend of $3 per share, free of government tax, payable at the National Bank, October 2.

The Philadelphia, Wilmington and Baltimore Railroad Company has declared a semi-annual dividend of 5 per cent., clear of government tax, payable October 2.

A stock dividend of 16 per cent. has been declared by the Indianapolis and Cincinnati Road, payable September 20.

The Panama Railroad Company have resolved to issue the Reserved Stock of the company, amounting to two millions of dollars, to be distributed among the shareholders, in the proportion of two shares for each five shares held by them. The certificates of new stock will be ready for delivery on and after October 5th. The company have also declared a dividend on the Capital Stock, as increased, of four per cent. out of the earnings of the road for the three months ending 30th inst., and two per cent. out of the earnings of steamers, sailing vessels, &c., payable on and after the 5th October.

The Granite Railway Company has declared a dividend of 3 per cent., payable Oct. 2.

The Pittsburgh, Fort Wayne and Chicago Railroad Company have declared the regular dividend of two and one-half per cent. on the capital stock for the quarter ending September 30, inst., payable free of Government tax, on and after October, 16th prox., at the banking-house of Messrs. Winslow, Lanier & Co., New York.

On the 30th of August, the Pacific Mail Steamship Company, in addition to a quarterly dividend of 5 per cent., ordered an issue of four million dollars of scrip stock, to the stockholders, share for share, upon which twenty-five per cent. was declared paid, leaving seventy-five per cent. to be called for at the pleasure of the company. The directors have now ordered an additional twenty-five per cent. to be declared paid of the four million scrip stock, issued August 30, 1865, subject to all the terms and conditions thereof. Its stock now stands $4,000,000 of original stock, and $2,000,000 of scrip. For the Atlantic Mail Ship property it is to pay $1,000,000 of full stock, $1,000,000 of scrip, and $2,000,000 of scrip stock is to be held by trustees for the benefit of the Atlantic Company's stockholders.

The Chicago and Rock Island Railroad Company have declared a dividend of five per cent., free of U. S. tax, payable October 10th.

The coupons of the first mortgage eight per cent. bonds of the Des Moines Valley Railroad of Iowa, due October 1, prox., will be paid at the banking-house of Gilman, Son & Co., No. 47 Exchange-place.

The coupons of the bonds of the Atlantic and Great Western Railway due 1st October, will be paid at the office of McAndrew & Wann, No. 12 Pine street.

The coupons of the Chicago and Alton Railroad income bonds, due October 1, 1865, will be paid, less the Government tax, at the office of M. K. Jesup & Co., No. 59 Exchange-place.

The seven per cent. land mortgage coupons of the Burlington and Missouri River Railroad Company of Iowa, due October 1, will be paid, less United States, at the Broadway Bank, New York,

The coupons of the bonds of the Vermont Valley Railroad Company, due October 1, 1859, will be paid at the National Park Bank in this city, from the 30th day of September to the 30th day of October, and thereafter only at the office of the Treasurer in Bellows Falls, Vt.

The interest coupons of the first mortgage bonds of the Chicago and Great Eastern Railway Company No. 4, due Oct. 1, will be paid (less Government tax) on presentation at the company's office, No. 37 William street, New York.

Coupons of St. Louis, Jacksonville and Chicago Railroad first mortgage bonds, due October 1, 1865, will be paid at the office of M. K. Jesup, & Co., No. 59 Exchange-place, free of Government Tax.

☞ The annual meeting of the stockholders of the UNION PACIFIC Railroad Company, for the election of directors will be held at the office of the company, 13 William street, New York, on Wednesday, October 4, between the hours of 10 a. m., and 4 p. m. Charles Tuttle, Secretary.

Our Paper Currency.

The committee appointed at the last meeting of the Chamber of Commerce, to consider and report on the propriety of receiving a portion of the customs duties in legal tenders, is understood to be composed of gentlemen who hold opposite opinions on this subject, and we may therefore expect their reports to be of a widely differing character. It is asserted that with the great premium at which gold is selling, the profits of importers are very large, much more than a healthy state of things would justify, and that we are accordingly losing by it on a large scale. It is said to be the practice of those persons to charge, profit, cost, expenses, all in gold, which is the cause of the high prices of foreign goods, and allows them a heavy margin. On the other hand it is understood that the reduction of the amount of currency afloat, which by this plan it is expected will be effected, does not accord with the views of the Secretary of the Treasury, who entertains the opinion, that as the faith of the Government is pledged to collect its customs in gold, and the public credit is based upon that, it will be dangerous as well as inexpedient to receive any paper money for duties on goods imported. Of course this abstract opinion is full of force, but yet we have so large a surplus of gold, that its accumulation in sums beyond what is wanted to meet the interest on our loans, appears to us unnecessary and perhaps oppressive. We think we have suggested a remedy which will fully meet the object in view of the leading members of the Chamber of Commerce, who are generally importers on a large scale, and give them the relief they want. But it is by a different process, and with a double effect. We have suggested that the Secretary of the Treasury from time to time, as he finds his surplus of gold large, should issue gold interest bearing notes, with nominal interest only, which should be receivable in all the custom houses of the United States for duties. This would have its effect on the market, precisely as the sale of so much gold would do in the street, and bring down the premium as certainly. But at the same time the Government would make a profit by the premium received in greenbacks. If ten millions of these notes were issued, then at the present rates his profit in paper would be $4,800,000, and proportionably as the rates declined. This amount of paper would go far to pay the interest on the currency loans, or better, be entirely withdrawn from circulation and cancelled. If the revenue is to be as large for the year, as it appears now very probable it will be, then he will be able to issue these notes more than once or twice a year, and we should be reducing our debt, our currency or our interest on a scale which would have valuable results. We have reflected upon this plan with some care, and have not yet detected in it any appearance of fallacy. If there be, we should like to have it pointed out.

Certainly something should be done to appreciate the value of the paper dollar, for with regard to all debts contracted before, and even a short time after the war, the debtor practically gains 40 per cent. in the discharge of his obligations, and the creditor loses as largely. So with regard to leases, salaries and dividends declared by monied institutions which stick to the old scale of dividends. All who gain in this way are doubtless well satisfied with the high price of gold, when they themselves are in the receipt of its premiums.

If this condition of things continues very long contrary to public expectation we must look for a heavy rise in our gold securities, and a heavy fall in all stocks paying only 7 or even 10 per cent. in paper. As it is, we wonder at the patience of those stockholders who receive instead of 7 per cent. from their investments, a sum in fact 40 per cent less than that.

As long as this state of things continues we cannot expect to see railway shares selling at their real value.

Lake Superior and Puget Sound R. R.

MONTREAL, Sept. 22.—Col. Rowland, as Commissioner of the Northern Pacific Railroad Company, is here conferring with the Canadian Government and others relative to uniting British capital with the grants of the United States in the construction of the Lake Superior and Puget Sound Railroad. Col. Rowland is confident the commercial influence of Canada will be most fully accorded to this project, as one of great international importance to the people of both countries; and he has no doubt that his mission will be crowned with success.

Western Maryland Railroad.

The County Commissioners of Washington County, Md., have resolved to subscribe one hundred and fifty thousand dollars for the extension of the Western Maryland Railroad from Union Bridge, in Carroll County, to Hagerstown. It will be recollected that the commissioners of the same county subscribed, a few weeks ago, a similar amount to the Washington County Railroad, which is to connect Hagerstown with the Baltimore and Ohio road, and which latter company subscribed $450,000 for the enterprise.

☞ An effort is being made to construct a railroad from Kennedysville, Kent county, Maryland, to connect with the Delaware Railroad at or near Middletown. A meeting for the furtherance of the enterprise was held at Kennedysville, on the 26th instant. Books have already been opened with a fair prospect that liberal subscriptions will be made. The Legislature of Maryland has appropriated one hundred thousand dollars towards this work, when a similar amount shall have been subscribed by individuals.

The Education of Engineers.

A perfect engineer, if such an one could be found, would be a man of gigantic intellect and vast research, a thorough master of all the sciences, and an unerring observer of all natural phenomena, and, withal, gifted with a wondrous power of classification, whereby to order to the best the cornucopia of precedents stored in his memory. Being unable to bring our engineers to this Utopian condition, it devolves upon us to endeavor to ascertain the best mode of approaching it, each generation adding to the general development of the professional body. In the beginning, knowledge must be generated in the mind, and tutorial teaching only becomes necessary, or useful, when a great number of facts and generalisations thereupon have accumulated, hence the pioneers of a new science or art are of necessity self taught, and, accordingly, liable to many errors, notwithstanding which, they are usually idolised by succeeding generations, and very often, in character, entirely misunderstood. From such causes, some of the most grotesque conceptions arise, one of which may be recognised in the conventional "practical man" of the last generation, which individual was rather identified by his grimy aspect than by his mental qualifications. Telford, who may reasonably be termed the father of modern civil engineering, has been said to have despised mathematicians in the profession; but an examination of his works and reports proves most incontestibly that he was himself a very sound practical mathematician.

There has, however, been good ground for objecting to the complication which some mathematical authors seeem to delight in introducing into their practical (!) treatises on the various branches of constructive science, preferring the elegant method of the infinitesimal calculus to the simpler one of plebian arithmetic. To mention an instance, continuous girders were treate1 theoretically thus until 1861, though, in some instances, the authors were fearfully at fault, probably from omitting those constants which they were incapable of determining, or otherwise liking to be rather original, and, therefore, slightly altering theorems borrowed from the works of their cotemporaries.

It is, however, useless to criticise the instructors of the past, except so far as it may tend to create a more healthy tone of those of the future, by warning them that a writer who wishes his reputation to be enduring, should have for his object rather by his simplicity to instruct his readers than to astonish them by his erudition; therefore, we will pass on to consider the state of the profession, and the prospects of its members in future times.

Any one who has the necessary funds to pay a premium can enter the engineering profession, and experience shows that many do it, or have themselves so placed by their friends, because they must do something and like to be *professional men* nominally without the trouble and anxiety of undergoing a period of probation, occupied with unceasing attention to study and the practical departments of an active business life. The result is that they often come through their pupilage scarcely more informed than they were at entering it, their future depending upon their own private means and influence, which not being available to all, those who lack them must degenerate into the lowest class of mechanical draughtsmen. This arises from the fact that in most engineers' offices pupils learn just what they choose to pick up, there being no instruction, as it were, forced upon them, nor even a present reward offered to such as become most competent, at the age at which youths usually enter the profession, there are but few who energetically pursue it from a clear conception of their own interests, and two or three years then lost cannot be afterwards redeemed; for the necessity of subsequently attending to commercial, as well as scientific matters, gives rise to a mental anxiety which unfits the brain for continuous or elementary study, although it does not prevent the application of knowledge already gained to fresh objects or impede its development into new ramifications.

The result of this system is that those who ultimately attain scientific eminence, though not necessarily commercial prosperity, are a class who, as youths, are diligent and perserverng from a deep and innate interest they take in the processes which are brought under their notice, but the conclusions at which they arrive are usually to a very great degree influenced by particular prejudices, and in many cases they cannot obtain information, even where they are desirous of profiting by the experience of others. This arises from one of two causes—either the principal is too much occupied to give any time to those whom he has undertaken to render proficient, or he is himself but ill informed in his procession. In this latter case it is hardly possible to condemn too strongly the conduct of the pretended instructor; but it is unhappily a fact that there are many calling themselves Civil Engineers who exist by taking pupils, when the latter are frequently better informed than themselves; and this is an evil which will probably last as long as engineers are allowed to practise without diplomas of some kind.

In the offices of such men as we refer to, the discouragement is immense, even sufficient to deter any but the most obstinately persevering from taking an interest in the course of life marked out for them; for although they may at first be attentive and diligent, yet the force of that evil example which encompasses them is but too apt to sap the very foundations of those good inclinations which, encouraged or even let alone, could scarcely fail, in the course of time, to bring honour to him in whom they are developed.

When it is through press of business that the pupils cannot obtain such information from the principals as they might wish, there is usually the compensation that there are works on hand from which they may themselves derive much information of the most valuable description; but in the other case alluded to, they are shut out from this, and often confined to such work as the tracing of plates for the illustration of books, in which beauty of execution is usually set before accuracy of detail; hence, although this occupation may serve to give a faint general idea of some engineering works to those engaged in it (at least, such as take the trouble to understand what they are about,) yet, practically, they fall short in attempting to design similar works, because the very parts which they have been accustomed to overlook, are frequently of the greatest importance when they have to be actually executed.

Let us enquire into the nature of such a method of training, as appears most likely to produce satisfactory results—the point of impressing the importance of diligence, affording facilities for obtaining information and encouraging talent, need no comment, as the necessity of urging them is sufficiently self-evident; but the mode in which theoretical and practical instruction is combined, requires very careful consideration, in order that the information gained in one department may be balanced with and adjusted to that acquired in the other. It does not appear satisfactory, ultimately, to impart a thorough education to the intended engineer, *first*, that is before he has any oportunity of dealing practically with work, as certain notions thereby become fixed in the mind, which are prejudicial, and difficult, susequently, to set at their true value. These refer to the application of abstract considerations to the actual execution of constructive works. The value of a correct understanding of the application of mathematical science in such cases, can scarcely be overrated; but if the limits within which its operation should be confined, be not ascertained, the results may be serious in the extreme. If an engineer designs, say a sea wall, according to careful calculations, based on strict theory, and that sea wall fails to attain the end for which it was erected, it does not necessarily follow that the theory itself is erroneous or inapplicable, but merely that it has been acted upon by some individual who did not comprehend the limits of its application.

In using any calculation of the class to which we allude, a very wide margin has to be allowed for possibilities, as the data given to work upon are frequently very meagre, and the fancy cases given in academical courses of tuition are not to be met with in reality, nor can important matters be decided on the first data, it more frequently happening that altercations are necessary, or desirable to be made during the progress of the work; and he will be esteemed the best engineer who most rapidly and clearly sees where such deviations from the original plan are needed, and to what extent they must be carried so as to hold the middel course between danger and expense—the Scylla and Charybdis—by which all who take the responsibility of carrying out great undertakings in the engineering profession are constantly threatened.

If a practical course of work is passed through by the student, in the first instance he is in danger of imbibing from those with whom he is necessarily brought into contact an ignorant contempt for theory of all kinds, though fortunately this feeling does not appear to exist to nearly the extent to which it had spread during the last generation, a result probably due to the increased facilities for education afforded to the working classes; nevertheless, the remaining elements are quite serious enough to be carefully guarded against.

The obvious conclusion is that the practical and theoretical instruction must proceed simultaneously but not after the fashion of some establishments where engineering is professed to be taught at the present time.

Making a model steam engine will not acquaint the learner with the nature of materials, as he will in after life have to deal with them, and in all probability, unless his model is comparatively large, he will be forced to make it disproportionate in many details, especially steam passages and valves, and, in fact, as far the real utility of such occupation to him is concerned it is very little better than imaginary.

How, then, it will be asked, are we to proceed? We think by the following course:—Let the tyro be placed in such a position that he may have access to works, mechanical or civil, of magnitude and importance, use all endeavors to develope in his mind an interest in the general principles by which they are affected, and the difficulties which arise during their progress; then let him study theory for each case as it arises, merely to enable him to understand those principles and their application. Thus if he is diligent and intellectual, he will have most strongly impressed upon his mind the necessity of ascertaining and overcoming obstacles which can only be understood by inspection, and will value abstract science rightly as his guide in completing such projects as he may undertake. If on the other hand, he is diligent and intellectual there is but one remark to make, let him not atttempt to enter the profession.

In order to carry out the view promulgated above a really honest intention to do his duty must exist in the engineer to whom the pupil may be articled, combined with a thorough knowledge in himself or his assistants of his business, and it is certainly the duty of guardians to ascertain whether such be the case with one with whom they propose to place a youth; for so long as they are careless, and charlatans, broken down attorneys, and others of that numerous body of vultures that live upon the labor of the honest part of society, can style themselves Civil Engineers and obtain pupils—while the really competent members of the profession are too busy to attend to their pupils, we cannot hope for any amelioration of the grievances which now burdens it with of many incapables who are useless to themselves and injurious to others.—*London Artisan.*

☞ The petition of the Vermont and Canada and Vermont Central Railroads for permission to issue additional bonds, has been granted.

Bavarian Railways.

We find in a late number of the London *News* the following remarks of a traveler, on the peculiarities of railway travelling in Bavaria:

The rail has been laid for miles through a country so flat that it was only necessary to fell the trees, cut them up into sleepers, and fasten down the rails, when the iron road was complete. The kind of prospect which is afforded on a line of this description is pleasing enough at first to the English traveler, as it is new to him; but after vainly endeavoring to pierce the gloom which pervades such a forest the thing becomes monotonous, and you are pleased to find yourself running through an open country at last. At Asschaffenburg, reached after a ride of about two hours, you change carriages on coming upon Bavarian territory, and you cannot fail to remark the great change not only in the dress and appointments of the railway officials, but in their cleanliness and gentlemanly appearance. The carriages also are infinitely superior; the second class, as is the case in many parts of Germany, being equal as a rule, and superior very often, to those of the first class on our own lines. Bavaria is a country, too, in which politeness is cultivated to a wonderful extent. Here the officials, that is to say the guards and porters, salute one another when they meet, and of course are particularly polite to travelers. The uniform worn is a light blue coat, braided, and adorned with silver buttons, while the trousers and waistcoat are of a dark and very serviceable kind of cloth. The cap bears a couple of outspread wings in silver, indicative of the speed at which the travellers are supposed to be conveyed on the lines, but delusive in some respects, for the rate of progress is slow as compared with some other continental routes, and, of course, even with the quick trains, will not bear comparison with our English lines. Another great annoyance is found in the circumstance that a great part of the line is only a single track, with all the inevitable annoyances of waiting at places till a train has passed you on a loop line. It must, however, be acknowledged that the natives seem to make no particular objection to this manner of travelling, and they, no doubt, are the best judges of what suits them. Every now and then, at level crossings, you see a statue-like individual, wearing a red jacket and a black "wide-awake" hat, who salutes the train in military fashion as it passes which seems to me to be another evidence of the particular politeness which characterises the railway people. One functionary observable at the principal stations causes an English traveler to smile, and even to feel some surprise. You observe marching up and down the platforms, with much stateliness, a regular parish beadle—silver-laced hat, silver-mounted staff, and handsome coat, of course of the invariable light blue color, as good a pattern of a full-blown Bumble as you could expect to see in any parish church in England, or even in Burlington Arcade. The stateliness of this individual is maintained throughout the performance of his important duties. He rings the bell to warn travelers of the arrival or departure of a train, shouts out the names of the stations on the lines which the trains pass over, and performs many other duties of an equally important nature. He is also useful as a repertory of general information, and is intensely anxious to guide, counsel, and direct any traveler who may seek information—altogether a very useful and intelligent functionary. The Bavarian line from Asschaffenburg passes through a wonderfully interesting country, running for miles along the bottom of an immense gorge between two hills, and having on the right hand a broad and shining river, the Dauewert, which flows past the ancient town of Karlstadt, and the no less ancient and interesting city of Wurzburg, both of which places the traveler sees to great advantage. In fact, were it not that the rate of speed is slow—nine hours and a half being occupied in the journey from Mayence to Bamberg—there would be no very disagreeable reminiscences or prospects attending the journey. There is still one other point which merits a word of notice, as showing with how little railway communication people are satisfied. Only one train per day is timed between Mayence and Bamberg, both cities of great importance, and this particular train brings its passengers to the last-named place at 10.30 p. m., when they must descend, as for that night no further progress is attainable. But then again comes an advantage arising from the little loss of time which you might devote to rest; for, after having comforted yourself with a supper at the hotel, you retire to rest about midnight, but not to sleep, as at four o'clock—rather before than after—you hear the plodding step of the night-porter, who raps at your door, and who rouses you with the intimation that it is time to be up and stirring if you wish to avail yourself of the five o'clock train to Coburg, or wherever else your destiny may lead you. Even then your troubles are not at an end, for before reaching your destination you have the opportunity to take an airing on the platform at Litchenfels, where your train leaves you, and whence you are reconveyed, after a stay of an hour and a half. However, you reach Coburg at eight, in time for breakfast.

The Mineral Resources of Italy.

That the mineral resources of Italy are capable of profitable development has long since been acknowledged, and within the past few years English enterprise has been directed to the working of mines producing various metals, and situated in almost every part of the country. In addition to those at present known to the English public from the large amount of English capital embarked in them, it appears that the Italians themselves are thoroughly alive to the advantages to be derived from energetic mining operations, since efforts are being made to induce English capitalists to embark in speculations of this class carried on by Italian adventurers and Italian miners. Amongst the mines now being worked upon this principle there are many which, to judge from the statements made concerning them, possess indications fully equal to any that have been secured by English companies.

The silver-lead mine of Crandola is situated in the most eligible part of the Valsassina, a delightful valley, communicating with Lecco and the Lake of Como by means of a good carriage-road. The net-work of Lombardian railways, which has one of its heads at Lecco, communicates with the sea port of Genoa. The charge for conveying one ton of mineral thence does not exceed 14s. 4d. per ton. From repeated assays made at Turin, by the Professor of Chemistry to the Government Mining Council, the ore has been found to contain, when reduced in schlich, 69 per cent. of lead, and 56 English ounces of silver per ton. The works already done upon this property, which embraces the best part of a mountain, and appears inexhaustible from the character of its lodes, consist of three galleries, of the aggregate length of 109 yards, on vein No. 1; and four others, driven one above the other at an interval of 20 yards, on vein No. 2. There are besides, two shafts, of the aggregate depth of 72 yards, which have been sunk between two of the above-mentioned galleries, and right into the ore. On prosecuting the work of the adit level on vein No. 1 there was discovered an old gallery, containing plenty of ore, and in the vicinity of the mine there is always abundance of water, though the mine itself requires no draining, and is likewise in such rock that there will be no necessity for timbering, which cannot but be regarded as favorable.

In the same province—that of Como—as that in which the Crandola Mine is situated, and likewise in the same valley, other silver-lead mines occur, upon which explorations have been begun on a scale sufficient to test their respective condition. At Dervio, Cortabbio, and Vimogno, in the Valsassina, very promising copper mines are in course of working, likewise in the province of Bergamo, which is confining with that of Como, two other copper mines, situated the one in the parish of Valtora, and the other in that of Fondra, have already produced most excellent copper pyrites, though hitherto superficially explored. In the province of Brescia, at Malonna, another rich copper mine is in course of working. The ores oi the above mines, assayed by the best assayists of the Italian, French and German mining schools, have returned from 10 to 27 per cent. of fine copper. In the province of Turin, beyond the very pretty and interesting town of Ivrea, are several mines well worthy of attention. At Valprato, an extensive mine of auriferous copper ore, yields, per ton of 1,000 kilogrammes (the English ton being equal to 1,015 kilogrammes), 147 kilogrammes of fine copper and 20 grammes (303 troy grains) of gold. The mine consists of three powerful strata, placed one above another at an inclination of about 29°. The quantity of ore in sight is enormous. The mine can be worked like a quarry for a very long period of time, and offers invaluable advantages; in fact, it may be fairly said that there is hardly in any country a mine so abundant in valuable mineral, and wherefrom so plentiful a source of income can be realised; but the mine being distant from the borough of Pont by a journey of six hours on horseback, along a rather neglected road, the parties working this mine will have to calculate upon the necessity of making a good carriage road, to be completed in (say) five years, thereby laying out some small capital, which will, however, be promptly recovered from the proceeds of this remarkable copper and gold mine.

At Tavagnasco there is a copper mine, the ore of which has been proved to contain for every ton of 1,000 kilogrammes 175 kilogrammes (386 lbs. English) of metallic copper. There are five galleries practised on the various lodes, and other important workings, in which the ore of copper is abundantly found. Every probability exists that this mine will turn out an excellent one. Issiglio is a neat little village, above which a mine, containing the ores of copper and nickel in encouraging proportions, is in a state of regular exploration. The ore becomes more compact and richer in nickel as the work progresses, so that in a short time this sett may prove very valuable. Other mining setts, where copper, lead, and nickel has been found to exist, in interesting proportions, have been secured by purchase or otherwise in the same district, and will be gradually put in working condition. In the province of Novara, and in the region of the Ossola, where the mines already known to the British public, Vallanzasca and Val Toppa, are situated, is a mine called Antronapiana, which produces abundantly an ore of copper and nickel, containing 8½d. per cent. of the former metal, and 4¾. per cent. of the latter. The length of the winter of 1864 has prevented this mine being extensively explored; but during the course of the good season in 1865 nothing will be spared to bring it to a thorough state of investigation, and test its worth, which seems highly promising.

In addition to the richer ores, there is in Italy an almost inexhaustible supply of copper ore of small per centage—2¼ to 4 per cent.—which cannot be smelted with the high price of fuel in that country; attention has, therefore, been turned to the chemical treatment of these minerals, the result of which has been that the most complete success has crowned

the endeavors of the companies who have tried it, and, at a very considerable profit, the copper is extracted by this method from poor ores, hitherto considered as useless.

The Mezzenile Copper, Nickel, and Cobalt Mine, in the province of Turin, is worthy of particular notice. The various veins constituting this mine can be traced out for a very long distance within the precincts of the grant, which embraces a surface of ground equal to 985 English acres. The disposition of the mountain where the mine is situated, and which presents a steep declivity, allows the rough ore to be brought cheaply to the carriage road. In short, this mine is one of the most remarkable of the kind existing in Europe, and presents to the naked eye such masses of rich ore as to leave no doubt whatever of the profitable results of a mining speculation conducted at Mezzenille, with a sufficient capital to work the sett as it ought to be —water-power, cheap manual labor, transit by road and rail to the sea, and every requisite being at hand.

The Lead Mines of the South of Spain.

The following is an abstract of a lecture delivered at the Royal School of Mines, Birmingham, by Pro. W. W. Smyth, F. R. S., &c.:

Let us transport ourselves in imagination to the district of these mines, and take our start from the capital of Spain. There—that is, in the neighborhood of Madrid—the climate is very variable, it being extremely hot in summer, and proportionately cold in winter. On journeying southwards from the capital, the traveller passes from a comparatively northern climate to more tropical regions, and the first great landmark he comes to is the chain of mountains called the Sierra Mancha. Continuing in this same direction, he arrives at the Sierra Morena, after crossing the Sierra Mancha, and there he finds the climate essentially tropical. Passing, again, over the high ground he reaches a barren, sandy district, stretching away to the neighborhood of Linares, the centre of one of the great lead mining districts of Spain. The mines of this district are situated in a low range of granite hills, and occupy an area some eight miles long by six miles wide. The neighborhood is a dangerous one to live in, being but thinly populated, and consequently but badly supplied with the necessaries of life, besides possessing an unhealthy climate. The lead is found in veins running north and south, their course and position being distinctly indicated by the number of small hillocks of sand and stone thrown out from the tops of the veins by those who, like the present owners, worked them for the lead they contained. No soil covers the old workings, and so they are doubly distinct from there not being a trace of vegetation on them, the country on either side being more or less green.

The mines of Linares, like all others in Spain, date their present workings from about the year 1839. Before that time all minerals, of whatever kind, and wherever found, within the kingdom, were the property of the Crown, so that no mines could be worked but by the Government. Hence resulted, as might reasonably have been expected, a dwindling down of the number of working mines, and a slovenly mode of conducting those in operation. Finding then the fallacy and loss to the State by this exclusive system, the Government relinquished their right to all the mineral produce of the country, throwing the privilege of working the deposits open to adventurers from all parts, and retaining alone the right to exercise a supervision in the workings, and to impose small dues. The laws which were then prepared to regulate the mines have certainly opened the door to considerable dishonesty and bribery; but, on the whole, it must be allowed the system works well. Amongst others there is a law which gives any explorer a right on discovering a vein to apply to the officer of the district for permission to work on it, over an area 300 yards long by 200 yards wide; and provided a claim has not been already lodged to the same spot the applicant can enforce his right. For the grant of such a piece of ground as mentioned, the miner pays a small fee, and an annual rental whilst he works the mine. Beside this, Government obliges him to make a certain amount of exploration each year, and if he abandons his workings for six months the area may be re-let to any other applicant.

As was natural, the sudden throwing open of the Spanish mines to all adventurers at first induced a great deal of rash speculation, which resulted in nothing but loss. This, however, was rather a feature of the earlier days of the district, for all such unwholesome schemes have long since disappeared, and now capital, being carefully and properly invested, has led to many most successful enterprises. One of the most remarkable of the remunerative mining schemes in Spain is that of the Linares Mining Company, an English company, who about 14 years ago bought up a range or old workings for £200. In plant, machinery, and exploring this company spent nearly £30,000, a capital which for some time seemed sunk, without any probability of a return. Success, however, at last rewarded their perseverance and energy, and this same company has since divided amongst its shareholders the enormous sum of £150,000. The veins of the district of Linares are very variable in their yield, being sometimes very rich at others very poor. The mines are worked to a great extent by the inhabitants of the district, although a good many English miners have been lately taken out by the English companies. Wages in Linares are pretty much the same as in our English mining districts; for example, a good working miner gets there, as here, 2s. 6d. per diem. The two systems of payment, known in our Cornish mines as those of tut-work and tribute, are also common in all Spanish mines. Living at Linares is very expensive, house rent is enormously high, and so natives, accustomed to the great variations in climate, and not requiring the same amount of animal food as Englishmen, do better than English miners. Coals cost £4 4s. per ton, wood is tolerably cheap, but all kinds of victuals are dear. All the miners work eight hours a day, and the natives are a hardworking race of men; unfortunately, however, they are passionately addicted to change, and directly they have saved from their earnings a small sum they start away to the towns to spend it, not returning until it is all exhausted. This erratic disposition is peculiarly troublesome to the managers of the mines, who are compelled to continually replace the old hands by new ones.

The whole of that district lying between Linares and the south coast of Spain would resemble Africa in its extreme barrenness, if it were not for the range of coast mountains known as the Sierra Nevada, which break the monotonous desert. These lofty mountains rise to a height of 11,000 feet, and feed several large rivers, which flow inwards and westwards, and in irrigating the lines of country through which they pass produce the only vegetation which varies the arid land. Access to the coast from the mines is most difficult, for the traveler, after leaving the beautifully irrigated plains of Granada, finds no road across the lofty coast mountains, and the only path open to him is that along the old river beds. Tracking his way by these, he reaches the mountains, and having surmounted their crests, on his road to the coast, journeys down over a series of low ranges of hills, until he comes to the well irrigated coast plains, covered with palms and tropical vegetation.

It is down on the coast side of the Sierra Nevada, and just below a smaller range of limestone mountains, which rise to a height of 7,000 feet above the sea, that the Albural smelting works are. At these works is smelted a large quantity of lead, and the position has been chosen partly because it is a mining centre, partly because there is near it a supply of flux and fuel, and partly because it is accessible to the coast. Between these works and the other districts may be at all times seen long strings of mules laden with lead ore to be smelted. Physically, the position of the smelting works is a most miserable one; there is no water in the neighborhood, and not a trace of vegetation, so that everything for the sustenance of man and beast has to be brought there. Still, despite the disadvantages of a bad climate, and despite the natural indolence of the Spanish race, their mines are now of considerable importance, and are likely to increase still further in notoriety as sources of metallic produce.

Debt of North Carolina.

The State Treasurer of North Carolina has made a public statement of the debt of that State. It is as follows:

Amount of debt before the war	$13,619,500 00
Amount contracted since the war	16,596,485 61
Total indebtedness (excluding English debt)	$30,215,985 61
The resources of the State are:	
Stocks in railroads	$6,516,500 00
Bonds on railroads and other corporations	3,117,780 88
	4,634,289 88
Balance	$20,681,695 73

The amount of the blockade debt in England is about £60,000.

Coal and Iron in Austria.

Progress has just been reported for 1864 to the shareholders in the Austrian Railway Company, which is also engaged in metallurgical and mining enterprises. It appears that the net revenue derived from the company's mines, ironworks and estates, experienced in 1864 a very considerable diminution. On the one hand, the continued crisis in metallurgical industry, and the constantly increasing fall in the sale prices of iron and other metals, gravely affected the results obtained from the working of the company's blast furnaces, forges, and metallic works; and the insufficiency of orders for the Vienna engine manufactory was reflected in a new loss for that establishment. On the other hand, 1864 experienced the reaction of the disasters of the preceding year, and the distress of the population of the Banat acted in an unfortunate manner on the recovery of rents due. The stock-taking enforced by the circumstances through which metallurgical industry has passed, has besides given rise to a reduction in the value of the stores held of £36,418, which has been supported by the year 1864, although the causes of that reduction are not attributable solely to the working of that exercise. The net profit, but which

for this operation would have been £58,947, was thus reduced to £22,529. We must remark, besides, that the revenue account of the mines, ironworks and estates of the company supported last year an exceptional charge of £12,337 for works executed at the cost of revenue. The collieries of the company produced last year a net profit of £42,646, reduced by the diminution in the value of the inventory to £39,126. The production of coal last year was £373,068 tons, a total of 46,849 tons in excess of the extraction of the preceding year. The sale notably exceeded the production, and the results of the year, which were better than those of 1863, would have been superior in a more marked degree if, independently of the reduction in the inventory, grave accidents, fires and slips of earth, which occurred at the commencement of 1864 in the Sobochleben lignites mine had not burthened the year's working with a loss of £2,828. In consequence of these accidents, the Sobochleben Mine only produced in 1864, 33.512 tons of lignites, instead of 49,127 tons in 1863. The distillation establishment of Steyerdorf delivered to the Orawitza Manufactory 717 tons of rough oil. This establishment is now complete, and in a position to deliver annually 850 tons of oil at least, at a sufficiently low and yet remunerative price. The Orawitza Works delivered, in 1864, 509 tons of refined oil from schist, and 23 tons of paraffin, or more than twice the production of 1863. Nevertheless, the season balanced itself with a loss of £1,060, of which the company supports two thirds, or £690. The increase in the production of the Steyerdorf Works will in future enable this establishment to meet orders and work at a profit. A notable increase is observed in the employment of mineral oil. The mines and metallic works of the company yielded, in 1864, a profit of £553. The reduction of £1,438 here indicated, as compared with 1863, arises especially from the fall in the price of copper, and from the fact that the sale has been very limited, in consequence of the idleness of the distilleries in Hungary and Servia. Notwithstanding a rather large production, and sale prices as satisfactory as the quantity of iron made, the ironworks account balanced itself in 1864 by a profit of £7,719 only, which was changed into a loss of £24,511 by the stock-taking previously mentioned. The production in the company's ironworks amounted last year to 12,824 tons of charcoal-made pig, 5,759 tons of coke-made pig, 1,850 tons of casting-pig, 4,594 tons of miscellaneous iron, and 3,010 tons of rails, of which 2,728 tons were made at the Anina. With the exception of the rails of the Anina, the sale of the iron exceeded the production, but the considerable fall in prices resulting from the general suffering state of metallurgical industry did not allow the company to realize such profits as the production gave the management a fair right to expect would be obtained. The directors do not rely on any very great improvement in the selling prices, but they are making every effort on the one hand to reduce the cost of production, and on the other hand to open up new outlets for their products. In 1864, it is stated, they realized notable progress in this direction, especially as regards the sale of pig. As regards the Anina works, the absence of orders has led the directors of late to stop the working of the forge. This necessity is all the more regretable, since this forge had attained, in respect to quality of products and their return prices, a very satisfactory state of affairs. The directors are still maintaining in activity the blast furnace at the works, in order to run off part of the stock of minerals, and also because the admittedly superior quality of the pig produced for casting purposes secures, at least, a partial sale of the production. The position of the engine manufactory at Vienna experienced but a slight improvement in 1864. The causes of non-success noted in 1863 have still continued, and it was only towards the end of the year that some orders for locomotives and trucks were received, which will benefit the operations of the current year. The production of the works in 1864 was reduced to five locomotives and 136 goods trucks. A few other operations of secondary importance were also carried on, but the accounts of the words for 1864 show, on the whole, a loss of £2,365.

The Production of Gold in North America.

Much as we hear of the enormous production of gold going on upon this continent, we cannot realize its extent without the aid of figures. The United States alone contain 1,200,000 square miles of auriferous territory, while Russia and Great Britain together have but 750,000. In 1863 Russia obtained from her mines $22,000,000, and Australia $75,000,000. At least such is the statement made by respectable authorities, while they compute the product of California for the same year at $70,000,000. The product of Arizona, Utah, Montana, New Mexico, Colorado, Nebraska and Dacotah, for the last five years are computed to have reached the sum of $125,000,000. If we add the products of California, Oregon, Washington, Nevada and Idaho, we have according to the same authorities for the grand total of product since the discovery in 1848, the sum of $1,875,000,000, a statement that seems almost incredible. Be this statement entirely accurate or not, no one doubts but that our mining interests are yet in their infancy, and that they will be developed by and bye on the grandest scale. What is now wanted is a cheap method of reaching them. The journey is expensive, the cost of subsistence on the journey, and at the mines is great, and that of transportation of proper machinery difficult, tedious, and almost impracticable by reason of the difficulties of the route, and the price charged for its conveyance. Now it seems to us that the National enterprise and energy, should at once be turned to the speedy construction of the Pacific Railway, that it should not be left to the skill or direction of merely private companies. We want the immediate advantage of a more energetic and comprehensive method, and thousands of men at work upon this line at one and the same time. We do not see why this Pacific Railroad may not be constructed in a short time. The physical difficulties except in the mountainous regions are small. Nature has graded the line already to the foot of the Rocky mountains on the eastern slope, and the Californians are already finding their way across the Sierra Nevada, having arrived at the summit of the western slope. As soon as it will become easy, and less costly for emigrants to get into the auriferous regions, we see no reason whatever, why our mines in them shall not become as numerous as our farms.

There is a great attraction in this business of mining. A laborer with a pickaxe may become a man of property, if he can but turned up a nugget. If he does not, he is always fully sure of good wages, and getting cash for his work instead of a due bill, or goods at the store. In fact he pays himself as he goes along. Labor and payment are identical. Just as soon as the Pacific Railroad is finished, there will be seen immense crowds of working men scattering all through these gold bearing states and territories, and settling in groups where ever there is a sign of the precious metals. Every settler will have a gold or silver mine at his own door. These precious deposits lie scattered in placers or piled mountains high, and will be brought into commercial use by thousands of tons. Intelligent travelers like Mr. Colfax, who has just returned from a tour through this fairy land, say that the immediate construction of this Railway will settle the entire predominance of the United States over all other nations.

Peat for Fuel.

The high price of coal is causing much attention to be given to the subject of peat as an economical substitute.

It is well known there are large deposits of this article on Long Island where it is locally used in some quantities, but there seems a lack of enterprise in furnishing it for a large consumption. We learn from the Albany Evening *Journal* that there are several Beds of it near Schenectady, and further west on the line of the Central Railroad.

On the west bank of the Oswego river, a short distance from the city, on lands owned by Hon. E. B. Talcott, there are nearly two hundred acres of the finest quality of peat, varying from ten to forty feet in depth! What is, perhaps, of still greater importance, is the fact that this immense deposit is at a point convenient for shipment by lake, canal or railroad.

At Oswego, experimental operations have already been carried on, and several hundred tons of solidified peat have already been produced, and with such facilities as have been employed, it has been ascertained that peat can be produced at a cost vastly less than that of wood or coal. We understand that a company is being organized for the purpose of carrying on the manufacture on a large scale. The Oswego peat will probably be in market next year, competing with coal. It cannot fail to meet an extensive sale, and if similar deposits are found at other points, we shall soon see an abundance of this excellent and cheap fuel in market—a godsend to the poor and a blessing to everybody.

It is also stated that the Central Railroad has been experimenting with it very successfully.

Railroads in India.

An important line is projected from Bombay through Central India. If it should be carried out, the East Indian, Eastern Bengal, and the Calcutta and South-Eastern Railways will be united in one central terminus in Calcutta. The distance at which produce is now carried will be much shortened, and the expenses generally will be much reduced. Lines for Central India are under discussion, and arrangements are being made with chiefs for the conveyance of the necessary amount of land. The total capital already expended upon the lines open and in course of construction amounts to 54,942,029*l*. In 1864 the expenditure was 8,806,044*l*., of which 2,418,345*l*., was disbursed in India, and 1,387,696*l*. in England. The amount raised in that year by the various companies was 8,716,856*l*., and on the 1st of May last 2,900,000*l*. was available for the current year's expenditure, which will rather exceed 5,000,000*l*. Next year it is expected that about 4,000,000*l*. will be raised in England, so that there will be ample funds to carry out and complete the necessary works.

RAILROAD EARNINGS—MONTHLY.

American Railroad Journal.

Saturday, September 30, 1865.

Stock Exchange and Money Market.

Notwithstanding the anticipation of the payment of the gold interest due on the 1st of November next, by the Treasury department, it has had little or no effect on the premium. Indeed, after the announcement, gold actually stiffened in price. It turns out that the payment will necessarily be made as follows: One-third is payable to persons residing abroad, and it will take some time to get advices out or back, in relation to the disposition of that portion. Then again a large amount is upon registered stock, and cannot be paid until the transfers are prepared at the different Sub-Treasuries, which will take several weeks. So that the demand for customs duties will probably use up all the gold as it comes into the market from week to week, and the price will remain pretty much where it is. Thus far the operation has not been attended with the beneficial consequences that might have been expected. If, on the other hand, 18 millions of gold had been put upon the street at one time, there is no combination strong enough to have prevented a very heavy decline in the premium, while the profit in currency would have been at least 7 millions, or a proportional amount corresponding with the fall. And still the Treasury would have had a reserve equal to the demand on the 1st of November, and for the rest of the year.

It is noticed that the French Consulate in this city has issued proposals for a supply of money for the use of the Imperial squadron, now in our harbor, during its stay here; which is likely to be for the whole winter. The reimbursement for the advances is to be made by short drafts on the French Treasury. As the Treasury Department has frequently to remit large sums for our diplomatic service abroad, it strikes us that it might with great propriety purchase these bills, and at the same time perform an act of courtesy. It could probably not be a difficult nor unprofitable negotiation.

The Money Market has shown considerable steadiness, the Government securities being firm and favorably affected by the recent rise in the price in London, in spite of the attempt at "repression" systematically attempted there, as admitted in a late number of a British journal of good standing. Conversing with an English gentleman, for many years and now a Member of Parliament, a few days since with regard to this statement, he expressed his belief that it was true, but that all such attempts would end in complete failure. He expressed the most decided opinion that our Government stocks were of the most secure and stable character, and would be paid without any question; the resources of the country being inexhaustible, and of unsurpassed magnitude.

It is said that the compound interest notes are being much sought for, in the expectation that they will shortly be convertible into a gold bearing stock. We trust not. The Government has enough interest to meet already in gold. Money is to be had in large quantities in this city at 5 per cent. in currency, and we do not see why the Government should any longer offer to pay its interest in gold, when no other borrower has to do so. It is a concession no longer necessary to be made by it to lenders, and will only tend to keep up the price of gold, and depreciate the legal tender currency. The London rate for the old 5-20s at the last advices is equivalent to 108¼ here. Let the price stiffen here, and we shall see them run up very near to par abroad, and that at no distant period. We have several times alluded to the efforts making to compel the National Banks in the country to keep large balances here, compelling them to redeem at par in two places at once, and to fall into the hands of a self-constituted and irresponsible body called the Clearing house. We are struck with the fact that the most able of the city press agree with us, that the proposed arrangement is quite unnecessary and uncalled for. If the New York City Banks wish to check an undue circulation by the country banks, the best method of securing this object is to send

their notes home for redemption; and if refused, then to wind the banks up at once. A few examples of this sort would keep them within bounds, and compel them to attend to the prompt redemption of their bills, much more certainly than by aiding them in increasing their circulation by credits loaned and appearing as balances in New York.

We observe that the condition of the associated banks at the close of the week ending September 16, is as follows: Their loans, as compared with those of the previous week, have increased but $327,073, and their legal tenders have accumulated by $863,240. Their specie has decreased by the sum of $382,097, and their deposits lessened by $180,946. It would thus seem that there has been but little disturbance in the financial current.

It is curious to observe the movements in the market during a single day. Thus, it is quite common to say, that before the board there was a considerable pressure to sell; then that at the open board the market was steady, with a hardening tendency; and then that after the board an active demand sprang up; while at each hour and half hour fractions rule, and the half per cents and eighths seem to turn the brains of the operators. Now what intense folly does this sort of thing discover. Is there a single stock in the market which intrinsically is worth at any 15 minutes, ⅛ or 1 per cent. more or less than it was before; yet hundreds of thousands are lost and won by such hair-breadth differences. Certainly in the eyes of reflecting persons the whole system is adverse to the dictates of common sense. To moralize over such conduct is a waste of time; it is well enough, however, to remark upon it, to prove at least that we are not all mad.

It is generally understood that a Mexican loan has been negotiated to a considerable amount in the United States through the exertions of an agency. We have known for some time that at least $200,000 had been subscribed in San Francisco. We also understand that the security for the loan is the confiscated estates of the country, and that money to pay the troops if forthcoming, will enable the President Juares to put an army in the field fifty thousand in number. As the confederate loan was openly negotiated in London and Paris, without objection on the part of the French and British Governments, these could not object to the raising money in the same way in the United States. And as this would be the cheapest way just now to maintain the Monroe doctrine, we have no doubt but that the agency could get subscriptions in moderate sums in every city, and town and village in the United States; and we wonder why it does not make the attempt without any disguise or hesitation.

Railway securities are quite steady, but must remain without any excitement as long as the dividends are small, and paid in paper. They are not an attractive investment, when compared with Government gold bearing stocks. The roads are certainly doing well, and everywhere increasing their earnings. During the war a great many able articles were written to show what was to be the effect in their business on the return of peace. All doubt has vanished on this point. The railways are stronger and better off than ever. All that is necessary now is to close the very convenient construction accounts, and let the money turn its direction, from contracts with officers and directors, into the pockets of the stockholders, and it will make a great difference in the values put upon them. The depreciation in the paper currency can then be borne by the stockholders with greater indifference. We notice the report that the Erie Railway Company has negotiated a loan of several millions abroad with which it expects to get out of debt to a certain party, and also improve its working condition. It is really remarkable that this road, doubled in value by its connection with the Atlantic and Great Western, should flounder along as it does notwithstanding its enormous receipts. Not until it gets into the hands of able men like McHenry and Kennard, with a less temporizing financial system, wholly independent of Wall street speculators, is it likely to stand as high with the public as it deserves.

It is well enough to remark with regard to the payment of the November interest on the National loan that while, as the event proves, it has had no perceptible effect on the price of gold, and in that respect the policy of pre-payment is a failure, still it is of importance in other ways. It is a demonstration to the world of the entire ease with which we are meeting our obligations. We are not aware of any other country able or willing to imitate our example. We doubt if the British Government has at any time such a surplus on hand in the exchequer that it could pay a month and a half beforehand so large an amount of interest without inconvenience. It is to be hoped that this evidence on our part of our financial ability, will induce the London *Times* and other journals to retract their frequently expressed opinions, that we were unable to meet our current interest.

The Money Market is a little more active. There is a rapid increase in business, and every one seems anxious to be engaged in something remunerative. The aggregate amount of exports from this port for the week ending September 26, exclusive of specie was $2,892,520.

The balance in the Sub-Treasury the same day was the large sum of $71,565,862, confirming the statements that the Secretary of the Treasury is perfectly easy and comfortable in his position. And here we may remark, that among all our business men and monied institutions the opinion is general that the Treasury Department is most ably managed, and that any change in it would be disastrous to the public interests.

We notice a considerable decline in cotton goods during the last week; but that in most of the necessaries of life prices are getting worse than ever. Butter is to be put up to $1 per lb., and coal to the rates it has held in the scarcest times. Consumers appear to be at the mercy of all sorts of combinations.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Illinois Coupon bonds, 1879, 97; New York 7s Bounty Loan, 98¼; Connecticut 6s, 95; Ohio 6s, 1886, 99; do., 1860, 93; Tennessee 6s, 1868, 79; Louisiana 6s, 71; Milwaukee and St. Paul 1st mort., 85; McGregor Western R. The Payment of Engineers—By the Trip or the Month.

In a recent conversation with the Superintendent of an important Railroad, he remarked that during the nine years in which one Division, and the five or six years in which the whole line had been in operation, no passenger had ever sustained injury in the cars, except through his own negligence. No collisions had occurred, by passenger trains running out of time or otherwise; no trains had gone off the track or fallen through bridges. The road, in fact, was as safe to a discreet passenger as a parlor.

On seeking his explanation of such an exemption from "the chapter of accidents," he assigned as among the first a rule adopted by the managers of that road—never to pay engineers by *the trip*, but always by *the month*. They had thus no motive to rush through, as on roads where the contrary practice has been established. Though it, of course, is not true that engineers and conductors as a body are reckless, mainly intent on their own safety; yet individuals among them are such, and when they get paid by the trip, an inducement to hurry through, regardless of the consequences, is held out to them, such as is not safe to the public, nor in the end beneficial to the company employing them.

The officer referred to gave a number of instances on some of our leading lines, where serious accidents could be traced directly to employing men by the trip, instead of by the month.

The observations of different managers on this subject would be interesting and instructive to the great body of those who read the JOURNAL.

Woodward's Steam Pump.

Among the most interesting articles now on exhibition at the Fair of the American Institute, is one of *Woodward's Steam Pumps*. This seems to be a great improvement on Worthington's well known invention, but is more favorably known for its ability to supply steam boilers, mills and public buildings with water, by the simple opening of a valve connecting with the discharge outlet. It has also motive power for driving a fan or light machinery, and is easily converted into a fire engine of most effective power. Its adaptability to these uses, gives it a pre-eminence over all other similar Steam Pumps, with which we are acquainted. It is not merely a theoretical invention, but is in daily use, fulfilling all the pledges made for it by the inventor. Mr. Woodward, the President of a Company with his own name, is not only engaged in the manufacture of these invaluable pumps, but in that of wrought iron pipe, oil tubing, boiler tubes, etc., and carries it on extensively in his building Nos. 76 and 78 Centre corner of Worth Street. Indeed, he furnishes all those articles known as engineers' stores; and being a thorough business as well as scientific man, is known to fill orders promptly and understandingly. We refer our readers to his advertisement in another column, and recommend those who wish to be well served to read it with attention. The Woodward Company is well worthy of the patronage it asks from the public.

Sacramento Valley Railroad.

The Sacramento *Union* of 17th inst., says that the principal stockholders of the Central Pacific Railroad Company have purchased a controlling interest in the Sacramento Valley Railroad, buying out the entire stock held by L. L. Robinson and Pioche & Bayerque. Under the new arrangement an election was held in San Francisco on the 15th, which resulted in the choice of Leland Stanford, E. B. Crocker, Charles Crocker, Mark Hopkins, E. H. Miller, Jr., A. P. Stanford and R. S. Fretz, as Directors of the Sacramento Valley Road. By the action of the board, L. Stanford was elected President, E. B. Crocker, Vice-President; E. H. Miller, Jr., Secretary, and Mark Hopkins, Treasurer. The new purchasers took formal possession on the 16th, of the road and property of the company. As yet no changes have been made as to the superintendency, time of running trains etc. The Sacramento Valley Railroad Company has occupied and used the Freeport road under a lease of ten years, on the payment of $15,000 per year. This lease, of course, is still held by the new company. The meetings of the Board of Directors of the Valley road will hereafter be held in Sacramento. This purchase does not carry with it any interest in the Sacramento Valley and Placerville road, running from Folsom to Shingle Springs. The road is owned principally in El Dorado. Charles McLean, of San Francisco, is the President of the company. That road is however, at the present time, worked by the rolling stock of the Valley road, having none of its own.

Shortest Line to the Oil Regions.

The business at the oil regions is becoming so large and valuable, that there is quite a competition among the Railroad Companies, to obtain the freight and traffic which is offered to the most enterprising. We publish to-day the advertisement of the New York, Williamsport and Erie Line, by which the traveler saves one hour of time and thirty miles of travel in reaching his destination at the wells. The road connects at Williamsport, with that which extends to Elmira, and from thence to Niagara Falls; at Corry, with the Atlantic and Great Western, and the Oil Creek road. At Erie again it connects with the Lake Shore road. For particulars see advertisement. The route will doubtless become a favorite with the public.

Pacific Railroad of Missouri.

The Pacific Railroad of Missouri, extending from St. Louis to Kansas City, (which is situated near the junction of the Missouri River with the Kansas State line,) a distance of 283 miles, was completed on the 19th inst. The company was incorporated on the 12th of February, 1849, with a capital of $10,000,000 but was not regularly organized until the 31st of January, 1850. The surveys were commenced in June, 1850, and the formal breaking of ground took place on the 4th of July, 1851. The hand that lifted the first spade full of earth 14 years ago, deposited the last on the 19th inst. The total cost of the road, including equipment, has been about $12,000,000.

Union Pacific Railway.—Eastern Division.

Since the washing away of the bridges over the Kansas River, the President has revoked his acceptance of the forty miles said to have been completed, and has ordered a re-examination of the road by the same commission Secretary Harlan recommended several months ago. The commission consists of Colonel Simpson of the engineer corps, Governor Crawford, of Kansas, and the Hon. H. D. Scott, of Terre Haute, Ind. They will, in addition to a thorough inspection, make a full length map of the road.

☞ The Union Pacific Railroad proper, commences at Omaha, and is being vigorously constructed; and as yet no Government bonds have been issued to it or asked for it. Major-General John A. Dix is President; Thomas C. Durant, Esq., Vice-President; John J. Cisco, Treasurer; and Charles Tuttle, Secretary; with 15 directors on the part of the stockholders, and 5 directors on the part of the Government. It is believed 100 miles of this road, west of Omaha, will be in running order next June.

☞ President Johnson has decided to approve the change of route recently proposed for the Union Pacific Railroad west from Omaha, the company having acceded to the condition that the grade of the road shall thereby be reduced to thirty feet to the mile between the Missouri River and the Platte Valley. By the route originally contemplated the grade was upwards of seventy feet to the mile.

Railroad Earnings--Monthly.

The approximate earnings of the Pittsburg, Ft. Wayne and Chicago Railway Company during the month of Aug., compared with the same period last year, were as follows, viz:

	1865.	1864.
Freight	$394,337 08	$331,956 92
Passengers	292,625 67	271,019 61
Express matter	13,160 64	5,400 00
Mails	7,825 00	7,825 00
Rent of railway	7,083 33	7,083 33
Miscellaneous	2,984 36	2,262 36
Total	$718,061 08	$625,547 22

Earnings from Jan. 1, to Aug. 31:

1865	$5,546,032 05
1864	4,138,116 33

The earnings of the Cleveland and Pittsburg Railroad for the month of Aug., were $243,417 44
Corresponding month of 1864 264,687 76

Decrease $21,270 32

The traffic receipts of the European and North American Railway for the month of Aug., 1865, compared with the corresponding month last year, is as follows:

	1865.	1864.
Passengers	$7,393 50	$7,050 15
Freight	4,640 00	5,852 63
Mails and Sundries	417 72	409 50
Total	$12,451 22	$13,312 28

Decrease in 1865 $861 06.

The earnings of the Atlantic and Great Western Railway for the month of Aug., 1865, were $738,527 00
Corresponding month of previous year 406,076 00

Increase $332,451 00

The earnings of the North Pennsylvania Railroad for the month of Aug., 1865, were $93,315 51
Corresponding month of previous year. 74,282 39

Increase $19,033 12

The earnings of the Philadelphia and Erie Railroad for the month of August, 1865, compared with same month in 1864:

From freight	$108,007 73
" passengers	98,920 25
Total	$206,927 98
Earnings in August, 1864	104,051 89

Increase in 1865 $102,876 09

The earnings of the Toledo, Wabash and Western Railroad for the month of Aug., 1865. $374,024 46
Corresponding month of 1864 244,114 19

Increase $129,910 27

The earnings of the Milwaukee and Prairie du Chien Railroad for the month of Aug., 1865, were $170,554 56
Corresponding month of previous year 113,398 71

Increase $57,155 85

The earnings of the St. Louis, Alton and Terre Haute Railroad for the month of Aug., 1865, were $218,552 82
Corresponding month of previous year 218,235 60

Increase $317 22

The earnings of the Housatonic Railroad for the month of Aug., 1865, were $47,431 72
Corresponding period of previous year. 43,868 39

Increase $3,563 33

☞ Stillman Witt, Esq., of Cleveland, has been elected President of the Bellefontaine railway company, vice John Brough, deceased.

Railroad Earnings.--Weekly.

The earnings of the Michigan Central Railroad for the 3d week in Sept., 1865, were $105,302 20
Corresponding week of previous year 88,972 81

Increase $16,329 39

The earnings of the Michigan Southern and Northern Indiana Road for the 3d week in September, 1865, were $108,518 00
Corresponding week of 1864 84,707 00

Increase $23,811 00

The earnings of the Chicago and Northwestern Railway for the third week in September, 1865, were $213,449 75
Corresponding week of previous year. 155,743 46

Increase $57,706 29

The earnings of the Chicago and Alton Railroad for the 2d week in Sept., 1865. $104,764 00
Corresponding week of previous year 85,594 00

Increase $19,170 00

From Jan. 1, to Sept. 16, 1865. $2,638,653 00
" " " " 1864 1,567,131 00

Increase $1,071,522 00

The earnings of the Grand Trunk Railway for the week ending Sept. 16, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$59,846 00
Express, freight, mails and sundries	4,036 00
Freight and live stock	86,304 00
Total	$150,186 00
Corresponding week, 1864	124,006 00

Increase $26,180 00

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Sept. 14, were:

	1865.	1864.
Passengers	$4,824 27	$2,919 31
Freight	12,888 80	10,393 66
Express	130 22	104 16
Mail	296 58	296 58
Total	$18,139 87	$13,713 71

Receipts from January 1 to Sept 14:

1865	$454,875 16
1864	395,464 03

Increase $59,411 13

The traffic of the Great Western Railroad for the week ending Sept. 22, 1865, was as follows:

Passengers	$60,131 74
Freight and live stock	33,617 51
Mails and sundries	1,715 67
Total	$95,464 92
Corresponding week of 1864	63,432 46

Increase $32,032 45

The earnings of the Marietta and Cincinnati Railroad for the 3d week in Sept., 1865, were:

	1865.	1864.
Passengers	$10,327 25	$9,546 86
Freight	14,299 50	9,792 29
Mail, express & telegraph	1,500 00	1,119 58
Total	$26,126 75	$20,458 73
Total for the fiscal year commencing Jan. 1	$849,734 03	$652,757 74

The earnings of the Chicago and Rock Island Railroad for the third week in September, 1865, were $98,200 00
Corresponding week of previous year 90,185 00

Increase $8,015 00

Lehigh Coal and Navigation Company.--New Railroad.

We have already noticed sundry improvements which are being made on the Lehigh and Susquehanna Railroad, by the Lehigh Coal and Navigation Company, who own that line. It remains to note the progress making on this side of the mountains, between Whitehaven and Easton. By the terms of their charter, that company were to keep in operation a canal or slack-water navigation, from Easton to Stoddardtsville, a distance of 90 miles. The latter is 20 miles above Whitehaven, the eastern terminus of the Lehigh and Susquehanna Railroad. That point is 964 feet above the Delaware at Easton, and about 600 feet above the Lehigh at Mauch Chunk.

The destructive freshets which have visited that valley at different times, sweeping away every dam constructed by the company, have proved that it is almost a physical impossibility to comply with the letter of the law. Fortunately the railroad has superseded the canal, so that what was formerly a necessity is now acknowledged to be so no longer. Application was made to the Legislature of Pennsylvania, for liberty to substitute a railway for the canal between Mauch Chunck and Whitehaven; also for authority to build a new line of railroad from the former place to Easton, there to connect with the New Jersey roads. Both applications were successful, and both works are now in process of construction.

It is well known that the Lehigh Coal and Navigation Company, who were the pioneers in building gravity railroads, own an extensive tract of most valuable coal lands, which are now producing about 15,000 tons per week. This coal is transported up two inclined planes to an elevation of nearly 800 feet; thence down a gravity railroad of nine miles, which, in connection with the planes at Mauch Chunk, overcome a total elevation exceeding 1,000 feet above the canal basin at that place. The canal is, however, open only during the summer months, so that either the mines have had to lie idle for the residue of the year or become tributary to a rival line, namely, the Lehigh Valley Railroad. The latter company have formed a consolidation with the Beaver Meadow Railroad Company, whose trains run up to a point about 24 miles above the junction at Penn Haven. As might be expected, its managers are doing their utmost to make the entire Middle coal-field tributary to their road—an object, indeed, which has been accomplished as far as the transportation in winter is concerned.

To preserve their magnificent business, which has been the fruit of many years' effort and sacrifice, the Lehigh Coal and Navigation Company, have commenced the construction of a new line from Easton to Whitehaven, and a respectable corps of laborers is now at work upon it, under the direction of Mr. John Leisenring, as General Superintendent, and Mr. R. L. Cooke, as Assistant Engineer.

This road will start from Phillipsburg, N. J., crossing the Delaware by an iron bridge, immediately above the bridge of the Lehigh Valley road, to avoid difficulties in navigation by the erection of a different set of piers. In other words, the piers to the new work will be but a continuation of those belonging to the existing one. On reaching the Pennsylvania side, after a pretty heavy

cut, the line will strike the Lehigh, crossing it to the opposite side within the borough of Easton. At Bethlehem and Allentown the company have authority to build bridges with branch lines to the western shore, which will doubtless be accomplished in time. The main stem will continue to follow the north eastern margin of the river, to a point about one mile below Mauch Chunk, where it will cross over to the opposite bank and pass through that borough. About a mile and a-half higher up, it re-crosses to the eastern side, which it will continue to follow most of the way to Whitehaven. For short distances the two competing lines will run together on the same bank, only on different elevations.

For the present the company are constructing but a single track and sidings. The design, however, is to follow this by a second at an early day, the time depending somewhat on the prices for labor and materials. Were these to be had at more moderate rates, the work could be pushed forward, so that it would be in operation by the close of navigation next year.

The graduation is exceedingly favorable, the steepest gradient below Mauch Chunk being under 25 feet, and from that place to Whitehaven not exceeding 32 feet to the mile. With such a uniform descent in the direction of the heavy freight, it is calculated that a locomotive will be able to draw back as many empty cars as it can take down loaded, the point of absolute perfection in railroad construction.

The curves are frequent and sharp, especially in the neighborhood of Mauch Chunk and Allentown, where the river describes a series of loops which must, however, be followed by any railroad entering the coal region through that route.

The quantity of coal now seeking markets at the East, and passing through that "gate of the mountains," now exceeds 62,000 tons per week, and for the present year has amounted to a full million of tons. The universal complaint in the coal mines of that section of Pennsylvania, is the lack of sufficient facilities for transportation, by means of which the aggregate product could be increased 50 per cent. within 30 days. At the same time, with an increasing demand at the East, and a great strike in the Lackawanna region, we were at one time threatened with an actual scarcity. There is not the shadow of a doubt that both the competing lines, as well as the canal during the summer, will find ready for them as much business as they can possibly accommodate. By the early part of next year the Morris and Essex extension to Phillipsburg will also be in operation, thus opening three railroads besides the Delarware and Raritan and the Morris Canals across New Jersey to the city of New York.

☞ The Alexandria *Gazette* says that the materials for rebuilding the bridge over Difficult Run on the line of the Loudoun and Hampshire Railroad, are being collected, and when that work is completed trains will run on the road to within a few miles of Leesburg, to which point passengers will be conveyed in stages.

☞ The Richmond, Fredericksburg and Potomac Railroad is now completed, and passengers can go without interruption by rail to Potomac Creek, if we except the passage of the Rappahannock River, which is not yet bridged.

European and North American Railway.

Bangor, Me., Sept. 24.—Information has been received here that the full amount of stock required for the completion of the European and North American Railway through New Brunswick has been raised. The agreement with the Government executed, and the approval of the contract with the American Company given, thus insuring a gift of $10,000 per mile from the Province of New Brunswick for the line from St. John to the boundary of Maine, where it is to connect with the line from the boundary to Bangor. The contract for the line east of St. John, from Moncton to Truro, one hundred and nine miles has been ratified by the Government, so that the unfinished sections of the entire route from Bangor to Halifax is under contract to be completed in four years. The work of building the line from Bangor to the boundary will not commence, however, until a subscription to the stock of $400,000 or $500,000 is secured at this end. The prospect is now favorable.

Railways in France.

The total length of railways in operation January 1, 1865, was 8,113 miles; and concessions had been granted for 4,304 miles—making 12,417 miles. The amount of money actually expended is £260,000,000, and there remains to be expended £104,000,000, which would make an average of not much less than £30,000 a mile. Of this the Government will have contributed about 57 millions, and companies about 307 millions.

The tunnels of all the railways in France are three hundred and sixty-six in number, and would if combined, measure three hundred and seventy-seven leagues in length. The longest tunnel is that of the Nerthe, near Marseilles, on the Lyons Railway, which cost 10,500,000 francs; that of Blaisy, on the same line, 8,000,000 francs, and that of the Credo, between Lyons and Geneva, 6,500,000 francs. The entire cost of the bridges, viaducts and tunnels on the various French railways amounts to 432,681,953 francs.

☞ It is said that means can be commanded to construct at once the railroad from St. Paul, Minnesota, to Superior City, on Lake Superior, which will increase the trade of the lakes to the East *via* Detroit, and divert much trade that has hitherto gone down the Mississippi River and through Chicago. Another road, intended to run to the Red River country, in British territory, is now in operation fifty miles, and will soon be finished to St. Cloud. Still another, partly built, will run from Minneapolis and St. Paul, southwest to Rochester, to meet the Winona and Mankato Railroad.

☞ The Upper Dauphin *Register* says that "the extension of the Lykens Valley Railroad is being rapidly pushed to completion, which will give an outlet for the Bear Valley Company's coal, and we expect shipments shortly from their mines, which will add very heavily to the business operations of this section."

☞ Judge Nelson of the United States Circuit Court, has rendered his decision on the motion for an injunction to prevent the collection of internal revenue taxes on sales of brokers' and bankers' for their own account. Judge Nelson denied the motion, leaving the parties in interest to their remedy in the ordinary course of law.

Holly and Toledo Railroad.

The Ann Arbor, Michigan, *Argus* says that Prof. Wood, of the University, has been "employed to make a preliminary survey of the northern section of the proposed Holly, Ann Arbor and Toledo Railroad, and has already entered upon the work. He commenced in the southern part of the city, running the line along the ravine. He says there will be no difficulty, as some have apprehended, in getting out through the hills north of the river, and that the cut to be made will furnish no more filling material than will be wanted in close proximity to the cut."

Southern Pennsylvania Railroad.

The engineers who have for the last year been running experimental surveys between Connellsville and Chambersburg, have commenced locating the road between Bedford and Mount Dallas. This indicates an intention on the part of the company to complete the road from its present terminus to Bedford.

☞ A communication to the *N. Y. Tribune*, dated Mexico, Aug. 12th says: "The great railroad which is to unite Vera Cruz to the City of Mexico, was progressing rapidly notwithstanding the rumors that the company of Messrs. Smith, Knight & Co. would not indemnify the proprietors for the lands appropriated to the use of the road. Eight thousand wheelbarrows had just been landed at Orizaba for the service of the company. Mr. Teaze, the agent of Knight & Co., has been intrusted with the task of valuing the indemnity to be granted to the land owners. Another railroad is to be established in Sonora by Mr. Nolf, who is to be assisted by several European and California capitalists."

☞ The Richmond and Petersburg Railroad Company have succeeded in effecting a loan, and intend to go to work with a will to put the road in its former condition. New engines and cars will be purchased and put on this road as soon as they can be had. Steps have been taken towards the rebuilding of the bridge across the James River.

☞ The President of the Central railroad and Banking company of Georgia, has effected an arrangment through Gen. McCallum, whereby he obtains iron and rolling stock on time from the Government sufficient to equip the entire line from Macon to Savannah.

☞ The directors of the Maryland and Delaware Railroad have succeeded in making a contract to have the road completed to Hillsborough by the 1st of January next. It is also stated that the contract has been ratified by the Commissioner of Public Works for the State.

☞ The Pittsburg, Fort Wayne and Chicago Railroad Company proposed building a branch from their trunk line at Masillon to their road at Clinton, a distance of about twelve miles, through the richest coal fields in Ohio.

☞ The Granada (Miss.) *Gazette* announces the opening of the Mississippi and Tennessee Railroad to Senatobia. The whole line to Memphis will soon be restored.

☞ The East Tennessee and Virginia Railroad will be in running order from Knoxville to Bristol in a few days.

☞ JOHN DURAND, Esq., Superintendent of the Marietta and Cincinnati Railroad, has accepted a call to the superintendency of the Pittsburg and Steubenville Railroad.

THE WOODWARD
STEAM PUMP MANUFACTURING CO.
MANUFACTURERS OF THE
Woodward Patent Improved Safety
Steam Pump & Fire Engine,
AND
STEAM, WATER AND GAS FITTINGS
OF ALL KINDS.
Also, Wholesale and Retail Dealers in WROUGHT IRON PIPE, BOILER TUBES, ETC.,
WOODWARD BUILDING,
Nos. 76 & 78 Centre street,
Corner of Worth Street, **NEW YORK.**
GEO. M. WOODWARD, Pres't.

SHORTEST LINE TO THE OIL REGIONS,
NEW YORK, WILLIAMSPORT & ERIE LINE,
Via Mauch Chunk.
ONE HOUR AND THIRTY MILES SAVED.
On and after September 25, 1865, trains will leave New York, via
Central Railroad of New Jersey,
FROM FOOT OF LIBERTY STREET, NORTH RIVER,
Daily, except Saturday, 7 P. M. On Sunday 8 P. M.
Cars run through from New York to Erie.
SLEEPING CARS ON ALL TRAINS.
TIME SHORTER, AND FARE AS LOW AS BY ANY OTHER LINE.
☞ Connects at Williamsport with Williamsport and Elmira Railroad, for Elmira, Niagara Falls, &c. At Corry, with Atlantic and Great Western Railroad, and Oil Creek Railroad for Titusville, Shaffer, Franklin, Oil City, &c. And at Erie, with Lake Shore Line, for the West.
Return train leaves Erie at 2.05 P. M., Corry, at 3.50 P. M.; arriving in New York at 12.05 P. M., (noon).
H P. BALDWIN, General Ticket-Agent.
NEW YORK, September 16, 1865.

To Railroad Companies or Contractors.
THE Advertiser has several Steam Excavators, with Cars, and all the material adapted for speedily executing heavy excavations, filling of trestle work, or loading trains with material for gravelling.
Any persons having such work to do will please address, with particulars, Box 866, Clinton, Mass. 6m-35

BENJ. H. LATROBE & C. H. LATROBE,
CIVIL ENGINEERS,
HAVE opened an office in Baltimore, in the LAW BUILDINGS, St. Paul street front, and may be consulted or employed in the Location and Construction of Railways and other Roads and their incidental works throughout the United States. Also, the survey of Estates, Water Powers, &c., and will receive a limited number of Pupils for instruction in their Profession. 3m-33

New York, Saturday, October 7, 1865.

Reconstruction, and Business.

Whoever has taken the trouble to read, and has been sufficiently interested to remember it, will not have forgotten that in October, 1862, we endeavored to show that the disunion attempted to be brought about by the secession of the South, in a purely economical view of the subject, would, if it had been successful, have proved ruinous to both North and South. We maintained that with a separation, innumerable difficult questions, impossible of a satisfactory solution would have arisen, such as boundaries, the use of the rivers heading in the North, and terminating in the South, the use of ports at their mouths, tariffs, the disruption of railway connections, the necessity and expense of maintaining numerous fleets and armies, the creation of State debts on a large and oppressive scale, the interruption of trade and commerce between the Atlantic and the interior, with a long train of minor evils. We did not discuss the subject as one of slavery at all, or of races, and this view was complimented in its reproduction by a Loyal Publication Committee in this city, in its interesting and valuable series of pamphlets adapted to the emergency and the times. Now that the unhappy and senseless contest has ceased, we have to see what can be done to restore the condition of the country to what it was, commercially especially, which will do more to renew and brighten the ancient chain of friendship, than any other means at our disposal.

The South has suffered intensely by their ill-timed and futile efforts, to overturn the old order of things under which they as well as ourselves had eminently prospered. Their cities, fields, and commerce have been quite destroyed. Dearly have they paid for their mistake to call it by no harsher name.

What is their obvious duty and our own. Clearly to endeavor by kindness, renewed intercourse and commercial exchanges, to repair the losses of the past, and to strove by renewed industry and energy to increase and sustain our new mutual relations.

The reconstruction of the seceded states is going on as well as could be hoped. The President, hitherto a personal sufferer, sets the example of kindness and benignity, and a large majority of both parties in the Northern, Middle and Western States, are evidently disposed to support his policy.

The chief apparent difficulty in the way of accepting the present condition of things is the labor question, and the doubt whether anything but black labor is adequate to the production of their great and valuable staples. Now it is a well known fact that free labor with white or black or tawney colored limbs has been fully tried in tropical climates, more of late than ever, with perfect success. In India, and Egypt especially, it has been particularly successful in the production of cotton, and it is also proved that a white skin under the hottest sun, may successfully bear the effects of even constant employment. Here in the North where our summers are oppressively hot, all kinds of labor in and out of doors are prosecuted with success. In fact, only in winter, which the South knows little of, do they receive any check. Thus, our agricultural labor is suspended, and our canals and rivers are closed, and our railways impeded with snow. Of all this the South know little by experience. And yet the North flourishes in spite of its varying climate. The South will in fact be able to employ much more of the year in business of all kinds, than we are in the North.

Then as to the labor of the freedmen. That they may many of them mistake the nature of the change that has occurred to them, is natural enough, and that they should also mistake their position. They have been brought up in extreme ignorance, have been considered too much as beasts of burthen, and do not comprehend their responsibilities justly. Indeed, when they remember how long, and how entirely without adequate remuneration they have toiled for others, it is not strange if they think that somewhere lies a reciprocity, and they should now have others take care of them. But little by little they will perceive the new light bursting upon them, that if they will not work neither shall they eat, and we learn that in innumerable places they have already discovered the necessity of self-support.

We are inclined to the opinion, therefore, that the supposed difficulty will shortly disappear, and that by tact, kindness, and the assurance of payment for their services, they will yet be made a most useful class of people, their labor will be more skillful, and their condition be immensely improved.

As regards the revival of production, its exchanges and its mutual profits, we have little fear. We are naturally the nearest neighbors of the South, we know their wants better than any others, and we can supply them more readily and more cheaply with the articles they need than can any foreign nation. Even if they had a direct and independent trade with Europe, they could never so well import from abroad what we can furnish them with. All agricultural implements, machinery, especially railway machinery, clothing, furniture, musical instruments, wooden ware, boots and shoes, and a thousand other necessities will not bear a long Ocean voyage with profit to importers, in the face of such a competition as we can maintain. New York is the only city in the world where a full assorted cargo can at any moment be made up. Here by the force of natural advantages, and the enormous aggregation of capital is to be found the best mart for the southern people to favor; and here, too, with a few

hours' advice may be most easily and inexpensively disposed of, any and all of the southern staples.

It is therefore well for the South, that the contest has terminated as it has. What it has now to do, is to betake itself to the development of its resources, which are enormous and inexhaustible, and no longer to listen to those heated and misguiding men who have lead them astray and plunged them in such misery and distress. Let them not shut their eyes to the fact that political dogmas, do not give them bread or happiness, that theories against facts are nothing, and that trusting to their own and paid labor, rather than enforced labor, is not only the wisest, and most honorable course of conduct, but will be found in the end, vastly more profitable. In this spirit we therefore hail their return to the Union, and the dear old flag under which we have so often fought side by side.

And we assure our southern readers, that the feeling at the North is as kind towards them as they could wish, and if we even for a moment hesitate to hold out both hands to them, it is because the political leaders and brawlers at the South who have led them into difficulty, still continue their agitation as much as they dare, to scatter the seed of discord and keep up a bitterness of feeling for which there is now no excuse whatever. Let all such attempts be frowned down. We have had enough of discord. Let it cease now and forever.

Vermont Central Railroad.

A special meeting of the holders of the first and second mortgage bonds, was held in Boston on the 29th ult., to hear and act upon the report of a committee previously appointed to suggest a plan of settlement between the two classes of bondholders; the plan being in brief as follows:

(1.) The principal and interest of the First Mortgage to be fixed at three million dollars, bearing interest at seven per cent., payable semi-annually; (2.) the principal and interest of the Second Mortgage to be fixed at one million, bearing seven per cent., semi-annually; (3.) the Philadelphia interest in the Second Mortgage Bonds to subscribe and pay two hundred thousand dollars on the new eight per cent. loan to be raised, in five equal installments of two months each; and the other interests to raise fifty thousand dollars in like manner; (4.) the First Mortgage bondholders agree to pay in two hundred and fifty thousand dollars of said loan; (5.) the Trustees agree to procure subscriptions for two hundred thousand dollars balance of said loan; (6.) the ratifying parties are to petition the Chancellor to embody these stipulations in a decree to be issued for the determination of the rights of all concerned; (7.) the interest to the paid on the first mortgage bonds is restricted to seven per cent. on two million dollars till the earnings of the road shall justify the payment of interest on the third million dollars, and the interest on the second mortgage is to be paid on the first day of June, 1867, for the previous six months, if the earnings of the road will justify it; (8) the priority of liens is to be preserved; (9.) pledging the best efforts of all parties interested for the accomplishment of the enterprise, and providing that no personal responsibility shall attach to any party signing the agreement.

The agreement of the committee, after a long discussion, was unanimously ratified and adopted.

☞ The Circuit Court of the United States at Milwaukee has entered a decree for the foreclosure and sale of the La Crosse and Milwaukee Railroad.

☞ A dispatch from San Francisco, dated Sept. 29th, says that the Central Pacific Railroad Company have been for several months surveying the ground at the Sierra Nevada Mountains preparatory to the final location of the route across the mountains. They find they are able to construct a road from the summit of the mountain to the Tucker River, on a grade not exceeding ninety feet per mile, and where they expected a grade of one hundred and five feet.

Burlington and Missouri River Railroad.

The earnings of this road for the year ending April 30, 1865, were:

From passengers		$146,342 93
" freight and express		276,503 36
" mails		5,982 71
" telegraph		1,155 18
" miscellaneous		1,621 80
		$431,605 98
Expenses, viz:		
Maintenance of way	$53,564 86	
" rolling stock	31,446 50	
Operating the road	84,319 29	
Taxes	13,726 26	
Permanent improvement	2,218 47	
		185,275 38
Balance of earnings		$246,330 60

The ratio of operating expenses to earnings is 42.9 per cent. The report says:

We are able to report at the end of another year, continued increase in receipts, owing partly to a larger number of passengers, but more to higher rates, advanced to meet a corresponding increase in cost of materials and price of labor. The comparison below shows the difference in the last two years:

Yr. ending April 30.	Receipts.	Operating and Improvement.	Net.
1865	$431,605 98	$271,259 18	$155,346 80
1864	292,121 93	179,172 82	112,948 71

It is expected that lower rates for everything will follow the return of peace, but it is hoped that it may not result in a net loss to the company. We have added more to our equipment the past year than for several years before in consequence of the additional business; and there are large expenditures in the way of repairing and rebuilding yet to be made, without delay, as shown more particularly by the superintendent in his report.

At the last annual meeting of the Chicago, Burlington and Quincy Railroad Company, a vote was passed by the stockholders, authorizing the directors to contract with the Burlington and Missouri River Railroad Company, or with parties representing the takers of their securities, to receive pay for fifty per cent. of the business, being the estimated net value of said business on the Chicago, Burlington and Quincy Railroad, to and from the Burlington and Missouri River Railroad, commencing July 1, in such of the preferred stock or bonds to be issued for the extension of said Burlington and Missouri River Railroad, as in the opinion of the directors may be necessary to secure the construction of about fifty-six miles of the same.

Nothing has been done to secure the benefit of the proffered aid of the Chicago, Burlington and Quincy Railroad Company, owing to the unwillingness of a few of the holders of the bonds of this company to join in the arrangement proposed by the bond interest, and acceded to by the Company, for its relief and the extension of the road. The parties who have stood out, and prevented the extension of the road, are mostly second mortgage bondholders, who have taken the ground that they were not fairly treated in the programme, which provided that they should have seventy per cent. in new bonds, the land mortgage bondholders seventy-five per cent., and the first mortgage bondholders eighty-five per cent., the balance in every case to be in preferred stock.

It was assumed that the near maturity of the second mortgage bonds (falling due in 1869) counterbalanced the advantage of the priority of the first mortgage on the same division of the road, and of the land mortgage on all the land granted by Congress, about 400,000 acres, and the whole road, subject only to the first and second mortgages on the first division.

It was considered by those who took this view, that all the mortgages had become liable to foreclosure, by the failure of the Company to meet the interest, and nothing but the forbearance of the bondholders has saved the property from being sold out, and the proceeds distributed according to the respective rights of creditors.

In consequence of the threatening attitude taken by some of the outstanding bondholders, counsel was consulted by the Trustees of the new mortgage, with a view to a protection of the interests committed to their charge, when it was found that the first and second mortgages on the first division of the road, lacked the sanction of law in important particulars, and were so defective as, in the judgment of counsel, to be incapable of enforcement. The company has no disposition to disown its acts, or repudiate its obligations. But if its creditors disagree, and appeal to the law to settle their differences, there will be no alternative for the Company but to take the decisions of the courts for the guide of their future actions, even though it should result in a total loss to those who have not exchanged their bonds.

Nothing, in the future, can be more certain than that without the measures adopted by the co-operation of the Bond and Stock interest of our company, or some equivalent for relieving the road, and extending it, the property would be, in a short time, of but little value to the parties interested.

Not only is the Des Moines Valley (late Keokuk and Fort Des Moines) road constantly increasing its power to control the business lying beyond us, west and north, and keep it from us, in our present position, but movements have been recently made to bring down the Muscatine branch of the Mississippi and Missouri road, on the north of us, to tap our road at Fairfield, and compete with us for what business may be left us by our flanking rival on the other side.

To live and support itself, our road must be extended, and be also connected with the Chicago, Burlington and Quincy road by a bridge at Burlington, affording to all southern Iowa a direct and uninterrupted route to and from the great business centre and mart of the West, Chicago. Investigations, renewedly made within a few weeks, by those qualified to form a correct opinion, lead them to the confident belief that it is in the power of those who are interested in this road, to make it, by the adoption at once of the proposed measures, one of the most prosperous to the owners and beneficial to the public of all the roads of the west.

The last Congress gave our company the right of way, and a liberal grant of land in Nebraska, to aid us to extend our road on the south side of the Platte River to the one hundredth meridian of longitude near Fort Kearney. The grant was accepted by the company, and the route has been surveyed and found practicable, and except some fifty miles next west of the Missouri River, very easy of construction, and upon the fifty miles, the work is but a little above a fair average. The south side of the Platte is said to be a much finer country than the north, and a far less expensive route for a railroad.

The additional favor, however, of United States bonds having been bestowed on the road north of the river, its projectors are enabled to build it, and the work is in progress, and likely to be completed at no distant day. The opening of our road across the State of Iowa, will of itself furnish business for the Nebraska extension, and make it an object to construct this link, by which we shall be connected with the Pacific Trunk road, at the one hundredth meridian.

Our construction account now stands as follows:

On first division, 35 miles, Burlington to Chicauqua		$1,295,739 70
On second division, 40 miles, Chicauqua to Ottumwa		1,242,894 74
On surveys west of the Des Moines, for locating the road		23,978 06
On accretions at Burlington, including buildings		40,976 18
On equipment		173,787 11
		$2,777,375 79

Our means were obtained as follows:

Des Moines Co. subscription bonds.	$150,000 00

Due sundries	1,451 20	
		10,612 87
For Coupons:		
Prior to date of new mort. Oct. 1, 1863	$1,414 40	
Back interest from Aug. to Oct. 1, 1863, on the exchanged bonds	2,704 00	
April, 1864; Oct. 1864; April, '65;—3 coupons on new unexchanged bonds	43,527 33	
New bond coupons, not presented	2,870 00	
		50,515 73
Available means on hand:		
Cash assets		$80,405 77
Notes receivable		420 00
New 7 per cent. bonds in exchange for 2d mort. and land bonds held by the company		78,250 00
Preferred stock		29,750 00
INCOME ACCOUNT.		
Receipts for the year's earnings		$431,605 98
Receipts for interest		2,626 42
		$434,232 40

Operating, improving and equipping	$269,010 95	
Exchange	265 01	
		269,275 96
Net income of the year		$164,956 44
Balance from previous year		119,749 03
		$284,705 47
Interest on funded debt charged to income account		207,438 24
Balance carried forward to new acc't.		$77,267 23

The cash assets of the company, as stated above at $80,405 77, are nearly sufficient to pay the back coupons on the new bonds yet unexchanged, an immediate liability, and to rebuild Skunk River bridge, and to pay for the new iron required at once for repairs, which have been delayed to the present time on account of the high cost of work and materials.

In the programme for relieving and extending the Road, it was provided that the Income bonds which have been given for one year's interest on the Mortgage Bonds, should be included in the new mortgage. As they had never been charged off before, the amount is, as shown in the accounts, debited to Coupon account, more than doubling it, and increasing the Bond and Preferred Stock accounts correspondingly, viz: $122,440 00.

The receipts and disbursements for the year ending May 1, 1865, were as follows:

Balance as per report	$34,630 86
Received on interest account	2,626 42
" notes receivable account	120 00
" road earnings account	431,605 98

President.—JOHN W. BROOKS, Boston.

Directors.—Robert B. Forbes, Nathaniel Thayer, John M. Forbes, John W. Brooks, Erastus Corning, James F. Joy, James W. Grimes, Elbridge D. Rand, Robert S. Watson.

Treasurer.—JOHN N. DENISON, Boston.

Ass't Treasurer and Secretary.—JAMES C. PEARLEY, Burlington.

Superintendent.—CHARLES E. PERKINS.

Chief Engineer.—H. THIELSEN.

The Direct Route to the West via Allentown.

By the card published in another column, it will be seen that there is a direct route to the Cities of Cincinnati, Chicago, St. Louis and the West. Two daily Express trains leave this city for those points by what is known as the Allentown Line, passing through Easton, Reading and Harrisburg. The route is by the Central Railroad of New Jersey, the Lebanon Valley, and the Pennsylvania Railroads, and with but one change of cars to Cincinnati, and two to St. Louis. The route is a very pleasant and expeditious one, and will be very attractive to the travelling community. Two hours are gained by taking this route, since its departure in New York is two hours later, while its arrival is as early as by any other line.

Interest and Dividends.

The Hudson River Railroad Company has declared a semi-annual dividend of 4 per cent., payable on the 14th inst.

The New York Providence and Boston Railroad Company has declared a quarterly dividend of three per cent., free of tax, payable October 2.

The Lehigh Valley Railroad announces a quarterly dividend of 2½ per cent., payable on 9th instant.

The Glen Carbon Coal Company announces a dividend of 12½ cents per share on its consolidated stock, payable on the 10th instant.

The October coupons of the first mortgage bonds of the Syracuse, Binghamton and New York Railroad Company, will be paid at the Continental Bank in this city.

The coupons of the second mortgage bonds of the Milwaukie and St. Paul Railway Company, due October 1, 1865, will be paid at the office of the company, 25 William street.

☞ The Secretary of the Interior has officially notified the Union Pacific Railroad Company of the acceptance of their proposition for the location of the new line, and also that the recommendation of the Board of Commissioners, fixing the maximum grade at 80 feet east and west, has been adopted.

☞ The capital stock of a railroad between Alexandria and Fredericksburg, Va., the construction of which was authorized at the last session of the State Legislature, has already been subscribed, and the work will be proceeded with immediately.

Journal of Railroad Law.

CONVERSION OF SCRIP INTO STOCK.—SCRIPHOLDER NOT A STOCKHOLDER.

The case of Brown against The Lehigh Coal and Navigation Company, lately decided in Pennsylvania is interesting, as deciding that scrip issued by a corporation is the sole evidence of the contract made between the company and its stockholders, and no dividends can be said to be due on such scrip, or on the stock into which such scrip has been converted, except such as may have been declared subsequent to the conversion of the scrip in question. It also holds that the holders of scrip are not stockholders by virtue of their scrip alone, but they would only become such where the funded debt of the company had been extinguished, and therefore the contract would not justify a claim to cash dividends of profits made prior to the conversion of his scrip into stock by the claimant stockholder.

The opinion of the Court was delivered by STRONG, J.—The rights of the complainants must be determined by the contract under which alone they can claim, and that contract is found in the scrip issued by the company. It is to be observed before proceeding to consider what its provisions are, that it was a contract made by the company with its stockholders, and with all of them, assuring to each an advantage exactly proportioned to his interest in the property of the company. It was a distribution of rights, whatever the rights may have been, among the corporators. And the present complainants, even if purchasers of scrip, have no rights superior to those which were given by the contract to the original distributees.

Looking, as we must, to the scrip alone as the evidence of the contract, and regarding it as the foundation of whatever rights the complainants have, we have no hesitation in saying that they are not entitled to any dividend on their scrip, or on the stock into which their scrip has been converted, except such as may have been declared subsequently to the conversion of their scrip. They were never stockholders by virtue of their scrip alone, not even stockholders with a right to cash dividends postponed. They were holders of nothing more than an engagement of the company that they might become stockholders after the funded debt of the company had been paid off or adequate provision had been made for its discharge when due and payment demanded. The language of the certificate is that the persons to whom scrip was issued "will be entitled" to shares of stock, when certain things shall have been accomplished—not that they are presently entitled, with payments of cash dividends postponed. Every part of the instrument excludes the idea of their being stockholders or having any rights as such until the certificates should be converted into stock. Not only the declaration that they should not have any cash dividend until then, but the provision that they should be entitled to a *pro rata* share of any future distribution of scrip, negatives the existence of any right as stockholders. It was wholly unnecessary to make provision for their sharing in future distributions of scrip, if they became stockholders by virtue of the scrip they held. So the alternative provision that the certificate might be converted into stock at any time upon its surrender, and the payment by the holder of the par value of the stock, either in cash or six per cent. loans of the company, expresses in no doubtful terms the intention to give no immediate rights of a stockholder. The argument, then, that the scripholders became at once joint owners of the property of the company, and as such entitled to share in its profits, the realization of their share being only postponed for the security of the loanholders, has no foundation in the contract. It is insisted, however, that the clause denying cash dividends, until the certificate had been converted into stock, (which could only be after the funded debt of the company had been paid off, or adequate provision made for its discharge when due and demanded,) is substantially a negative payment. The scripholders, say the complainants, were not entitled to cash dividends until such payment of the debt or provision made for it, but then they became entitled not only to such as might thereafter be made, but to such as had been made before, between the issue of the scrip and its conversion. In other words, it was only the payment of cash dividends and not the dividends themselves that was postponed. But this is utterly irreconcilable with the language of the certificate, and even with the words of the extending clause. It is the dividend itself, the declared of the profits which is denied instead of the right to payment at the times when declared dividends became payable to stockholders generally. If it be asked, why then was this clause introduced at all, the answer is ready. It was to exclude any possible inference of right to profits which might be supposed to be deducible from the clause immediately preceding, which declared that the scripholder should be entitled to a pro rata share of any future distribution of scrip. Admitting as this last mentioned clause did, their right to be possible distributees of scrip, it was a prudent precaution to negative expressly any claim to dividends of profits.

It would, therefore, in our opinion, be a very strained and unnatural construction of the contract, were we to hold that the scripholder, after the conversion of his scrip into stock, is entitled to cash dividends of profits antecedently made. The obvious meaning of the language is, we think, that the stock, when issued, shall stand on a level with other stock, instead of having then an advantage over it. The case is in close analogy with that of a merchant who promises to receive another into partnership at a future day, declaring that meanwhile he shall have no share of the profits of the business. It could not be pretended that the partner taken in could claim, when received, a share of the profits made after the formation of the contract, and before its consummation.

But it is said the contract must be read in the light of the circumstances surrounding it when it was made, in order to understand more perfectly its meaning. That might be if its meaning was doubtful. But in this case we discover nothing obscure in the instrument by which the contract was evidenced. Nor is there anything in the circumstances to which we are referred that tends to throw doubt upon the construction we have given to it. Surely the consideration for the promise of the company can shed no light upon the meaning of their promise. Whatever may have been the reason for engaging with their shareholders that they should be entitled to shares of stock at a future time, the nature and exten of the engagement, it having been express, is to be deduced from the words in which it is made. We are pointed to the resolution of the stockholders adopted May 1st, 1865, by which it was recommended to the Board of Managers, should they deem it expedient, to issue the scrip. This, it is said, shows an intention to make the scripholders substantially stockholders, only postponing the payment of cash dividends to them until the scrip should be converted into actual stock. Suppose it does show this. How can it affect the contract subsequently made? The resolution itself was not a contract with those who might become scripholders—a contract that gave them any rights. The stockholders at their meeting had no power to make any such contract binding on the company. Under the charter such a contract could be made only by the managers. And the resolution attempted no such thing. It merely recommended to the Board of Managers to issue scrip, assuming certain rights should they deem it expedient. The whole matter was left to the discretion of the Board. If the Managers afterwards issued scrip, promising less than was contemplated by the resolution, how can the intention of the stockholders affect the contract? How can that intention enlarge the meaning of the engagements assumed by the Managers? Admit that the Managers were agents of the stockholders. If an agent makes a contract for his principal, promising to do less than his principal authorized, does it bind the principal to do anything more than the agent promised? Or does the authority given by the principal throw any light upon the meaning of the agent's express contract?

But even if the resolution of the stockholders could be introduced into the contract, we do not perceive that it would give the complainants any right to back dividends. It is true that the scrip proposed to be issued was recommended to be in places of loans of the company, to be canceled simultaneously with the issue of the scrip. That must have referred to the portions of loans of the company which they had purchased, and which they held uncanceled to secure the payment of the mortgage of March 7th, 1842, or such portions as they might thereafter purchase and thus hold, for the loans were to be canceled simultaneously with the issue of the scrip, and they could not be canceled unless held by the company. But the interest of all loans thus purchased and held uncanceled was a fund for the payment of the mortgage; not for the payment of what the company held, but primarily for the payment of the loans not redeemed. If, therefore, the scrip took the place of loans of the company, (which is not asserted in the contract,) its income was to be applied not to the scripholder, but to the payment of outstanding debts of the company secured by the mortgage. It would seem then that this provision in the resolution, that the scrip should stand in place of loans to be canceled simultaneously with its issue, if it was designed to enter into the contract at all, is inconsistent with the existence of any intention of the stockholders that the scripholder should have a right to interest or dividends on his scrip with the payment deferred. It is, however, most probable that it was intended rather as a distinction to the Managers respecting the affairs of the company, than a re-

commendation of what should be incorporated in the contract.

As did the scrip, so the resolution prohibited any cash dividend to the scripholders until the time for conversion into stock arrived, and for the same reason in both. It was manifestly because the scrip had been declared entitled to share in any future distribution of scrip. There could be no other dividend than one in stock, or in scrip, or in cash, and a dividend in stock was rendered impossible by the restrictions of the mortgage. A prohibition of cash dividends was therefore a denial of right to share in the earnings of the company while the scrip remained unconverted.

The resolution also recommended that the stock, when issued in lieu of the scrip, should stand in all respects on the footing of the now (then) existing stock. It is asked how can it be on the footing of the stock then existing unless entitled to all the dividends awarded to that stock since the resolution was passed? The question points to a very forced construction of the language. The stock then existing would of course continue to exist when the scrip should be converted. Its footing at the time of the conversion was the footing spoken of. The relative condition of the old and the new stock to the company was then to be the same. The resolution did not recommend that the new stock when issued should be on the same footing as the stock existing in 1855 was at that time. It is impossible that the issue of stock in 1863, or 1864, can give all the rights to the new stockholder which belonged to holders of stock in 1855. They can be on the same footing, that is, in the same condition relative to the company for the future, but not for the past. The stockholder of 1855 had a right to vote in that year, or to become a manager, as well as to receive dividends. How can he who became a stockholder in 1864 enjoy all those past rights? The language of the resolution as well as that of the scrip is all prospective. It provides for what is to be after the conversion of the scrip.

There is nothing, then, in what is called the surrounding circumstances, and nothing in the resolution of the stockholders adopted in May, 1855, that would justify such a construction of the contract as that for which the complainants contend. They are not entitled to any other dividends than such as may be declared to all other stockholders and declared after the conversion of their scrip.

The decree made at *Nisi Prius* is therefore affirmed.

☞ The Council Bluffs *Nonpareil*, of 16th ult., says that the Chicago and Northwestern Railroad is being pushed westward across the State of Iowa with a spirit of enterprise seldom surpassed, if equaled, in the history of Western railroads. Two years ago, when this road was placed under its present management, it was far behind all other roads then building across the State. Now it is seventy-five miles nearer the Missouri River than any other road in Iowa. And its energy is not abating.

☞ The Grand Trunk Railway Company is desirous of disposing of from two to three thousand tons of old rails, delivered on any point of their line to suit purchasers. The office of the company is at Montreal.

Local and Through Business and Fares on Railroads.

By a short-sighted as well as unjustifiable policy on the part of not a few canal and railroad companies, higher rates are charged proportionally for local than for through transportation—in one instance, indeed, which occurs to us at this moment, the tolls for way business are actually ten per cent. above what they amount to, when the whole line of work is used, a rebate of so much being allowed when freight is carried over its entire length.

No plausible argument can be offered on behalf of such a discrimination, except the argument of *force*. The company have the legal right to charge so much; and seeing that competition on way business is, in effect, cut off, they *do* charge. They have "nine points of the law" in their favor, which is held to be a sufficient justification for their conduct in the premises.

Of course, if a ton of coal or a bale of merchandize can be profitably carried 100 miles for a given sum, it can be carried any shorter distance for the same amount. If the through business be remunerative, so will the local, when the charges are actually alike. So with passenger transportation. How absurd and even suicidal would be the action of the managers of the Hudson River Railroad, if they insisted upon charging a larger *sum* for each ticket between New York and Poughkepsie than they do between New York and Albany. Yet on the Morris Canal such antiquated ideas prevail to this day.

But we go further and maintain that, as a general rule, the charges imposed for carrying either passengers or freight should not be at a higher *rate* for way than for through business. Let those who are disposed to call this in question attend to the following considerations:

First. Much of the success of any public enterprise depends upon the good feeling of the localities in which it operates. Make the management of a railroad thoroughly unpopular, and its prosperity will experience a check from that moment. Popularize it, and it enters at once on the high road to success. We do not assert that good-will is the only or the chief point to be considered, but it certainly is not one to be overlooked. In the neighboring State of New Jersey on some of the railroads lower *rates*, as well as prices, are established for way than for through business, the consequence of which is a local support which is never withdrawn, and enables a monopoly exceedingly distasteful to the outside public to be maintained, in spite of all the clamor which has been kept up, nearly twenty years, for its abolition.

Second. The idea is essentially *fair*, addressing itself to the common sense of every child, as well as to that of every president and director. It is cheaper to haul an empty than a loaded car; and, therefore, the charge for transporting passengers or freight should be regulated solely according to the distance.

Third. So far from the principle being valid, that because managers *can*, therefore, they *should* discriminate against local business, the very opposite ought to hold good. The way business is their own exclusively; therefore, they should nurse it, foster it, by every judicious measure possible, instead of throwing obstacles in the way of its development. That business is the goose which lays "golden eggs" every day in the year; while the through traffic may or may not. The one is certain; the other is liable to be cut off at any moment. Every company ought, accordingly, to make all needed sacrifices to secure the former, while not neglecting to accommodate the latter.

Fourth. The express train, intended chiefly for through travel, takes precedence in time of all others on a well managed railroad. This may be all right enough, as the through passenger is supposed to be a man whose time is not only money, but a good deal of it at that. But surely there is no propriety in making the way train lie off at the switch to make room for its "lightning" neighbor; while the passenger by the former is charged four, and he on the latter three cents per mile. A just equalization of the scale would, in return for the point of *precedence*, exact a somewhat higher rate, as well as a larger sum in the aggregate, from the through than from the way passenger.

The Michigan Central Railroad has not upon its line, excepting the termini, a city of any consequence, while it constitutes an important link in the great chain of connections between the East and West. If the development of through at the expense of way passenger business can be advisable *anywhere*, it is on the line in question. Yet the experience of the past five years shows that the latter is not only much greater in volume than the former, but is *increasing* at a rate nearly double. Here are the statistics of five years' passenger business, which must we think, settle the question:

Year ending	Way Passengers.	Through Passengers.	Total Passeng's.
May 31, 1860	251,755	72,666½	324,421½
May 31, 1861	262,665	65,110	327,775
May 31, 1862	253,536½	55,292	308,828½
May 31, 1863	387,672	59,689½	447,361½
May 31, 1864	556,206½	89,552½	645,759
May 31, 1865	745,348½	107,540½	852,889

Thus it will be seen that while the increase in through passengers has been 48 per cent. in five years, that of the way passengers has been a fraction over 200. The experience of the Michigan Central road may doubtless be that of nearly every other in the country in this respect.

☞ A meeting was recently held at Hamilton, Madison Co., N. Y., for the purpose of taking into consideration the utility of constructing a railroad to connect Hamilton with some point on the New York Central Railroad. The people of Stockbridge are represented as very much aroused to the importance of building a road through that town to Oneida. The route to Utica, as prospectively the cheapest and best paying investment was also advocated. A committee was appointed to confer with the citizens on the proposed routes, and inquire into the practicability of those routes, and to ascertain whether the people of Utica, Oneida or any other place will unite with them in the enterprise.

☞ The total mileage of railways in the United Kingdom, September 2, 1865, was 12,234, against 11,889 miles at the same period last year—increase, 345 miles. Number of railway lines, 74.

☞ The steamship Somerset, the first of the new line between Baltimore and Liverpool, sailed from that port on the 29th ult., with a large freight and a number of passengers.

American Railroad Journal.

Saturday, October 7, 1865.

Stock Exchange and Money Market.

The Treasury Department has taken the first steps towards a contraction of the currency. On the 29th ult., it published a notice to the holders of compound interest notes, of one and two year Treasury notes, and of certificates of indebtedness, that the department was in readiness to give bonds in exchange for them to the extent of fifty millions of dollars in 6 per cent. 5-20s, at 8 per cent. premium.

"Holders of certificates, compound interest, or Treasury notes, who desire to make such conversions, will deliver them to the Treasurer, the Assistant Treasurers, or the Designated Depositaries of the United States, or to any National Depositary Bank which may consent to transact the business without charge.

"Interest will be allowed on certificates of indebtedness, and one and two year Treasury notes matured or maturing prior to the first of November, 1865, up to the date of maturity, and when maturing after the first of November interest will be allowed to that day.

"Upon the compound interest notes the interest will be computed to November 1, 1865, upon the amount of principal and interest compounded on the back of said notes, from the period next prior to that date.

"The principal and interest of such Treasury notes and obligations will be considered together as an offer for conversion; but when, after deducting the principal of the bonds, and three per cent. premium, there remains a fractional part of one hundred dollars, this fractional part will be paid to the depositor.

"The Secretary reserves to himself the right of withdrawing this proposal at any time prior to said first day of November, provided fifty millions of dollars shall, prior to that date, be offered for conversion as aforesaid."

The securities thus to be retired have been used as money, especially the compound interest notes, which were neither more nor less, than paper tainted with usury, appealing to that principle for success, and always of doubtful expediency. These have been used as a part of the Government currency, and contributing to its inflation. Well 50 millions by this operation are to be withdrawn from circulation, being nearly 10 per cent. of the Government currency afloat. We should therefore have a right to expect an appreciation in the remaining Government paper afloat of 10 per cent., or in other words, a fall of 10 per cent. in the premium on gold. It will, however, be resisted to the utmost by the whole power of the speculators. More than this, we save the accumulating interest on one class of these notes; for as the Government has a large surplus of gold on hand, which it receives at par, it can spare it at par without loss, and in this respect is the same to it as paper. And yet we perceive the transaction is styled in some of our cotemporaries a new loan, and in others said, this virtually gives the Secretary power to issue 50 millions more currency to replace that withdrawn. There must be considerable confusion in their ideas when they take such a view of the subject. It is a positive actual contraction of so much paper, which it removes from circulation, and must have, at least it ought to have, an immediate and beneficial effect on currency, premiums and prices. The idea that the Treasury may issue $2, for $1, by this process, is an absurdity.

Something more than half a million of specie has gone out to Europe during the past week, or about half what was received by the last steamer from California. Exchange has not kept up all the week, but has been for a few days below par. This is an anamaly, one of those strange inconsistencies of which just now we see so many. It does not pay to export gold, and yet there are those who continue to ship it. We attribute this, however, to the only cause which can be reasonably assigned for it, that it is sent to pay for imports which are quite large, instead of being paid here to the bill drawers. In connection with this subject, it is gratifying to learn that New Orleans is again beginning to draw on London, as in better days. The Bank of New Orleans is furnishing bills, and they find a market here at the highest rates. Certainly bills against cotton can be more favorably drawn at that city, than in New York;

for by direct shipment, the cost, trouble and time of the intermediate voyage can be saved, and the bills will afford the drawer a better profit than can be made by the second or third hand drawer on the same article transhipped to New York, and again shipped to Liverpool or Havre. We are pleased to notice this feature in the New Orleans trade. It is a most favorable one.

The amount of gold duties received at the New York Custom House since the first day of January last, to the 30th of September, was $73,218,610, out of which the interest paid during that time was $27,161,006. At this rate the amount of gold which will have been received for the whole year will be $99,820,415, leaving a very large balance in the Treasury after payment of all the gold interest. Still that margin should be carefully guarded; and as we have already said, on previous occasions, the Government should cease to offer interest on gold for any cause whatever, as money is loaned here at 5 per cent. interest, payable in currency, and the Treasury has no need to pay interest in gold either on its newly funded debt, or any other it may have to put upon the market. Six per cent. in gold at present rates is considerably more than 7-30 in currency; and this last is quite enough to pay under any circumstances. Private borrowers do a great deal better.

The resumption of specie payments is much discussed at present, and with varied and very opposite opinions. It is believed that a large body in the mercantile world are content with the present condition of the currency, which enables them really to make heavy profits. We were told by one of the largest and most respectable manufacturers of cotton in England a few days since, that he was getting in good profit for his exported fabrics. We have also noticed very recently in an influential journal a communication on the subject of the currency and its efforts upon fixed income, written as we know by a person who has a very high reputation as a political economist and banker. It maintains on the moral principle of compensation, that while fixed incomes are affected by the depreciation of paper, the public gain largely by it. That it is like the advantage which the locomotive gives to us over the old stage coach. Now the writer, who lives on a very large income from Government gold bearing stocks for which he paid in paper at par, gets 40 per cent. in paper profit on his interest. Of course it is not likely he will complain, or even perhaps hold an impartial judgment in the matter. We contend that in any way his doctrine is not a good one. It is certainly the part of a wise man to make the best of everything, and to believe on the whole, good may come out of evil, but this is no excuse for the commission of evil, and no justification for its continuance. If it were, disorder and crime would always have excuse and license. No, the sound principle in finance as in morals is to do right. And so while inflation may have benefitted and does benefit certain classes, it is a great violation of sound principles, and those who avail themselves of the wrong, become demoralized, as every day's experience shows.

The tricks, frauds, overcharges, combinations and fictitious prices ruling from day to day, now considered the means of suddenly acquiring property, are only a repetition of what has taken place under similar circumstances both in France and England, when society was shaken to its centre. If we wish to remain a moral people, we must get back as soon as practicable to a sound currency.

In looking over our last files from Europe we notice an interesting statement of the affairs of the Bank of France, which our financial readers will no doubt find interesting.

The condition of the bank on the 14th of September last was as follows:

Dr.

	Francs.
Capital	182,500,000
Profits	7,044,776
Reserve of bank and branches	22,105,750
Circulation of notes	849,749,975
Bank notes to order and receipts due at sight	8,955,167
Dividends payable	1,624,321
Discounts	4,867,726

Cr.

Cash in bank and branches	503,716,344
Discounts	289,159,977
Advances on bullion	296,442,672
Do. in branches	54,439,066

There are also large advances on public securities, railway shares and debentures, credit foncier bonds, to the State in 1857, Rentes immobilisees &c., to $300,000,000 more and the total footing of Dr. and Cr. is each $1,465,540,351 84. The circulation is something of more than 4 to 1 of capital, and its operations are equivalent to the handling of about three hundred millions of dollars on a basis of 38 millions.

American 5-20s are still in good demand in the London market. The latest quotations are as high as 69; while on the continent they are in some places 3 per cent. higher. When the sayings and doings of Sir Morton Peto and his friends reach England, we must look for a still further advance. As Europe is far from being entirely in a state of permanent peace, we cannot yet foresee what will be the ultimate range of our securities there. In Sweden there is great agitation between the democratic and aristocratic classes, very determined measures having been taken by the latter to prevent further reform. The affair of the Duchies is far from being settled, and the unjust conduct of Prussia is giving cause of great anxiety. In Italy, the liberals are putting forth manifestos openly declaring their intention to wrest Venitia from Austria, to destroy the temporal power of the Pope, and to break up entirely his religious establishments of a monastic character. The Belgians are anticipating and perhaps dreading absorption by France, and Ireland is giving great alarm to England. Now all this must attract the attention of foreign capitalists and investers, while on the other hand as they plainly see, we have gone through with the greatest trials to which we could be exposed, and peace and permanent institutions with increasing and rapidly developing prosperity may be anticipated for another century. This consideration in addition to the others we have alluded to must have their full effect on our securities, and we do not see therefore, why they should not ere long be regarded with more favor than any others in the known world.

The Secretary of the Treasury has taken a holiday of ten days to re-visit his home in Indiana. He could certainly do so with much ease of mind when his statement of the public debt was finished for the 30th of September. It is most satisfactory and conclusive that the Department is moving successfully and consistently in the right direction. Even the Commercial Editor of the *Herald*, who has been generally a determined opponent of Mr. McCulloch's measures, admits that contraction and the first steps towards the resumption of specie payments are now commenced.

It appears from the statements referred to, that since the 1st of August last, the public debt has actually been reduced nearly 13 millions of dollars, and the interest half a million, and also that of the legal tenders upwards of six millions have been retired from circulation the last month. This contradicts rather plumply the theory of a new loan, for the six millions thus retired might very readily, and much easier have been used and returned to circulation while a large amount of interest would be saved by its re-issue.

Gold is held pretty firmly at fractional differences between 144 and 146. The November dividend anticipated by the Treasury is very slowly drawn by the holders of the bonds, and the payment makes no impression on the market. It is a curious circumstance that the Cuba from Liverpool last week brought £20,000 in specie. We have seen no explanation of this.

Governments are just now quite dull, the story of a new loan having spent its effect on the credulous. They now intimate that in consequence of the conversion we may expect large returns of our stocks from holders abroad. We have waited sometime for the avalanche which was predicted some months ago; but it has not been visible to the most careful or anxious observers. When the laudatory speeches of Sir Morton Peto and friends, to which we have alluded, find place in the columns of the foreign Press, with the intimation that they mean to invest hundreds of millions of dollars more in this country, we think there is not much danger of a very great decline in American securities abroad, or a lack of confidence in any sound American enterprises. And while we are on this subject we might as well adduce a remarkable fact in relation to the character of American business, and the principles on which it has been lately transacted. While the mercantile failures in the Northern States in 1861 were in number 5,935, with liabilities to the extent of $178,632,170, in 1864 the number was but 510 with liabilities of $8,574,700 and in 1863 only 495 with liabilities of $7,800,000. This a perfect demonstration of the increasing soundness of our mercantile community as compared with what it was, and affords opportunity for some important suggestions in relation to our future financial policy, which we may consider at a more convenient time.

There has been quite a revival in Railway shares and bonds within a short time past. The market has been animated and large sales in favorite companies made at an advance.

State stocks are in more demand, North Carolina 6s being quoted at 83, while N. Y. 7s are but 101. This shows the confidence the public entertain of a speedy restoration to the old state of things and is encouraging in all respects.

Money is easy, the rate in many cases being as low as 5 per cent. It is observable that the Insurance and other money lending companies are raising their rates on mortgages to 7 per cent.

when it was but 6 before. The reason of this is plain enough. The taxes paid by the holders of these securities under our city taxation will eat up at least 3 per cent. the present year; so that a 7 per cent. mortgage nets them but 4 per cent. If our high taxes are not speedily reduced by means of a change in the City Government, it will be *impossible to obtain money on mortgage much longer in this city.* The effect will be destructive of a large class of enterprising and useful people, as well as produce a powerful check in improvements, for it is a well-known fact that almost all the buildings erected in the city for years past, have been put up by means of loans effected on mortgage. It is high time some stop was put to the waste of public money at the City Hall. Eighteen millions of dollars expenditure the present year, is a load which is crushing the ordinary tax-payers of the city.

There continues a large disparity between the prices of the necessaries of life, at wholesale and retail, a hundred per cent. is made in flour, quite as much in sugar and provisions. Consumers suffer greviously, but there seems to be no remedy at hand.

The following is a comparison of the principal items of the public indebtedness according to the two last published statements of the Treasury:

	August 31.	September 30.
Debt bearing interest in coin	$1,108,310,191	$1,116,658,191
Debt bearing interest in lawful money	1,274,478,103	1,260,009,120
Debt on which interest has ceased	1,503,020	1,389,320
Debt bearing no interest	373,398,256	366,891,093
Total debt	$2,757,689,570	$2,744,947,724
LEGAL NOTES IN CIRCULATION.		
One and two year 5 per cent. notes	$33,954,230	$32,954,230
U. S. notes, old issue	402,968	392,070
U.S. notes, new issue	532,757,601	427,768,499
Compound interest notes	217,024,160	217,012,141
Fractional currency	26,344,742	26,487,754
Total	$710,483,701	$704,614,694

The receipts from Internal revenue are exceeding all expectation. In the last 83 days they amounted to $100,985,321 94. For the month of September they were $37,939,415 82, and on the 4th of October (for one day only) $1,882,453 94. Thus the position of the Treasury is every day getting stronger. The revenue from customs is also far beyond the estimates.

The Erie Railway Company has succeeded in negotiating a sterling loan in London, interest payable in sterling, (10 years to run) for £800,000 at 75 per cent. of the principal, which in our currency is equivalent to 107. It is to be hoped this will be the last operation necessary to sustain the road which ought to be a great success if well managed.

The exports from this port for the week exclusive of specie was $2,418,527.

The balance in the Sub-Treasury on Tuesday was $66,486,362 83.

Our readers will find an advertisement of the new Banking House of Messrs. JOHN J. CISCO & SON, in our advertising columns. We have alluded to the standing and character of this House in another place in fitting terms.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Railroad Earnings---Monthly.

The following are the earnings of the Indianapolis and Cincinnati Railroad for August:

Passengers	$54,200 22
Mail	1,182 29
Freight	46,333 34
Express	1,273 50
Total	$102,988 35

The earnings of the Philadelphia, Wilmington and Baltimore R. R. for Aug., 1865, were $331,065 76
August, 1864 301,606 67

Gain	$29,259 09
Previous gain this year	459,612 26
	$488,871 35

The earnings of the Ohio and Mississippi Railroad line from Cincinnati to St. Louis for August, were:

	1865.	1864.
Eastern division	$202,683 50	$177,926 82
Western "	142,016 36	124,669 46
Total	$344.689 86	$302,595 78
Increase of 1865 over 1864		42,104 08

Comparative earnings from Jan. 1, to Aug. 31:

	1865.	1864.
Eastern division	$1,395,422 60	$1,224,859 48
Western "	977,745 24	853,618 07
Total	$2,373,167 84	$2,078,477 55
Increase of 1865 over 1864		$294,690 29

Railroad Earnings.---Weekly.

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Sept. 21, were:

	1865.	1864.
Passengers	$4,492 10	$3,309 21
Freight	13,593 81	10,381 17
Express	130 22	104 16
Mail	296 58	296 58
Total	$18,512 71	$14,091 12

Receipts from January 1 to Sept 21:

1865	$473,387 87
1864	409,555 15
Increase	$63,832 72

The traffic of the Great Western Railroad for the week ending Sept. 29, 1865, was as follows:

Passengers	$41,690 76
Freight and live stock	39,581 99
Mails and sundries	3,070 97
Total	$84,343 72
Corresponding week of 1864	81,387 24
Increase	$2,956 47

The earnings of the Grand Trunk Railway for the week ending Sept. 23, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were:

Passengers	$68,651 00
Express, freight, mails and sundries	4,036 00
Freight and live stock	81,808 00
Total	$154,495 00
Corresponding week, 1864	134,496 00
Increase	$19,999 00

The earnings of the Chicago and Northwestern Railway for the fourth week in September, 1865, were $295,014 26
Corresponding week of previous year. 217,845 16
Increase $77,669 10

☞ Messrs. Wells, Fargo & Co., 84 Broadway, have been appointed transfer agents of the Cleveland and Toledo Railroad Company.

☞ The Albany *Journal* says that the people of Utica are working vigorously for one or two railroads south of that city, to retain the trade of the Chenango Valley. Their chief apprehension appears to be the Susquehanna road, which, it is said, "threatens to take away a large portion of the business hitherto belonging to Utica."

The National Debt.

The following is the detailed official statement of the public debt, just issued by Hon. Hugh McCulloch, Secretary of the Treasury:

DEBT BEARING INTEREST IN LAWFUL MONEY.

Authorizing Acts.	Character of Issue.	Rate of Interest.	Amount Outstanding.	When Redeemable or Payable.	Interest.	When Payable.
July 1, 1862, and July 2, 1864.	Bonds, Central Pacific R. R. Co	6 per cent.	$1,258,000 00	Payable after Jan. 16, 1895	$75,480 00	Jan. 16 and July 16.
July 11, 1862	Temporary loan	4 per cent.	618,127 98	Ten days' notice after thirty days	24,725 11	
July 11, 1862	Temporary loan	5 per cent.	36,249,660 65	Ten days' notice after thirty days	1,047,711 50	
July 11, 1862	Temporary loan	6 per cent.	79,017,960 81	Ten days' notice after thirty days	4,741,077 64	
March 1, 1862	Certificates of indebtedness	6 per cent.	62,899,000 00	One year from date	3,773,940 00	One year from date.
March 3, 1863	One and two years' notes	5 per cent.	$211,000,000 00			One year from date.
Less withdrawn and destroyed or ready to be destroyed			178,045,770 00		1,674,711 50	
March 3, 1863	3 years' compound interest notes	6 per cent.	15,000,000 00			
June 30, 1864	3 years' compound interest notes	6 per cent.	202,012,141 00			
June 30, 1864	3 years' Treasury notes	7 3-10	234,400,000 00			
March 3, 1865	3 years' Treasury notes	7 3-10	65,600,000 00			
March 3, 1865	3 years' Treasury notes	7 3-10	300,000,000 00	Three years from date		Aug. 15 and Feb. 15.
March 3, 1865	3 years' Treasury notes	7 3-10	300,000,000 00	Three years from date	21,900,000 00	June 15 and Dec. 15.
March 3, 1865	3 years' Treasury notes	7 3-10	230,000,000 00	Three years from date	16,790,000 00	July 15 and Jan. 15.
Aggregate of debt bearing lawful money interest			$1,260,009,120 44	Aggregate lawful money interest	$72,527,645 75	

DEBT BEARING INTEREST IN COIN.

Authorizing Acts.	Character of Issue.	Rate of Interest.	Amount Outstanding.	When redeemable or Payable.	Interest.	When Payable.
January 28, 1847	Bonds	6 per cent.	$9,415,250 00	Payable after Dec. 31, 1867	$564,915 00	Jan. and July.
March 31, 1848	Bonds	6 per cent.	8,908,341 80	Payable after 20 years from July 1, 1848	534,500 50	Jan. and July.

Compound int. notes, Act of March 3, 1863	15,000,000
Compound int. notes, Act of June 30, 1864.....	202,012,940
Total	$678,126,940

The foregoing is a correct statement of the public debt, as appears from the books, Treasurer's returns and requisitions in the department on the 30th of Sept., 1865. HUGH McCULLOCH,
Secretary of the Treasury.

☞ We learn from Quebec that arrangements are being made for the removal of the seat of Government to Ottawa. All the written papers and books of the departments will go by the Grand Trunk and Ottawa and Prescott Railways, the papers being protected in iron bound boxes. The office furniture and Parliamentary library go by barges and tow boats *via* the St. Lawrence and Ottawa Rivers. The library is to be insured by the Government. The effects of the Assembly and Legislative Council are now being packed, and all the departments are preparing for removal.

Commerce of New York.

Railroads in the West.

A letter from a correspondent of the N. Y. *Times*, dated Chicago, Sept., 18th, says: "The railroad era in the West is not yet passed. Roads are being constructed in various directions—mostly short connecting lines, aside from the prosecution of the great trunk lines westward toward the Missouri River. One road well under way is being constructed from Jacksonville to Alton, about midway between the Illinois River and the Chicago and St. Louis Road. It has been completed to Carrollton, the county seat of Greene County. Another line is being constructed through the western tier of counties, parallel with the Mississippi, north of Rock Island. It is also proposed to continue it south to intersect with completed roads at Galesburgh. Two lines are projected in the southern part of the State—one from St. Louis to Cairo, west of the Illinois Central, and the other from Vincennes, Ind., to Cairo, east of that road. One or both of these will soon be built. Forty-two miles of the Springfield and Northwestern Road have been put under contract, and are to be constructed forthwith.

"In Iowa, new enterprises are continually being entered upon. A link about forty miles in length from Cedar Rapids north, has been recently completed, of what is eventually to be an important line. St. Louis is stretching out her iron arms northward, to compete with Chicago for the trans-Mississippi trade. She has already entered upon an enterprise contemplating the construction of a trunk line north and south through Iowa, to extend eventually to St. Paul. The railroads leading from this city to the Mississippi, have, by their exhorbitant freight charges, caused much indignation among the farmers of Iowa, and inclined them St. Louisward, if proper transportation facilities are offered, and of this feeling our go-ahead neighbors at St. Louis are disposed to take all proper advantage."

Swan & Payson.

We would call the attention of our readers to the card of Messrs. SWAN & PAYSON, Bankers and Brokers, 54 Wall street. Mr. Payson has been a member of the Stock Exchange for twelve years, and was formerly of the firm of Hopkins & Co., well-known and highly esteemed. Mr. Swan bears a name which has not descended upon an unworthy possessor, but which was always synonimous in the person of B. L. Swan, Esq., with wealth, enterprise and great private worth. This house will unquestionably draw about it a large circle of friends and supporters.

John J. Cisco & Son.

Among the notable incidents occurring in our financial circles within the last few days, is the establishment of the new banking house in this city of Messrs. JOHN J. CISCO & SON. Mr. Cisco enters on his new career with large capital, great experience and the prestige attached to him by his long and faithful services to the country and Government as assistant United States Treasurer, having enjoyed its entire confidence, rendered it the most valuable services at critical periods, and performed his duties with zeal and unsurpassed ability. Modest in manner, affable, incorruptible and reliable, he is deservedly a favorite with a large circle of personal and official friends, and these qualities of character, added to his profound knowledge of the principles of finance and the condition of our public affairs, must place him at once in the front rank of eminent bankers. We recommend to the National Banks in the interior, as well as our friends and readers both in this country and abroad, if they would advance and protect their financial interests here, to give his house their confidence, and avail themselves of its indisputable advantages, the result of high character, ample resources, a wide reputation and large personal influence.

Large Sale of Government Cars, Engines, and Railroad Iron.

Will be sold at City Point, Va., on Wednesday Oct. 11, about four thousand tons railroad iron.

At Portsmouth, Va., on Friday, Oct. 13.

Five first class locomotive engines.

About fifty freight cars and one passenger car.

At Norfolk, Va., Oct. 13, at 5 P. M.:

One new locomotive engine, 5 foot gauge.

☞ The net profits from operations of the Philadelphia and Reading Railroad for eight months ending July 31, 1865, were $2,100,251 against 2,289,615 in the corresponding period of the previous year—a decrease of $189,364.

☞ The Missouri Pacific Railroad was opened and the first through train from St. Louis reached Kansas City, Mo., on the 29th ult.

Alabama.

STATEMENT OF THE CONDITION OF THE STATE TREASURY SEPTEMBER 1, 1865.

Balance in the Treasury Sept. 30, 1864	$3,713,959
Receipts from Sept. 30, 1864, to May 29, 1865, (including $964,766 98, transferred from the Military Department)	3,776,188
Total	$7,490,148
Disbursements to May 24, 1865	6,698,853
Balance in the Treasury May 24, 1865. This balance is in the following described funds, to wit:	$791,294
Check on Bank of Mobile, payable in confederate or State Treasury notes.	11,440
Certificates of deposit, same bank, payable in confederate Treasury notes	1,330

American Railroad Journal.

New York, Saturday, October 14, 1865.

Our English Visitors and American Railroads.

An *ignorant* Englishman is the last person living from whom we should expect to find an impartial judgment on the merits and demerits of American railways; an *intelligent* Englishman would probably render as fair a decision respecting both as is to be obtained. He knows the difficulties and drawbacks attending the system in his native island; and if he finds drawbacks and difficulties, though of quite another kind, attending *ours*, he is prepared to make due allowance therefor. On this account, we regard the visit of Sir Morton Peto and his companions to this country, for the purpose of making a personal inspection of our public works, their wants and resources, as an event of considerable importance financially, in addition to the service which it will render in recementing between the two nations the friendship that had been checked, if not broken, by the affairs of the past five years.

In some respects the visit takes place at an inconvenient time for us, as far as presenting the best appearances is concerned. There is no denying that, in consequence of the vast demands made upon our leading lines since 1860, and the extraordinarily high prices of labor and materials, our public works are in a rather poor condition for presentation at this moment. They have no holiday dresses to put on; but must show themselves in every day attire, and sometimes very common at that. Railroad managers have reasoned thus: "It is true our line is in need of a double track, better bridges, station houses, &c.; but the probability is that with the termination of war there will be such a decline in prices that we shall be able to make those improvements at fifty per cent. of what they would now cost; so let us wait a while. If we proceed to expend our means freely *now* in new buildings, tracks, and other permanent improvements, the money value of which is liable to shrink from 25 to 50 per cent. at any moment, not only will our stockholders justly find fault with us for such a piece of extravagance; but the public, and even the journals so loudly demanding better accommodations, will treat us with contempt."

By such reasoning, sound in many cases, and plausible in all, delays have been allowed to take place, the consequences of which are rough tracks, insufficient machinery and rolling stock, dilapidated buildings, &c., to a greater or less degree. Most of our leading lines have been worked at a profit, and are now earning reasonably well, in spite of the sudden cessation of the war demands; yet they are not in such condition to be presented advantageously to a foreign investigator, as we might desire.

The gentlemen examining them, however, have unquestionably studied our affairs sufficiently to take in at a glance the causes which have brought about these temporary defects. If they observe in all cases lighter rails used than in Great Britain, tracks less carefully finished and guarded after completion, a smaller amount of locomotive power used, less extensive and costly buildings for depots and station houses, they will readily bear in mind the different conditions under which the railroad systems of the two countries have been constructed. In Great Britain a vast and varied industry, a dense population existed before the advent of the railway; here, both had to be created in a great measure *after* that advent, to which, indeed, it was rendered subservient in no slight degree. There, the iron track was laid to accommodate the travel and transportation already existing; here, it has been put down, especially in our Western States, to bring travel, trade and industry. Excepting near the seaboard, our population is still comparatively sparse. Three miles of track must be built in the United States for one in England to reach a given number of inhabitants, with a corresponding volume of freight business. Of necessity, we had to build our works more cheaply than they, leaving to time and progress their proper completion.

That completion had not taken place, when the war broke out, not even upon our great trunk lines, much less upon their feeders or the system created in the Southern States. In the one, little if any progress has since been shown; in the other, a vast amount of damage has been inflicted, directly by the destruction of rails, ties, bridges, depots, &c.; indirectly by almost annihilating much of the business upon which those railroads depended.

These are the drawbacks to which we referred at the opening of this article. But an intelligent observer, whether American or foreign born, cannot fail to perceive that out of the calamities through which we have passed arise assurances of safety, such as we could never before present to the outside world. It has been proved that our Government and people have the means of concentrating power, during times of public danger, as well as of diffusing it among the States and municipalities during times of repose. The rule of mob law has forever ceased on this continent. All threats of revolution by force have been buried for the next hundred years at least, and we fondly trust for all ages to come. At the same time, extremists on all sides have learned the danger of irritating any section of the people on account of the supposed cowardice of their natures. The North as well as the humiliated South has been taught a salutary lesson in this respect. Fitz James and the Douglass have both "much forgiven," and are forgetting as fast as they can. In point of stability, fixedness of purpose, we stand to-day in the world's estimation many cubits

higher than we could possibly do before the war. The passage of such immense bodies of troops back and forth over the American continent has increased rather than diminished our national desire of travel, so that our railroads will reap a permanent as well as a temporary increase to their passenger business. Not only so, but in the great event of emancipation, to be followed by a new and superior labor system at the South, we see the approach of a day, not far distant, when the railroad property of Virginia, Kentucky, Tennessee, the Carolinas and the whole Southwest will be more valuable than at any former period. It is certain that a future development awaits that magnificent section of country far exceeding any progress that has taken place in the past, be that ever so wondrous. The course of migration, whether American or European, is to be largely southward, instead of being only from east to west. With this will follow a corresponding interchange of commodities, the repairing, and even the reconstruction of many of the Southern railroads. War is over; the armies have been disbanded at a rate which none of us hoped to witness; guerilla fighting has nearly altogether subsided at the South, thus also exceeding our liveliest anticipations. The Southern people are not resigning themselves to destiny, with the fatalism of Turks, but *accepting* the course of events with a hearty good will, which promises to generate a friendship, such as never before existed. Such is our situation at this moment. If it be supposed that this is an attempt to paint the future in too brilliant colors, we ask whether the history of the past season does not justify all these anticipations and even more glorious ones still?

The Globe Mutual Coal Co.

This company is organized on the mutual principle, giving to every stockholder one ton of coal, every year, at cost, for every share of stock he may hold—thus saving the profit of the miner, shipper, wholesale dealer, and retailer. Or, if he should not desire the coal, then the profit on the number of tons to which he is entitled will be paid him in cash. If more tons of coal are mined in the year than there are shares, (and it is expected it will be far greater,) then the profits on the excess will be divided among all the shareholders alike, whether they have taken coal or not.

The property of the company consists of 209 acres, in all respects first class coal land, having a width of about one-half of a mile, and extending one and a half miles on the veins. It is about six miles southeast of Wilkesbarre, in the great Northern or Wyoming Coal Field. Every foot of it is underlaid with the coal, including all the seven great veins of the valley—one of which is the celebrated Baltimore or Mammoth Vein, 30 feet thick—in all some 80 feet in thickness, giving an aggregate of some 100,000 tons to the acre, or on the entire property, over 20,000,000 of tons of the very finest quality of anthracite white ash coal. This immense deposit has already been opened by a practical mining engineer, and can be seen by any person visiting the property. One-half to one-third of the mine is above water level, yielding a product of 200,000 tons a year, for at least the next 30 years to come, before any expensive pumping or digging of shafts will be required. The coal can be mined and placed on the cars for 50 cents per ton.

A railroad, under the management of the Lehigh Valley Railroad Company, now in course of construction, runs directly across the property, and so connects with canals and other railroads as to give every desired facility for cheap and ready access to market in all directions, North, South, East and West.

In quantity, quality, and location—those three indispensable requisites to successful and profitable mining—the property is all that could be wished—in every sense a first class coal property, as is fully shown in the published Reports of Professor Forrest Shepherd, and others.

The stock of the company is $800,000, divided into 80,000 shares, of $10 each. A large part of it has already been taken; but as it is proposed to make this a popular company, a limited number of shares will be offered to first subscribers at the low rate of $8 per share, payable to the Treasurer.

Subscription books are opened, and further information may be obtained at the office of the company, 64 Broadway and 19 New street, near Wall street, N. Y.

Cleveland and Pittsburg Railroad.

The earnings of this road for the years ending November 30, 1863 and 1864, have been as follows:

	1863.	1864.
From freight	$1,204,439 49	$1,571,155 11
" passengers	611,990 44	832,821 57
" miscellaneous .	93,604 61	108,338 82
	$1,910,034 54	$2,512,315 50
Expenses, viz:		
Motive power and cars.	$403,754 16	$620,900 32
Maintenance of way & structures	204,226 17	460,350 55
Transportation & general expenses	266,750 33	424,385 67
	$874,730 66	$1,505,636 54
Net earnings	$1,035,303 88	$1,006,678 96
Deduct expenditures upon new equipment, etc.....	216,638 62	567,782 22
Balance	$818,665 26	$438,896 74

The total ordinary expenses of 1864 are 60 per cent. upon the gross earnings, while for 1863 the expenses were only 46 per cent. This increase was mainly caused by the greatly augmented cost of all material and labor. During the year 3,263 tons of new and re-rolled rail have been laid in the main track, and 89,877 cross ties. An expenditure of $26,619 69 has also been made in the restoration and re-building of water stations, and in the erection of permanent first class tanks and tank buildings. This item is included in the amount charged to motive power and cars.

The earnings of the road for the year have been much larger than ever before, and indeed have exceeded the anticipations of the most sanguine friends of the company. The aggregate is over two and a half millions of dollars. The amount of business which has been done upon the road has taxed its capacity. The machinery and rolling stock, which were regarded as only amply sufficient for the amount of business done three years ago, with such additions as the Directors have been able to make, have hardly been adequate to the enhanced business which has been imposed. If the company had had more cars and more locomotives the receipts of the company might easily have been largely increased, without a proportionate increase of expenses.

It is gratifying to state that the great increase of freight upon the road has come in a very important degree from two articles of traffic which may be considered the staples of your road, naturally and legitimately belonging to it. These articles are coal and the iron ore of Lake Superior. The coal interest was one of the principal agencies in planning and building this road, and those early projectors of the enterprise have always looked to the development of the coal mines on the line of the road as a sure and steady means of remuneration. The coal trade has from the first held an important place among the various sources of revenue to your road. It has steadily increased with the progress of years, and as manufacturing has been more extensively undertaken, and as new demands for coal from regions before unsupplied have arisen, the transportation over your road has been greatly increased in amount. The projectors of the road were not mistaken—the coal trade is a large, increasing and permanent source of revenue. The other item of freight, which has increased very largely, is the iron ore of Lake Superior. The city of Pittsburg has long been one of the largest manufacturers of iron in the whole country. No route offers so direct, convenient, expeditious and cheap a transit from the mines to Pittsburg as is furnished over your road. At other points too, besides Pittsburg, iron ore is demanded for manufacturing, and from the first opening of the mines, this item of freight has been looked to confidently to supply an important amount of revenue to the company. This too has been steadily increasing in importance, and for the last year rapidly, and seems likely to increase still more rapidly in future years. Its importance can hardly be over estimated, as the demand for materials of iron and the increase of iron manufactories abundantly testifies.

The experience of the past year shows that the resources of the Cleveland and Pittsburg Railroad are as yet only imperfectly developed, that the true interest and highest profit of the company is to be found, not in competition with other roads for distant business, expensive to be obtained and to be managed, but in developing and encouraging that which properly belongs to us, and which we may look on as permanently ours.

We proceed to give a statement of the transactions of the past year.

Assets on hand per last annual report		$406,536 88
Less machinery and tools now included in construction items.....		36,729 89
Balance		$369,806 94
Gross earnings.....		2,512,315 50
Interest on monies, &c.....		3,678 51
Capital stock issued		430,852 33
4th mortgage bonds issued.	$7,000 00	
Less scrip converted.....	3,344 05	
		3,655 95

Cash.....	$66,622 66	
Balance of personal acc't	32,361 51	
Shop materials.....	84,347 64	
Bills receivable	12,930 67	
Lawrence R. R. and Tr. Co. stock.....	4,125 00	
		200,387 48
Total		$3,450,130 00

It will be seen that while the expenses of operating have been much larger than usual, and the rate of expense is about 60 per cent., the net earnings of the road are over a million of dollars.

When it is remembered that four years ago the gross receipts were only a million of dollars, and it is now shown that the road has earned a million of dollars, after paying all expenses, a correct idea of the growth of the business and the increase of its development may be obtained. Notwithstanding the increased price of materials for the repair and management of the road, and not-

withstanding the increased cost of labor, we still show a net profit this year equal to the gross receipts of four years ago.

The extraordinary expenses of the road, or in other words, the additions which have been made to the cost of the road have been unusually large. It has been necessary to add largely to the equipment, and there has been expended for this item alone a quarter of a million of dollars. There has been paid for real estate, in Cleveland and Pittsburg, for depot grounds, and for the Union passenger depot at Cleveland, nearly one hundred thousand dollars. The machine shop and round house at Wellsville, the Bedford bridge, a substantial stone structure, and new iron rails for sidings, turnouts, &c., have also been items of large expense. They are essential to the business of the road, and the benefit will be found, and indeed has this year been partially experienced, in the safety and facility of conducting so large a business.

Charges to construction account direct	$46,250 80
New equipment	246,767 36
Bedford bridge	43,114 00
Real estate at Pittsburg	100,000 00
New U. depot and real estate purchased at Cleveland	42,163 52
Wellsville and Cleveland shops	43,409 57
Machinery and tools for same	2,512 35
Steubenville passenger station	1,833 76
Iron rails purchased	116,062 78
Allegheny Bridge extension	8,418 88
Total	$664,032 52

The division of earnings with the Pittsburg, Fort Wayne and Chicago Railway Company has, on the whole, been satisfactory, for although we have been compelled to pay that company a larger sum than was anticipated, the evils of competition have been avoided, and the attention of the officers turned more energetically to the development of the resources of our own road than could otherwise have been done, and the result has been very gratifying.

It is evident however from the experience of the past year that still larger additions must be made to the equipment of the road. There is no doubt that the receipts of the last year would have been much larger had the company been able to carry more freight, and there is every probability that the business of the present year will be in advance of the last year. Ten locomotives, as many passenger cars and two hundred and fifty flat cars with addition of twenty miles siding will be needed for the prompt and efficient dispatch of business.

The financial condition of the company is sound and prosperous. The company has no floating debt which cannot be paid from the debts due, and all its engagements are promptly met. The payment of two dividends of four per cent. each has been made during the year.

The principal change in the condition of the company during the year is that many of the holders of the mortgage bonds of the company have availed themselves of the privilege of convertibility attached to some of the bonds, and have exchanged them for stock. The whole amount of bonds so exchanged during the year is two hundred and seventy thousand dollars.

The equipment of the road consists of: 56 locomotives, 27 first class and 1 second class passenger cars, 8 express, 12 baggage and mail, 18 caboose, 263 freight, 90 stock, 19 platform, 768 gondola, 32 gravel, 40 hand, 25 ditching, and 1 wrecking cars. Miles run by passenger trains, 888,079; by freight trains, 566,613; by wood and gravel trains, 281,020; by mixed train on Tuscarawas branch, 21,100—total, 1,256,812, an increase over 1863, of 138,645. Tons of freight carried one mile, 59,823,382, an increase over 1863 of 3,697,398.

The financial condition of the company Nov. 30, 1863 and 1864, was as follows:

	1863.	1864.
Construction	$7,816,140 21	$8,454,040 38

President.—J. N. McCULLOUGH.

Directors.—J. N. McCullough, James F. Clark, C. A. Read, W. W. Holloway, P. E. Geisse, David Gibson, Charles R. Carroll, George M. Ives, H. C. Kingsley, Noah L. Wilson, B. F. Jones, Joshua Hanna.

Vice President.—JAMES F. CLARK.

Secretary and Treasurer.—EDWARD ROCKWELL.

Superintendent.—J. H. DEVEREUX.

Baltimore and Ohio Railroad Extensions.

Two very important railroad enterprises are now under full headway. The one is the construction of a railroad from Washington to Point of Rocks, on the Baltimore and Ohio Railroad near Harper's Ferry; and the other is the completion of the Pittsburg and Connellsville Railroad between Pittsburg and Cumberland, the latter also a point on the Baltimore and Ohio Railroad, 178 miles west of Baltimore. The Point of Rocks road will be 40 or 50 miles long. It is 70 miles now from Baltimore to Point of Rocks, and 91 miles from Washington to Point of Rocks by the present railroad. By the new road it will only be 40 or 50 miles to Point of Rocks from Washington. It is being built by the Baltimore and Ohio Railroad Company. The Pittsburg and Connellsville road is 148 miles long; 59 miles are completed and in operation between Pittsburg and Connellsville; the remaining 89 miles will be completed, it is hoped, in about a year. When these two links are completed, there will be an air line railroad from Chicago to Washington, as follows: Chicago to Pittsburg, by Fort Wayne and Chicago road, 468 miles; Pittsburg to Cumberland, by Pittsburg and Connellsville road, 148 miles; Cumberland to Washington, by Baltimore and Ohio and Point of Rocks road, 155 miles—total from Chicago to Washington only 771 miles, or 71 miles shorter than the present shortest route by way of Harrisburg and Baltimore. The difference in time, however, will be still greater. It now requires 40 hours to go from Washington to Chicago. By the new route through trains can easily be run in 30 hours, and that will be only 25 miles per hour.—*Baltimore American.*

☞ Efforts are being made by some of our most influential citizens to get money subscribed to build a railroad from this town to connect with the Delaware Railroad at some convenient point. This is a good move, and should be looked upon favorably, and not slighted at the beginning. Here is an opportunity for our monied men to invest capital, so as to realize thereon a handsome income. We hope they will take hold of it with a will, and in a spirit worthy of the importance of the undertaking. Every property holder in the county is particularly interested.—*Cambridge, Md., Herald.*

The Great Railroad Suit.

The Supreme Court of the United States, in February, 1864, directed that a decree be entered, fixing the amount due on the second mortgage for interest, and that if it was not paid within one year, that an order to sell the road should be entered.

On the 27th day of September, 1864, the decree fixing the amount thus due for interest was entered, fixing the amount at about $405,000. Since then two instalments of interest have fallen due, amounting together to $80,000. There has been paid by the receiver to apply on these two sum, $62,440, leaving the amount now due for interest, over $430,000.

The year allowed for the payment of this amount expired September 27th, 1865, and on the 28th instant, the order to sell the railroad from Milwaukee to Portage was entered, directing the Marshal to advertise the same for twelve weeks. We understand that the sale will be advertised for the 3d day of January next. The decree is for about $430,000 interest, and $1,000,000 of principal, and is subject to the first city mortgages of about $1,200,000. The sale can be prevented by the payment of the amount of interest.—*Milwaukee Wisconsin.*

Large Sale of Government Cars, Engines, and Railroad Iron.

At Alexandria, Va., on Tuesday, Oct. 17:

Fifty first class locomotive engines, 4 feet 8½ inch gauge.

Eighteen new platform cars, 5 foot gauge.

Twenty-five new box cars, 5 foot gauge.

About three hundred and fifty box cars, 4 feet 8½ inch gauge.

About two hundred and thirty platform cars, 4 feet 8½ inch gauge.

About thirty stock cars, 4 feet 8½ inch gauge.

Twenty passenger cars, 4 feet 8½ inch gauge.

One wrecking car, 4 feet 8½ inch gauge.

Two new trucks.

Sixty new trucks, framed.

Fourteen flats, framed.

About two thousand tons railroad iron.

Sales to commence at Alexandria at 10 A. M., and to continue from day to day until all are sold.

Terms: Cash, in Government funds.

Woodstock Branch Railway.

The Woodstock Branch Railway will soon be in course of construction, and will give additional facility to the mining companies for the transportation of their produce to the seaboard. The branch will connect the town of Woodstock with the St. Andrew's Railway. The St. Stephen's branch, also connecting with the St. Andrew's line, is under construction and proceeding rapidly. The Western extension will, probably, be commenced in the course of next month.—*Canadian News, Sept.* 14.

Bear Creek R. R.

The directors of this company have awarded the contract for building the road to Messrs. Sharp & Scurry. The contract stipulates that the work is to be commenced in thirty days, and completed on or before the 1st of August next. The contractors intend to sub-let the grading, clearing, etc. It is the intention of the contractors to commence work immediately.

☞ We see it stated that the work of constructing a railroad between Henderson and Nashville, has already been commenced, and it is said to be in the hands of capitalists who are determined to give to Kentucky the great advantages derived from a thorough line of railroads. This road will go into and through the richest coal, petroleum and tobacco sections of the State.

Journal of Railroad Law.

DELAY IN DELIVERY OF FREIGHT—LIEN OF COMMON CARRIERS.

In the case of Crommelieu *vs.* N. Y. and New Haven Railroad Company in the New York Superior Court, the plaintiff, who was a stone cutter, was in the habit of having marble brought over the Harlem Railroad from South Dover to Forty-second street, in the city of New York. The defendants had established a rule or regulation, that in addition to the freight, one dollar per day would be charged for the use of each car, after the marble had remained forty-eight hours at the depot. The plaintiff had notice of the regulation. In October 1860, three car loads were brought over the road for the plaintiff. On the arrival of the three cars, the plaintiff was notified thereof, and also that one dollar per day for each car, would be charged, after forty-eight hours. The cars with such marble upon them, remained in the street in front of the depot for several days. On the 19th October plaintiff paid the freight, but refused to pay the one dollar extra per day for the detention of the cars. The defendants refused to deliver the marble without payment of the extra charge, and the plaintiff brought this action to recover possession of the property.

The defendants proved by Baker, their freight agent, that in August or September, previous to the shipment of the marble, he was inquired of by the plaintiff respecting cars; that Baker replied that they were very short of cars. The plaintiff said he expected in a week or two some more marble down. Baker said they would do the best they could to suppiy the cars; that they had been short of cars all summer; so short that he had received notice from the president that all persons having freight upon the road must take it away within forty-eight hours, or he must charge them one dollar per day for the use of each car. This was three or four weeks before the arrival of the marble. The plaintiff objected to the arrangement and said that he would break it up if he could.

The Judge submitted to the Jury the question whether the plaintiff had notice as to what the charge of the company would be. He was requested by the plaintiff to charge that the "defendants had no lien for the detention." He refused so to charge and the plaintiff excepted.

The Jury returned a verdict for the defendants.

The plaintiff appealed to the General Term, and the opinion of the court was written by

Robertson, J.—The defendants claim to have had a lien on the plaintiff's marble, for a per diem compensation for allowing it to remain upon the cars by which it was brought, for several days in a public street. There was no evidence adduced of any right on their part to such permanent occupation of the highway; the obstruction therefore, of it by such cars and marble was a public nuisance. So far as any safety of the merchandize was concerned, its bulk would probably have rendered it equally safe, if taken off from the cars and laid on the pavement. Leaving articles in an open vehicle exposed on a highway, is not the kind of storage for which a lien can be acquired. Even the right of the defendants to make contracts for continuous storage of merchandize, although transported by them previously, under their charter, may be doubted. Upon any ground I think the claim for such lien is untenable. The judgment must be reversed, and a new trial ordered to abide the event. An opinion was also written by

Monell, J.—The only question in this case is, whether the regulation of the defendants, to make an extra charge for the detention of their cars, known to, and as I think the evidence establishes, acquiesced in and assented to, by the plaintiff, constituted a lien upon the marble, which would authorize the defendants in retaining it, until the charge was paid, I think the transaction, as testified by Baker, constituted it in effect an implied, if not an express contract, that the defendants would charge, and the plaintiff would pay, the extra charge, with notice of the regulation, he shipped the marble and there is enough to raise an implied assumpsit, upon which I have no doubt the defendants could recover in an action for that purpose.

A lien is defined to be the right which one person in certain cases possesses, of detaining property placed in his possession belonging to another, until some demand which the former has is satisfied (Whitaker on Liens, p. 2). They are of two kinds particular or special, and general. A special lien is the right to retain the property of another on account of labor bestowed or money expended on the same property, and is established by the common law and by express agreement. A general lien is the right to detain property for a general balance due from the owner and arises by the usage of trade, the usage of the parties or by express contract. (Ib.) The lien of a common carrier is a special, and not a general lien. Hence, in this case, if any lien exists in favor of the Railroad Company, which would authorize them to detain the plaintiffs marble, until the charge for detaining the cars was paid, it must be established either by express contract or by the common law. It is not pretended that there was any agreement that the defendants should have a lien on the marble until the extra charge was paid; and I have been unable to discover that it is sanctioned by the common law.

The lien at common law exists only in respect of freight actually earned by the carrier of the goods, at the stipulated place of destination. (Angell on carriers, § 383.) "And therefore' says this elementary writer, "covenants for demurrage, or for providing a full cargo, cannot be enforced by the specific remedy of lien, even though the charter party contain such penal clause. The remedy for such matters rests entirely in covenant, and the more penal clause will not extend the right of lien."

The question arose in Boily *vs.* Gladstone 3 M. & Sel. R., 205. The ship was chartered for a voyage out and home, and by the terms of the charter party the merchant covenanted to pay for the homeward cargo at certain rates per ton, on delivery at Liverpool; to load with full cargo, and pay demurrage. He bound the goods to the performance of his covenant.

The court of King's Bench held, that the carrier could not detain the goods either for the freight of such as was put on board and afterwards reclaimed by compulsion, nor for the dead freight, nor for demurrage. Ld. Ellenborough said that covenants for providing a full cargo, or for demurrage give no lien. In this case it was claimed that the charter party gave the lien for demurrage in express terms, as it was stipulated that the goods should be bound for the due performance of the covenants, but Le Blanc, J., says: "it is impossible that this obligatory clause can be construed to mean, that the owners of the ship would have a lien on the goods brought home, for every breach of covenant in the charter party; as for instance the not loading a full cargo and for demurrage. The remedy for such matters rests entirely in covenant." It was not denied that such a lien might be created by express contract, but it was held that the words in the charter party expressed no such agreement.

The only other case I have found bearing directly on the question is, Lambert *vs.* Robinson, (1 Exp. R., 119,) which was tried for the conversion of goods. The goods had been taken upon the road. On their arrival at the Inn, the plaintiff (owner) was there to receive them. The carriage came to three shillings and sixpence, which the plaintiff tendered. The tender was refused unless the further sum of two pence per parcel was paid for "booking." This was refused, as the goods had not been brought into the warehouse, but delivered from the wagon. Eyre Ch. J., said; there was no lien given by law in this case; but if there was the charges were not lawful, and a lien exists only for lawful charges.

The elementary books and cases to which I have referred would seem to settle the law, that a lien exists for freight only after it has been earned, unless there be an express contract creating the lien, in clear and unequivocal terms. The defendants in this case, claimed to detain the marble until the plaintiff paid the extra charge of one dollar per car. The freight had been tendered and paid. At most there was an implied agreement only, that the plaintiffs would pay the extra charge. He did not by an express stipulation, bind the goods, or create a lien upon them, until the charge was paid. The remedy, if any, rested entirely in the implied assumpsit; there was no right of lien. Nor can defendants be regarded as warehouse-keepers, and entitled to a lien for storage. They did not in any sense store the plaintiffs marble. It was left upon the cars standing upon the railway track in the public highway, upon its arrival at the place of destination and notice to the plaintiff, and reasonable time given to accept and take, by the consignee, the defendants had discharged their whole duty, and could not be held responsible for any loss or damage; and hence no right of lien could arise for housing, unless the defendants were warehouse men as well as carriers, which they were not in this case.

Under the view of the law of lien which I have taken, it was error to refuse to charge as requested by the plaintiff.

The judgment must be reversed and a new trial granted with costs to abide the event.

☞ The Virginia and Tennessee Railroad between Lynchburg and Bristol has been re-opened, and the cars are now running on regular time, making regular connections with all the railroads, running North and South from the latter point.

☞ Railroads are now open to Mobile and Montgomery, Ala., thus completing the connection with New York *via* Knoxville, Tenn., and Lynchburg, Va.

Steam Navigation in the Pacific and Elsewhere.

As the world becomes more and more familiar with the power of steam when applied to the propulsion of vessels, and the wants of commerce, engineers and ship builders are found equal to the demand and exigency. Short voyages are no longer the limit of their efforts, but the longest are provided for with the greatest success.

When the first attempt was made to cross the Atlantic with steamers, many scientific persons entertained the belief that it would fail from their inability to carry the sufficient quantity of fuel. Now distance is no longer feared. The widest oceans seem only to be considered as affording the greatest opportunity for the employment of steamers, and the Pacific is being rapidly filled with lines of the greatest cost, speed and burthen, competent to make the longest voyages without coaling except at the start. At present the other ocean routes are almost fully occupied. The Indian Ocean is already traversed by lines from Suez to the Mauritius and Australia. In Asia there are steamers in active service plying under the French and British flags between, for example, Galle and the Chinese and Japanese ports; and between the British ports at home, and those of the East Indies, New Zealand and Australia, there is a regular and well appointed steam service. Our own American project of a line in the North Pacific between San Francisco and Hong Kong, and Kanawaga is under way, at least at the shipyards and machine shops, to be in operation in 1867, with a ten years' subvention of half a million of dollars a year, and to consist of splendid side wheelers of from 3,500 to 4,000 tons burthen. The length of the voyage between the first two named points is 7,050 miles, and between the latter 5,475 miles. The first named route will compete on pretty equal terms as to time with that overland and now in use. That from Japan, it is admitted will be the shortest for the traveler bound to Europe.

This has produced competition. And we learn that a mail route is immediately to be undertaken on behalf of the colonies in the East, to be worked by the Panama, New Zealand and Australian Company, between Wellington and the isthmus. One of the four ships to be employed is already built of 1,640 tons with a twin screw, an annual subvention of $550,000 to be paid by the colonies, and each vessel able to carry 1,200 tons of fuel. It is calculated that by means of this line the mail and passengers will be taken from Wellington in 45 days, a clear gain on the present postal time of 15 days.

There are already British and French lines to various ports on the Southern Atlantic securing valuable freights, as in Colombia, Brazil and the River Plata. There are also British lines which pass around Cape Horn, and trade with several important points on the Pacific. Down the Pacific coast, Wheelwright's line has long been established up the coast to Central American ports the Panama Railroad Company has an efficient and paying line. The California lines on both shores of the continent have been for many years earning large profits for their proprietors.

A line from Australia to Valparaiso is contemplated, and even a second line between New Zealand and Panama. Even the Dutch are making new connections by steam between their own and the neighboring colonies. Still it is admitted that when our Union Pacific Railway is finished competition with the American routes will be almost impossible. It is a great pity that while we are thus likely to take the lead in the Pacific, we are doing nothing on the Atlantic. We have frequently alluded to the fact that the United States Government at the close of the rebellion had left on its hands about 40 fast steamers of wood, admirably adapted to the mail service, that might be placed on well-known Atlantic, African and Mediterranean routes, which manned with moderate complements of crews could not only thus find employment for a large number of our gallant seamen and officers, earn their expenses by freights and postages, but give an immense impulse to our declining commerce now almost entirely in the hands of foreign companies.

This idea found favor at once, and before the war closed, with the Secretary of the Navy, the Postmaster General, and even the late President, and was recommended in a very elaborate report by the New York Chamber of Commerce. Yet so far nothing has come out of it. The lines thus proposed could be set at work in six months' time, if Congress would sanction them, but we fear its attention will be again absorbed in political questions of really no vital importance, or in party contests where the gain of the few rather than the good of the many, will be the principal object.

We may sometimes feel greatly discouraged at the indifference shown to these grave and great questions, but reiteration will sometimes do as much good as argument, and therefore we have again referred to a subject in which we have taken, and still take the deepest interest. If our steam marine is not to show itself on the seas till five or six millions a year subventions are given to private monopolies, it will be a long time before we shall compete on any terms of equality with the British and German lines, while on the contrary, the postages alone we are now paying them would go far to support six or seven lines of the character designated, while at the same time they would on their various routes be doing important and active duty as cruisers, thus saving the now useless expense of sending ornamental squadrons into the harbors of countries with which we have the least trade, the smallest intercourse, and where our flag is too frequently used to gratify the vanity of princes and their nobility, on high days and holidays. We have made a beginning, however, on the Pacific, our Union Railway is in progress, and on one ocean at least our flag will wave with an undisputed commercial supremacy.

Maryland and Delaware Railroad.

A large force of workmen are engaged in constructing the Delaware Railroad, which is to extend through the county of Worcester in Maryland, and Accomac and Northampton in Virginia, until it reaches Annamessex, a point opposite Norfolk, on this side of the Chesapeake bay. The ties are of pine, which are rather a new feature in railroading, but in that sandy country where pine abounds, it is by far the most economical tie that can be used. In sandy soil pine trees will last for six years, but in spongy, clayey soil they would rot out directly. The road is to be finished through by the 1st of next October.

The Delaware and Maryland Railroad, which is to be lengthened from the Delaware Railroad at Smyrna to Easton, in Talbot county, Maryland, on an arm of the Chesapeake bay, has, we are informed, been put under contract and is to be finished by the 1st of June. Ten miles of this road have been finished for some years, but it has not been operated. It will open a fine country for trade, especially in peaches and early vegetables. —*Wilmington Republican.*

New York and Boston Air Line Railroad.

The Air Line Railroad from New York to Boston is much discussed in the Connecticut papers, especially among the rival interests, Hartford and New Haven. A writer in the Boston *Post*, who is very earnest upon the subject, says:

The Air Line claims to be twenty-five miles and one hour nearer to New York than any other Line, When completed they can connect with either the New London or Stonington boats by 16 miles less travel than any other route from Boston. The road passes through Woonsocket, up Pascoag Valley to the Norwich and Worcester road, and thence to Daysville in Connecticut, along the line of which there is a very large manufacturing interest which has no other railroad advantages. Those interests demand the building of this road. If the enterprize was finished as contemplated, the traveller could get into the cars in Nova Scotia, and not change until he arrived in New York city. The Grand Trunk Railway favors the enterprise, for it can send freight and passengers through from Montreal to New York with only a change of cars at Portland. Of course the Eastern shore people favor the Air Line road. Not only this, but the connection proposed with the New York and Erie road at Fishkill, opposite Newburg, is not only practicable, but the route is from ten to fifteen miles shorter between New Haven and Fishkill, and passes over a much easier grade at a less cost in building than the route proposed by the New York, Hartford and Erie road, from Hartford, through Waterbury in Connecticut.

Portage Lake Canal.

We learn that active operations are commenced on the Portage Lake and Lake Superior Ship Canal, and it is confidently anticipated that boats will be passed through it by the first of November of next year. Portage Lake, as our readers are generally aware, is an inlet of Lake Superior, cutting Kewenaw Point almost in two, much as Sturgeon Bay cuts off the Peninsula of Green Bay. It is navigable for all craft to within two miles of Kewenaw Point, and when a canal is made across that narrow neck of ground it is said that 175 miles of sailing will be saved, besides avoiding the rather dangerous navigation around the Point. The Government has provided a liberal outfit for the enterprise by donating a grant of 200,000 acres of land in its aid, which can be selected anywhere on the Michigan Peninsula. The work consists of two miles and eight hundred feet of cutting, the deepest part of which will be only 30 feet—the canal to be 18½ feet in depth throughout—giving ample depth for all classes of vessels. The piers at the Western end will be of crib work and stone, 400 feet long; and the natural conformation of the bay at that end makes it a safe entrance. At the east end of course, Portage Lake is a harbor of itself.—*Green Bay Advocate.*

☞ A gap of only seven miles exists in the Mississippi Central Railroad between Grand Junction and Holly Springs. This break will be completed and in running order in ten days, which will enable travelers from Memphis to reach New Orleans in 40 hours.

☞ The steamer Tonawanda cleared from Boston on the 9th, for Havana, with a full freight and 21 passengers, and also with the United States mails. She is the poineer of the new steamship line between Boston and Cuba.

☞ The census of Iowa shows the the population of the state to be 749,904, including 8,599 colored persons.

American Railroad Journal.

Saturday, October 14, 1865.

Stock Exchange and Money Market.

Holding the opinions that we do of the permanent value of American securities, especially those of a National character, we were not in the least surprised to hear by the last arrival from abroad, of the rise of the 5-20s to 70½. The August statement by the Secretary of the Treasury must have had its effect upon the most incredulous; and when they come to read that of the last month, showing that contraction almost without an effort had commenced, both in the debt and the legal tender currency, we imagine a further rise must have taken place. As we have very recently suggested, European politics by no means wear a settled, we had almost said a peaceful aspect. Even England, which now seems to have adopted "the peace at any price" policy, this in all probability preventing an active intervention in behalf of the rebel Government, seems to have awakened from her slumber, and we see Earl Russell protesting, *sotto voce* at least, against the Gastein convention. Italy is in a ferment in relation to Rome and Venetia, Belgium in alarm lest she is to become a French frontier possession, Sweden and Norway dividing into parties democratic and anti-democratic in their demands and opinions, and even France as far as it dare under the head of a despot exclaiming against the further loss of life and treasure in Mexico. Certainly the financial condition of all these countries may in a moment lose all its stability, and their funds their place in the market. On the other hand, it is now plainly seen abroad how strong we are, how easily we recuperate, how vast are our resources, and how enterprising and industrious are our people. Again, they perceive that the long train of evils, discontent, insubordination, suppressed rage and secret enmity are disappearing under the magnanimous and clement policy of the President, contrary to the expectations of foreign and domestic sympathisers. The Nation appears to be forming a more compact Union than ever, and the present termination of the struggle has unquestionably proved best for all.

Convictions such as these must have their effect abroad on American securities, particularly when our National debt is, at the worst, but about half that of Great Britain, and is actually on the decrease already.

Especially when it is seen on what an enormous scale the internal revenue is now collected, coming in at the rate of more than a million a day, or between 300 and 400 millions a year, with as yet but little aid from the restored States, and when the revenue from customs is full from 25 to 30 per cent. above the estimates, and is already above the rate of one hundred millions a year. Such results as these are not to be blinked by the most careless observer, and must tell on the most doubtful minds. The receipts at the New York Custom House alone between October 2d and 7th, both days inclusive, were $3,590,114. Now when the Southern ports begin to feel the revival of foreign commerce we must look for a very large weekly addition to any sums we now receive at New York, Boston, Philadelphia and Baltimore. It is also estimated that the amount of specie in the Sub-Treasury and the banks on the 1st of October, was $46,595,971, quite as much as usual, and enough for all the purposes of business and the wants of the Government. As the Treasury Department is now understood to have set its face towards contraction and the redemption of its currency, it is well to consider what the National banks are doing. At present they are increasing their circulation. Their whole number on the 7th inst., was 1,578, with a capital of $399,354,213. Under our old system of banking the issue of bills would have been considered justifiable at the rate of $3 in bills for $1 in specie. It is, however, but $194,182,630, not quite 50 cents for $1 of capital. A most material change for the better, and which it seems to us will make a return to specie payments by no means so difficult as is by some supposed. Especially when we consider that their bills out are issued upon Government stocks,

which every day are growing better, and are destined to rise still higher. We are inclined to the belief that the knowledge of this fact among the people, will enable us to resume with a much less amount of specie on hand, than could have been effected under the old system, when no one knew precisely whether there was anything real to fall back upon.

The total of customs received in gold for the quarter comprising the months of July, August and September, was $50,035,652, out of which interest was paid to the extent of $16,250,392, so that the pre-payment of the interest due 1st of November, was by no means difficult even without the balance still on hand in the Treasury, and the certainty that the receipts for the present month were not likely to be of a less amount than they were in September, viz: thirteen millions and upwards. This cursory view of the subject shows beyond all question, the entire ease with which our finances can meet any emergency we have been placed in or can be placed in, and with an experienced Secretary, such as we now have, one who understands himself fully, we do not feel the least anxiety for the future. In short, our financial movement is but another parallel with our military success.

Another remarkable circumstance which has occurred abroad as appears by the recent advices, is the sudden demand for some of our leading railway securities. For Erie it is said to have been four times greater than the supply. Like causes must produce like effects, and we do not see why if the Government stocks rise from considerations already stated, confidence should not be extended to all those other securities which rest on the general prosperity, restored confidence and increasing traffic and interchange.

But there is something more of which to predicate our future. Cotton has risen 10 cents per lb., a circumstance with a two-fold influence. In the first place with the stocks on hand in this country, it will add just so much money to the value of our exports, diminish the call for specie in return for the goods imported into this country, a large portion of them being of no real importance, and merely the sweepings of the foreign manufactories, will also enhance the price of the Southern plantations, an immense advantage to our Southern brethren, and stimulate the further production of cotton on a large scale, of which there has been entertained considerable doubt in some quarters. Holders will at once realize very large profits by the advance, and there is no doubt that much more attention will be immediately paid to the cotton bearing plantations than was expected. All this is working well for the South, for the North, and the commercial relations of the country generally.

We notice with some satisfaction that the sudden and unexpected rise in the price of coal, is drawing the attention of capitalists to the necessity of forming new companies to obtain further supplies. We publish to-day the card and prospectus of a Montreal company, which we hope will meet with great success. If it can meet with success, it will have a benign effect on the present prices. We notice also that a new company called the Spring Mountain is going into operation, under good auspices; and that the Richmond Coal Company, for the supply of bituminous coal, has been reorganized under a new name by very wealthy capitalists, who propose to give us a fine article much below present rates, before the winter finally comes upon us. Certainly with our immense coal fields we do not see, why we cannot have as cheap fuel as they have in England. The shares of our leading companies are quoted at enormous figures.

There has been great activity the past week in Railway shares, the market having become quite animated, and a good advance obtained in leading companies.

We understand the English gentlemen now here on railway business, contemplate a large immediate outlay on their principal line between Salamanca and Cleveland, at the same time the bonds of the Erie recently negotiated abroad, have already been sold at a handsome premium. All this looks well for the Railway interest. Good and careful management is all that is necessary to give great increase and value to our permanent improvements of this character.

Money continues to be had without much difficulty, although it is attempted to be maintained that a tight market is to be expected. We see no evidence in favor of the supposition. The National Banks are increasing their circulation sufficiently to keep up a full supply, rather too much so in the opinion of the conservative among the Bankers. Just as soon as the Government makes a decided movement by a large contraction, the National Banks will have to follow. They are making large profits, but they will have to come back to a more rigid system of operations. The Government by calling in its legal tenders by act of Congress, and requiring them to be funded within a limited time can resume specie payments very rapidly, and the National Banks should think of this and prepare to take in sail themselves. Nor do we fear the consequences for the public. Every contraction of the currency will give greater value to what remains of it, increasing its purchasing power in exact proportion to the reduction.

Exchange is again lower under the effect of the rise in cotton and the 5-20s.

The business of the Sub-Treasury, shows the constant tendency to accumulation there, the balance on Tuesday was $68,847,115 84. The *Tribune* puts forth a calculation that the amount of Federal taxes received is now at the rate of five hundred millions per annum. We do not estimate the receipts as high as this; but we notice the circumstance as a proof of the prevailing impression of the great strength of the country in its finances, and its ability to meet its engagements. Let Mr. McCullough have but a fair chance and he will bring out everything right, and to the entire satisfaction of the public creditors at home and abroad.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Union Pacific Railroad.—Eastern Division.

A dispatch from St. Louis, dated October 4th says: "The railroad Presidents, representing the Ohio and Mississippi, Little Miami, Central Ohio, Pennsylvania and other roads, who went on an excursion to Lawrence, Kansas a few days ago, and who will meet the commission appointed to inspect the Union Pacific Road, have engaged to construct sixty miles of the Road west of Lawrence by the 1st of May next. The iron for this road has already been purchased and shipped by J. Edgar Thomson, Esq., President of the Pennsylvania Railroad. Seven miles of the track have already been laid, and it will be completed to Topeka by November. Arrangements have also been made to build a railroad between Leavenworth and Kansas City at once."

The Debt Statement.

Messrs. Culver, Penn & Co. bankers, 19 and 21 Nassau street, N. Y., have published a full and detailed statement of the public debt to September 30th, 1865, including a synopsis of all the acts authorizing the same. It also includes a progressive statement of the public debt, showing the amount outstanding at different periods, from March 4th, 1861, to September 30th, 1865. The compilation is invaluable to politicians as well as to men of business.

Oscillating Steam Engines.

We call the attention of our readers to the advertisement, in another column, of Wm. D. Andrews & Bro., who construct Oscillating Engines, and Boilers, the furnaces of which consume their own smoke. There has in nothing been greater progress than in the construction of Steam Engines and Boilers. The Oscillating Engine is becoming a deserved favorite with Steamship Companies, being simple, economical and effective, and the furnaces, which consume their own smoke, must give them a decided preference in all manufacturing cities and towns. The advertisement speaks for itself and Mr. Andrews so satisfactorily, we need not add another word.

The Globe Mutual Coal Co.

We give elsewhere the advertisement and prospectus of this company, which offers to subscribers of $10 each, the privilege of purchasing one ton of coal annually at cost price, and so in proportion to the number of shares subscribed. The enormous prices now asked by the combination companies for this article of necessity, make the support of this new system of cheap supply a real duty on the part of the public.

Mr. Watkin and the Grand Trunk of Canada.

This gentleman who arrived in this city on the 18th of September has just returned from an official visit to the Grand Trunk Railway of Canada. Among his accompanying friends are Mr. Brydges, the manager of the road, and Mr. Eysrcigge, Mayor of Stockport, England. They have inspected the line from Portland to Sarnia, and their report of its condition is very favorable.

Within the last four years the Company has expended £500,000 upon the road; new rails have been laid for 500 miles, new ties for 800 miles, and steel rails from the Ebbvale Works for 20 miles. The rolling stock is largely increased. The connection with the Buffalo and Lake Huron is turning out very advantageously for both companies. The contract for the International bridge at Buffalo has been signed and sealed, and the work is to be completed in two years. The traffic on the Grand Trunk has increased the last year full 25 per cent.

A very important connection is about to be made. Acts have been passed in Michigan authorizing a wide gauge track from Sarnia, the western terminus on Lake Huron, to Chicago, the expense of which will be in part provided for by the people of Michigan, the Grand Trunk Company to supply the iron by the way of a loan on bonds. This will be an immense advantage to the Company and the City of Chicago. Mr. Watkin left this city for Washington on Thursday, and returns to England in the Scotia in November next, highly gratified with this, we believe, his third or fourth visit to the United States, and duly appreciated by his American friends.

Erie Railway.

The following gentlemen have been unanimously re-elected directors of this company for the ensuing year: Samuel Marsh, Daniel Drew, John Arnot, William B. Skidmore, Cornelius Vanderbilt Robert H. Berdell, Dudley S. Gregory, Ralph Mead, Ambrose S. Murray, William Evans, (of London,) J. C. Bancroft Davis, H. L. Pierson, D. A. Cushman, Alexander S. Diven, Thomas W. Gale, Isaac N. Phelps and J. F. D. Lanier. The Board elect will meet next week to vote for their executive officers for the year ensuing.

Toledo, Wabash and Western Railroad.

The following gentlemen have been elected directors of this company for the ensuing year A. Boody, J. H. Marks, E. C. Litchfield, J. R. Jessop, J. Ross, J. Speers, J. Dunlop, S. Humphreys, W. Kidd, W. A. White, E. Wells, L. Tilton, J. C. Cecil, W. Colbourne, J. N. Drummond.

The following are the officers elected: A. Boody, President; W. Colbourne, Vice President and General Superintendent; J. N. Drummond, Secretary and Treasurer.

Winona and St. Peters Railroad.

The Winona *Republican* says that the work on the Winona and St. Peters Railroad is not to stop at Mantorville this season. The iron will be laid only to that point, but a good portion of the grading will be done between there and Owatonna. Col. De Graff is already prosecuting operations in that direction. All, or nearly all of the directors of the company will take a survey of the road and the country west of Winona.

Minnesota Central Railroad.

The track of this road was laid to Minneapolis, and the first train of cars entered that place on the 26th ult. Trains commenced running to Dundas on the 27th. The road was to have been completed to Faribault by the 11th inst.

☞ A contract has been made with the Des Moines Valley Railroad Company for the completion of the road to Des Moines, Iowa, on or before December 1st of next year. Trains will be running to Monroe next week. Twelve miles west of Monroe will be graded this fall, and work will be commenced on the Des Moines end immediately.

☞ The Fredericksburg and Gordonsville Railroad Company has been organized by the almost unanimous election of G. H. C. Rowe, Esq., President. Montgomery Slaughter and Peter Goolrick were appointed directors on the part of the private stockholders.

☞ The annual meeting of the stockholders of the Virginia and Tennessee Railroad was held in Lynchburg on the 11th inst. The Board of Public Works have appointed the following gentlemen as directors to represent the state in the company for the ensuing year: Charles H. Lynch, of Campbell; James F. Johnson, of Bedford; Robert W. Hughes, of Washington.

☞ A route has been surveyed for a railroad from Manchester to Keene, through Goffstown, Greenfield, New Boston, Peterborough, Harrisville and Marlborough.

Railroad Earnings.--Weekly.

The earnings of the Chicago and Alton Railroad for the 4th week in Sept., 1865 .. $91,302 00
Corresponding week of previous year .. 72,624 00

Increase $18,678 00

The earnings of the Chicago and Rock Island Railroad for the fourth week in September, 1865, were $86,407 00
Corresponding week of previous year .. 74,295 00

Increase $12,112 00

The earnings of the Grand Trunk Railway for the week ending Sept. 30, 1865, (including the receipts of the Montreal & Lake Champlain and Buffalo & Lake Huron Railways) were :

Passengers	$66,645 00
Express, freight, mails and sundries	4,036 00
Freight and live stock	98,961 00
Total	$169,642 00
Corresponding week, 1864	119,447 00
Increase	$50,195 00

The earnings of the Chicago and Northwestern Railway for the first week in October, 1865, were $221,142 43
Corresponding week of previous year. 131,721 74

Increase $89,420 69

The traffic of the Great Western Railroad for the week ending Oct. 6, 1865, was as follows :

Passengers	$44,613 16
Freight and live stock	44,698 71
Mails and sundries	3,770 89
Total	$92,082 76
Corresponding week of 1864	63,120 48
Increase	$28,962 28

The earnings of the Racine and Mississippi and Northern Illinois Railroad for the week ending Sept. 30, were :

	1865.	1864.
Passengers	$5,601 73	$4,579 07
Freight	17,521 81	14,535 09
Express	260 22	104 16
Mail	296 58	296 58
Total	$23,680 34	$19,514 90

Receipts from January 1 to Sept 30 :

1865	$497,068 21
1864	429,070 05
Increase	$67,998 16

The earnings of the Marietta and Cincinnati Railroad for the 4th week in Sept., 1865, were :

	1865.	1864.
Passengers	$15,967 25	$17,887 51
Freight	18,013 00	12,294 04
Mail, express & telegraph	1,601 00	1,419 02
Total	$35,581 25	$31,600 57

Total for the fiscal year commencing Jan. 1 . $885,315 28 $684,358 81

☞ The Stark County (Ind.) *Times* states that a company has been organized for the purpose of building a railroad from Goshen, Indiana, to Springfield, Illinois, by way of Middleport, which is designed to connect the Northwest, including Canada, with the Southwest.

☞ The following gentlemen have been elected Directors of the Hudson River Bridge Company : Augustus Corning, Dean Richmond, Chester M. Chapin, William H. Swift, Horace F. Clark, Augustus Schell, James H. Banker, Henry H. Martin and Sidney T. Fairchild.

Railroad Earnings--Monthly.

The earnings of the Marietta and Cincinnati Railroad for the month of Sept., 1865. $120,051 25
Corresponding month of previous year 93,077 63

Increase $26,973 62

The following is a statement of the business done by the Illinois Central Railroad for the month of September, 1865 :

LAND DEPARTMENT.

Acres Construction Lands Sold	10,887.99 for	$132,061 52
Acres Int. Fund Lands sold	478.15 for	7,335 53
Acres Free Lands sold	1,511.39 for	20,520 99
Total sales during month of Sept., 1865	12,877.53 for	$159,918 04
To which add Town Lot Sales		1,440 00
Total of all	12,877.53 for	$161,358 04
Cash collected in September		$219,312 00

TRAFFIC DEPARTMENT.

Receipts from	Passengers	$260,638 63
do.	Freight	425,743 00
do.	Mails	6,358 33
do.	Rent of Road	4,000 00
do.	Other Sources	10,000 00
Total Receipts in month of Sept., 1865.		$706,739 96
Total Receipts in month of Sept., 1864.		799,235 92

The earnings of the Michigan Southern and Northern Indiana Railroad for the month of September, 1865, were $484,173 00
Corresponding month of previous year 402,219 00

Increase $81,954 00

The earnings of the Michigan Central Railroad for the month of Sept, 1865, were $460,661 23
Corresponding month of previous year 408,444 58

Increase $52,216 65

The earnings of the Chicago and Alton Railroad for Sept., 1865, were $399,602 00
Sept., 1864 .... 354,554 00

Increase $45,048 00

The earnings of the Chicago and Rock Island Railroad Company for the month of Sept., 1865, were $384,290 00
Corresponding month of previous year 375,860 00

Increase $8,430 00

The earnings of the Atlantic and Great Western Railway for the month of Sept., 1865, were $677,625 00
Corresponding month of previous year 446,044 00

Increase $231,581 00

The earnings of the Chicago and Northwestern Railroad in Sept., 1865, were $930,315 38
Same period last year 669,604 75

Increase $260,710 58

☞ The *Herald* says : "It has been decided to double track the Atlantic and Great Western Railway from Salmanca to Meadville and from Youngstown to Cleveland. Orders have also been issued for a very large addition to the equipment of the line in locomotives and freight cars, to accommodate the expected increased business and to properly dispose of the immense amount of freight that already crowds upon the road without proper facilities to take it away."

☞ The New Orleans and Jackson Railroad has been completed through to Canton, Miss., and trains will soon commence running.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley, left at tide water from the commencement of navigation to the 30th ult., inclusive, during the years 1864 and 1865, was as follows :

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1864	670,400	11,572,400	7,435,600	229,500
1865	490,600	5,733,700	11,493,900	573,100
Dec.	179,800	5,838,700	*4,058,300	*343,600

* Increase.

The excess in the receipts of barley of the new crop is 334,900 bushels.

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows a deficiency of 1,347,500 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 30th of Sept., in the years indicated :

	1863.	1864.	1865.
Canal opened—	May 1.	April 30.	May 1.
Flour, bbls	843,600	670,400	490,600
Wheat, bush	12,197,300	11,572,400	5,733,700
Corn, bush	18,313,100	7,435,600	10,493,900
Barley, bush	255,000	229,500	573,100
Oats, bush	5,573,800	5,756,200	6,413,800
Rye, bush	281,200	135,300	501,500
Malt, bush	.....	.....	421,200
Beef, bbls	9,890	5,600	7,190
Pork, bbls	227,900	54,700	14,850
Bacon, lbs	3,441,100	559,300	1,273,100
Butter, lbs	153,900	147,200	107,700
Lard, lbs	18,582,600	1,760,500	1,964,100
Cheese, lbs	841,200	438,000	6,557,100
Wool	105,600	658,500	426,400

Interest and Dividends.

The Cleveland and Toledo Railroad Company have declared a semi-annual dividend of five per cent. (free from government tax) payable on the 25th day of October inst., at the Office of Messrs. Wells, Fargo & Co., No. 84 Broadway, New York, and after the 14th day of November next, and after the latter date at the company's office, in Cleveland.

The Central Railroad Company of New Jersey, have declared a quarterly dividend of 2½ per cent., payable October 13th.

The Cincinnati, Hamilton and Dayton Railroad Company, have declared a semi-annual dividend of five per cent., and the government tax, payable on the 16th inst., at the Bank of North America.

Essex County R. R.

A preliminary meeting of the Essex County Railroad was held at the St. Johnsbury House the 28th ult. The meeting was well attended by parties from various places interested in the building of the road, and was very unanimous and enthusiastic. All present were for pushing forward the enterprise at once. The commissioners for that purpose, we understand, will very soon open books for subscription to the capital stock of the road. We think capitalists who will investigate the matter will find this the shortest, most feasible and most direct route for railroad communication, between New York and Quebec, and one which at the same time brings into market the immense quantities of lumber in Essex County and places in Northern and Central Vermont within easy railroad communication with Portland and the West.—*St. Johnsbury (Vt.) Caledonian.*

☞ The first sod on the Buenos Ayres Great Southern Railway was turned on the 7th of March, 1864. Its opening is expected to take place this October.

Grain Trade of Buffalo.

The following table shows the receipts of flour and grain at Buffalo from January 1 to October 1 in the years indicated:

	1863.	1864.	1865.
Flour, bbls	1,638,728	1,462.116	1,186,212
Wheat, bush	12,919,670	12,298,298	7,631,610
Corn	18,360,877	9,439,463	14,325,444
Oats	3,666,349	6,855,334	6,276,350
Barley	152,731	183,008	333,475
Rye	256,001	359,161	273,688

The canal exports from Buffalo for 1863, 1864 and 1865, from May 1 to October 1, compare as follows:

	1863.	1864.	1865.
Flour, bbls	317,326	84,581	110,054
Wheat, bush	10,732,313	13,144,584	5,912,633
Corn	18,241,739	8,540,221	6,149,418
Oats	4,688,828	7,074,750	4,359,079
Barley	142,210	35,372	317,316
Rye	242,897	333,974	292,851

The following will show the receipts of canal tolls at Buffalo, from opening of canal navigation to October 1, for the years indicated, viz:

1865	$1,296,352	1862	$2,203,068
1864	1,636,018	1861	1,312,376
1863	2,011,765	1860	804,680

No. of boats cleared to October, 1865 4,725
No. of boats cleared to October, 1864 5,875

The Coal Trade.

The Philadelphia and Reading Railroad Company have raised their rates of freight on coal fifty cents a ton. The following tolls are now charged:

	To Richmond.	To Phila.
From Port Carbon	$3 58	$3 68
From Mount Carbon	3 57	3 67
From Schuylkill Haven	3 50	3 60
From Auburn	3 40	3 50
From Port Clinton	3 35	3 45

By the Schuylkill Canal the toll from Schuylkill Haven to Philadelphia is $1 90 per ton; boating freight, $1 45 per ton; total toll and freight, $3 35 per ton. From Schuylkill Haven to New York the boating freight is $2 95 per ton.

By the Lehigh Valley Railroad route the charges are:

	Per ton.
Mauch Chunk to Philadelphia *via* Lehigh Valley and North Pennsylvania Railroad	$3 40
Mauch Chunk to Elizabethport *via* Lehigh Valley Railroad and New Jersey Central Railroad	3 81
From Mauch Chunk to Trenton *via* Lehigh Valley and Belvidere Delaware Railroads	3 20

From Elizabethport to New York City the charge for boating coal is 65 cents per ton, making the cost of carrying Lehigh coal from Mauch Chunk to New York $4 46 per ton, against $5 40 from Mauch Chunk to Philadelphia.

Grain Trade of Milwaukee.

The receipts and shipments of produce at Milwaukee from January 1 to Sept. 30, 1864 and 1865, have been as follows:

	1865.	1864.
Receipts:		
Flour, bbls	312,669	228.402
Wheat, bush	6,282,212	7,658,220
Oats	382,976	735,908
Corn	194,015	403,080
Rye	79,305	59,337
Barley	84,358	120,460
Shipments:		
Flour, bbls	320,005	345,605
Wheat, bush	5,550,754	7,780,119
Oats	197,056	575,382
Corn	55,619	166,718
Rye	21,775	12,115
Barley		1,789

☞ The capital stock for a new railroad between Fredericksburg and Richmond has been subscribed.

Grain Trade of Chicago.

The following table shows the receipts and shipments of flour and grain at Chicago, from Jan. 1, to Sept. 30:

RECEIPTS.

	1863.	1864.	1865.
Flour	1,037,151	919,217	803,066
Wheat	7,453,940	9,081,151	6,197,142
Corn	24,230,419	11,979,382	20,675,624
Oats	5,460,713	9,167,819	8,284,471
Rye	585,907	841,890	773,719
Barley	658,563	535,419	700,495

SHIPMENTS.

Flour	1,137,374	912,380	676,782
Wheat	6,135.561	8,303,333	4,729,972
Corn	23,124,419	10,809,460	20,265,835
Oats	4,969,619	9,677,049	7,001,858
Rye	410,731	462,285	296,549
Barley	386,773	139,979	143,769

The annexed figures show the amount of grain in store at Chicago on the first of October in 1864 and 1865:

	1864.	1865.
Wheat bushels	886,333	817,781
Corn	121,726	1,347,947
Oats	613,047	1,299,896
Rye	150,141	247,710
Barley	226,648	928,298
Total bushels	1,998,795	4,003,212

Railroad Train Recorder.

Our attention has been called to a very ingenious and compact piece of mechanism, which if introduced upon our Railroads would it is thought, do much to work a reform in their management, and prevent numerous accidents. This instrument is called by the inventor a "*Railroad Train Recorder*," and its object is to give full particulars of the movements by the Engineer during each trip, also the condition of the track. The size of the Recorder is one cubic foot; its cost about $200. The Recorder is placed in the engine, a roll of paper placed therein, the Recorder locked, and at the end of the line the roll of paper is taken out by the manager, and following points found plainly recorded:

1. The speed run at any point on the road.
2. The signals given by the engineer, either by bell or whistle, and where given.
3. Changing the position of the reverse lever and where.
4. Condition of the track, showing high or low points, their character, and where located.
5. It indicates to the Engineer, by day or night, the speed he is running.

Steam pressure and water-line may also be recorded, if desirable; also the places where drivers slip.

But these five points will enable any Railroad manager to test the capacity and honesty of Engineers, and track men in his employ, which is very important.

The inventor desires to make arrangments with some capitalist to take an interest in this Patent, and to manufacture some of the Recorders at once. Any capitalist or railroad men desiring further information, can communicate with C. W. Theo. Krausch, St. Louis, or N. H. Parker, No. 24 Pine street, (Room 37) New York.

☞ A meeting of the subscribers to an agreement of capitalization of the Central Ohio Railroad Company, will be held at Zanesville, Ohio, on the first day of November, for the purpose of providing for a corporate reorganization of said company, and the transaction of other business.

Oil City and Pit Hole R. R.

The work on the Oil City and Pit Hole Railroad is being pushed forward with great vigor. The grading on that part of the road lying between the Allegheny river and Pit Hole City is nearly completed. About 125 tons of the iron is already on the ground, and the remainder is being shipped. If nothing occurs in the meantime to retard operations, the road will be in running order by the 1st of November, between Pit Hole city and the mouth of the Allegheny.

☞ The Superintendent of United States Military Railroads, recently sold at auction, at Manchester, Virginia, twenty-five locomotives and 100 passenger cars. They were purchased principally by the Southern railroad companies, and brought $417,000 in cash, or about two-thirds of the original cost. Forty or fifty locomotives and five or six hundred cars are to be sold on the 17th inst., at Alexandria, Va.

☞ We see it stated that the stockholders of the New York and Boston Air Line Railroad have commenced an action to regain possession of the franchise of their road from the hands of the Boston, Hartford and Erie Railway Company, so that they may be enabled to go on with their work as originally intended.

☞ The Lehigh Coal and Navigation Company notify stockholders that, to provide means for extending their railroads and other improvements, it will allow stockholders on the 14th instant, the privilege of subscribing for new stock at par, at the rate of one share for every five shares then standing in their names.

☞ We learn from Havana that an Imperial decree orders the construction of a railroad with mule power, to connect with the Vera Cruz railroad at Puebla. It is to be in operation by next May.

☞ The Comptroller of Tennessee reports the State debt, real and contingent, at $25,000,000, and suggests the repudiation of bonds issued to railroads by Governor Harris, after the passage of the ordinance of seccession.

☞ The official report of the St. Paul, Minn., assessor shows a return of $2,639,000 of personal property in that city for 1865, against $1,520,000 in 1864, and $850,000 in 1863.

☞ The Boston and Maine Railroad Company has rescinded the vote to pay the Portland, Saco and Portsmouth Railroad Company eight per cent. annually in currency instead of six per cent. in gold.

☞ The last Legislature of New Jersey exempted the Morris and Essex Railroad from all taxes until one year after their road is completed to Philipsburg.

☞ The through railroad route from Washington to Lynchburgh, Knoxville, Chattanooga and Atlanta, and thence to Augusta or Montgomery, is now open, and communication perfect.

☞ The earnings of the Philadelphia and Baltimore Railroad for the first seven months of the year 1865 were $2,297,220 05
Do. do. 1864 ..... 1,837,608 29

Gain $459,611 76

☞ Workmen are engaged upon the Root River Railroad, and it is expected that twenty miles of track will be laid this fall.

☞ The bridge on the East Tennessee and Virginia Railroad over the Holston River is completed, thus establishing direct communication between Chattanooga and Washington.

Railroads and Express Business.

A new express company, known as the National Bankers' Express, with a capital stock of ten millions of dollars, has just completed its organization. Among the list of trustees we observe the names of prominent business men in this city, Philadelphia, Boston, Portland, Albany, Buffalo, Syracuse, Rochester, Detroit, Pittsburg, Baltimore, Norfolk, Cleveland, Chicago, Milwaukee, St. Paul, St. Louis, &c.—all of which will secure the enterprise a good degree of local support from the outset. The officers are: Edward B. Judson of Syracuse, President; Thomas B. Fitch, of Syracuse, Vice President; Dudley P. Phelps of this city, Treasurer; Alfred Wilkinson of Syracuse, Secretary; and Charles B. Sedgwick of this city, Attorney.
